Various recreational facilities in Crystal Lake Park, Urbana.

1 INTRODUCTION

The Urbana Park District offers residents a recreational system that includes 24 parks distributed over 580 acres, 6 facilities, and hundreds of sports, fitness, aquatics, community, and environmental programs. However, there is not a system of trails that connects every park to make them accessible to all residents of the community. With the number of existing parks and flat topography in Urbana, it is important to enable walking and bicycling access for residents of the community to these open spaces. Walking and bicycling contribute to the improved public health and well-being of Urbana's citizens, good air quality, and reduces congestion.

The Urbana Park District's mission is to "improve the quality of life of Urbana's citizens through a responsive, efficient and creative park and recreation system." The mission has several associated strategic objectives, one of them being to "meet the community's priorities for value and environmental ethic by acquiring, providing, maintaining and improving safe, high-quality, accessible parks,

recreation facilities and programs." The same document also focuses on six "big moves" that would help meet the needs of the community and maintain the existing assets of the District, one of them being to "continue with the collaborative development of a trail system including strong connections between present and future Urbana Park District parks, loop trails within parks and linkages with the regional trail system."

The three elements (mission, strategic objectives, and moves) mentioned above define the framework for the development of a Trails Master Plan for the Urbana Park District. This framework will help guide the creation of linkages for existing, proposed, and future trail facilities for walking and bicycling within the community. It will also establish connectivity for walking and biking between Urbana Park District facilities and adjacent attractions and destinations.

The Urbana Park District Trails Master Plan will guide park district decisions on trails within its jurisdiction and will strive to coordinate their efforts with the City of Urbana, those of adjacent open space districts, and adjacent municipalities to create a more integrated, better connected trail system on a regional scale. This plan establishes goals and objectives as well as performance measures that will guide the implementation of proposed recommendations that will further enhance the connectivity of area trails for the enjoyment of area residents and visitors.

EXISTING PLANS AND POLICIES

2.1 STATE LEVEL

Illinois Statewide Comprehensive Outdoor Recreation Plan (IDNR, 2009 and 2014):

The Illinois Department of Natural Resources (IDNR) prepares this report every five years to assess existing facilities, user statistics, future projects and actions, and a five-year implementation schedule citing agency responsibility for projects. It identifies prevalent issues such as accessibility for people with disabilities, linking transportation modes with recreation areas, and interagency coordination. It also helps maintain Illinois' eligibility to participate in the federal Land and Water Conservation Fund (LWCF) program and establish funding goals for the use of State Open Space Land Acquisition and Development grants.

Connection to the Urbana Park District Trails Master Plan:

According to the 2008 Illinois Outdoor Recreation Survey, 85 percent of statewide respondents agree that more trails should be developed (pg. 11). This sentiment was also found to be slightly higher among urban county respondents (including Champaign County) at 87 percent. Walking, hiking, and biking on trails were cited by respondents as some of the most important outdoor activities. Walking and bicycle riding on roads and trails were cited by respondents as the outdoor recreation activities with the most growth potential. The plan lists trails protection, development, and connection (especially linked to natural systems and greenways) as one of the Land and Water Conservation Fund's top priorities.

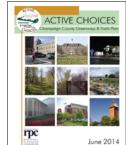

2.2 COUNTY LEVEL

Active Choices: Champaign County Greenways and Trails (GT) Plan (CCRPC, 2014):

This plan is a guiding document for the development of a countywide greenways and trails system for Champaign County residents and visitors. The purpose of this plan is to facilitate interagency cooperation for the development of a regional system of greenways and trails in the County by establishing potential projects, funding mechanisms, and an implementation schedule.

Connection to the Urbana Park District Trails Master Plan:

This document outlines existing trail infrastructure, including bicycle and shared use facilities, on municipal and regional levels. Many future trail facilities are also proposed. Consideration of these proposed features within the Urbana Trails Master Plan will strengthen regional planning efforts by matching relevant strategies for trail development.

Champaign County Greenways and Trails Design Guidelines, Logos & Signage (CCRPC, 2008; amended 2014):

This was created as a stanadlone document in 2008, and incorporated into the Active Choices GT Plan in 2014 (see above). This document is meant to facilitate the development of all non-motorized paths throughout Champaign County. The standardized design guidelines, logos and signage within this document will help create a recognizable, consistent, safe and convenient system of greenways and trails in the County.

Connection to the Urbana Park District Trails Master Plan:

This document is beneficial in creating a unified system of greenways and trails within Champaign County. Signage installed using these design guidelines will help users identify Urbana's municipal trails and links across jurisdictions.

Champaign County Greenways and Trails Funding Sources List

(CCRPC, 2008; amended 2014):

This was created as a stanadlone document in 2008, and incorporated into the Active Choices GT Plan in 2014 (see above). This document outlines potential funding sources to support implementation of Champaign County's regional system of greenways and trails. It includes federal, state, private and non-profit development sources with agency names, websites, funding descriptions, deadlines, and maximum award amounts.

Connection to the Urbana Park District Trails Master Plan:

This document is important for identifying funding sources for the Urbana Park District and City of Urbana to help facilitate the development of trails within their jurisdictions.

2.3 LOCAL LEVEL

Urbana Park District Strategic Plan: Expanding the Legacy (JJR, Pros Consulting, 2007):

The Urbana Park District Strategic Plan has established a strategic vision, mission, priorities, goals, policies, and work plans to guide the next ten years of decision making for the Urbana Park District from 2007-2017. Significant stakeholder and public input, a demographic analysis, an operational review, a needs analysis, a facilities development plan and a strategic action plan supported its development.

Connection to the Urbana Park District Trails Master Plan:

The Urbana Park District Strategic Plan has advocated for the continued and collaborative development of a trail system in Urbana with more loop trails in parks, connections between trails within current and future parks, and linkages to the regional trail system. This plan thus establishes a baseline service level of 3 acres of greenways and trails (corridor parks) per 1,000 people. It also advocates for the continued acquisition of open space to support unique facility guidelines and demonstrates that walking and biking trail facilities are one of the highest needs for Urbana's residents. According to its household survey, people would generally support funding the development of walking/biking and open space facilities with their tax dollars.

Urbana Comprehensive Plan and Update (City of Urbana, 2005; updated 2006):

This plan summarizes historic information, community profiles, growth, development, goals, objectives, and an implementation program for the City of Urbana. The plan captures the community's vision for preserving and enhancing Urbana's unique "small town" character, cultural diversity, economic competitiveness and natural resources.

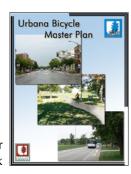

Connection to the Urbana Park District Trails Master Plan:

The Urbana Comprehensive Plan and Update supports the development of trails in the region and promotes links to existing trails through new development, thus connecting Urbana's park system in the process.

Urbana Bicycle Master Plan (CCRPC, 2008; UPDATE 2016):

The Urbana Bicycle Master Plan is a guide for bicycle infrastructure development in the City of Urbana. It defines the bicycle network and recommends strategies to improve it over time. It also includes a comprehensive summary of public input, a system inventory, Bicycle Level of Service analysis, facility recommendations, cost estimates, and implementation strategies. The Champaign County Regional Planning Commission is updating the Urbana Bicycle Master Plan in conjuction with the development of the Urbana Park District Trails Master Plan.

Connection to the Urbana Park District Trails Master Plan:

This plan leverages efforts from the 2004 Champaign County Greenways and Trails Plan by addressing the potential for implementing recommended bicycle facility improvements in Urbana. The document presents existing and proposed (future) bicycle and shared use facilities at the municipal level in Urbana while identifying opportunities for regional connectivity. Consideration of these facilities within the Urbana Trails Master Plan will strengthen local and regional planning efforts by matching relevant strategies for trail development between Urbana Park District facilities.

Boneyard Creek Master Plan (HNTB, 2008):

The Boneyard Creek Master Plan outlines recommendations to improve recreational opportunities near the Boneyard Creek in the City of Urbana. The plan recommends several strategies for improving pedestrian and bicycle connectivity between downtown and the surrounding neighborhoods through the greening of the Creek.

Connection to the Urbana Park District Trails Master Plan:

The plan focuses primarily on the stretch of the Boneyard Creek that runs from Main Street to Maple Street and directly intersects with Patterson Parklet while presenting connection opportunities within less than a quarter mile of Phillips Recreation Center, Leal Park, Crystal Lake Park, Chief Shemauger Park, and the Hickory Street Site. The Plan also suggests future greenway extensions connecting the University of Illinois to the west and Saline Branch to the east.

University Avenue Corridor Study (CCRPC, 2010):

The University Avenue Corridor Study examined current and future land use, zoning, redevelopment, and transportation conditions along the University Avenue corridor between Downtown Champaign and Downtown Urbana. The study established baseline goals for the corridor to promote orderly, attractive redevelopment; develop higher density multimodal nodes; maximize the transportation

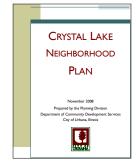

system's safety and efficiency; and enhance bicycle and pedestrian facilities.

Connection to the Urbana Park District Trails Master Plan:

This plan outlines specific opportunities and challenges presented by the University Avenue corridor. Relevant topics to Urbana Park District parks include the Boneyard Creek Master Plan, the Norfolk Southern Railroad, Carle medical campus, pedestrian and bicycle facilities, and Level of Service (LOS) at the University Avenue intersections of Cunningham Avenue, Broadway Avenue, and Race Street. General pedestrian and bicycle infrastructure recommendations include signed bike routes, shared-use paths, on-street bike lanes and a Rails-to-Trails pathway in areas parallel to and intersecting University Avenue.

Crystal Lake Neighborhood Plan (City of Urbana, 2008):

The Crystal Lake Neighborhood Plan serves as a guiding document for future land uses and improvements in the Crystal Lake Park area of Urbana. One trend identified from public input and technical analysis is a desire for connectivity to Downtown and other uses. Nineteen goals were developed, as well as implementation strategies for land use & development, housing, and mobility.

Connection to the Urbana Park District Trails Master Plan:

Plan recommendations include a shared-use path around Crystal Lake Park and Busey Woods, linking Crystal Lake and Leal Parks, preserving residential access to Crystal Lake Park, and long term integration of homes and properties on Franklin Street into Crystal Lake Park. This plan also cites the 2007 Crystal Lake Park Master Plan, which calls for improving the visibility of the park through connections to neighborhoods and Downtown.

2012 Downtown Urbana Plan (City of Urbana, 2012):

The 2012 Downtown Urbana Plan expands on downtown Urbana's strengths and guides future growth to match the community's needs. The plan outlines seven key goals for downtown: strengthen economic activity; promote urbanstyle infill development; increase vitality by attracting more residents and visitors; develop engaging public spaces and streetscapes; improve mobility; protect and enhance character; and reduce environmental impacts.

Connection to the Urbana Park District Trails Master Plan:

The plan advocates developing public open spaces and streetscapes and improving mobility in downtown. Specifically, the plan references the Boneyard Creek Improvement Project as a way to create an attractive green space connected to pedestrian and bicycle infrastructure to enhance multimodal transportation capabilities. Furthermore, the rail line to the north of downtown is seen as a way to enhance local and regional transportation. Wayfinding signage is also planned for downtown to direct pedestrians and bicyclists to various destinations. Urbana Park District facilities that will benefit from enhanced trail connectivity as an indirect result of these developments include: Phillips Recreation Center, Patterson Parklet, Leal Park, Hickory Street Site, Judge Webber Park, Victory Park, and Crystal Lake Park.

2.4 CONTIGUOUS PLANNING AREAS

Champaign Trails Plan

(City of Champaign, Champaign Park District, 2011):

The Champaign Trails Plan has responded to residents' expressed desire for more trails throughout Champaign during recent surveys. The document provides a vision for a well-connected trail system in Champaign with recommendations for locations, design standards, and funding. This plan was a joint effort between the City of Champaign and the Champaign Park District.

Connection to the Urbana Park District Trails Master Plan:

This plan identifies opportunities for regional trail connectivity between Champaign and Urbana. Relevant trail links outlined in the plan include the Boneyard Greenway, Wabash Rail Trail, and Olympian Drive Multi-Use Trail. These recommendations include extending trails from Champaign to trail infrastructure and destinations within the Urbana Park District.

Champaign Park District Comprehensive Park and Open Space Plan (Pros Consulting, 2008):

The Champaign Park District Comprehensive Park and Open Space Plan is a guiding document for the future development of parks and open space in the Champaign Park District. It includes a park and facility inventory, a financial analysis of facilities and programs, community collaboration opportunities, capital improvement plans, and future development plans.

Connection to the Urbana Park District Trails Master Plan:

A top priority in the plan is the expanding the Champaign trail system by 2.6 miles each year for ten years for pedestrian and bicycle use. For this purpose, the plan recommends developing connections between existing trails (including linkages with Urbana specified within the Champaign Trails Plan) and greenway corridors to enhance accessibility, convenience and public health.

Champaign Park District Trails Master Plan (CCRPC, 2016):

The Champaign Park District has contracted with the Champaign County Regional Planning Commission to develop a trails master plan for its jurisdiction in 2015-16.

Connection to the Urbana Park District Trails Master Plan:

This upcoming planning process, combined with regional coordination efforts involved with the Champaign County Greenways & Trails Plan implementation process, will provide the Urbana Park District and Champaign Park District the opportunity to develop trails that connect between their jursidictions, possibly creating a regional loop trail or extending the Kickapoo Rail Trail.

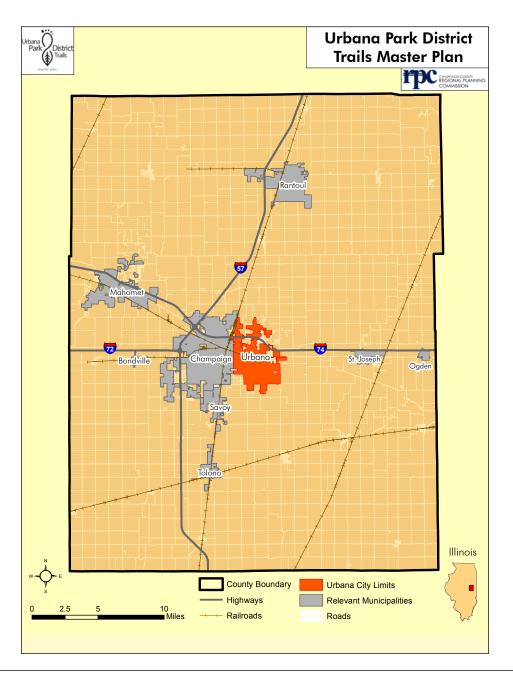

EXISTING CONDITIONS ANALYSIS

3.1 POPULATION AND SOCIOECONOMIC CONDITIONS

3.1.1 REGIONAL CONTEXT AND OVERVIEW

The City of Urbana, located in east-central Illinois, is the second most populous and second largest municipality in Champaign County. As of 2010, Urbana had a population of 41,250 and currently covers nearly 12 square miles. The city is located approximately 135 miles south of Chicago, Illinois, 120 miles west of Indianapolis, Indiana, and 180 miles northeast of Saint Louis, Missouri (see Figure 1).

Figure 1 City of Urbana and the surrounding region Relevant municipalities include those located within the Champaign-Urbana Metropolitan Planning Area (Urbana, Champaign, Savoy, Bondville, Tolono, and Mahomet) and Rantoul (population 12,941 - 2010 U.S. Census), St. Joseph (population 3,967 - 2010 U.S. Census), and Ogden (population 810 - 2010 U.S. Census)

3.2 GENERAL POPULATION CHARACTERISTICS

According to the U.S. Decennial Census, Champaign County, Illinois had a population of 201,081 people in 2010. 41,250 of these residents reside within Urbana, consisting of 16,961 households and an average household size of just over 2 persons.

3.2.1 AGE

The 2010 Census shows that the largest group of Urbana residents is between 20 and 29 years of age (see Figure 2). This category includes students at the University of Illinois at Urbana-Champaign, who are a transient population centered around campus in West Urbana. There are more males in the age groups from 0 to 9 and 20 to 39 years of age and more females in the age groups from 10 to 19 and over 40 years of age.

This demographic emphasizes the importance of planning for Urbana's large student population when considering future development of park facilities.

3.2.2 RACE AND ETHNICITY

The City of Urbana maintains a diverse population. While the majority (63 percent) of the city's population is white, Asians and African Americans account for the second and third largest racial groups, each representing 17 percent of the overall population respectively (see Figure 3). Residents identifying as Native American, Hawaiian or Pacific Islander, "other," or two or more races collectively accounted for 3 percent of Urbana's inhabitants. Both Champaign County and Urbana show similar trends in Hispanic versus Non-Hispanic populations, which are 6 and 94 percent, respectively.

Urbana's cultural and ethnic diversity represents an opportunity to develop an appreciation for the variety of recreational preferences and styles associated with different racial and ethnic groups, build new alliances within varied communities, and incorporate themes that reflect the diversity of the cultures represented in the population.

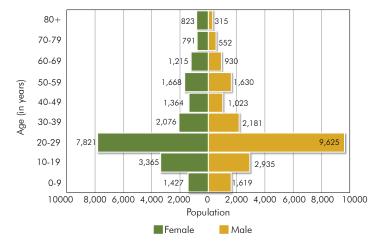

Figure 2 Urbana population by age, 2010 Decennial Census

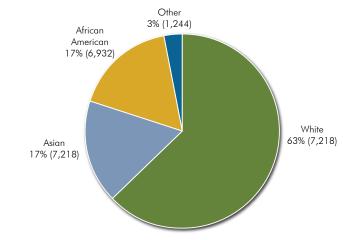

Figure 3 Urbana population by race, 2010 Decennial Census

13

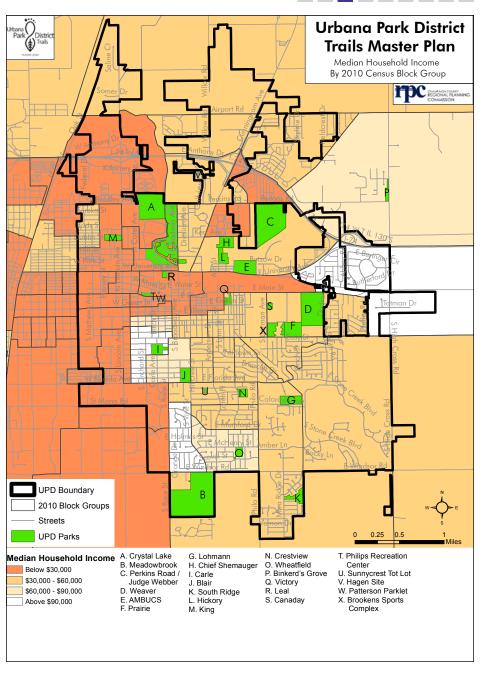

3.3 SOCIO-ECONOMIC CONDITIONS

2010 decennial census data was used to identify median household income by block groups within the Urbana municipal area. Household income is one factor used to identify trail development and services to residents based upon traditional representation and propensity to utilize facilities. For instance, neighborhoods with lower income levels are traditionally underrepresented by access to trail systems but also hold abundant potential for usage due to high demands for a variety of transportation options and increased connectivity to surrounding areas.¹

As shown in Figure 4, the majority of low income block groups are found within the western portion of the Urbana Park District and are served primarily by King Park, Crystal Lake Park, Leal Park, and Phillips Recreation Center. Other low income pockets are located to the north and center of the Park District and are situated contiguously to Judge Webber Park, Chief Shemauger Park, Victory Park, and Weaver Park.

Figure 4 Median Household Income - Urbana, Illinois (2010 U.S. Decennial Census). Low income block groups are found within the western portion of the Urbana Park District with additional pockets to the north and center.

Lindsey, Greg, et al. 2004. Access, Equity, and Urban Greenways: An Exploratory Investigation. Professional Geographer. Volume 53, Issue 3, pages 332-346.

3.4 EXISTING PARKS AND OPEN SPACES

3.4.1 URBANA PARKS CLASSIFICATION

The Urbana Park District maintains an array of 24 unique parks and open spaces, along with facilities within these parks, that have been classified according to their respective uses within surrounding neighborhoods and communities. These classifications, initially developed within the Urbana Park District Strategic Plan, serve to provide guidelines for design, development, maintenance and operations of parks. Relevant to promoting a unified trail system, park classifications determine how individual parks are generally intended to serve and interact with the surrounding area. The following relevant categories are described below: Signature, Community, and Neighborhood, Special Use Facility, and Natural Area.

SIGNATURE PARKS

Signature parks are large park facilities that serve Urbana's entire population and beyond. Suitable sizes range from 50 acres and larger, and they are designed for four or more hours length of stay. Signature parks will include a defined natural area (see "Natural Areas" below) and a variety of park features with which trails interact such as sports fields and complexes, playgrounds, water activities, swimming, picnicking, and indoor recreation and special use facilities (see "Special Use Facilities" below).

Table 1 Signature Parks

Signature Parks	Area (acres)
Crystal Lake	144
Meadowbrook	130
Perkins Road / Judge Webber	84
Weaver	60

COMMUNITY PARKS

Community parks are larger than neighborhood parks and serve several neighborhoods. Suitable sizes range from 20 to 50 acres and have a service area up to 2 miles in radius. Length of stay is two to three hours. The community park may include areas for intense recreation activity such as competitive sports, swimming, tennis, playgrounds, volleyball, etc. There may also be passive recreation opportunities such as walking, viewing, sitting and picnicking with small to medium sized shelters, drinking fountains, benches, etc. Locations for indoor recreation facilities and special use facilities are also included in community parks. Lighting, parking and restrooms are provided. Community parks can also serve a secondary function as a neighborhood park for the surrounding area.

Table 2 Community Parks

Community Parks	Area (acres)
AMBUCS	22
Prairie	20
Brookens Sports Complex	11.5
Canaday	3

NEIGHBORHOOD PARKS

Neighborhood parks serve a variety of age groups within a limited area or "neighborhood." Suitable sizes for future park development range from 10 to 20 acres, depending on available land, with a service area of a half-mile radius, a 15 minute walk, and approximately 5,000 persons. Length of stay is one hour or less. The neighborhood park is an area for active recreation such as practice field games, court games, playgrounds and passive recreation such as walking, picnicking, viewing, etc. Facilities are unlighted (except for security lighting), and there is limited or no parking or restrooms.

