CITY CHARTER
AND
Ordinances of the City of Hudson
Proceedings of the Common Council,
AND
CORPORATION ACCOUNTS FOR 1862.

BRYAN & WEBB, PRINTERS, HUDSON.
The Charter of the City of Hudson

The City of Hudson, New York, is incorporated under the provisions of the General Law of the State of New York, as amended by the General Assembly of the State of New York, passed at Albany, April 10, 1837, and is now in operation.

The Mayor, Council, and Board of Aldermen are the governing body in the City of Hudson, and are elected in the manner prescribed by the State of New York.

The Mayor is the ex-officio President of the Board of Aldermen, and is also the ex-officio President of the Village of Hudson, as defined by the law of the State of New York.

The City of Hudson is divided into two wards, and each ward is represented by two aldermen, elected by the people of the ward.

The City Clerk is the secretary of the City Council, and is elected by the people of the city.

The City Treasurer is the treasurer of the City of Hudson, and is elected by the people of the city.

The City Assessor is the assessor of the city, and is elected by the people of the city.

The City Engineer is the engineer of the City of Hudson, and is elected by the people of the city.

The City Collector is the collector of the city, and is elected by the people of the city.

The City Surveyor is the surveyor of the city, and is elected by the people of the city.

The City Auditor is the auditor of the city, and is elected by the people of the city.
Section 12. Why can't we go any closer to the Moon?

Other than the obvious reason of our current technology being unable to propel a vehicle to the Moon's surface, there are several other significant factors that prevent us from landing on the Moon. One of the major reasons is the Moon's gravitational pull, which is significantly weaker than Earth's. This means that a spacecraft would need a much longer and more complex trajectory to reach the Moon's surface safely.

Additionally, the Moon's surface is covered with a layer of dust and debris that can be extremely hazardous to landing spacecraft. This dust is kicked up by the impact of meteoroids, and it can create a dangerous environment for robotic or astronaut landing missions.

Another consideration is the lack of air and water on the Moon. These are essential resources for human habitation and could be critical to the long-term sustainability of a lunar base.

Lastly, the Moon's environment is much harsher than Earth's, with extreme temperature fluctuations, radiation, and a lack of protecting atmosphere. Any human mission to the Moon would require significant technological advancements to protect astronauts from these harsh conditions.

In summary, while we may be able to get closer to the Moon in the future, landing on its surface will likely remain a significant challenge for some time due to technological, environmental, and logistical limitations.

On the Waterfront Center

This is a test. It is a test, and it is a test.
