City of Alpena

News Release of March 16, 2015

Survey of Neighborhood Income Levels

In order to better qualify for grants and programs to assist with continuing efforts to revitalize Alpena’s downtown area, the City of Alpena will soon be working with Lake Superior State University to conduct a survey of income levels in select neighborhoods. Local researchers from the Community Research Center at Lake Superior State University will be visiting homes in select neighborhoods within the next few weeks to conduct a BRIEF, anonymous survey of the following information:

- Your household size and general income level
  *(questions pertaining to your income are not specific to a dollar amount, but to a general range)*

- Your household’s disability status and whether someone is over 62 years old

- Your household’s ethnicity

This survey is anonymous and LSSU will not share individual information with either the City or the state. The survey requires to collect this general information on the City in order to qualify for most federal and state improvement grants. To do this, we need the participation of all downtown area residents.

Properties within the survey area will receive a mailing from the City notifying them of the survey. Please direct any questions to Adam Poll, Planning and Development Director, at 354-1771 or email him at adamp@alpena.mi.us.