Table 3 Neighborhood Parks

Neighborhood Parks	Area (acres)
Lohmann	15
Chief Shemauger	13
Blair	11
Carle	11
South Ridge	11
King	8
Crestview	6
Larson (formerly Wheatfield)	5
Victory	5

Neighborhood parks, such as Carle Park (shown above), are the most common park type in the Urbana Park District.

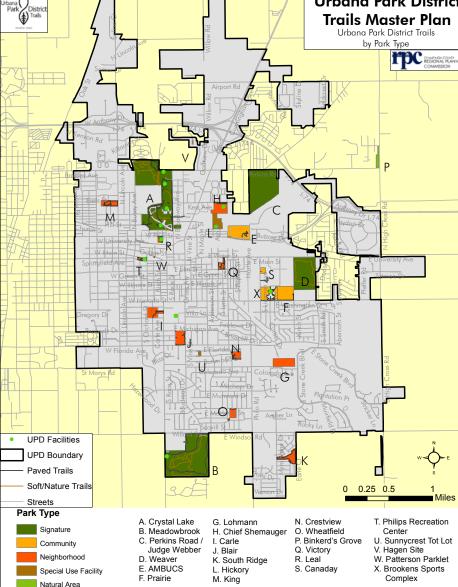

Figure 5 Urbana Park Type Map

Neighborhood parks are Urbana's most ubiquitous park type, while most Community parks are located to the east and Signature parks to the north and south. Additionally, Crystal Lake Park contains the most UPD facilities of any single park with four, with all others containing either one or zero.

SPECIAL USE FACILITIES

Special use facilities are for concentrated recreation activities. These may include areas such as recreation and community centers, senior centers, and other open spaces. There are no specific standards for size or acreage, although all of Urbana Park District's current special use facility open spaces are 10 acres or less.

Table 4 Special Use Facility Open Spaces

Special Use Facilities	Area (acres)
Hickory Street Site	10
Leal	3
Phillips Recreation Center	2.4
Hagan Site	1
Sunnycrest Tot Lot	1
Patterson Parklet	Less than 0.5

Table 5 lists the special use facilities within Urbana parks.

Table 5 Special Use Facilities within Parks

Special Use Facilities	Park
Planning and Operations facility	Chief Shemauger
901 N. Broadway Ave.	Crystal Lake
Anita Purves Nature Center	Crystal Lake
Family Aqautic Center	Crystal Lake
Lake House	Crystal Lake
Phebus Administration Building	Leal
2808 S. Race St., private residence	Meadowbrook
Meadowbrook Interpretive Facility	Meadowbrook
Dog Park	Perkins Road Site

Table 6 lists the special use facility outside of an Urbana park.

Table 6 Special Use Facility outside of a park

Special Use Facility	Address
Urbana Indoor Aquatic Center	102 E. Michigan Ave.

NATURAL AREAS

Natural areas can be stand-alone open spaces or within another park type and offer significant ecological function or structure. Generally these are high quality, undisturbed areas which include remnant natural areas and/or have overall restoration potential. Recreation use is limited to passive recreation such as wildlife and habitat viewing. Suitable size and acreage must be sufficient to protect the resource and provide for appropriate usage and buffering to minimize potential off-site impacts.

Table 7 Natural Area, stand-alone

Natural Area	Area (acres)
Binkerd's Grove	4

Table 8 Natural Areas within Parks

Natural Area					
Busey Woods, Crystal Lake Park					
Meadowbrook Park					
Perkins Road Park Site					
Weaver Park					

See **Figure 5** for parks' spatial distribution within the Urbana Park District's jurisdiction.

3.4.2 URBANA PARK OWNERSHIP

The Urbana Park District leases four open spaces from the Urbana-Champaign Sanitary District (UCSD): AMBUCS Park, the Hickory Street Site, Patterson Parklet, and the Perkins Road Park Site.

3.5 EXISTING TRAILS INVENTORY

The Urbana Park District manages a total of approximately 16 miles of trails split between roughly 11 miles of paved trails distributed in 18 parks, and about five miles of soft trails found within five parks: Crystal Lake Park, Meadowbrook Park, Weaver Park, Carle Park, and AMBUCS Park. Dogs and bicyclists are restricted from using soft trails and the Busey Woods Boardwalk. Furthermore, Crystal Lake Park and Meadowbrook Park collectively contain more than half of all trails (see Table 9).

For the purposes of this plan, a **trail** is defined as any paved or natural surface pathway on land owned or leased by the Urbana Park District. However, not all paved trails in **Table 9** meet the minimum recommended width of 8 feet. This recommendation comes from the Champaign County Greenways & Trails Design Guidelines (2014) and AASHTO *Guide for the Development of Bicycle Facilities* (2012). The same documents recommend an ideal width for all paved, shared-use trails to be at least 10 feet, in order to facilitate bi-directional and multi-modal traffic. This plan will recommend new paved trails to be at least 8 feet wide, and existing trails to be widened to at least 8 feet wide when possible, unless it is intended to be predominately a pedestrian trail.

3.6 BICYCLE COUNTS

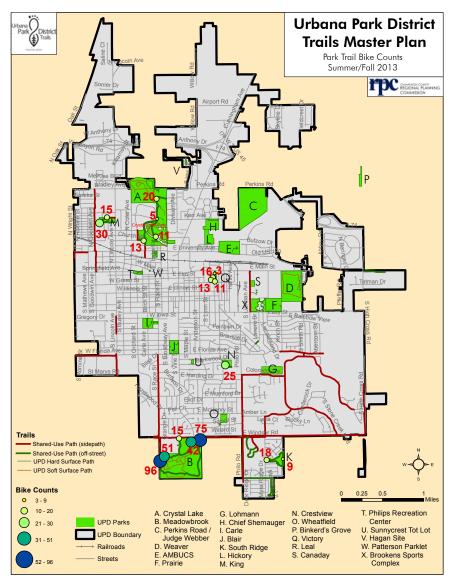

24-hour bike counts were recorded at 18 UPD park locations and 26 shared use and bicycle trail facilities located outside of UPD parks but within the Urbana Park District (see Figures 6 & 7). Counts occurred through the summer and fall seasons of 2013 to obtain data regarding bicycle traffic volumes along specific locations and corridors throughout Urbana.

Meadowbrook Park recorded the highest counts of any UPD park with 96 cyclists counted at a western location and 75 in the northern portion of the park over a 24-hour period. Crystal Lake Park, King Park, and Crestview Park comprised the second most-frequented parks group with a peak of 20 to 30 bicyclists at any given count location. Non-park trail corridors that recorded high volumes of bicycle travel included Race Street, University Avenue, Goodwin Avenue, Florida Avenue, and Philo Road with peak counts of 50 to 80 cyclists per day.

Daul, Nama	Trail Type (miles)

3.7 CRYSTAL LAKE PARK VISITOR COUNTS

In Summer 2015, the Urbana Park District contracted with CCRPC to conduct visitor counts at Crystal Lake Park. This same study was done in 2007, but with the opening of the reconstructed Crystal Lake Park Family Aquatic Center in 2013, UPD wanted updated information on how many people are visiting Crystal Lake Park, where they are entering the park, and what mode they are using.

Table 10 shows the number of people walking, biking, and driving to Crystal Lake Park on a typical weekday and weekend day. Figure 8 shows the count locations listed in **Table 10**. More information can be found in Appendix A.

The majority of Crystal Lake Park visitors entered near the Aquatic Center off of Broadway Avenue. The second highest number of park visitors entered the south side of the park at Central Avenue and Park Street. This was the case for all modes and all count days. Most visitors arrived at Crystal Lake Park by car, followed by walking, then bicycling.

	Mo							
Count Location	Walking	Walking Bicycling		Total				
	Week	day (Thursday)						
Location 1	1,414							
Location 2	26	15	325	366				
Location 3	35	16	110	161				
Location 4	85	12	455	552				
Location V1	102	20	-	120				
Location V2	64	20	-	84				
Total	339	95	2,143	2,577				
Weekend (Saturday)

Total	244	60	2,007	2,311				

Table 10 Crystal Lake Park Visitor Counts 2015

Figure 8 Crystal Lake Park Visitor Count Locations 2015

3.8 SAFETY: PEDESTRIAN AND BIKE CRASHES NEAR PARK FACILITIES

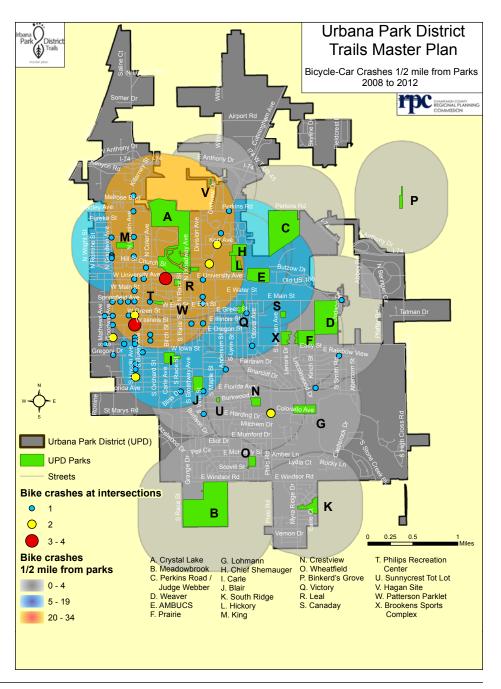

Bicycle and pedestrian crashes were assessed over a five year period from 2008 to 2012, with a total of 85 bicycle crashes and 101 pedestrian crashes occurring in Urbana. Bicycle and pedestrian crashes were calculated within a buffered biking and walking distance from each park (assumed to be a half and quarter of a mile respectively). High crash bicyclists and pedestrians locations nearby parks were considered to be 21 to 34 and 10 to 14, respectively. Figures 9 and 10 display bicycle and pedestrian crash zones by frequency over the observed five year time frame.

In general, crash points tended to cluster around the University of Illinois and downtown Urbana between 2008 and 2012. More specifically, the corridors of Lincoln Avenue, Cunningham Avenue, and University Avenue experienced a higher amount of crashes. While these locations may generally represent areas containing more difficult crossings, they also reveal areas of relatively high bicyclist and pedestrian usage.

Figure 9 Urbana bicycle crash locations (85 total) within a 5 year period from 2008 to 2012.

Buffers indicate a half-mile cycling distance from each park and are tiled from highest crash category (21 to 34) to lowest (0 to 10) over the 5 year time frame.

² Champaign-Urbana Urbanized Transportation Study (CUUATS). 2012. Active Choices: Champaign County Greenways & Trails Plan Needs Assessment. Page 14.

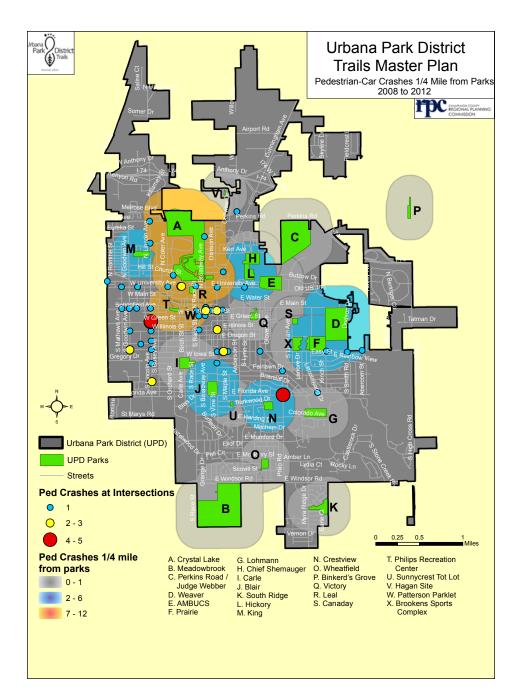

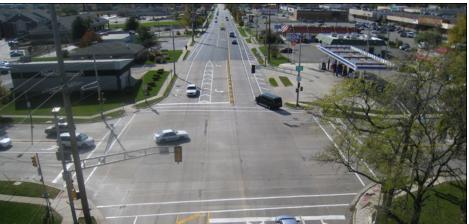

Relatively more pedestrian crashes occur at key intersections, such as Lincoln Avenue & Green Street (see top) and Philo Road & Florida Avenue (see above).

Figure 10 Urbana pedestrian crash locations (101 total) within a 5 year period from 2008 to 2012.

Buffers indicate a quarter-mile walking distance from each park and are tiled from highest crash category (10 to 14) to lowest (0 to 4) over the 5 year time frame.

3.9 ACCESS TO TRANSIT

Existing bus routes as of Fall 2013 for the Champaign-Urbana Mass Transit District (CUMTD) were inventoried, and designated bus stops within a quarter-mile walking distance from each park were counted (see Tables 11 & 12). Table 11 shows park ranking by number of designated stops. Figure 11 displays each park relative to its overall connectivity to the transit network.

The Crystal Lake Park area contained the most designated bus stops with 72. In comparison, Crestview Park had the second most stops with 52 (20 less) followed by Victory Park, Blair Park, Prairie Park, and King Park, containing between 40 and 50 stops.

With regard to bus routes, the Patterson Parklet and Leal Park areas were in closest proximity to the most bus routes within a quarter-mile walking distance with 8 and 7 respectively. Crystal Lake Park, Blair Park, and Phillips Recreation Center followed with 4 to 5 routes.

Park Name	Number of Stops within 1/4 Mile
Crystal Lake	72

4 PARK INVENTORY AND TRAIL "GAP" ANALYSIS

In producing a comprehensive existing conditions analysis, existing park and trail facilities were inventoried in all Urbana Park District parks (see Table 13). These included:

- Benches
- Bike Parking Locations
- Drinking Fountains
- Lighting
- Maps
- Mile Markers
- Trail Signs
- Waste Receptacles

Waste receptacles and benches were the most common park facilities, found at 19 and 18 park locations respectively. Additionally, lighting (283) and benches (129) were the most abundant per individual unit.

To accompany these facilities, park acreage, location, type, and unique amenities were also inventoried and listed.

Туре	Park Name	Acres	Benches	Bike Racks	Drinking Fountain	Lighting	Мар	Mile Marker	Trail Sign	Waste Receptacles
	Crystal Lake	144	19	4	3	95	1	0	15	32

Table 13 Urbana Park District trail facilities by park. Inventoried Summer 2013, Updated 2015.

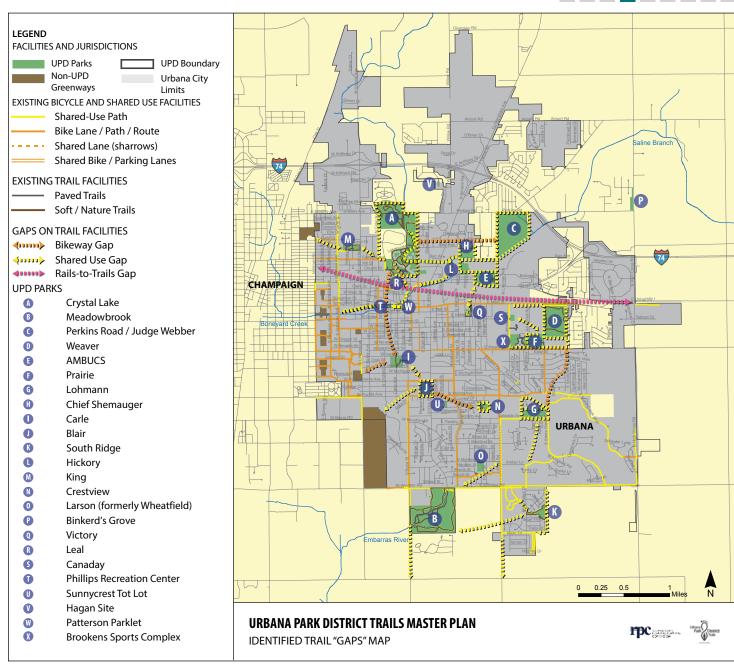

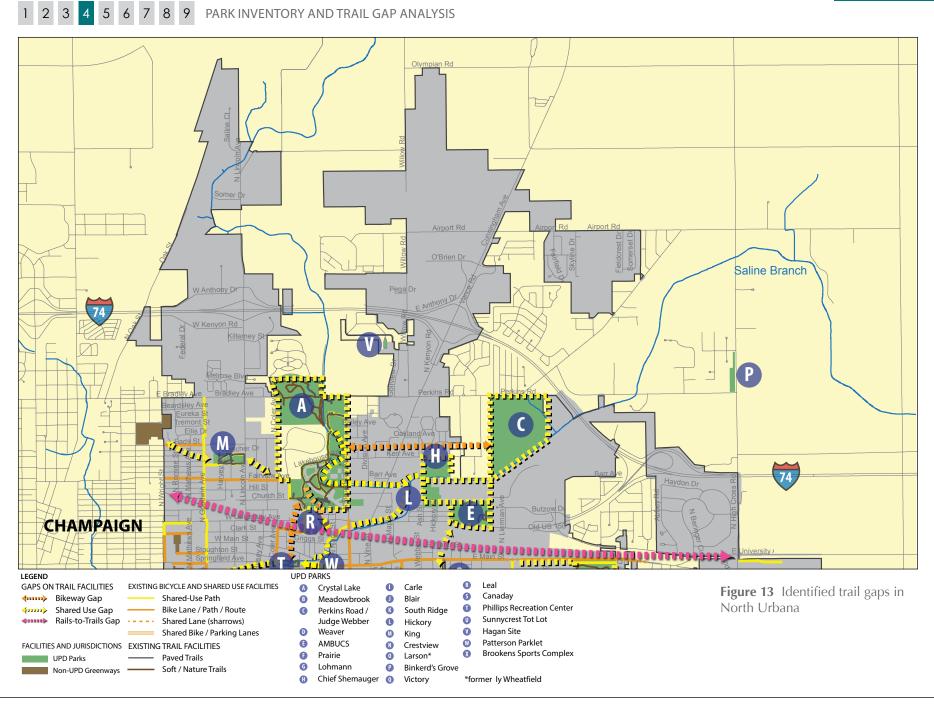

Gaps in the trail network were assessed at the individual park level based upon both walking and biking distance (assumed to be a quarterand half-mile respectively) to other UPD facilities (see Figure 12).3

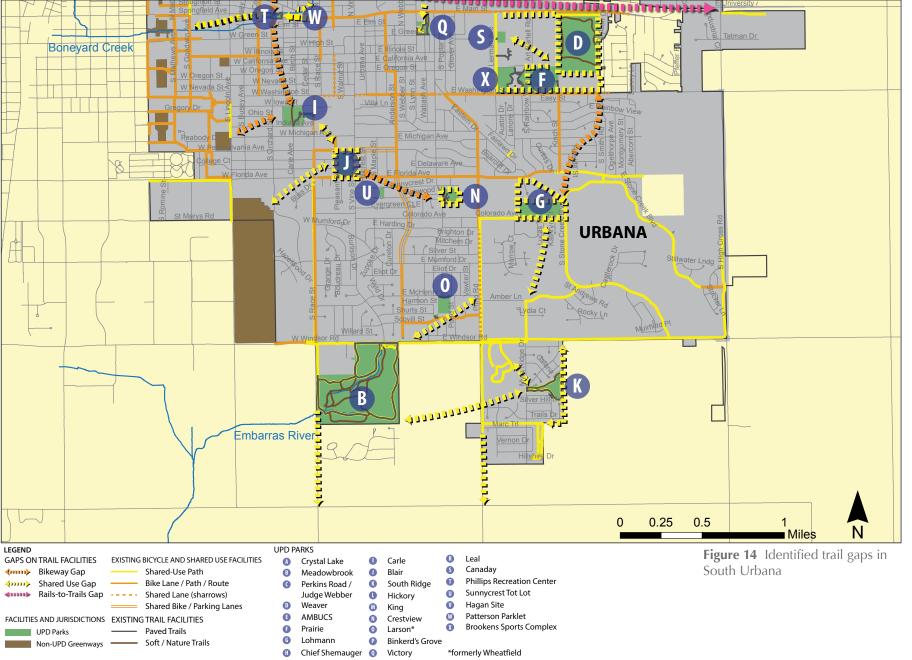

From there, opportunities and constraints for each mode were identified and elaborated upon relative to potential for future enhancement of local and regional trail networks.

Active Choices: Champaign County Greenways & Trails Plan Needs Assessment. December, 2012. Page 14. Champaign County Regional Planning Commission.

4.1 CRYSTAL LAKE PARK

AreaLocationType144 acresPark Street and Broadway AvenueSignature

KEY ELEMENTS

- Benches (19)
- Bike Parking Locations (4)
- Drinking Fountains (3)
- Lighting (95)
- Map (1)
- Trail Signs (15)
- Trash Cans (32)
- Paved Trails (3.12 miles)
- Soft Trails (2.11 miles)

AMENITIES

- Crystal Lake
- Busey Woods (59 acres)
- Anita Purves Nature Center
- Crystal Lake Family Aquatic Center
- Recreational Facilities
- Open Space
- Parking
- Restrooms
- Playgrounds
- Pavilion

Proximity to Neighborhoods, Parks, and Destinations: Crystal Lake Park is accessible to many nearby residential neighborhoods, with King Park located within walking distance from the park's western edge. Likewise, bicycle path opportunities to the south and east can benefit cyclists traveling from slightly further distances such as downtown Urbana and eastern neighborhoods.

Greenway Opportunities: Trail development along the Saline Branch would connect Crystal Lake Park with Chief Shemauger Park and the Hickory Street Site and ultimately Perkins Road / Judge Webber Park. This will provide a paved, off-road path leading from a river walk at Crystal Lake to other parks and areas of northeastern Urbana. This path also poses a connection with greenway development and adjacent areas along the Boneyard Creek.

Rail Trail Opportunity: The Norfolk Southern rail line has the potential to be both a local and regional amenity, bringing visitors from further away to Crystal Lake Park while offering a connection to Leal Park as well as other Urbana Park District areas situated along the Boneyard Creek including Phillips Recreation Center, Patterson Parklet, and Chief Shemauger Park.

Loop Trail Opportunity: The park road looping around Crystal Lake Park could be converted to one way vehicle traffic entering at Park Street, proceeding from south to north, and exiting at Broadway Avenue. The inside land could be converted to bicycle and pedestrian use. The road path system would tie into proposed sidepaths on Broadway Avenue and Park Street to create a large loop path system.

