Paving on residential streets will take place from 7:00 a.m. to 6:00 p.m. Allied Paving is the contractor for the project, and they will have a certified flagger in the area to handle traffic control. Use caution while traveling through work zones, and watch for workers.

—MORE—

Please make sure your vehicle is not parked on the street when paving begins, or it will be towed. Also ensure your sprinkler system is not spraying into the road on the days crews are working, if applicable. Expect minor delays as you access your street while crews are at work. Notices will be posted to streets affected. All trash and recycling receptacles out for collection should be placed either in driveways or front yards the evening before pickup to ensure they will not be missed. Do not place yard refuse bags and piles on the street.

All work should begin next week, weather permitting. Also secure any items hanging on walls, especially in the neighborhood areas. After milling and paving occurs, a vibrating machine comes behind these two processes to tamp down these layers, and shaking may be felt in houses. Please secure any fragile items.
