Tree Planting Partnership Program

City of Alpena

Tree Planting Partnership Program

Applications

Applications for tree program vouchers will be processed on a first-come, first-served basis, up to available funding. Applications for vouchers are available from the Engineering Department or can be obtained from the Engineering Department page on the City of Alpena web site. The application form, once approved, is the voucher used by the resident to submit for reimbursement.

Program Guidelines

Any residential lot or parcel will be eligible for a maximum of **one** voucher, per program year, for up to 3 trees, **planted between the sidewalk and the curb line of the street.**

Homeowner and condominium associations will be eligible for a maximum of **one** voucher, per program year, for up to 5 trees, **planted adjacent to a public street.** City approval required for location of planting.

If funds are still available after September 30 of each program year, homeowners, condominium associations, and commercial properties may apply for a maximum of 1 additional voucher for planting up to 5 trees, as stated above.

Issuance of the voucher

Once the Engineering Department receives an application and has reviewed and approved the application and proposed tree location a voucher will be sent to the applicant in the mail, if funds are still available. The program participants will also receive a list of approved tree species and planting specifications with the approved voucher. Trees must be purchased after the issuance of the voucher to be eligible for reimbursement.

Purchasing the tree

The resident may select an appropriate street or ornamental tree from a licensed nursery and/or landscape contractor of their choice. The resident shall purchase the tree and coordinate with the nursery and/or landscape contractor for the installation of the tree. The property owner or contractor shall contact MISS DIG, 1-800-482-7171, for utility locations. The minimum size of the tree shall be 2¼ inches in caliper for street trees and 1½ inches in caliper for ornamental trees. The resident must pay for a one year, 100 percent replacement warranty for the tree.

Voucher limitations and reimbursements

The vouchers will be valid from the date of issuance, beginning April 1, until November 15 (planting season) of each program year and vouchers must be returned to the Engineering Department no later than November 30 for reimbursement. The receipt shall indicate size, services, and a note that the warranty is included. Please do not submit the voucher until the tree is planted.

The vouchers will be reimbursed as follows:

- Street Trees (individual lots) will be reimbursed 50 percent of the actual cost of a 2¼ inch caliper street tree (up to a maximum of \$150) from the approved list (with the warranty), whichever is less.
- Ornamental Trees (individual lots) will be reimbursed 50 percent of the actual cost of a 1½ inch caliper ornamental tree (up to a maximum of \$100) from the approved list (with the warranty), whichever is less.

Tree removal expense is not eligible for reimbursement. In order for the resident to receive payment, the vouchers must be completed by the resident, indicating size and species of tree planted, with a copy of the paid receipt attached. The voucher must also be signed by the program participant indicating that the tree has been planted where stated and accepted. Once the voucher has been received by the Engineering Department, an inspection will be conducted to ensure that the tree meets all of the required specifications and has been planted in the proper location(s). A check request will be submitted to the City of Alpena's Finance Department for reimbursement of the approved amount. It will take four to six weeks to receive the reimbursement check.

Warranty

It will be the responsibility of the program participant to maintain the tree and coordinate with the vendor regarding warranty issues.