CONSTRAINTS

Crossing University Avenue and Cunningham Avenue: Crystal Lake Park is close to Cunningham Avenue (US 45) to the east and University Avenue (US 45/150) to the south, presenting difficult crossings to and from the park for visitors. All options for a safe crossing should be considered to ensure an adequate connection for pedestrians and cyclists to this area.

Limited Northern Access: Lack of sidewalks, bikeways, and trails, as well as the Urbana Country Club prevent access to Crystal Lake Park from neighborhoods north and northeast of the park.

Left: Wildlife and habitat near Crystal Lake.

Right: Pedestrian bridge crossing Crystal Lake.

4.2 MEADOWBROOK PARK

AreaLocationType130 acresWindsor Road and Race StreetSignature

KEY ELEMENTS

- Benches (33)
- Bike Parking Locations (3)
- Drinking Fountains (2)
- Lighting (28)
- Map (5)
- Mile Markers (18)
 - ins (2) Trail Signs (19)
- Trash Cans (5)
- Paved Trails (2.22 miles)
- Soft Trails (1.74 miles)

AMENITIES

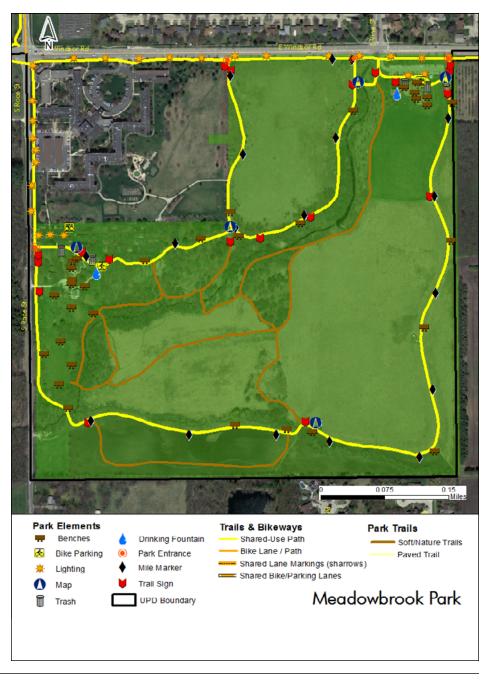

- Gardens
- Open Space
- Natural Areas
- Parking
- Pavilions
- Playgrounds
- Restrooms
- Sculptures / Art

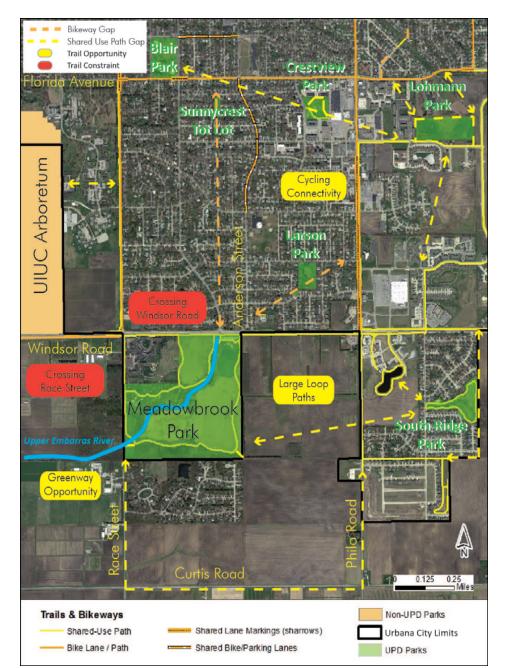

Paved trail with bicycle parking near Meadowbrook Park's western entrance.

Upper Embarras River on the north side of Meadowbrook Park.

OPPORTUNITIES

Cycling Connectivity: Meadowbrook Park is located within cycling distance from many parks (including Blair, Sunnycrest, Crestview, Lohmann, Larson, and South Ridge) and residential neighborhoods to the north and east. Likewise, existing bike infrastructure along Race Street, Anderson Street, Philo Road, and Windsor Road offers substantial opportunities for connecting park facilities.

Greenway Opportunity: Trail and natural area development along the Upper Embarras River downstream of Meadowbrook Park would provide a regional connection between Meadowbrook Park and residential areas in Savoy, as well as the University of Illinois South Research Park and Mattis Park area of southern Champaign.

Large Loop Paths: Abundant open space to the south and east of Meadowbrook Park provides opportunities for the creation of loop trails between South Ridge Park as well as to the south of Meadowbrook Park on Race Street, Curtis Road and Philo Road. These trails would offer visitors a larger variety of destination options and trail links throughout southern Urbana.

CONSTRAINTS

Crossing Race Street and Windsor Road:

Meadowbrook Park is bordered to the west by Race Street and to the north by Windsor Road, presenting difficult crossing areas for visitors on foot and bike. Options for safe crossings should be considered to ensure adequate connections for pedestrians and cyclists to this area.

Soft trail in the southeast corner of Meadowbrook Park leading away from the Prairie Path; potential trail connection to South Ridge Park.

4.3 PERKINS ROAD / JUDGE WEBBER PARK

AreaLocationType84 acresPerkins Road and Eastern AvenueSignature

KEY ELEMENTS

- Benches (11)
- Drinking Fountain (1)
- Trail Signs (4)
- Trash Cans (3)

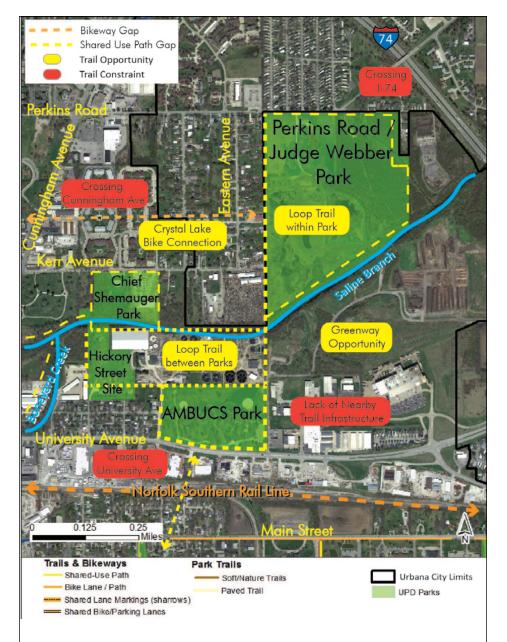

AMENITIES

- Urbana Dog Park
- Parking
- Archery (private)

Prairie habitat, Perkins Road/Judge Webber Park.

OPPORTUNITIES

Crystal Lake Bike Connection: Perkins Road/Judge Webber Park is located within cycling distance from Crystal Lake Park. Both Kerr Avenue and the Saline Branch offer potential links to connect these two signature parks.

Greenway Opportunity: Trail and natural area development along the Saline Branch will connect Perkins Road/Judge Webber Park with several UPD facilities including Crystal Lake Park, Chief Shemauger Park, and the Hickory Street Site as well as producing a regional connection to the west.

Loop Trail Between Parks: Walking and biking juxtaposition and proximity to Chief Shemauger Park, AMBUCS Park, and the Hickory Street Site provide an opportunity for the creation of a shared use loop trail between these areas.

Loop Trail Within Park: Developing loop trails within Perkins Road/Judge Webber Park will allow visitors to experience an array of natural areas including the Saline Branch, restored prairie, and woodlands while increasing opportunities for trail linkages to nearby parks.

CONSTRAINTS

Lack of Nearby Trail Infrastructure: The Perkins Road/Judge Webber Park area does not currently contain any designated bicycle or shared use trails. Connecting to the park by walking and biking using Perkins Road is a particular problem due to the lack of pedestrian and bike facilities on this roadway.

Crossing University Avenue, Cunningham Avenue, and I-74: Perkins Road/Judge Webber Park is bordered on nearly all sides by major roads or other land uses that present a difficult crossing for visitors. All options to create safe and accessible crossing locations should be considered to ensure an adequate connection for pedestrians and cyclists to this area.

4.4 WEAVER PARK

AreaLocationType60 acresMain Street and Smith RoadSignature

KEY ELEMENTS

- Benches (2)
- Bike Parking Location (1)
- Trail Signs (3)
- Paved Trails (0.24 miles)
- Soft Trails (0.95 miles)

AMENITIES

- Natural Areas
- Open Space

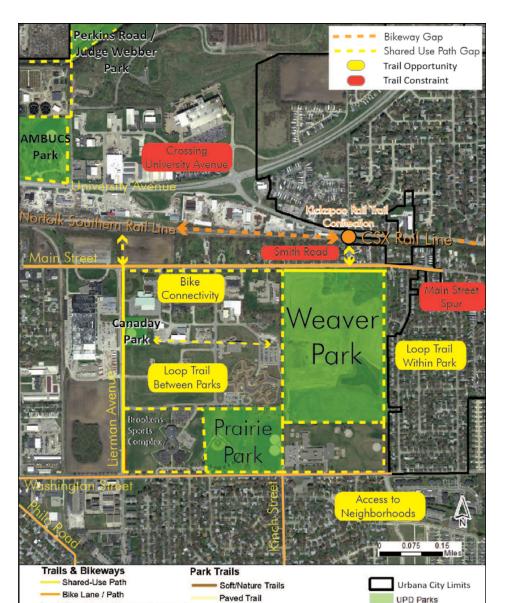

Weaver Park entrance.

Weaver Park open space.

OPPORTUNITIES

Bike Connectivity: Victory Park is located within cycling distance from Weaver Park to the west. Both Main Street and a future trail along the Norfolk Southern rail line offer potential links to connect these two parks. Furthermore, Weaver Park is connected to existing bicycle infrastructure to the south via Washington Street and Kinch Street (connecting to Lohmann Park).

Kickapoo Rail Trail Connection: The Kickapoo Rail Trail is proposed to begin just north of Weaver Park. A potential trailhead in the Weaver Park area would serve a 24.5 mile regional connection between east Urbana and Kickapoo State Park near Danville, Illinois, with several other destinations along the way.

Loop Trail Between Parks: Walking and biking juxtaposition and proximity between Weaver Park, Prairie Park, Canaday Park, and the Brookens Sports Complex provide an opportunity for the creation of an accessible, shared use loop trail between these areas.

Loop Trail Within Park: Developing loop trails within Weaver Park will allow visitors to experience open space and natural areas while increasing opportunities for trail linkages to nearby parks and neighborhoods.

CONSTRAINTS

Crossing University Avenue: University Avenue is located close to Weaver Park to the northwest, presenting a difficult crossing for some visitors. All options to create safe and accessible crossing locations should be considered to ensure an adequate connection for pedestrians and cyclists in this area.

Smith Road: Due to the short distance on Smith Road between the southbound stop at Main Street and stoplight at University Avenue, vehicles queue on this street segment. There is also limited right-of-way to create a sidepath or bike lanes. It would be difficult to create a safe crossing from the Kickapoo Rail Trail to Weaver Park via Smith Road.

Main Street Spur: Main Street narrows down to two travel lanes with no space to extend the existing bike lanes from Scottswood Drive to University Avenue. The City of Urbana has ownership of this section of road. Constraints to building a sidepath here include issues regarding stomwater drainage and adjacent properties.

Shared Lane Markings (sharrows)
Shared Bike/Parking Lanes

4.5 AMBUCS PARK

AreaLocationType22 acres1100 block of East University AvenueCommunity

KEY ELEMENTS

- Bench (1)
- Drinking Fountains (3)
- Lighting (9)
- Trail Signs (3)

- Trash Cans (9)
- Paved Trails (0.25 miles)
- Soft Trails (0.04 miles)

- Accessible Areas
- Recreational Areas
- Open Space
- Parking

- Pavilions
- Playgrounds
- Restrooms

Accessbile playground ensures all types of users can utilize this facility.

Park pavilion at AMBUCS Park.

Greenway Opportunity: Trail and natural area development along the Saline Branch will increase connectivity between AMBUCS Park and several other UPD facilities including Crystal Lake Park, Chief Shemauger Park, Judge Webber Park, and the Hickory Street Site as well as producing a regional connection to the west.

Loop Trail Between Parks: Walking and biking juxtaposition and proximity between AMBUCS Park, Chief Shemauger Park, and the Hickory Street Site provide an opportunity for the creation of a shared use loop trail between these areas.

Loop Trail Within Park: Developing a loop trail within AMBUCS Park will allow visitors to experience the park's many amenities while increasing opportunities for trail linkages to nearby parks.

CONSTRAINTS

Contiguous Neighborhoods: AMBUCS Park is bordered on only one small side (west) by residential development. Most other contiguous areas present a difficult crossing or barrier for visitors. This arrangement underscores the need for adequate trail facilities in this area.

Crossing University Avenue: University Avenue presents a difficult crossing for neighborhoods south of AMBUCS Park. Creating a safe and accessible crossing location to ensure adequate connections for pedestrians and cyclists to this area would improve connectivity to Victory Park and other eastern and southern neighborhoods.

- Trash Cans (4)
- Paved Trails (0.01 miles)

- Recreational Facilities (baseball / softball)
- Parking

Softball field, Canaday Park.

Shared Lane Markings (sharrows)

Shared Bike/Parking Lanes

Urbana City Limits

UPD Parks

OPPORTUNITIES

Bicycle Connectivity: There are many parks located within cycling distance of Canaday Park including the Brookens Sports Complex, Prairie Park, Victory Park, AMBUCS Park, Weaver Park, and Lohmann Park. Furthermore, existing bicycle infrastructure along Lierman Avenue, Washington Street, Main Street, Philo Road, and Kinch Street provides a good starting point for closing bicycle network gaps between these parks.

Loop Trails Between Parks: Walking and biking juxtaposition and proximity between Prairie Park, Weaver Park, and Canaday Park provide an opportunity for the creation of a shared use loop trail between these three areas.

CONSTRAINTS

Access to Neighborhoods: Canaday Park does not have direct access to neighborhoods from the west or the east. The park is bordered by Champaign County facilities on the east and north sides, and a manufacturing industry on the west.

Area between Main Street and University Avenue: There is currently no direct north-south connection from Canaday Park to AMBUCS Park where Lierman Avenue ends at Main Street and University Avenue. Primary barriers include the current active use of the Norfolk Southern rail line and existing land uses along University Avenue with no cut-throughs or sidewalks. All options for a safe crossing should be considered to ensure an adequate connection for pedestrians and cyclists between these areas.

- Recreational Areas
- Open Space

Disc golf course, Lohmann Park.

Sitting area and open space, Lohmann Park.

Message board, Lohmann Park.

Bicycle Connectivity: Crestview Park is located within a half-mile cycling (and quarter mile walking) distance from Lohmann Park. Furthermore, existing bicycle infrastructure along Florida Avenue, Philo Road, Kinch Street, and Colorado Avenue present connection opportunities to slightly further UPD facilities including Prairie Park, Weaver Park, and Larson Park.

Proximity to Neighborhoods, Schools, & **Destinations:** Lohmann Park is accessible to nearby residential neighborhoods, with Crestview Park located within a quarter-mile walking distance from the park's western edge. Likewise, commercial areas along Philo Road are within walking and cycling distance and are relatively well connected by existing trail facilities.

CONSTRAINTS

Pedestrian Access: Lohmann Park is not currently accessible via sidewalks or shared use paths from the north near Florida Avenue and Thomas Paine School. Coupled by only sparse residential developments to the south and the east, enhanced northern accessibility will serve to better connect the park to local neighborhoods.

4.10 CHIEF SHEMAUGER PARK

AreaLocationType13 acres1000 Block of Kerr AvenueNeighborhood

KEY ELEMENTS

Urbana Park District Planning and Operations facility, Chief Shemauger Park.

Open space and recreational facilities, Chief Shemauger Park.

Greenway Opportunities: Trail and natural area development along the Saline Branch and Boneyard Creek will increase connectivity between Chief Shemauger Park and several other UPD facilities including Crystal Lake Park, AMBUCS Park, Judge Webber Park, Leal Park, Patterson Parklet, Phillips Recreation Center, and the Hickory Street Site as well as producing a regional connection to the University of Illinois.

Loop Trail Between Parks: Walking and biking juxtaposition and proximity between Chief Shemauger Park, AMBUCS Park, and the Hickory Street Site provide an opportunity for the creation of a shared use loop trail between these areas.

Loop Trail Within Park: Developing a loop trail within Chief Shemauger Park will allow visitors exposure to all of the park's amenities while increasing opportunities for trail linkages to nearby parks.

CONSTRAINTS

Crossing University and Cunningham: Both University Avenue and Cunningham Avenue present difficult crossing areas for neighborhoods south and west of Chief Shemauger Park. Creating safe and accessible crossing locations to ensure adequate connections for pedestrians and cyclists to this area assists in connecting this park to local neighborhoods as well as developing potential regional trail networks along the Norfolk Southern rail line.

4.11 BLAIR PARK

| Area | Location | Type | Neighborhood | Type | Neighborhood | Neighborhoo

KEY ELEMENTS

- Benches (18)
- Bike Parking Locations (2)
- Drinking Fountain (2)

- Lighting (22)
- Trash Cans (8)
- Paved Trails (0.38 miles)

- Recreational Facilities
- Gardens
- Open Space

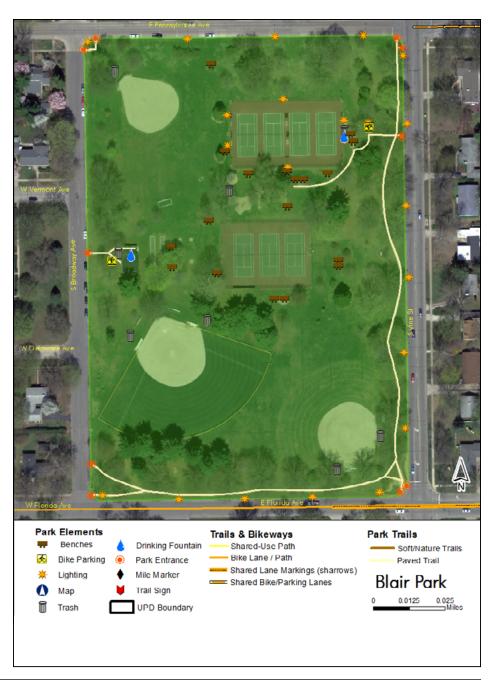

- Playgrounds
- Restrooms

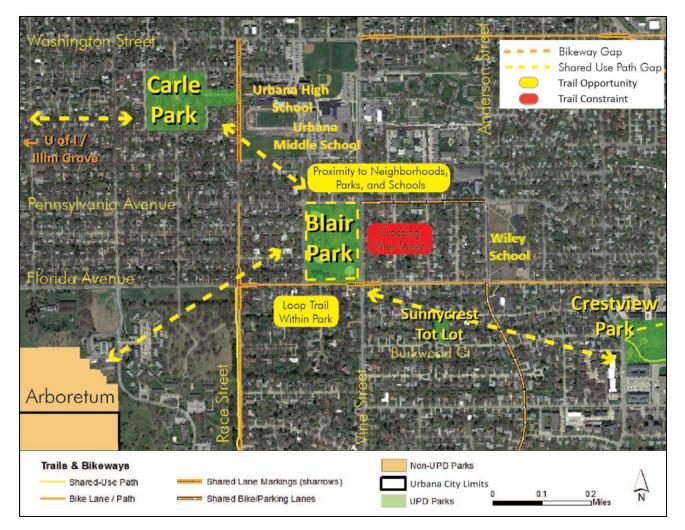

Tennis Court at Blair Park

A distinct entrance into Blair Park.

Loop Trail Within Park: Developing a loop trail within Blair Park would give visitors exposure to the park's many amenities while increasing opportunities for trail linkages to nearby parks: Sunnycrest Tot Lot, Crestview Park, Carle Park, and the [University of Illinois] Arboretum.

Proximity to Neighborhoods, Parks, and Schools: Blair Park is accessible to many nearby residential neighborhoods with Carle Park, Sunnycrest Tot Lot, Crestview Park, and the [University of Illinois] Arboretum located within walking distance. Likewise, bicycle path opportunities to the south west will benefit cyclists traveling from slightly further distances and Meadowbrook Park. Blair Park is also very close to Urbana Middle School, Urbana High School, and Wiley Elementary School.

CONSTRAINTS

Crossing Vine Street: Park visitors accessing Blair Park on foot or by bicycle from the east only have an all-way stop to cross the minor arterial of Vine Street at Florida Avenue. Options for safe crossings should be considered to ensure adequate connections for pedestrians and cyclists to this area.

4.12 CARLE PARK

AreaLocationType11 acresIndiana Avenue and Garfield AvenueNeighborhood

KEY ELEMENTS

- Benches (11)
- Bike Parking Location (1)
- Lighting (32)Maps (2)
 - Trail Signs (2)
 - Drinking Fountain (1) Trash Cans (2)

- Sculptures

Hickman Tree Walk, Carle Park.

Drinking fountain along nature trail and open space, Carle Park.

Proximity to Neighborhoods, Parks, and Schools: Carle Park is accessible to many nearby residential neighborhoods, Urbana High School, and Leal School. Blair Park, Sunnycrest Tot Lot, Crestview Park, [University of Illinois'] Illini Grove, and the [University of Illinois] Arboretum are also located within walking distance. Likewise, nearby bicycle path opportunities will benefit cyclists traveling from slightly further distances such as Phillips Recreation Center to the north and Meadowbrook Park to the south.

4.13 SOUTH RIDGE PARK

AreaLocationType11 acresMyra Ridge SubdivisionNeighborhood

KEY ELEMENTS

Benches (7)Trail Signs (5)

- Trash Cans (2)
- Paved Trails (0.73 miles)

- Playground
- Trails
- Open Space

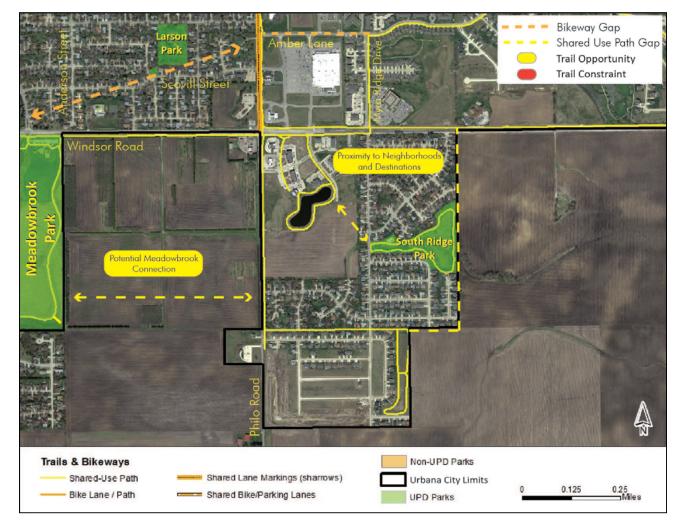

South Ridge Park entrance.

