

How to Download and Take a Speedtest®

With over 50 billion tests taken, Speedtest and Dwnldetector® work together to help you plan, assess, and troubleshoot your internet connections. Here's how to make the Speedtest app your first stop when connecting and staying connected.

What kind of phone do you have?

Android

e.g. Google Pixel, OnePlus, or Samsung

1. Open the Google Play Store (<https://play.google.com/store/apps>)
2. Search Speedtest by Ookla
3. Click Install

iOS

Any iPhone

1. Open the Apple App Store (<https://www.apple.com/app-store/>)
2. Search Speedtest by Ookla
3. Click Get

Once you have the app, run a Speedtest!

GO

1. Open the Speedtest app
2. Click the pulsing GO button
3. Wait approx 25-30 seconds for the test to complete

Understanding your results

- **DOWNLOAD** Mbps - How fast you pull data from the internet to your device
- **UPLOAD** Mbps - How fast you send data to the internet
- **Ping** ms - Latency (or Ping) is the reaction time of your connection—how quickly your device gets a response
 - Yellow 🟡 - **latency while idle**
 - Teal 🟢 - **latency while downloading a lot of information**
 - Purple 🟣 - **latency while uploading heavily**

Click the  icon to save or share your results with a friend or your provider

Create a Speedtest account to save your results history across devices or annotate your results.
