

Flowers and Plant Checklist:

Here is a list of the flowers commonly seen on Island Park at any given time of year. They are grouped according to the color of their flowers and the time of year that they bloom.

Feel free to look and smell all the flowers and enjoy nature's bounty at its best, but please don't pick the flowers. Leave them for the next person.

In Your Travels, Please Be Wary of Poison Ivy:

Poison Ivy has white berries and leaves that are reddish when they appear in early spring. Later in spring, the leaves change to green. They turn yellow, red, or orange in autumn. The leaves come in groups of three.

“Leaves of three, let them be”