Paved trail along seating areas and open space, South Ridge Park.

South Ridge Park playground.

Potential Meadowbrook Connection:

Developing a southern trail connection between Meadowbrook Park and South Ridge Park will increase connectivity within the UPD park system while providing enhanced accessibility options to residents of the Myra Ridge subdivision.

Proximity to Neighborhoods and Destinations:

South Ridge Park is within a quarter-mile walking distance for residents of the Myra Ridge subdivision as well as visitors to The Pines retail center and other commercial- and service-based businesses along Philo Road and Windsor Road. Existing and future bicycle facilities will also provide access to visitors from slightly further distances.

1 2 3 4 5 6 7 8 9 PARK INVENTORY AND TRAIL GAP ANALYSIS

4.14 KING PARK

AreaLocationType8 acresNear Lincoln Avenue and Fairview AvenueNeighborhood

KEY ELEMENTS

- Benches (8)
- Drinking Fountain (1)
- Lighting (12)

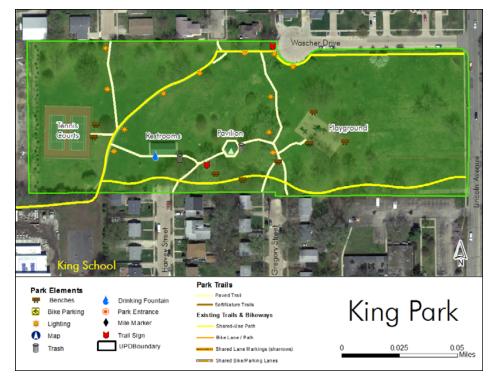

- Trail Signs (2)
- Trash Cans (2)
- Paved Trails (0.64 miles)

- Pavilion
- Restrooms
- Tennis Courts

- Playground
- Parking

Paved trails connect King Park to nearby homes.

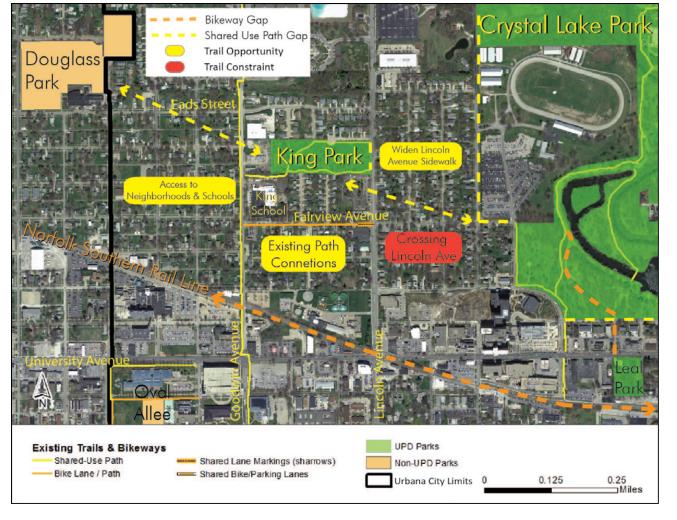

Paved path, pavilion, and playground (top center), King Park.

Widen Lincoln Avenue Sidewalk: The sidewalk on the west side of Lincoln Avenue also runs along the east side of King Park. Widening this sidewalk to a minimum 8' sidepath would create a full loop trail around King Park. Cooperation with the City of Urbana will be required.

Walking & Biking: Crystal Lake Park, a signature park that attracts both regional and neighborhood visitors, and Douglass Park (Champaign) are within both walking and biking distance of King Park. This proximity is an opportunity to link both locations. The Oval Allee, part of the University of Illinois campus, is also located within biking distance.

Access to Neighborhoods & Schools: King School is located adjacent to King Park with direct access points for pedestrians and cyclists. The park also offers recreational amenities to a large number of residences within the surrounding neighborhood.

Access to Shared-Use Paths/Bikeways: Shared-use paths along Goodwin Avenue and bike lanes and routes along Fairview Avenue are important links for neighborhood residents to access the park while offering the opportunity to build further connections to Crystal Lake Park.

CONSTRAINTS

Crossing Lincoln Avenue: Park visitors accessing King Park on foot or by bicycle from the east can only cross the arterial Lincoln Avenue at a signalized intersection on Fairview Avenue, which is south of King Park.

Connectivity to Crystal Lake: Although King Park and Crystal Lake Park are located within walkable and bikable distances from one another, there are currently no shared-use paths connecting the two locations.

4.15 CRESTVIEW PARK

Area Location Type Cottage Grove Avenue and Neighborhood 6 acres Burkwood Drive

KEY ELEMENTS

- Benches (6)
- Drinking Fountain (1)
- Lighting (3)

- Trail Signs (3)
- Trash Cans (2)
- Paved Trails (0.36 miles)

- Gardens
- Open Space
- Paths

- Pavilion
- Playground
- Recreational Facilities

Drinking fountain, pavilion, and waste facilities, Crestview Park.

Paved trail passing by a playground and open space, Crestview Park.

Loop Trail Within Park: Developing a loop trail within Crestview Park would give visitors exposure to the park's many amenities while increasing opportunities for trail linkages to nearby parks: Sunnycrest Tot Lot, Blair Park, and Lohmann Park.

Proximity to Neighborhoods and Destinations:

Crestview Park is accessible to Blair Park, Sunnycrest Tot Lot and Lohmann Park (located within a quarter-mile walking distance) as well as many nearby residential neighborhoods. Likewise, Crestview Park is situated directly to the west of the Philo Road Business District. Furthermore, bicycle path opportunities to the north, east, and west will connect cyclists traveling from slightly further distances.

CONSTRAINTS

Philo Road Business District: Philo Road underwent a road diet in 2008, reducing the number of lanes (and thus the crossing distance). Additionally, a mid-block crosswalk was added, Florida Avenue contains a stoplight with bike lanes, and there is a 4-way stop at Colorado Avenue. However, all of these favorable features have not yet been connected to an official trail or bikeway connection leading east and west through the Philo Road Business District toward Crestview Park. This is a constraint, because cooperation is needed from the landowners to implement such a trail.

4.16 LARSON PARK (FORMERLY WHEATFIELD PARK)

AreaLocationType5 acresMcHenry Street and Combes StreetNeighborhood

KEY ELEMENTS

• Benches (2)

• Drinking Fountain (1)

• Trash Cans (3)

Paved Trails (0.35 miles)

AMENITIES

• Open Space

Playgrounds

Recreational Facilities

Entrance to Larson Park from McHenry Street (2015).

Refurbished tennis court and new playground, Larson Park (2015).

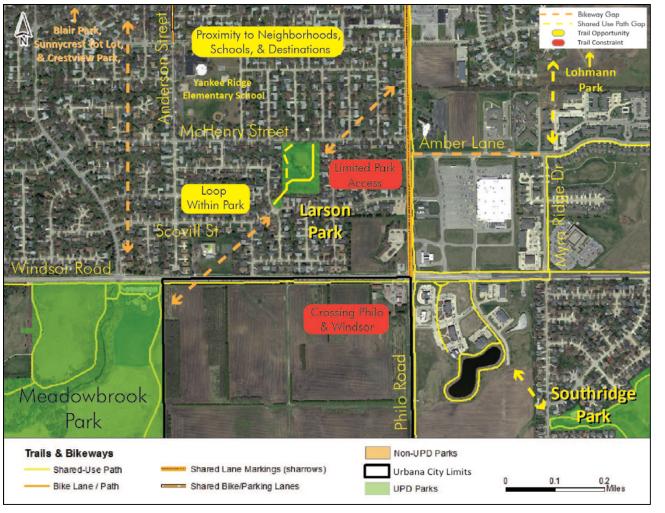

Small Loop Within Park: Developing a small loop trail within Larson Park will implement recommendations from this park's master plan, and meet neighbor preferences. It will also allow visitors adequate walking space and exposure to the park's amenities while increasing opportunities for trail linkages to nearby parks: South Ridge Park and Meadowbrook Park.

Proximity to Neighborhoods, Schools, & **Destinations:** Larson Park is located within a quarter-mile walking distance from Meadowbrook Park as well as nearby residential neighborhoods, Yankee Ridge Elementary School, and businesses along Philo Road and Windsor Road. Furthermore, bicycle path opportunities to the north and south will connect cyclists traveling from slightly further distances and connecting to Meadowbrook Park.

CONSTRAINTS

Crossing Philo & Windsor: Both Philo Road and Windsor Road present a potentially difficult crossing for visitors. Ensuring safe and accessible crossing locations will promote adequate connections between Larson Park and other UPD facilities as well as surrounding destinations.

4.17 VICTORY PARK

AreaLocationType5 acresGreen Street and Lynn StreetNeighborhood

KEY ELEMENTS

- Benches (9)
- Bike Parking Location (1)
- Drinking Fountain (1)
- Lighting (4)

- Trail Sign (1)
- Trash Can (5)
- Paved Trails (0.42 miles)

- Recreational Facilities
- Gardens
- Open Space

- Paths
- Pavilions
- Playground

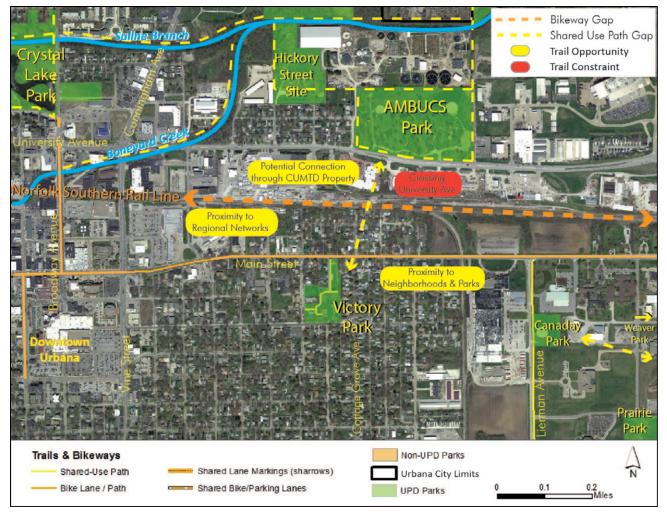

Bike parking and trail near a pavilion, Victory Park.

Sitting area along a paved park trail, Victory Park.

Proximity to Regional Networks: Victory Park is located one block from the Norfolk Southern rail line – a potential future Rail-Trail connection to Leal Park as well as regional destinations.

Proximity to Neighborhoods & Parks: Victory Park is located within a quarter-mile walking distance of AMBUCS Park while being immediately accessible from nearby residential neighborhoods. Furthermore, bicycle facilities to the north and west (Main Street) and shared use paths to the east (Lierman Avenue) provide very good connections for cyclists and pedestrians traveling from slightly further distances such as Phillips Recreation Center and Weaver Park respectively.

Potential Connection through CUMTD Property:

The Champaign-Urbana Mass Transit District (CUMTD) is headquartered just south of University Avenue and north of the Norfolk Southern rail line within a critical area for linking Victory and AMBUCS parks. This location presents an opportunity to work with CUMTD to investigate the feasibility of providing access along the east side of their property.

CONSTRAINTS

Crossing University Avenue: University Avenue presents a difficult crossing for visitors coming from the northern park areas: AMBUCS Park, Chief Shemauger Park, Judge Webber Park, and the Hickory Street Site. In particular, the difficulty of traversing the area between Main Street and University Avenue (especially the Norfolk Southern railroad tracks) to get from Victory Park to AMBUCS Park is high. Ensuring a safe and accessible crossing location will promote adequate connections between Victory Park and these northern UPD facilities as well as to surrounding destinations.

4.18 HICKORY STREET SITE

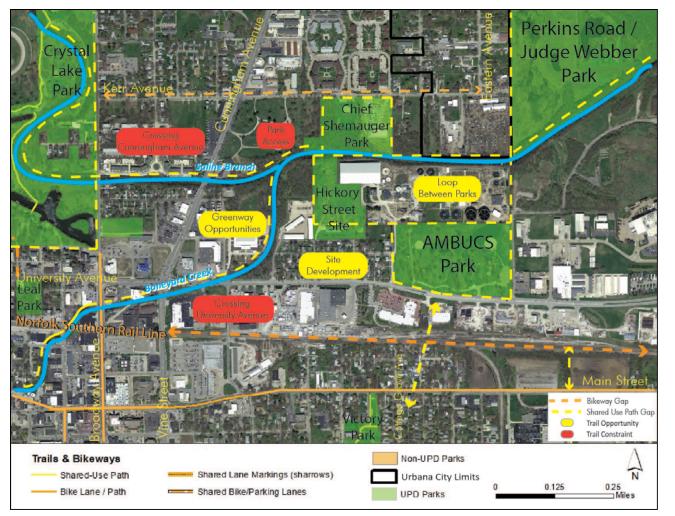

AreaLocationType10 acresHickory Street north of Park StreetSpecial Use Facility

KEY ELEMENTS

• Park District Storage Facilities

Greenway Opportunities: Trail and natural area development along and across the Saline Branch and Boneyard Creek will increase connectivity between the Hickory Street Site and several other UPD facilities including Chief Shemauger Park, AMBUCS Park, Judge Webber Park, Crystal Lake Park, Patterson Parklet, and Phillips Recreation Center, as well as producing a regional connection to the University of Illinois.

Loop Trail Between Parks: Walking and biking juxtaposition and proximity between Chief Shemauger Park, AMBUCS Park, and the Hickory Street Site provide an opportunity for the creation of a shared use loop trail between these areas.

Site Development: The Hickory Street Site is developed for park district storage facilities. It does not support public access. However, its location near several other UPD facilities (Chief Shemauger Park, AMBUCS Park, Judge Webber Park, Victory Park, and Crystal Lake Park) as well as the Saline Branch, Boneyard Creek, and Norfolk Southern rail line present a wide array of development opportunities for the site. Trail linkages to nearby parks as well as regional trail and greenway networks should be a principal component of future site enhancements.

CONSTRAINTS

Park Access: The Hickory Street Site does not have direct access to neighborhoods from the north, west, or the east. The park is bordered by Harvey and East Lawn Cemeteries to the north, the Boneyard Creek and a storage facility to the west, a treatment plant operated by the Urbana-Champaign Sanitary District to the east, and a small residential neighborhood to the south.

Crossing University and Cunningham: Both University Avenue and Cunningham Avenue present difficult crossing areas for neighborhoods south and west of the Hickory Street Site. Creating safe and accessible crossing locations to ensure adequate connections for pedestrians and cyclists to this area would assist in connecting this park to local neighborhoods as well as developing potential regional trail networks along the Norfolk Southern rail line.

University Avenue bordering Leal Park to the north.

5

6

7 8

OPPORTUNITIES

Proximity to Parks, Neighborhoods, & Destinations: Leal Park is located within a quarter-mile walking distance from many nearby residential neighborhoods, downtown Urbana, and UPD facilities including Crystal Lake Park, Phillips Recreation Center, and Patterson Parklet.

Proximity to Boneyard & Rail: Trail development along the Norfolk Southern rail line and Boneyard Creek has the potential to be both a local and regional amenity, bringing visitors from further away to Leal Park while offering a connection to other Urbana Park District facilities situated along these areas including Phillips Recreation Center,

Patterson Parklet, Chief Shemauger Park, the Hickory Street Site, Judge Webber Park, and Weaver Park. Segment 3 from the Boneyard Creek Master Plan is now built and provides trail facilities running near Leal Park along the creek from Griggs Street to Broadway Avenue.

Leal to Crystal Lake Connection: Leal Park is situated between the Carle main campus, Crystal Lake Park, and Downtown Urbana. A trail and bikeway connection using the Norfolk Southern rail line, widening the existing path through Leal Park, a potential protected crossing of University Avenue at Central Avenue, a potential bike boulevard on Central Avenue, sidepath on Park Street, and shared use of the Crystal Lake Park loop road by pedestrians, bicyclists, and vehicles would connect many destinations in a small area.

CONSTRAINTS

Crossing University Avenue: Leal Park is bordered to the north by University Avenue (US 45/150), a five lane arterial, presenting a difficult crossing for visitors. All options for a safe crossing should be considered to ensure an adequate connection for pedestrians and cyclists to this area, working with the City of Urbana and IDOT; whether that be at Central Avenue, or existing stoplights at Broadway Avenue, Race Street, and/or McCullough Street.

Surrounding Development Constraints: Leal Park does not share any contiguous boundary with residential neighborhoods, with the exception of sparse residential development to the east. The rest of development surrounding Leal Park is commercial, with insufficient right-of-way along University Avenue to widen sidewalks to trails. This arrangement underscores the need for adequate trail facilities leading to this area, to allow people to access Leal Park on foot and bike – specifically along the Norfolk Southern rail line and Boneyard Creek.

4.20 PHILLIPS RECREATION CENTER

UPD Parks

OPPORTUNITIES

Greenway Opportunity: Park, trail and natural area development along the Boneyard Creek would connect Phillips Recreation Center to the University of Illinois and several UPD facilities including Patterson Parklet, Chief Shemauger Park, Leal Park, Judge Webber Park, and the Hickory Street Site as well as producing a regional connection to the northeast. Segment 3 from the Boneyard Creek Master Plan is currently under construction and will provide trail facilities running toward Phillips Recreation Center along the creek from Griggs Street to Broadway Avenue.

Access to Neighborhoods: Phillips Recreation Center is accessible to residential neighborhoods from all directions. Likewise, future bicycle paths will offer cycling connections to the University of Illinois, Downtown Urbana, and nearby UPD parks including Carle Park, King Park, Crystal Lake Park, Leal Park, and Victory Park.

CONSTRAINTS

Bikeway Gap Shared Use Path Gar

Trail Opportunity
Trail Constraint

0.25

0.125

Crossing Lincoln and University: Crossing Lincoln Avenue and University Avenue may present increased difficulty for some pedestrians and cyclists. All options for a safe crossing should be continually evaluated to ensure an adequate connection between areas separated by these arterial streets and Phillips Recreation Center.

4 acres	Perkins Road and High Cross Road	Natural Area

KEY ELEMENTS

Private Residence

the urbana park district Mission

To improve the quality of life of Urbana's citizens through a responsive, efficient and creative park and recreation system.

Each of these elements, carefully crafted by the Urbana Park District Trails Master Plan steering committee, represent clear and concise directions for continued development of the trail system within the Urbana Park District.

Appendix B includes sheets for Urbana Park District staff to track the performance measures listed in this chapter.

Accessibility, Connectivity Safety, Coordination, User-Implementation Friendliness UTMP Themes **Environment** Education

Figure 15 This diagram illustrates the themes used to define Goals and Objectives of the Urbana Trails Master Plan

CREATING A VISION

The Urbana Park District's mission is to "improve the quality of life of Urbana's citizens through a responsive, efficient and creative park and recreation system." The Urbana Park District Strategic Plan formulated six "big moves" to maintain and enhance connectivity of area trails, one of which is to "continue with the collaborative development of a trail system including strong connections between present and future Urbana Park District parks, loop trails within parks and linkages with the regional trail system." These elements provide important focus and direction for preparing specific goals and objectives for this master plan within its broader vision to obtain a more integrated, better connected trail system for walking and bicycling within the community.

Each of the goals is under a specific theme. In addition to Goals and Objectives, a list of Performance Measures is included to evaluate achievements of the proposed objectives. All the Themes, Goals, Objectives, and Performance Measures are shown on the following tables.

A **theme** is the subject of a goal.

A goal is defined as an end state that describes an outcome the Urbana Park District wishes to achieve by implementing the Urbana Trails Master Plan.

Objectives are sub-goals that help organize the implementation of the plan into measurable and manageable parts.

Performance measures will help the Urbana Park District to track the progress of each objective over time.

Goal 1: Continue with the collaborative development of a district-wide / regional trail system including strong connections between present and future UPD parks, loop trails within parks, and linkages within the regional trail system.

Goal 2: Develop a system of trails that is user-friendly by providing amenities that make parks accessible to all residents and visitors.

Goal 3: Educate residents about the benefits and availability of trail facilities.

Goal 4: Preserve and enhance the natural environment through the development and operation of greenways coinciding with Urbana Park District trails.

Goal 5: Coordinate the planning and implementation of all Urbana park trails system projects with the City of Urbana's Bicycle Master Plan and proposed sidewalk improvements, as well as the Champaign County Greenways and Trails Plan in a manner that emphasizes rational and cost-effective measures.

