

Change in Severe Weather Warning for Genesee County

Effective June 12, 2009

The Genesee County Emergency Management & Homeland Security Office will no longer do Comcast override announcements for severe weather.

Please visit your local television or radio station for local weather updates or go to the National Weather Service Website at: <http://www.nws.noaa.gov> .

We recommend that you purchase a battery backup/programmable National Oceanic and Atmospheric Administration (NOAA) weather radio. These can be programmed for various counties and various alerts to stay informed by the National Weather Service. (These can be purchased from most local electronic stores.)

Tornado sirens will still be activated by the County 911 Center for Tornado WARNINGS in Genesee County. They will also sound for Severe Thunderstorm Warnings if winds exceed 70mph. *(The City of Fenton 911 activates the sirens within the City of Fenton.)*

For more safety information please visit <http://ready.gov> .