THEMES: ACCESSIBILITY, CONNECTIVITY

Goal 1: Continue with the collaborative develor future UPD parks, loop trails within parks and			between present and	
Objectives	Performance Measures	Strategies	Responsible Parties	
1. Provide regional trail connections from UPD trails to the Kickapoo Rail Trail by 2020.	a. Number of trail connections made to the regional trail network	i. Include connections to designated regional trails within Urbana Park District Capital Improvement Plan development.	Urbana Park District, City of Urbana, Champaign	
to the Nickapoo Kali Irali by 2020.	made to the regional trail network	ii. Continue working with regional partners to develop and implement the Urbana Trails Plan.	County Forest Preserve District, developers	
2. Provide trail connections between parks and major destinations:- By 2020:- Downtown to Crystal Lake Park	a. Number of trail connections made between parks and major destinations	i. Include connections to designated parks within Urbana Park District Capital Improvement Plan development.	Urbana Park District, City of Urbana, developers	
 By 2030: Crystal Lake Park to Chief Shemauger Park Chief Shemauger Park to Perkins Road Site Weaver Park to Prairie Park 	b. Number of trail connections made between parks	ii. Continue working with local partners to develop and implement the Urbana Trails Plan.		
3. Provide loop trails in parks: Crystal Lake Park by 2020; and AMBUCS, Prairie, and Weaver Parks by 2030.	a. Number of loop trails	i. Include loop trails in designated parks within Urbana Park District Capital Improvement Plan development.	Urbana Park District	
		i. Create routes that connect to and through all UPD parks designated within the UTMP.		
4. Implement all of the short-term projects proposed in the Urbana Trails Master Plan by 2020.	a. Number of miles of new trail facilities	ii. Take advantage of opportunities to develop off- street shared-use paths, using methods including but not limited to: working with railroads to develop bicycle facilities on or along rights-of-way, and acquiring property for trail facilities.	Urbana Park District, City of Urbana, developers, CUMTD, railroad companies	
5. Complete a continuous trail/bikeway loop around Urbana by implementing the Urbana Green Loop by 2030.	a. Miles of loop trail infrastructure constructed	i. Take advantage of opportunities to develop off- street shared-use paths and trails, using methods including but not limited to: working with railroads to develop trail facilities on or along rights-of-way, and acquiring property that provides off-street connections between trail facilities.	Urbana Park District, City of Urbana, developers, University of Illinois, railroad companies, City	
		ii. Contribute to creating a continuous loop in the Champaign-Urbana urbanized area.	of Champaign	

THEMES: SAFETY, USER-FRIENDLINESS

Objectives	Performance Measures	Strategies	Responsible Parties
1. Add 2 new miles of trail facilities that provide the minimum number of amenities: benches, bike parking, drinking fountains, lighting, maps, mile markers, trail signs, and waste receptables.	a. Miles of new trails built with the minimum number of amenities	i. Seek grants for new trail facility construction and development.	Urbana Park District
2. Retrofit at least 1 mile of existing trails with the amenities listed in UTMP Chapter 4: Park Inventory and "Gap" Analysis, adhering to Champaign County Greenways and Trails Design Guidelines where applicable, by 2020.	a. Miles of existing trails retrofitted to meet minimum amenity standards	i. Set aside funding within the Urbana Park District Capital Improvement Plan for trail retrofits.	Urbana Park District, Cit of Urbana
3. Install trail signs and markings on all new trail facilities according to the Champaign County Greenways & Trails Design Guidelines by 2020.	a. Miles of trail infrastructure projects built with signs according to the Champaign County Greenways & Trails Design Guidelines	ojects built with signs according the Champaign County reenways & Trails Design	
4. Provide covered bike parking at at least 3 designated parks and facilities by 2020.	a. Number of designated parks with covered bike parking installed	i. Seek grants to provide covered bike parking. ii. Set aside funding within the Urbana Park District Capital Improvement Plan for covered bike parking.	Urbana Park District
5. Partner with the Urbana Police Department to	a. Police reports related to vandalism on park trails	i. Initiate a bicycle education program that includes	Urbana Police Department, Urbana
promote safety and security of existing and proposed trail facilities by 2016.	b. Police reports related to personal safety on park trails	information on personal safety.	Park District, City of Urbana

THEME: EDUCATION

Objectives	Performance Measures	Strategies	Responsible Parties	
		i. Collaborate with mapping and distribution efforts of Champaign County Bikes (CCB).	Urbana Park District, Champaign County Bikes, Champaign County Regional Planning Commission	
1. Produce and distribute a regularly updated map that includes existing trail facilities in Urbana at least	a. Frequency of map publication and distribution	ii. Include Urbana Park District facilities.		
every 3 years.	, and dishibonon	iii. Include facilities listed in the Champaign County Greenways and Trails (GT) Plan inventory.		
2. Distribute educational, encouragement, and enforcement materials focusing on trail accessibility	a. Number of events with materials available	i. Distribute materials at annual events such as the Jazz Walk, Strawberry Jam, Turkey Trot, and MLK Jettie Rhodes Neighborhood Day.	Urbana Park District	
and proximity at a minimum of 2 new public events per year by 2016.	b. Number of materials distributed ii. Distribute materials at weekly or seasonal even such as Neighborhood Nights.			
	a. Number of educational	i. Partner on providing a Bike 101 class (up to 1 per semester) with Champaign County Bikes (CCB).		
3. Provide 3 educational and encouragement programs for all ages about the benefits of walking, biking, and appreciation of green space by 2020.	and encouragement programs provided	ii. Provide specific programs for toddlers, youth, teens, seniors, etc.	Urbana Park District, Champaign County Bikes, University of Illinoi	
biking, and appreciation of green space by 2020.	b. Portion of all age ranges served	iii. Establish a presence at U of I Quad Day to reach out to students.	Dives' Office still Of IIIII	
4. Distribute a biennial survey to Urbana residents to identify trail system priorities to be included in the	a. Number of surveys distributed	i. Make the survey available at events such as Neighborhood Nights and the Sweetcorn Festival.		
Urbana Park District Capital Improvement Plan by 2016.	b. Number of surveys collected	ii. Make the survey available at UPD parks, facilities and website.	Urbana Park District	
5. Make 3 new trail education, encouragement, and enforcement materials available on the UPD website by 2016.	a. Number of materials available on website	i. Provide materials for a wide variety of park users	Urbana Park District	
5. Make available trail education, encouragement, and enforcement materials in at least 1 language pesides English by 2020.	a. Number of multilingual materials	i. Maps, brochures	Urbana Park District	

THEME: ENVIRONMENT (NATURAL)

Goal 4: Preserve and enhance the natural environment through the development and operation of greenways coinciding with Urbana Park District trails.

Objectives	Performance Measures	Strategies	Responsible Parties	
		i. Connect Chief Shemauger Park with Crystal Lake Park via Saline Branch trail.	Urbana Park District, City of Urbana, developers	
1. Use the Urbana trail system to connect 2 natural features such as bodies of water, wooded areas, and open spaces by 2030.	a. Number of new connections between natural areas	ii. Connect Chief Shemauger Park with AMBUCS Park via Saline Branch trail.		
open spaces by 2000.		iii. Connect Weaver Park marsh with Weaver Park Woods.		
2. Develop at least 2 miles of trail facilities that allow users to interpret and experience the natural	a. Number of miles of trail facilities developed with minimum	i. Meadowbrook Park	Urbana Park District, City of Urbana	
environment along greenways through signage and/or trail creation by 2030.	signage and natural area requirements	ii. Perkins Road / Judge Webber Park		
3. Implement 1 new annual trail cleanup event for greenways and natural areas by 2016.	a. Number of trail cleanup events implemented	i. Create a rotating list of designated areas to clean up (e.g. Crystal Lake, Perkins Road / Judge Webber, new areas as developed, etc.)	Urbana Park District	

THEME: COORDINATION, IMPLEMENTATION

Goal 5: Coordinate the planning and implementation of all Urbana park trails system projects with the City of Urbana's Bicycle Master Plan and proposed sidewalk improvements, as well as the Champaign County Greenways and Trails Plan in a manner that emphasizes rational and costeffective measures.

Objectives	Performance Measures	Strategies	Responsible Parties	
1. Recognize the significance of prioritized projects listed within the Champaign County Greenways and Trails Plan by implementing 3 High Priority projects that are also listed in the Urbana Trails Master Plan by 2020.	a. Number of projects implemented that are listed as High Priority in the Champaign County Greenways and Trails Plan	i. Combine projects that can be geographically linked for implementation.	Urbana Park District, City of Urbana, Champaign County Regional Planning Commission (CCRPC), developers	
2. Develop a coordinated review process between		i. Work with City of Urbana and other government agencies to prioritize proposed UPD trail linkages within the review process for trail connections.		
the City of Urbana and the Urbana Park District for development proposals where park trails are proposed by 2016.	a. Number of new development projects receiving trail evaluations	ii. Identify any negative impacts found during evaluation though design changes, geographic location, or other options.	Urbana Park District, City of Urbana	
		iii. Work with the City of Urbana on reviewing development proposals linked to trail development.		
3. Promote and establish at least 1 connection	a. Number of trail connections	i. Pursue connections along abandoned railroad rights of way which offer significant rail-to-trail possibilities.	Urbana Park District, City of Urbana, City of Champaign, rail	
from Urbana parks to future statewide systems of greenways and trails by 2040.	leading outside Urbana	 ii. Coordinate with neighboring jurisdictions to acquire and develop abandoned railroad rights of way. 	companies, Champaign County Forest Preserve District, developers	
4. By 2020, 3 different grant applications will		i. Keep abreast of upcoming transportation projects and how they could contribute to the trails system.		
be submitted by the Urbana Park District for trail projects funding as part of new trail development	a. Number of grant applications submitted	ii. Advocate for the inclusion of trails in new road projects and roadway repairs.	Urbana Park District	
projects as appropriate.		iii. Apply for funding to enhance road repair and construction aside from allocations from local agencies.		
5. Dedicate at least 5% of the Urbana Park District Capital Improvement Plan (CIP) money allocated for trail construction and maintenance projects annually.	a. Percentage of Urbana Park District CIP dedicated to trail improvements	i. Incorporate into budgeting policy and strategies.	Urbana Park District

Assign at least the equivalent of 0.5 FTE staff from UPD to work on the implementation of the Urbana Park District Trails Master Plan including planning, design, engineering, education, enforcement, and encouragement by 2016.	implementation of the Urbana	i. Assign staff time to designate a trails coordinator for the plan.	Urbana Park District	

6 FACILITY TYPES

This plan recommends a mixture of off-street trails, on- and off-street bike facilities and University bike paths to foster a cohesive active transportation network that links all UPD parks and facilities in the City of Urbana. Facility types are organized in Figure 16.

6.1 OFF-STREET FACILITIES

Trails and dedicated paths are available to pedestrians and/ or bicyclists, which offer significant separation from other vehicle traffic.

The following path types are for shared-use between bicyclists and other non-vehicle modes:

- Shared-Use Path (Off-street)
- Shared-Use Path (Sidepath)
- Fitness Trail
- Rail-to-Trail
- Rail-with-Trail

The following path types are for the exclusive use of pedestrians:

- Nature Trail
- Walking Trail

The following path types are for the exclusive use of bicyclists:

• University Bike Path

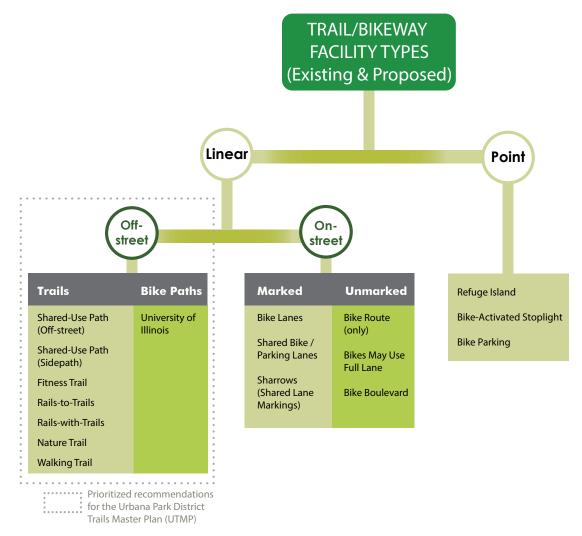

Figure 16 Recommended trail and bike facility types

6.1.1 SHARED-USE TRAILS

The ideal width for all shared-use paths is 10', with a minimum recommended width of 8', in order to facilitate bi-directional and multi-modal traffic. Striping is not necessary on shared-use paths.

See Appendix C for information on signage installation along shared-use trails.

Shared-Use Path (Off-street)

A shared-use trail is a recreational pathway that pedestrians, bicyclists, rollerbladers, people with baby strollers, and skateboarders may use. They may connect parks, employment centers, shopping centers, and public places.

Shared-Use Path (Sidepath)

Sidepaths are shared-use paths running immediately parallel to a roadway, similar to, but wider than a sidewalk. In general, sidepaths may be better choices than on-road bikeways for faster, busier roads with few access points and with well-designed intersections.

Fitness Trail

A fitness trail is an outdoor path with physical obstacles and challenge stations with corresponding signs, spaced along a walking / jogging or running path. Fitness trails should be accessible to people of all physical abilities in order to fully realize their potential to promote good health.

Rail-to-Trail

A "rail-to-trail" is a shared-use path, either paved or unpaved, built within the right-of-way of a former railroad, perhaps under federal railbanking law.

Rail-with-Trail

A "rail-with-trail" is a shared-use path that parallels active railtrack, sometimes as an easement on railroad right-of-way. The Federal Highway Administration's Rails with Trails: Lessons Learned provides best practices information on rails-with-trails.

⁴ Guide for the Development of Bicycle Facilities. 2012. Page 1-3. American Association of State Highway and Transportation Officials (AASHTO).

⁵ Rails with Trails. Harry Sanders. http://home.comcast.net/~phyilla1/sstrails/railswithtrails.html.

6.1.2 PEDESTRIAN TRAILS

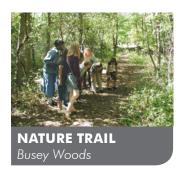

These path types are for the exclusive use of pedestrians.

Nature Trail

Nature trails typically run through environmentally sensitive areas. The surfacing and width specifications are more flexible than for shared-use paths; for example, nature trails may have a soft, permeable surface, such as bark, wood chips, or crushed aggregate in lieu of asphalt. Therefore, nature trails are not designed to be ADA accessible. The width of the nature trail may be as narrow as 18 inches to allow for passage through densely vegetated areas and hilly terrain.

Walking Trail

Walking trails are paths similar to sidewalks in parks. These trails are 5-8' wide, and are therefore not appropriate for shared-use with bicyclists. This trail type is appropriate for predominately pedestrian traffic in smaller parks.

6.1.3 BICYCLIST TRAILS

This path type is for the exclusive use of bicyclists.

University Bike Path

A University bike path is an off-street path for exclusive bicycle use on the University of Illinois campus. It has a striped dashed centerline to indicate bi-directional travel.

1 2 3 4 5 6 7 8 9 FACILITY TYPES

6.2 ON-STREET FACILITIES

On-road bicycle facilities are becoming more desired by the public, and are being installed in more places around the country. Using the road often improves safety by increasing cyclist visibility, particularly at intersections, where most crashes occur. On-road bikeways are especially appropriate on moderate to lower speed roads with more than a few intersections, driveways, and entrances. They also eliminate conflicts with pedestrians by keeping bikes off of sidewalks, which are not wide enough to handle both modes.

Bike Lanes

An on-road bike lane is a one-way path that carries bicyclists in the same direction as the adjacent motorized travel lane. Bike lanes should be located on the right side of the roadway, between the parking lane (if one exists) and the travel lane. Bicycles traveling in bike lanes have the same rights and responsibilities as motorized vehicles.

Bike Route

Bike routes are specially designated shared roadways that are preferred for bicycle travel for certain recreation or transportation purposes. These "signed shared roadways" may be appropriate where there is not enough room or less of a need for dedicated bike lanes. See Appendix C for information on signage installation along bike routes.

Shared Bike/Parking Lanes

Bike/parking lanes are recommended on streets with low parking occupancy. They are designated with Bike Route signage and a continuous white line to separate the parking lane from travel lanes. Shared bike/parking lanes should be used for each travel direction, with each lane typically 8' wide (including gutter pans).

Shared Lane Markings (sharrows)

Bicycle positioning on the roadway is key to avoiding crashes with cars turning at intersections. Shared lane markings, also known as "sharrows," are included in the 2009 version of the Federal Highway Administration's Manual on Uniform Traffic Control Devices (MUTCD). Shared lane markings are used to indicate correct straight-ahead bicycle position at intersections with turn lanes, and at intersections where bike lanes are temporarily discontinued due to turn lanes or other factors.

Bikes May Use Full Lane

A *Bicycles May Use Full Lane* sign may be used to inform road users that bicyclists may occupy the full travel lane. This sign may be used on roadways where no bike lanes or adjacent shoulders usable by bicyclists are present, and where travel lanes are too narrow for bicyclists and motor vehicles to operate side by side.

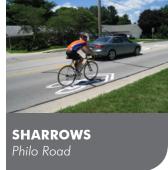

Bike Boulevard

A bike boulevard is a local street or series of contiguous street segments that have been modified to function as a through street for bicyclists, while discouraging through automobile travel. Local access is maintained.⁴ Signs and pavement markings create the basic elements of a bike boulevard.

6.3 POINT FACILITY TYPES

Refuge Island

A refuge island is a concrete island in the middle of a roadway that allows bicyclists and pedestrians to cross one direction of traffic at a time. The benefit of a refuge island is that it allows bicyclists and pedestrians to cross one direction of traffic at a time on roads where cross-traffic does not stop.

Typically, refuge islands include marked crossings on either side of the island, and are oriented at an angle so that the person(s) crossing must look at the approaching traffic before crossing. The minimum width of a refuge island should not be less than 6 feet, according to the Federal Highway Administration Report No. FHWA-SA-05-12.

Bike-Activated Stoplight

A bike-activated stoplight is a pavement marking indicating the detector trigger point for actuation of a traffic signal.

The City of Urbana and Illinois Department of Transportation are responsible for installing and maintaining bike-activated stoplights near and between Urbana Park District parks. For more information on this treatment and its application, please see the Urbana Bicycle Master Plan and/ or Manual on Uniform Traffic Control Devices (MUTCD).

Bike Parking

Bike parking is an end-of-trip facility to secure a bicycle, falling into one of two categories: short-term (two hours or less), or long-term (more than two hours). Short-term bike parking accommodates convenience and ease of use, while long-term parking provides security and weather protection.6

Bike parking should be located at trailheads and destinations along trails and bikeways. A good bicycle rack provides support for the bike frame and allows both the frame and wheels to be secured with one lock. The Association of Pedestrian and Bicycle Professionals (APBP) recommends the "inverted-U" and "post and loop" bike parking types. See Appendix C for information on bike parking installation.

Bicycle Parking Guidelines. 2012. Association of Pedestrian and Bicycle Professionals (APBP).

COMMUNITY OUTREACH

Several community outreach activities were completed as part of the planning process for the creation of the Urbana Park District Trails Master Plan. These outreach activities were designed to keep the residents informed on the progress of this plan and provide various opportunities for getting public feedback. Throughout the planning process, two sets of public meetings were organized in conjunction with the Urbana Bicycle Master Plan (UBMP). The purpose of these meetings was to provide an opportunity for Urbana residents to voice and prioritize their needs and desires for the trail and bike facilities in the community. Ultimately, this input provided the foundation for the recommended bike and trail network.

COMMUNITY OUTREACH

Public Workshop Series #1 at the Urbana Civic Center.

The following community outreach activities were utilized:

- Pedestrian and Bicycle Survey (PABS)
- Public Meeting Series #1
- Public Meeting #2
- Online Feedback through Project Website

7.1 PEDESTRIAN AND BICYCLE SURVEY (PABS)

Soliciting public input on bicycle, trail, and park facilities in Urbana was integral in developing the Urbana Park District Trails Master Plan (UTMP). The first step in doing so was to survey Urbana residents' mode choices and preferences as well as socio-economic information. The survey model used was the Mineta Institute's Pedestrian and Bicycle Survey (PABS). The City of Urbana contracted with CUUATS to gauge public use of pedestrian and bicycling facilities, determine attitudes about active transportation modes, and solicit ideas for improvements. The survey focused on these main purposes:

- Determine the modes of transportation used by Urbana residents during the past year
- List the general purposes of walking and cycling trips
- Determine the prevalence and frequency of walking and bicycling together with exploring the reasons for not walking or bicycling
- Understand respondents' habits in walking or bicycling to different destinations within the community

CUUATS staff mailed the paper surveys to 1,574 randomly selected households in two mailings identified from the stratified sampling method (for more information, see Appendix D). An address list of all households in each traffic analysis zone (TAZ) within the Urbana Park District was created through geographic information systems (GIS), and CUUATS staff used this to randomly select households in each TAZ. Each mailing contained: a cover letter explaining the survey's purpose, the paper survey, instructions on how to access the web survey, and a stamped return envelope to mail back the completed paper survey. This gave respondents the flexibility to complete the survey either on paper or on the internet.

In addition to paper surveys, CUUATS posted a link on the UTMP website to the PABS survey on the Urbana Bicycle Master Plan website so that any Urbana resident could complete it. The survey link was advertised via the paper survey, Urbana Park District website and advertising, City of Urbana website, Urbana Public Television (UPTV), and a News-Gazette article. CUUATS staff also attended several community and planning outreach events and asked event attendees to complete the PABS survey if they had not done it yet.

A component of the Pedestrian and Bicycle Survey unique to Urbana was to estimate and evaluate trail usage to better understand people's preferences and to address the growing need for more information on trail use. Section 7.1.1 discusses respondents' purpose of trail use, followed by discussion on Urbana residents' preference of trail length and type and how they usually travel to parks in subsequent sections. It also outlines respondents' opinions about preferred facility types that would encourage them to bike to the park.

7.1.1 TRAIL USE

Out of 1,371 responses, almost two-thirds (62%) of the respondents reported that they use park trails in Urbana. Non-trail users made up 22% of the survey respondents, and were also not asked to answer any more questions in this section of the survey if they did not want to.

Figure 17 Do you ever use park trails in Urbana?

7.1.2 PURPOSE OF TRAIL USE

People use trails for different purposes. Questions related to greenways and trails show that most of the trail users engage in different types of physical activity during their visits. Figure 18 shows the number and percentage of respondents reporting those various activities. Respondents could give multiple answers. Walking (33%) was by far the most frequent mode used on Urbana trails, followed by biking (15%), nature hiking (14%), and running (11%). 2% of trail users also mentioned that they use park trails for other uses. However, about 25% of respondents did not answer this question.

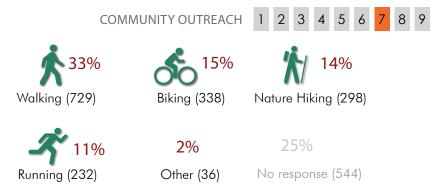

Figure 18 Purpose of trail use

7.1.3 TRAIL LENGTH

The survey asked people about their preferences on trail length. Approximately 35% of respondents preferred medium length trails that are 0.5 to 4 miles in length. 21% of respondents preferred long trails more than 4 miles long.

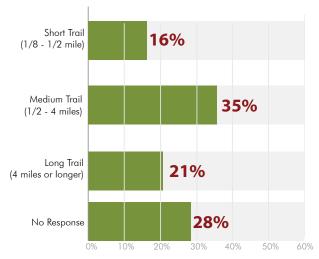

Figure 19 Respondents' preference for trail length

7.1.4 TRAIL TYPES

The survey also asked what type of trail people would prefer to use. Most of them preferred paved trails (24%) compared to non-paved trails (13%). On the other hand, 23% of respondents preferred both paved and non-paved trails.

Table 14 Trail Type Preferences

Responses	#	%
Paved Surface (e.g. concrete, asphalt)	333	24
Non-Paved Surface (e.g. mowed natural area, woodchip, gravel)	182	13
Paved AND Non-Paved Surface	309	23
No response	547	40
Total	1,371	100

7.1.5 TRIPS TO PARKS

More than one quarter (26%) of the respondents travel to parks by driving. About one quarter (23%) of Urbana residents walk to parks, and almost another quarter (22%) of residents bike to parks. Only a very small number of trail users use public transit to get to parks (2%). 2% of the respondents also mentioned other means of transportation to get to the park, such as driving with a friend or getting a ride from someone else, running, and roller skating.

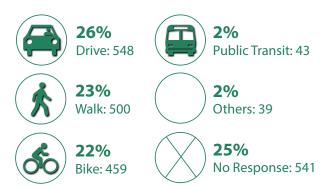

Figure 20 Travel modes to parks

7.1.6 ENCOURAGEMENT FOR BIKING

From a list of five options, respondents were asked what would encourage them to bike to a park. Around 29% of respondents would bike to the park more if more off-street and/or on-street facilities existed. The highest group of residents preferred a connected bicycle network using a combination of on-street and off-street facilities (12%). Separately, 10% of respondents felt that a connected off-street trail system would encourage them to bike to the park; while only 7% of respondents felt that a network of on-street facilities such as bike lanes and routes would encourage them to bike to the park. While 17% of respondents mentioned that they already bike to the park, 10% stated that they would never bike to the park.

Table 15 Biking to parks encouragement preferences & behaviors

Response	#	%
I already bike to the park	246	17
Connected on-street bicycle network	108	7
Connected off-street bicycle network	149	10
Combination of on- and off-street bicycle network	169	12
I would never bike to the park	147	10
Other	82	6
No response	550	38
Total	1,451	100

6% of respondents cited other factors affecting their decision to bike to the park. The most cited factor that would get them to bike to the park is owning a bike, or owning a working bike. Time, having young children not able to bike to the park, and preferring walking or running were also cited by multiple respondents. Other desires to persuade people to bike to the park are more bike parking, more destinations besides Meadowbrook Park, and longer park trails. Some respondents stated that they are fine using the streets without special facilities, while others wanted better maintained roads that are less bumpy or have bike lanes cleared of debris.

7.2 PUBLIC MEETING SERIES #1

CUUATS hosted the first series of public workshops for the UTMP and UBMP in February 2014 to solicit Urbana residents' input about bicycle, trail, and park facilities in Urbana. To engage with residents from all neighborhoods, CUUATS hosted four public workshops at different dates and locations. The meetings' details, including the number of attendees, are provided in the table below:

Туре	Date – Location	# of Attendees					
Community wide	Feb 12, 2014 – Urbana Civic Center	33					
Neighborhood (North Urbana)	Feb 18, 2014 – King Elementary School	14					
Neighborhood (East Urbana)	Feb 19, 2014 – Urbana Early Childhood School	9					
Neighborhood (Latino Community)*	Feb 20, 2014 – Leal Elementary School	2					
*This neighborhood n	*This neighborhood meeting was conducted in Spanish.						

In all public workshops, attendees were asked to indicate their bicycling and/ or walking trip origin and destination(s). For trip origin, there was a trip origin map depicting Urbana-Champaign-Savoy and attendees placed stickers on the intersection that was closest to their place of residence or their latest trip origin. Also, there were trip destination tables showing top employers, parks, shopping areas, schools and UPD facilities. Attendees placed stickers on the tables to indicate their trip destination(s). The stickers were sorted into four types or colors:

Attendees also participated in a series of group exercises where they drew desired bicycle and trail facilities on each of the five geographical zones in Urbana: North Urbana, West Urbana, Central Urbana, East Urbana and South Urbana.

Individuals also filled out the comment card. The full list of comments received are listed in Appendix E.

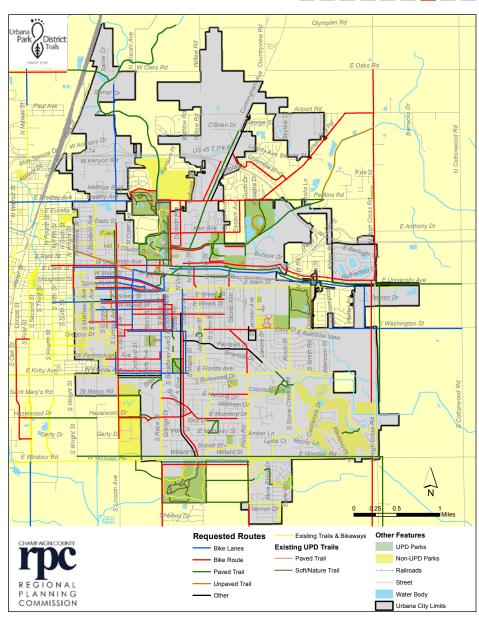

Figure 21 Individual public requested routes

Group exercise at the Urbana Civic Center.

Group exercise at Urbana Early Childhood School.

Below is a summary of the responses received during the first series of public workshops:

- When asked why participants were interested in the UBMP & UTMP, around half cited use of active transportation for recreation, while another 35% cited use of active transportation for commuting to work or school. Around 18% of the participants also mentioned other reasons of interest for these projects.
- When asked which active mode of transportation participants used to reach their destination, 185 were bicycle votes, and 65 were pedestrian votes.

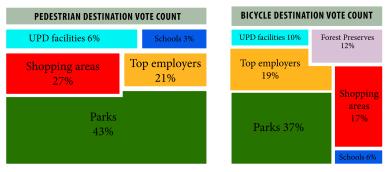

Figure 22 Pedestrian and Bicycle destinations vote count

- Parks received the most votes as a destination either by walking or bicycle. Parks received 43% of the votes as a pedestrian destination and 37% as a destination by bike.
- Top 5 voted pedestrian destinations were: Downtown Urbana (8), University of Illinois (8), Blair Park (5), Meadowbrook Park (5), Crystal Lake Park (3) and Leal Park (3).
- Top 5 voted bicyclist destinations were: Meadowbrook Park (21), University of Illinois (12), Downtown Urbana (11), Market at the Square (10) and Homer Lake Forest Preserve (10 votes).
- All comments collected on the UBMP and UTMP interactive map websites and comment cards were organized by subject. Those subjects are listed on the wordle in Figure 24.

7.3 PUBLIC MEETING #2

CUUATS hosted the second public workshop for the UTMP and UBMP on April 23, 2014 in the Urbana Middle School Cafetorium. 20 people attended.

Public Workshop #2 exercise.

Public Workshop #2 exhibit boards.

Participants voted for their top desired labeled segments of the proposed bicycle and trail network segments in each of Urbana's five geographical zones: North Urbana, West Urbana, Central Urbana, East Urbana and South Urbana.

Participants were also given two votes for their top desired proposed noninfrastructure recommendations in each of the following categories: Education, Encouragement, Enforcement and Evaluation. Below is a summary of the responses received during the Public Meeting #2:

- 296 votes were received from the workshop's five neighborhood zone maps, and 135 segments of the proposed network were voted on.
- Top three voted facilities were:
 - Shared-Use Path / Paved Trail 72 votes
 - Bike Route 37 votes
 - Bike Lanes 12 votes
- Most desired paths were:
 - Florida Avenue South Sidepath (Lincoln-Race) 11 votes
 - Washington Street Bike Route (Race-Vine) 9 votes
 - Kickapoo Rail-Trail (Smith-E city limits) 8 votes
 - Broadway Avenue West Sidepath (Country Club-Park) along Crystal Lake Park– 7 votes

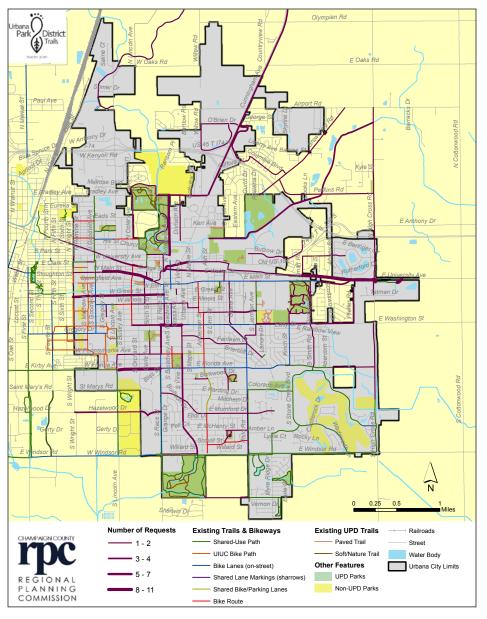

Figure 23 Public preferred recommended routes

Figure 24 "Wordle" of Public Comments received in Public Meetings #1 and #2

- o Green Street (Wright-Race) 6 votes
- o Boneyard Creek Path (Maple-Race) 5 votes
- Non-infrastructure vote counts were as follows:
 - o Education 26 votes
 - o Encouragement 28 votes
 - o Enforcement 29 votes
 - o Evaluation 28 votes
- Many written comments involved bike parking, education, and maintenance (see Appendix F).
- All comments collected during the second public meeting were organized by subject. Those subjects are listed in Figure 24.

8 RECOMMENDATIONS

chapter presents proposed trail system recommendations for the Urbana Park District to implement in Urbana. The recommendations are based upon the previous steps of the planning process, which include public outreach activities and research and analysis of the inventoried Urbana parks and trails. All possible alternatives for the trail system were presented throughout these processes and have gone through rigorous consultation and updating. The recommendations presented here are aligned with the overall goals and objectives of this plan. Besides public consultation, these are the results of collaboration between CUUATS staff and Urbana Park District staff, as well as direction from the Urbana Park District Trails Master Plan (UTMP) steering committee and Urbana Park District Advisory Committee (UPDAC).

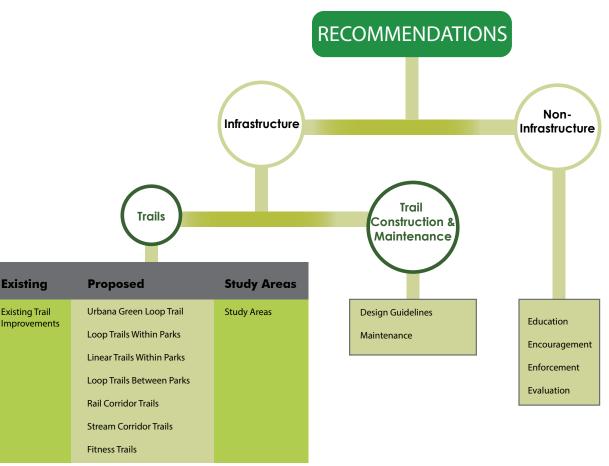

Figure 25 outlines the infrastructure and non-infrastructure recommendations in this chapter.

8.1 RECOMMENDED TRAIL & BIKE NETWORK

recommendations in conjunction with the City of Urbana Bicycle Master Plan to ensure appropriate on-street connections between Urbana Park District facilities and consistency among both plans.

Figure 27 shows the recommended trail and bicycle network map for the north half of Urbana, and **Figure 28** shows the recommended trail and bicycle network map for the south half of Urbana.

Trail and bikeway types are discussed in Chapter 6 (Facility Types).

RECOMMENDATIONS 1 2 3 4 5 6

Figure 25 UTMP Recommendation Types

For the purposes of this plan, **timeframes** are generally defined as such:

- Short-Term = 0-5 years (2015-2020)
- Medium-Term = 6-10 years (2021-2025)
- Long-Term = 11+ years (2026 and beyond)

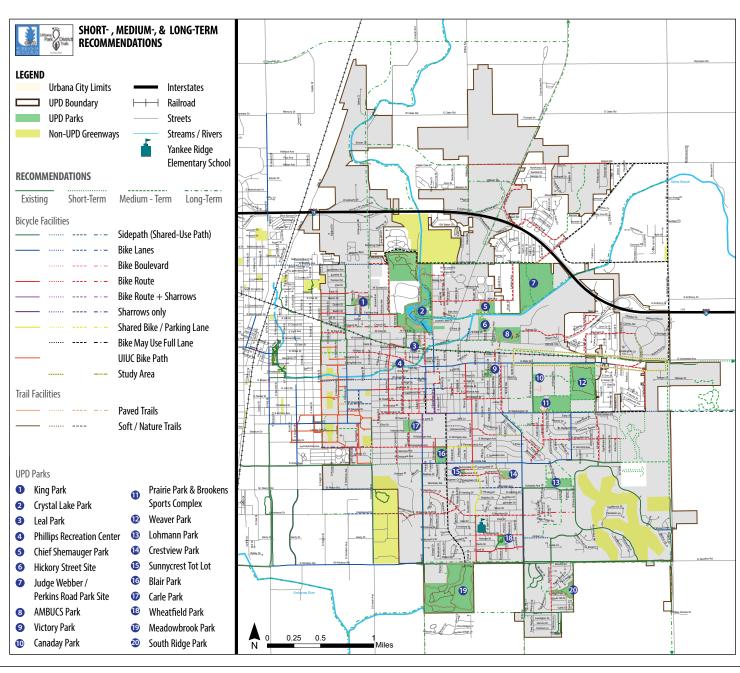

Figure 26 Proposed Short-, Medium-, and Long-Term Recommendations

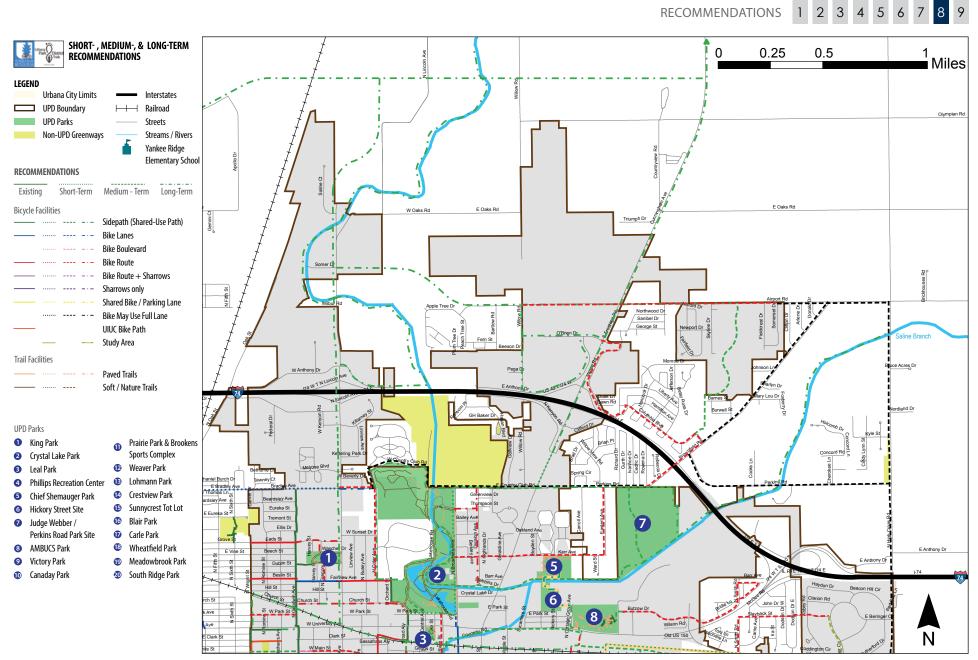

Figure 27 Proposed Short-, Medium-, and Long-Term Recommendations in North Urbana

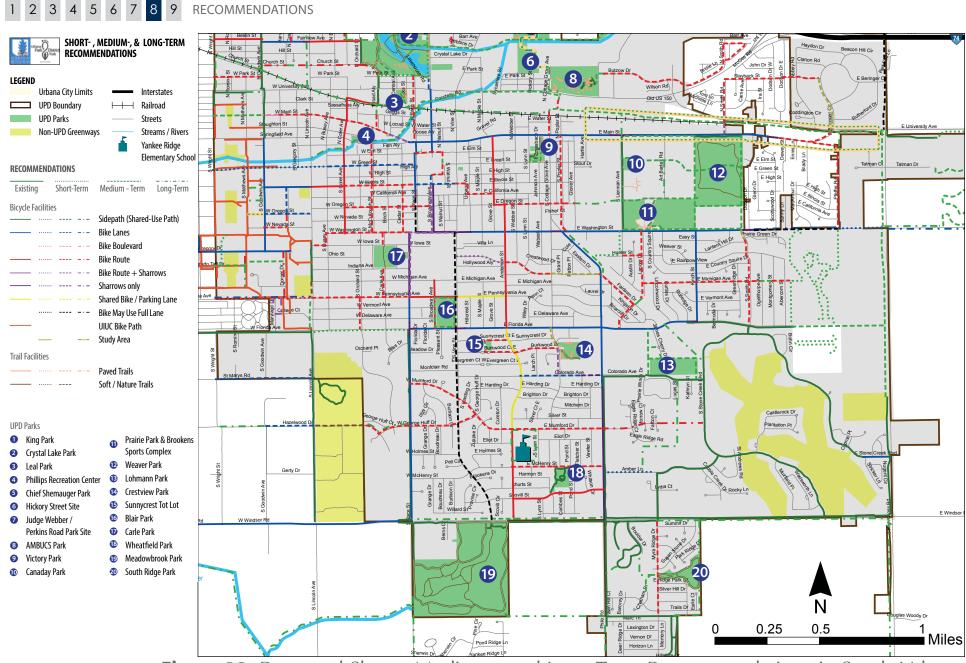

Figure 28 Proposed Short-, Medium-, and Long-Term Recommendations in South Urbana

8.1.1 EXISTING TRAIL IMPROVEMENTS

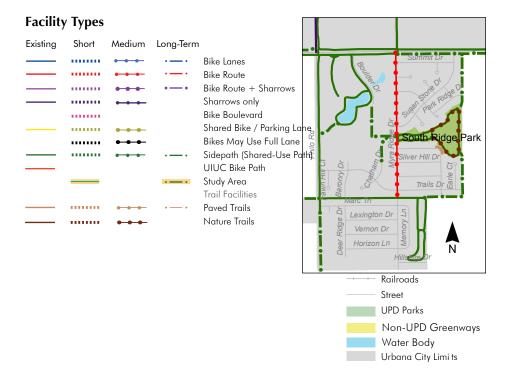

The following improvements are recommended for the existing loop trail around South Ridge Park.

SHARED-USE TRAIL

The existing trail on the west half of South Ridge Park should be widened to 10 feet. A new 0.03 mile north-south shared-use trail should be constructed in the middle of the park to connect the north and south legs of the trail. This will provide improved accessibility to the park's playground and picnic areas.

NATURE TRAIL CONVERSION

The existing trail on the east half of South Ridge Park should be converted to a nature trail comprised of crushed gravel, with appropriate interpretation of the park's natural features.

8.1.2 URBANA GREEN LOOP

A signature recommendation of this plan is the establishment of the **Urbana Green Loop** trail. A model for the Urbana Green Loop is the Davis, California Bike Loop⁷, implemented in 2007. Davis is a Platinum Level Bicycle Friendly Community, the highest level awarded by the League of American Bicyclists, and has long been a leader in bicycle friendliness.

The Davis Bike Loop is a 12 mile long route through the Greenbelt that passes through most of the major pieces of bicycle infrastructure in Davis. The route is suitable for walking, jogging or bicycling. It runs mostly on paths and trails, but has some sections on guiet residential streets. The route was chosen to be safe and pleasant, but not too fast. It is suitable for casual bicyclists who don't mind going slow and yielding to pedestrians, young riders, old riders, and new riders.

Figure 29 Davis, CA Bike Loop

The route is designed to be used as a navigable route for children, so parents can send their children on a safe, easy-to-follow route.⁷

The **Urbana Green Loop** is intended to connect Urbana neighborhoods, Downtown Urbana, and the University of Illinois to all Urbana Park District parks and facilities. It is intended to be a family-friendly path, available to users of all ages and abilities, and inviting to both residents and visitors to explore Urbana.

The **Urbana Green Loop** (Figure 30) is 21 miles in length, consisting of 11.4 miles of existing facilities, 8.6 miles of proposed facilities, and a 1 mile study area. Both existing and proposed trails are included on the loop to connect all Urbana Park District facilities and parks and thus improving the range of local destinations accessible on foot or by bike for residents using the trails. This length of trail will allow for long distance non-motorized recreational trips of 4 miles or longer, which 21% of Urbana Pedestrian and Bicycle Survey (PABS) respondents preferred (see Section 7.1.3).

Davis Wiki. Davis Bike Loop. http://daviswiki.org/Davis_Bike_Loop

1 2 3 4 5 6 7 8 9 RECOMMENDATIONS

While there are numerous existing and proposed trail access points throughout the network, **Figures 30-31** and **Table 16** detail the loop segments from the most northwest park of Urbana (i.e. King Park) in a clockwise direction. Each part of the loop has a corresponding recommendation table starting from King Park and detailing the segment number, location, length, category, category type, and agency responsible (**Table 16**).

The **Urbana Green Loop** includes both existing (shown in solid lines) and recommended (shown in dashed lines) facilities (**Figures 30-31**). The maps show a number of on-street connections as part of the loop. These connections were identified as key links between parks, trails and recreational facilities.

In addition to these, **Orange Connections** to the University of Illinois and other potential connections to Champaign and Savoy are also shown to present potential regional connections to the Urbana Green Loop. CCRPC staff will work with other local agencies to potentially realize these connections through implementation of the 2014 Champaign County Greenways & Trails Plan and the development of the 2016 Champaign Park District Trails Master Plan.

The ambitious nature of the **Urbana Green Loop** goes beyond the capacity of the Urbana Park District to implement. This system is achievable only through cooperation with the following agencies listed below, in the *Agency Responsible* column of **Table 16**, and again in **Table 17**; along with community support and continued pursuit of trail development:

- 1. City = City of Urbana
- 2. County = Champaign County
- 3. CUMTD = Champaign-Urbana Mass Transit District
- 4. IDOT = Illinois Department of Transportation
- 5. UIUC = University of Illinois at Urbana-Champaign
- 6. UPD = Urbana Park District
- 7. Township = Urbana Township

ON-STREET CONNECTIONS

CUUATS staff have developed bicycle and trail network recommendations in conjunction with the City of Urbana Bicycle Master Plan to ensure a safe and easy-to-navigate system for all Urbana residents (**Figure 26**). The main purpose is to provide transportation alternatives to access a wide range of recreational activities, varying length of space for walks and runs, and for exploring different parts of the city; thus, promoting healthy lifestyles and improving residents' quality of life.

On-street connections are necessary for the **Urbana Green Loop** because they are the only feasible, cost-effective and/or direct routes between parks. Many families should be able to safely navigate low-traffic routes on foot or bike, or use adjacent sidewalks.

8.1.3 LOOP TRAILS WITHIN PARKS

The proposed **Urbana Green Loop** offers a series of smaller loops in and around twelve Urbana parks (including South Ridge Park described in Section 8.1.1). These loops provide a wider variety of options for people to tour Urbana parks, thereby exercising and experiencing the natural beauty of the parks while using the trails.

KING PARK LOOP TRAIL

0.4 miles Length: **Existing Section:** 0.35 miles **Proposed Section:** 0.05 miles

Description: The King Park Loop Trail is already in place on the north, south and west sides of the

park. A sidepath along the west side of Lincoln Avenue is proposed on the east side of

King Park.

Recommendation: Medium-Term Sidepath (east)

Connecting Facilities: Lincoln Ave Sidepath (Proposed)

King Park Path Connector to Goodwin Avenue Sidepath (Existing)

Gregory St Bike Route (Proposed)

Other Nearby Destinations: King Elementary School

CRYSTAL LAKE PARK LOOP TRAILS

Length: **Existing Section: Proposed Section:**

Description: An existing sidepath parallels Church Street, Lakehouse Road, and Thompson Street extended. The

short-term recommendation is to widen the existing sidewalk along Broadway Avenue to a sidepath,

and construct a sidepath along Park Street to create a medium-sized loop. The medium-term

recommendation is to convert the inner lane of Lakehouse Road to a two-way divided shared-use path to replace the existing sidepath and create a small loop, and retain the outer lane of Lakehouse Road as a one-way vehicle travel lane from Park Street to Broadway Avenue. The long-term recommendation is to extend the sidepath along Country Club Road, Coler Avenue, and Fairview Avenue to create a large

loop including Busey Woods.

Recommendations: Short-Term Sidepaths (east, south), Medium-Term Trail (interior), Long-Term Sidepaths (north, west)

Connecting Facilities: Thompson St Bike Route (Proposed)

Burkwood Ct E Bike Route (Proposed)

Other Nearby Destinations: Crestview Park, Wiley Elementary School, Blair Park

Railroads Street **UPD Parks** Non-UPD Greenways Water Body Urbana City Limits

LEAL PARK TRAIL

0.09 miles Length: **Existing Section:** 0 miles **Proposed Section:** 0.09 miles

Description: The existing paved trail from the park's parking lot in the northwest corner of the

> park to the southeast corner of the park should be widened to at least 8 feet wide. A short connector trail should also be constructed between Leal Park and the proposed Kickapoo Rail Trail and/or Race Street; UPD will have to work with the landowner of the parking lot between Leal Park and the railroad to create this connection. UPD should also work with IDOT and the City of Urbana if there is an opportunity to connect Leal Park to Crystal Lake Park via Central Avenue using a bike boulevard

concept.

Recommendation: Medium-Term Paved Trails

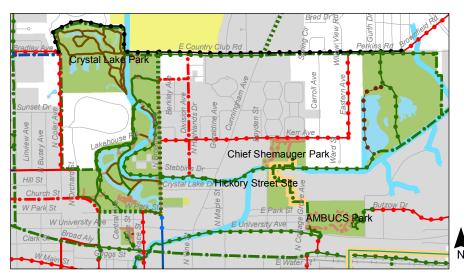

Connecting Facilities: Kickapoo Rail Trail (Proposed)

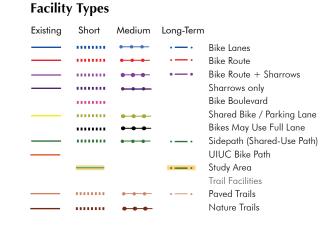

Race Street Bike Route (Proposed)

Other Nearby Destinations: Downtown Urbana, Crystal Lake Park, Phillips Recreation Center

8.1.5 LOOP TRAILS BETWEEN PARKS

Trails and bikeways recommended in this plan would also create connections between several parks in different areas of Urbana. Implementation of these facilities would provide medium-sized loop trails that the majority (35%) of Urbana Pedestrian and Bicycle Survey (PABS) respondents would prefer to use (see Chapter 7), between smaller-sized park loop trails and the larger Urbana Green Loop trail. Trail development along private property between parks (e.g. Saline Branch, Norfolk Southern Railroad) is dependent upon mutual agreement between existing landowners and local governments.

Pomology Path (Philo Rd-Meadowbrook Park; Proposed)

Marc Trail paths (Existing)

Myra Ridge / Deerfield Trails Path (Proposed)

Curtis Rd Sidepath (Proposed)

Race St Sidepath (Existing (north), Proposed (south)) Philo Rd Sidepath (Existing (north), Proposed (south))

High Cross Rd / IL 130 Sidepath (Proposed)

Description:

Shared-use paths in South Urbana have the potential to connect two parks (one **signature**, one neighborhood) totaling 141 acres. Many trail loops could be developed between Windsor Road, Race Street, Curtis Road, and High Cross Road, complementing the existing loop trails at Meadowbrook and South Ridge Parks. The Urbana Park District should support opportunities for trail development if road reconstruction and/or land development occurs in this area.

8.1.6 RAIL CORRIDOR TRAILS

Trail development along private property (e.g. Norfolk Southern Railroad) is dependent upon mutual agreement between existing landowners and local governments.

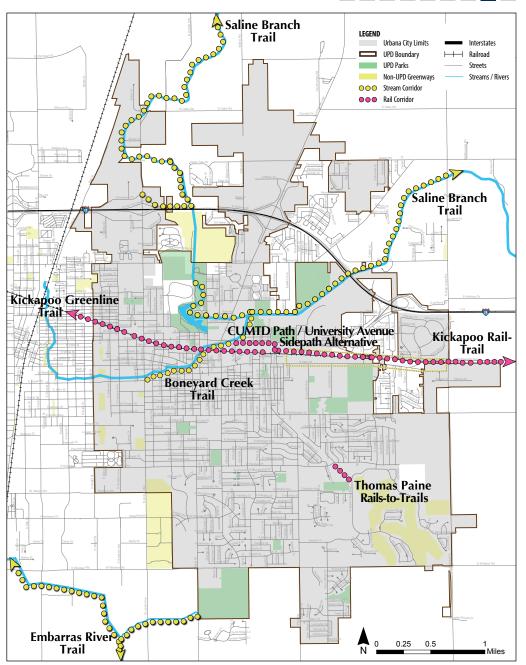

KICKAPOO RAIL-TRAIL (KRT)

The Champaign County Forest Preserve District nows owns the abandoned rail corridor land east of Smith Road in Urbana. Norfolk Southern Railroad owns the rail corridor and track west of Smith Road.

Recommendations for the east-west rail corridor along the University Avenue corridor include the following:

- 1. Continue to support acquisition and construction efforts to build the 24.5 mile Kickapoo Rail-Trail from Urbana to Kickapoo State Park in Vermilion County, working with the Champaign County Forest Preserve District (CCFPD), Champaign County Design & Conservation Foundation (CCDCF), and Vermilion County Conservation District (VCCD).
- 2. Work with the City of Urbana to establish a safe, efficient trail connection into Urbana. Evaluate the best connection from the KRT terminus at High Cross Road along the University Avenue/Main Street corridor between High Cross Road and Hartle Avenue (see study area outline on map), preferably establishing a trailhead at Weaver Park.
- 3. Work with the City of Urbana, Champaign-Urbana Mass Transit District (CUMTD), Champaign Park District, City of Champaign, and Illinois Department of Transportation (IDOT) to extend the KRT as the "Kickapoo Greenline Trail" into Downtown Urbana and Downtown Champaign. Investigate the alternative to a rail-with-trail of diverting the KRT north along the east side of the CUMTD property, continuing west as a sidepath along University Avenue, and connecting to Downtown Urbana via the proposed Boneyard Creek Trail.

Figure 32 Recommended rail and stream trail corridors

THOMAS PAINE RAIL-TO-TRAIL

Continue to explore the rail-to-trail acquisition and development opportunity along the former Norfolk & Western Railroad corridor running northwest and southeast from Florida Avenue to Stone Creek Boulevard east of Thomas Paine Elementary School.

8.1.7 STREAM CORRIDOR TRAILS

Trail development along private property (e.g. Saline Branch) is dependent upon mutual agreement between existing landowners and local governments.

SALINE BRANCH TRAIL

Establish a paved trail along the Saline Branch north and south of the Urbana Country Club.

South of the Urbana Country Club

Construct a paved trail along the Saline Branch connecting Crystal Lake Park, Chief Shemauger Park, Perkins Road/Judge Webber Park, and other natural areas in unincorporated northeast Urbana.

- Lakehouse Road: Convert one lane of this road in Crystal Lake Park to a two-way divided shared-use path, and retain one lane for one-way vehicular traffic leading to Broadway Avenue.
- Stebbins Drive (Broadway Avenue-Division Street): Designate as a Bike Route, existing 5' sidewalk on the south side of the road.
- Stebbins Drive (Division Street-east terminus): Construct 8-10' sidepath on the south side of the road, continuing east along the Saline Branch.

North of the Urbana Country Club

Construct 8-10' sidepath along the Saline Branch Path from Lincoln Avenue at Anthony Drive, continuing north along the Saline Branch.

EMBARRAS RIVER TRAIL

Support construction of an 8-10' paved trail along the Upper Embarras River, continuing south along the Lower Embarras River. Termini include Race Street, connecting to Meadowbrook Park; and First Street in Champaign. This stream corridor runs through the University of Illinois South Farms.

8.1.8 FITNESS TRAILS

Fitness trails are proposed in Crystal Lake Park and Weaver Park, preferably utilizing existing trails. Crystal Lake Park is a candidate for a fitness trail considering its scenic beauty, high frequency of visitors, and focus on short-term improvements by the Urbana Park District.

Weaver Park is close to sports facilities (Prairie Park, Brookens Sports Complex) and also located near low income neighborhoods. Crystal Lake and Weaver Parks are also Signature Parks, which means they serve a wide range of Urbana residents.

Recommendations for the fitness trails include the following facilities:

- 1. Trail Layout Map Create a Fitness Trail layout map for users including the location of exercise stations/equipment together with a list of fitness equipment provided at the site.
- 2. Signage Install 'user' friendly self-guided signs that include graphics and text, describing and illustrating how to use the equipment safely and effectively for people of any physical ability and fitness level.
- 3. Exercise Stations Evaluate probable locations for exercise stations, either grouped together or spaced out over the fitness trail considering site specific trail characteristics such as length, width and available amenities of the trail.
- 4. Fitness Equipment Install fitness equipment and signs along an existing trail or at the exercise station. Explore options to provide the user with an environmentally friendly outdoor fitness system which would be easy to install, is functional, is low cost, needs a low amount of maintenance, and is durable. A list of possible fitness equipment includes but is not limited to:
 - **Balance Beam**
 - Climbing Wall
 - Jumping Station
 - Monkey Bars
 - Multi-level exercise step platforms
 - Parallel Bars
 - Pull Up Bar
 - Push Up Platform
 - Stretching Beam
 - Sit Up Bench

- 5. Other Facilities Identify areas where benches, drinking fountains, garbage cans, trailheads, restroom facilities, picnic shelters, exercise stations, and bike racks are needed; and work to add these facilities when opportunities become available.
- **6. Promotion** Create outdoor exercise equipment brochures to promote the benefits of the fitness trail and thereby improving quality of life so that people will be inspired to use it as part of a healthy and active lifestyle.
- 7. Implementation Develop a timeline for project implementation over the next 5 to 10 years. Encourage cooperation and seek partnership opportunities with Carle Hospital and/or the Champaign-Urbana Public Health District to install equipment and signs, and to promote trail usage.
- 8. Maintenance Provide efficient and high quality maintenance of fitness equipment, trails, and signs.

Crystal Lake Park	Short-Term/
Fitness Trail	High Priority
Weaver Park	Medium-Term/
Fitness Trail	Medium Priority

Figure 33 Fitness trail priorities

8.1.9 STUDY AREAS

Study areas are those sections which need further survey and analysis before determining trail feasibility, type, and alignment. A trail connection between Chief Shemauger Park and the Hickory Street Site as well as the Kickapoo Rail-Trail entry into Urbana are designated as Study Areas. The Urbana Park District should work with the appropriate agencies, such as the City of Urbana and the Champaign County Forest Preserve District, to make project recommendations after the UTMP is completed.

TRAIL CONNECTION OVER THE SALINE BRANCH

Investigate a trail connection between parks north of the Saline Branch (Chief Shemauger Park, Perkins Road/Judge Webber Park) and parks south of the Saline Branch (Hickory Street Park Site, AMBUCS Park). This is an important connection, as not only is there no trail connection between these parks, but there are no roads that cross the Saline Branch between Cunningham Avenue and I-74. Security considerations regarding the Urbana Park District Planning & Operations facilities next to Chief Shemauger Park and UPD storage facilities at the Hickory Street Site must be considered.

KICKAPOO RAIL-TRAIL (KRT) CONNECTION

Work with the City of Urbana to establish a safe, efficient trail connection into Urbana. Evaluate the best connection from the KRT terminus at High Cross Road along the University Avenue/Main Street corridor between High Cross Road and Hartle Avenue, preferably establishing a trailhead at Weaver Park.

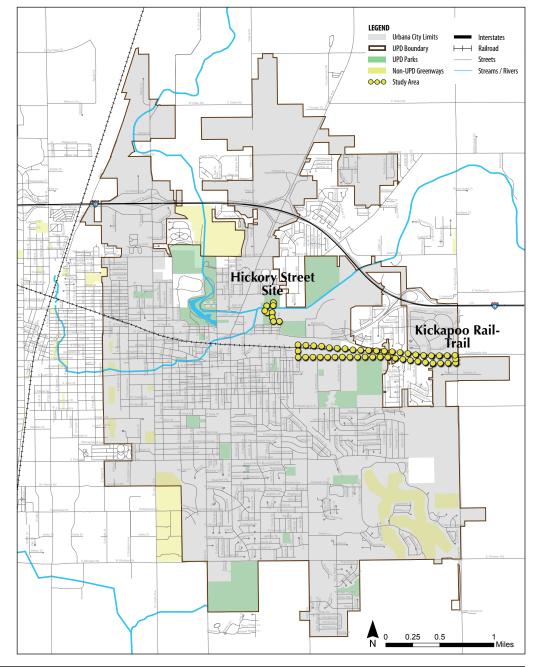

Figure 34 Study areas

8.2 TRAIL CONSTRUCTION AND MAINTENANCE

8.2.1 DESIGN GUIDELINES

The Urbana Park District should follow the latest version of the Champaign County Greenways & Trails Design Guidelines (Appendix H) during all new trail construction and maintenance projects. These guidelines provide guidance for shared-use trails, nature trails, on-street bikeways, crossings, trailheads, rest areas, logos and signage. Signage templates are presented for oval signs, mile marker signs, point of interest signs, arrow signs, and map signs. All guidelines should comply with the most recent versions of the Americans with Disabilities Act (ADA), Illinois Department of Transportation (IDOT) and American Association of State Highway and Transportation Officials (AASHTO) standards as applicable.

Although the Davis Bike Loop uses more pavement markings than signs, if mile marker signs are installed along the Urbana Green Loop, it is recommended to use the most northwest park (King Park) as the start and end point.

Distance (e.g. mileage), direction, and destination (e.g. next closest park, facility, trail, or bikeway) signage is recommended to be installed on trails within Urbana parks and bikeways between Urbana parks. This will help trail users orient themselves and assure them that they are on their chosen route. Trail signage should be used on off-road trails and bikeways only, and bike route signage should be used on on-road bikeways only (see Figures 35-36 below).

Figure 35 Off-street **Trail Signage**

Figure 36 On-street **Bikeway Signage**

8.2.2 MAINTENANCE

Recommendations in this category are meant to keep the trails system in appropriate operating condition.

- 1. Protect green corridors providing and connecting open space.
- Prioritize consistent upkeep and maintenance of trails.
- Through good design practices, minimize weather related obstacles such as ice and mud.
- 4. Prioritize improvements including accessibility to all facilities, facility safety, and improvements to field conditions.
- 5. Define ongoing preventive maintenance needs based on current facility conditions and build sustainable budgets based on this information.
- Implement maintenance plans on trails and bikeways promoting safety, increasing efficiency, and minimizing lifetime costs.
- Increase public awareness of how to report trail condition issues to the Urbana Park District.
- 8. Regularly evaluate existing amenities along trails such as drinking fountains, restrooms/changing rooms, trail maps, seating and interpretive signage.
- 9. Create and organize volunteer programs to provide additional trail maintenance support.
- 10. Schedule trail inspection on a regularly basis. Frequency will depend on the amount of trail usage, location, age and availability of staff.

8.3 NON-INFRASTRUCTURE RECOMMENDATIONS

In addition to development of trails and bikeways, the other 4 E's - Education, Encouragement, Enforcement and Evaluation - are the best way to increase the number of bicyclists and pedestrians using the trail system in a safe manner. Recommendations in this plan are not just about increasing trail use and accessibility, but also taking a holistic approach that includes safety and health. These 4 E's can improve the trail experience in and between parks.

8.3.1 EDUCATION RECOMMENDATIONS

Education and awareness of bicyclists, motorists and pedestrians is vital to increasing bicycling and walking while improving safety and encouraging trail use. It is important to educate not only the bicyclists and pedestrians but motorists as well, so that each group will be aware of their legal rights and responsibilities, safety precautions they can take, and be cognizant of other users.

- 1. K-12 Bicycle Education Curriculum: Work with local schools to incorporate bicycle education into the existing curriculum at the Urbana School District and private schools, such as physical education and health.
 - Potential Partners: Urbana School District, private schools (e.g. University High School), Champaign-Urbana Safe Routes to School (C-U SRTS) Project, Champaign County Bikes (CCB)
- Map Updates and Distribution: Continue updating and distributing maps with existing bicycle and trail facilities as the network continues to grow, including but not limited to: Champaign County Greenways and Trails Map, Champaign-Urbana Bike Guide & Map, and a future Urbana Green Loop Trail Map. Produce an online map or mobile application with existing trails. Work with existing online map sources (e.g. Google) to ensure accuracy of existing trails.
 - Potential Partners: CCB, Ride Illinois, Champaign County Regional Planning Commission (CCRPC), Urbana Park District, City of Urbana, mobile app developers, Google
- 3. Road User Safety Campaigns: Continue to convey the message to encourage bicyclists and motorists to obey traffic laws and show respect to other road users.
 - Potential Partners: C-U SRTS Project, City of Urbana, Champaign-Urbana Mass Transit District (CUMTD)

- 4. Driver's Education Curriculum: Work with local schools and driving schools to incorporate bicycle education into driver's education curriculum, using tools such as the Illinois Bike Safety Quiz.
 - Potential Partners: Urbana School District, private schools (e.g. University High School), driving schools, CCB, Ride Illinois
- 5. Bicycle Ambassador Program: Partner with the University of Illinois to organize a bicycle ambassador program to educate residents at public events.
 - Potential Partners: University of Illinois, City of Urbana
- 6. **Bicycle Rodeos:** Increase volunteer base in order to institutionalize bicycle rodeos at public events and schools for children to learn and improve bicycling skills. Install a permanent bicycle rodeo station in a parking lot.
 - Potential Partners: Urbana Park District (UPD), City of Urbana, Urbana School District, C-U SRTS Project, CUMTD, Champaign-Urbana Public Health District (CUPHD), CCRPC, Parent-Teacher Associations (PTAs), service organizations
- 7. Availability of Materials in Other Languages: Make bicycle education, encouragement, and enforcement materials available on municipal agency websites in at least 1 language besides English.
 - Potential Partners: Urbana Park District, City of Urbana, Urbana School District, CUMTD, CCRPC
- 8. Professional Development: Support Urbana Park District staff attendance at professional development opportunities, such as the Illinois Bike Summit and other conferences, to provide learning, networking, and planning opportunities regarding bicycles and pedestrians.
 - Potential Partners: Urbana Park District, City of Urbana, Urbana School District, CUMTD, CCRPC, University of Illinois
- 9. Public Participation: Continue to provide at least one opportunity per new trail or bikeway project for citizens to express concerns over trail or bicycling issues and public reaction to new treatments.
 - Potential Partners: Urbana Park District Advisory Board (UPDAC); City of Urbana, particularly the Bicyclist and Pedestrian Advisory Commission (BPAC): bike@illinois.edu
- 10. Adult Bicycle Education: Offer bicycle education opportunities for adults to educate them about rules of the road, how to properly handle a bicycle in traffic, and how to respectfully share the road with other users.

Potential Partners: Urbana Park District, Urbana School District (Urbana Adult Education), CCB, League [of American Bicyclists] Certified Instructors (LCIs)

11. Law Enforcement Officer Training: Support law enforcement officer attendance at professional development opportunities regarding the enforcement of bicycle and pedestrian laws, especially as they change.

Potential Partners: Urbana Police Department, University of Illinois Police Department

8.3.2 ENCOURAGEMENT RECOMMENDATIONS

Promotion programs are also important to promote and encourage the use of trails and on-street connection facilities. Encouraging people to bike or walk more improves air quality by reducing the number of cars, and improves health among residents. Encouragement recommendations include:

- 1. **Bike Route & Trail Signage:** Install standardized bike route signage on onroad bikeways only, and standardized trail signage on off-road bikeways and trails, with destination, distance and/or time, and direction information to better inform users.
 - Potential Partners: Urbana Park District, City of Urbana, University of Illinois, Champaign County Forest Preserve District (CCFPD)
- **2.** *Bicycle Friendliness Promotion:* Promote Urbana as a bicycle friendly community, and local bicycle friendly businesses to demonstrate community support for and usage of active transportation.
 - Potential Partners: City of Urbana, University of Illinois, CCB, CUMTD, Urbana Business Association (UBA), businesses
- **3. National Bike Month:** Continue to celebrate National Bike Month in May by hosting Bike Month, Bike to Work Day, Bike to School Day, Bikes on Campus Day and Bike to Market Saturdays.
 - Potential Partners: CCB, C-U SRTS Project, City of Urbana, University of Illinois, businesses, sponsors
- **4. Open Streets initiative (car-free streets):** Temporarily close streets to motorized traffic so that people may use them for healthy and fun physical activities like walking, bicycling, dancing, jogging, playing and socializing.

Potential Partners: City of Urbana, CUPHD, University of Illinois, CCB, businesses, sponsors

- 5. Support for Advocacy Organizations: Support existing advocacy organizations to increase their capacity to carry out bike and trail encouragement activities. This includes volunteer and financial support from local organizations for the C-U Safe Routes to School (SRTS) Project, as this program will struggle to survive without SRTS grant funding.
 - *Potential Partners:* Urbana Park District, City of Urbana, CCB, Prairie Cycle Club, Ride Illinois, CUPHD, Urbana School District
- **6.** *Trail Dedication Events & Rides:* Hold events to celebrate new and/ or rehabilitated trails, such as ribbon-cutting ceremonies and bike rides, especially to showcase destinations along the route.

Potential Partners: Urbana Park District, City of Urbana, UBA, CCB, businesses, neighborhood groups

8.3.3 ENFORCEMENT RECOMMENDATIONS

Enforcement tactics are necessary to create a safe environment for bicycling and walking when using the trail and road system. These recommendations aim to compel public obedience to exercise trail etiquette, follow rules of the road, and to reduce common car-bike and car-pedestrian collision types at trail crossings and road crossings near parks.

- 1. **Light the Night:** Continue annual installation of free bike lights in the fall on the University of Illinois campus coupled with an education component, to keep bicyclists compliant with bike light and riding laws.
 - Potential Partners: City of Urbana, CUMTD, University of Illinois, City of Champaign, The Bike Project (TBP), CCRPC
- **2.** *Bicycle Diversion Program:* Continue education and enforcement campaign to allow bicyclists to waive a first-time fine using Ride Illinois' Bike Safety Quiz.
 - Potential Partners: Urbana Police Department, University of Illinois Police Department, Ride Illinois
- **3.** *Enforce Bicyclist Violations:* Continue issuing warning citations and/or ticket bicyclists for traffic offenses, such as riding against traffic, disregarding traffic signals (unless the cyclist has legally waited 2 minutes for a light to change) and stop signs, and riding without lights at night.
 - *Potential Partners:* Urbana Police Department, University of Illinois Police Department

RECOMMENDATIONS

4. Enforce Motorist Violations: Continue issuing warning citations and/or ticket motorists for traffic offenses against bicyclists, such as failing to stop for bicyclists at intersections.

Potential Partners: Urbana Police Department, University of Illinois Police Department

5. Trail Safety & Security: Create partnership between the Urbana Park District and the Urbana Police Department to promote safety and security of existing and proposed trail facilities.

Potential Partners: Urbana Park District, Urbana Police Department

6. Off-Campus Light the Night Event: Pursue opportunities to install free bike lights in the fall in other areas of Urbana, especially low-income neighborhoods, coupled with an education component, to keep bicyclists compliant with bike light and riding laws.

Potential Partners: Urbana Park District, City of Urbana, CCB, TBP, neighborhood groups

8.3.4 EVALUATION RECOMMENDATIONS

Various qualities of the trail and bikeway system should be assessed regularly for success and improvement. This section proposes some evaluation procedures:

1. Trail Counts: Conduct counts before and after trails and bikeways are installed.

Potential Partners: City of Urbana, CCRPC, Illinois Department of Transportation (IDOT)

2. Bicycle Level of Service (BLOS): Continue to update the Urbana BLOS Database to measure existing and future conditions, and evaluate different measurements of bike friendliness if different tools become available.

Potential Partners: City of Urbana, CCRPC

3. Pedestrian & Bicyclist Crash Studies: Continue to analyze pedestrian and bicyclist crash data as part of the CUUATS Selected Crash Intersection Locations (SCIL) Report.

Potential Partners: City of Urbana, CCRPC

4. Pedestrian and Bicycle Survey (PABS): Conduct the Urbana PABS survey every five years to measure existing pedestrian and bicycle behavior and attitudes.

Potential Partners: City of Urbana, CCRPC, Urbana Park District

- 5. **Economic Impact of Trails:** Take advantage of opportunities to measure the economic impact of trail and bicycle facilities and events on Urbana's economy.
 - Potential Partners: Urbana Park District, City of Urbana, CCRPC, University of Illinois, Ride Illinois, Trails for Illinois, CCFPD
- 6. Annual Performance Measure Assessment: Identify a lead Urbana Park District staff member(s) to assess the progress of this plan's goals and objectives using the performance measures in Chapter 5 and Appendix B, as projects occur and/or each year after January 1st. Submit a report to the Urbana Park District Advisory Committee (UPDAC) and Board of Commissioners, post it to the Urbana Park District website, and incorporate information into the press release about completed and current trail construction projects.
- 7. Trails Plan Updates: Update the Urbana Park District Trails Master Plan (UTMP) every 5 years, completing the next plan update by 2020, and making plan amendments between plan updates if necessary.

IMPLEMENTATION

9.1 HIGH PRIORITY INFRASTRUCTURE RECOMMENDATIONS

Figure 37 lists the high priority infrastructure recommendations from this plan that the Urbana Park District should primarily focus on implementing in the next 5 years (2016-2020). Some of these are large projects, and may be good candidates for grant applications. Some of these projects require interagency cooperation, and the Urbana Park District should continue interagency cooperation when needed for implementation of any trail project.

Urbana Park District Trails Master Plan (UTMP) High Priority Infrastructure Recommendations

- 1) Crystal Lake Park Trail Improvements
- a) Widen Broadway Avenue sidewalk
- b) Construct sidepath on Park Street
- c) Install fitness trail
- 2) AMBUCS Park Small Loop Trail
- 3) Urbana Park District Capital Improvement Plan (CIP) funding Dedicate at least 5% of UPD CIP funding annually to trail construction and maintenance
- 4) Kickapoo Rail Trail
- a) Continue to support construction of the trail from Urbana to points
- b) Work with the City of Urbana to determine the best trail alignment into East Urbana, potentially using Weaver Park as a trailhead
- 5) Urbana Green Loop Trail Work with the City of Urbana and other agencies to install missing loop

Figure 37 UTMP High Priority Infrastructure Recommendations

9.2 IMPLEMENTATION MAPS & MATRICES

Figure 38 lists the Urbana Park District Trails Master Plan projects by timeframe (short-term, medium-term, and long-term), as well as the two projects that are study areas.

Figures 39-41 show the proposed Urbana trail and bicycle network improvements by timeframe: 0-5 years, 6-10 years, and 11+ years respectively.

The short-, medium-, and long-term priorities may change according to available funds, changing priorities, new bike and pedestrian facilities, new development and redevelopment opportunities, or with other factors. Therefore, it is recommended to review these projects periodically after the UTMP is completed. It is also recommended to update this plan at least every five years.

The full list of trail and bikeway network improvement projects include the following details:

- Project location
- Treatment type
- Agenc(ies) responsible
- Proposed timeframe of facility installation
- Future status of on-street parking
- Other relevant comments (e.g. temporary facilities, sidepaths that are part of a loop path)
- Estimates of striping, signage, and/or construction cost (based on information from the Pedestrian and Bicycle Information Center (PBIC))

Table 18 organizes the implementation matrix by treatment type. Streets and path names are alphabetized under each treatment type. The recommended side of the street is usually listed for sidepaths. Alignment is described for off-street paths.

Table 19 shows the implementation matrix by the agency responsible for installing the facility, and is further divided by timeframe. A total cost of recommended improvements is also listed for each agency. The table first lists single-party responsibilities, then multi-party responsibilities. Costs do include such things as striping, signage, and pavement markings.

Table 20 displays the implementation matrix by timeframe of implementation. These periods are broken into 0-5 years, 6-10 years, and 11 years or more.

Separate plans showing specific designs and each stage of the work should be prepared. Such plans help identify and avoid any gaps in the network. Plans

should be publicized in the following manners, but not limited to these methods:

- 1. Project open houses
- 2. Urbana Park District website (http://www.urbanaparks.org/)
- 3. Urbana Park District social media (Facebook, Twitter, Instagram)
- 4. Neighborhood listservs

Figure 38 UTMP Infrastructure Recommendation Timeframes

SHORT-**TERM**

- 1. AMBUCS Park Small Loop Trail
- Broadway Avenue Sidepath (Park St Country Club Rd)
- Crystal Lake Park Fitness Trail

- 4. Kickapoo Rail-Trail (East City Limits High Cross Rd)
- Park Street Sidepath (Broadway Ave McCullough St)
- 6. Sunnycrest Tot Lot Trail

- 1. Hickory Street Site Study Area (Chief Shemauger Park AMBUCS Park)
- Kickapoo Rail Trail Study Area (High Cross Rd Hartle Ave)

MEDIUM-**TERM**

- 1. Art Bartell Road Trail
- Bakers Lane Trail
- Blair Park Loop Trail
- Boneyard Creek Path (Maple St Main St)
- Canaday-Weaver Park Trail
- 6. Chief Shemauger Park Small Loop Trail
- Crystal Lake Park Road Trail Retrofit
- 8. Green Street Sidewalk Widening at Victory Park
- 9. James Cherry Drive Trail to Thomas Paine School
- 10. Kickapoo Rail Trail (Boneyard Creek Path Broad Alley)
- 11. Kinch Street Trail
- 12. Larson Park West Trail
- 13. Leal Park Trail Widening
- 14. Leal Park Kickapoo Rail Trail Trailhead
- 15. Lincoln Avenue Sidepath along King Park

- 16. Lohmann-Florida Trail (Lohmann Park Florida Ave)
- 17. Lohmann Park Loop Trail
- 18. Lynn Street Sidewalk Widening at Victory Park
- 19. Main Street Sidepath
- 20. Perkins Road Park Trail
- 21. Perkins Road Park North Trail
- 22. Perkins Road Park West Nature Trail
- 23. Prairie Park West Trail
- 24. Saline Branch Trail (Stebbins Dr Perkins Rd Park Site)
- 25. South Ridge Park Trail Improvements
- 26. Victory Park Trail Widening
- 27. Weaver Park South Trail
- 28. Weaver Park Fitness Trail
- 29. Washington Street Sidepath

LONG-**TERM**

- 1. AMBUCS Park Long Loop Trail
- AMBUCS Park South & West Trails
- Boneyard Creek Path (Main St Lincoln Ave)
- 4. Chief Shemauger Park Long Loop Trail
- Coler Avenue Sidepath (Country Club Rd Fairview Ave)
- Country Club Road Sidepath (Broadway Ave Coler Ave)
- Crestview Park Loop Trail
- Fairview Avenue Corridor Trail (Orchard St Lakehouse Rd)
- Fairview Avenue Sidepath (Coler Ave Orchard St)

- 10. Lower Embarras River Trail
- 11. Kickapoo Rail-Trail (Hartle Ave Boneyard Creek Path)
- 12. Kickapoo Rail-Trail (Broad Alley Wright St)
- 13. Perkins Road Park East Trail
- 14. Pomology Path (Philo Rd Meadowbrook Park)
- 15. Saline Branch Trail (Perkins Rd Park Site High Cross Rd)
- 16. Thomas Paine Rails-to-Trails (Florida Ave Stone Creek Blvd)
- 17. Upper Embarras River Trail
- 18. Yankee Ridge School Loop Trail

147 URBANA PARK DISTRICT TRAILS MASTER PLAN

9.3 POTENTIAL FUNDING SOURCES

Each year, local governments receive a set amount of funds from federal and state transportation agencies for transportation projects. They also have funding set aside within their own budgets for transportation projects. Local governments allocate most of this funding for roadway projects and only periodically allocate a small part of this funding for pedestrian and/or bicycle projects. Therefore, local agencies must seek funding from external sources for many proposed greenway, trail, and bikeway projects.

In order to combat this, it is recommended that the Urbana Park District dedicate a minimum of 5% of its annual Capital Improvement Plan (CIP) funding to trails.

Potential activities include:

- Construction
- Acquisition
- Widening
- Rehabilitation
- Sign Installation
- Amenity Installation (e.g. lights, benches, bike racks, etc.)

The Urbana Park District should also continue to work with the **Champaign** County Greenways & Trails member agencies on regional trail planning, in case there are funding opportunities that can benefit multiple jurisdictions.

Beyond those member agencies, the Urbana Park District should maintain a relationship with the Champaign-Urbana Public Health District (CUPHD) and Healthy Champaign County (HCC), as funding and resources for trail use and education have become increasingly available from the public health sector.

Trails for Illinois is another organization that the Urbana Park District should investigate working with, especially the Illinois Trails Corps that piloted the "do-ityourself trail building" model in Shelby County, IL in 2014. A young adult service corps and volunteers were recruited to repair, rebuild, and extend nearly 27 miles of hiking, biking and equestrian trails in Shelby County.8

At the state level, the Illinois Department of Natural Resources (IDNR) and Illinois Department of Transportation (IDOT) provide the most access to funding for trails. Those funding sources, along with federal, private, and non-profit sources are listed below, organized by the 5 E's (singular, then multiple categories).

Trails for Illinois. Illinois Trail Corps. http://www.trailsforillinois.org/ILtrailcorps

ENGINEERING

Illinois Bicycle Path Program					
Department: IDNR	Deadline: March 1st	Maximum Amount: \$200,000 for Development Projects, None for Acquisition Projects	Category: Engineering		
Description: The Illinois Bicycle Path Grant Program was created to financially assist eligible units of government acquire, construct, and rehabilitate public, non-					

Description: The Illinois Bicycle Path Grant Program was created to financially assist eligible units of government acquire, construct, and rehabilitate public, nonmotorized bicycle paths and directly related support facilities. Grants are available to any local government agency having statutory authority to acquire and develop land for public bicycle path purposes. Financial assistance up to 50% of approved project costs is available through the program.

Website: http://www.dnr.state.il.us/ocd/newbike2.htm

Illinois Transportation Enhancement Program (ITEP)				
Department: IDOT	Deadline: Set by IDOT	Maximum Amount: N/A	Category: Engineering	

Description: ITEP provides funding for community based projects that expand travel choices and enhance the transportation experience by improving the cultural, historic, aesthetic and environmental aspects of our transportation infrastructure. Project sponsors may receive up to 80 percent reimbursement for project costs. The remaining 20 percent is the responsibility of the project sponsor. A project must qualify as one of the 6 eligible categories listed in the ITEP Guidelines Manual and it must relate to surface transportation to be eligible for funding.

Website: http://www.dot.il.gov/opp/itep.html

National Trails Fund				
Organization: American Hiking Society	Deadline: Mid-December	Maximum Amount: \$5,000	Category: Engineering	
Description: The American Ulling Cociety's National Trails Fund is the cally privately funded mational greats programs dedicated colors to building and protesting billing				

Description: The American Hiking Society's National Trails Fund is the only privately funded, national grants program dedicated solely to building and protecting hiking trails. Created in response to the growing backlog of trail maintenance projects, the National Trails Fund has helped hundreds of grassroots organizations acquire the resources needed to protect America's cherished hiking trails. Grant applicants must be a member of the American Hiking Society Alliance and a 501(c)(3) non-profit organization.

Website: http://www.americanhiking.org/national-trails-fund/

Off-Highway	Vehicle (OHV) Recreation	Program
-------------	--------------------------	---------

Deadline: March 1st Department: IDNR Maximum Amount: N/A Category: Engineering

Description: The OHV grant program provides financial aid to government agencies, not-for-profit organizations, and other eligible groups or individuals to develop, operate, maintain, and acquire land for off-highway vehicle parks and trails. These facilities must be open and accessible to the public. The program can also help restore areas damaged by unauthorized OHV use. The program can provide up to 100% funding reimbursement assistance for approved, eligible project costs.

Website: http://www.dnr.state.il.us/ocd/newohv2.htm

Open Space Lands Acquisition and Development Program (OSLAD) & Land and Water Conservation Fund (LWCF)						
		Maximum Amount:				
Department: IDNR	,	\$750,000 for Acquisition Projects,	Category: Engineering			

Projects

Description: The OSLAD Program is a state-financed grant program that provides funding assistance to local government agencies for acquisition and/or development of land for public parks and open space. The federal LWCF program (also known as LAWCON) is a similar program with similar objectives. Projects vary from small neighborhood parks or tot lots to large community and county parks and nature areas. Both programs provide funding assistance up to 50% of approved project.

Website: http://www.dnr.state.il.us/ocd/newoslad1.htm

People for Bikes (PFB) Community Grants Program					
Organization: People for Bikes	Deadline: Varies; Letter of Interest Required	Maximum Amount: \$10,000	Category: Engineering		

Description: The People for Bikes (PFB) Community Grants Program provides funding for important and influential projects that leverage federal funding and build momentum for bicycling in communities across the U.S. These projects include bike paths, bike lanes, rail trails, bridges, mountain bike trails, bike parks, BMX facilities, end-of-trip facilities, and large-scale bicycle advocacy initiatives.

Website: http://www.peopleforbikes.org/pages/community-grants

Recreational Trails Program (RTP)			
Department: IDNR	Deadline: March 1st	Maximum Amount: N/A	Category: Engineering

Description: This program provides funding assistance for acquisition, development, rehabilitation and maintenance of both motorized and non-motorized recreation trails. Examples of eligible project activities include: trail construction and rehabilitation; restoration of areas adjacent to trails damaged by unauthorized trail uses; construction of trail-related support facilities and amenities; and acquisition from willing sellers of trail corridors through easements or fee simple title. By law, 30% of each state's RTP funding must be earmarked for motorized trail projects, 30% for non-motorized trail projects and the remaining 40% for multi-use (diversified) motorized and non-motorized trails or a combination of either. The RTP program can provide up to 80% federal funding on approved projects and requires a minimum 20% nonfederal funding match.

Website: http://www.dnr.state.il.us/ocd/newrtp2.htm

Snowmobile Grant Program

Department: IDNR Deadline: May 1st Maximum Amount: N/A Category: Engineering

Description: The state-funded Snowmobile Grant Program for local governments is financed from the registration fees of snowmobiles and provides up to 50% reimbursement of approved facility development/rehabilitation costs and 90% of approved trail corridor land acquisition costs for public snowmobile trails and areas in the state. This program is available to any unit of local government located in a region of Illinois with sufficient snow cover and having statutory authority to acquire and develop lands for public park and recreation purposes.

Website: http://www.dnr.state.il.us/ocd/newsnow2.htm

Snowmobile Trail Establishment Fund (STEF)

Deadline: May 1st Category: Engineering Department: IDNR Maximum Amount: N/A

Description: The Snowmobile Trail Establishment Fund (STEF) Program provides financial assistance to incorporated, private snowmobile clubs in Illinois. The STEF Program provides reimbursement funding assistance up to 100% of eligible project costs. Funds for the program come from a portion of snowmobile registration fees collected by the state. Grants may be obtained by local snowmobile clubs to develop and maintain additional public trails and facilities in the state. Although grants are made to private clubs, STEF-assisted snowmobile trails and facilities must be open and available for general public use.

Website: http://dnr.state.il.us/ocd/newstef2.htm

EDUCATION

Illinois Biodiversity Field Trip					
Department: IDNR	Deadline: January 31st	Maximum Amount: \$500	Category: Education		

Description: Grants are only available to teachers in Illinois and should be for the purpose of studying some aspect of Illinois' biodiversity, referring to the variety of life in an area. The field trip site must be in Illinois and can include state parks, natural areas, natural history museums and nature centers. A budget with an itemized list of expenditures to be covered by the grant must be included. Items eligible for funding include: transportation, substitute teachers, admission fees, and guest speakers.

Website: http://dnr.state.il.us/education/Classrm/grants.htm

MULTIPLE E'S

AmeriCorps Funding Opportunities					
Organization: Corporation for National and Community Service (CNCS)	Deadline: Varies	Maximum Amount: Varies	Categories: Engineering, Education		
Description: The Corporation for National and Community Service (CNCS) provides grants through its AmeriCorps program to national and local nonprofits, schools, government agencies, faith-based and community organizations, and other groups committed to strengthening their communities through volunteering. The promotion of environmental stewardship is one of CNCS' six focus areas.					

Website: http://www.nationalservice.gov/build-your-capacity/grants/funding-opportunities

Doppelt Family Trail Development Fund					
Organization: Rails-to-Trails Conservancy (RTC)	Deadline: Varies	Maximum Amount: \$10,000 for Community Support Grants, \$50,000 for Project Transformation Grants	Categories: Engineering, Encouragement		

Description: The Rails-to-Trails Conservancy (RTC) launched a new grant program in 2015 to support organizations and local governments that are implementing projects to build and improve rail-trails. Under the Doppelt Family Trail Development Fund, RTC will award a total of \$85,000 per year for the next five years to qualifying projects through a competitive process.

Website: http://www.railstotrails.org/our-work/doppelt-family-trail-development-fund/

New Belgium Environmental Stewardship Grants Program						
Organization: New Belgium Brewing Company	Deadline: Varies depending on grant strategy	Maximum Amount: \$10,000	Categories: Engineering, Education, Encouragement			
Description: The purpose of New Belgium's Environmental Stewardship Grants Program is to serve and connect with the communities where they sell their beers.						

Their goal is to improve the health of the planet and inspire others to joyously embrace sustainable choices. They focus their grants on the following four strategies to mitigate human impacts on the planet: youth environmental education, sustainable agriculture, sensible transportation & bike advocacy, and water stewardship.

Website: http://www.newbelgium.com/sustainability/Community/Philanthropy.aspx

Pedestrian & Bicycle Safety Program (PBS)						
Department: IDOT	Deadline: Set by IDOT	Maximum Amount: N/A	Categories: Education, Enforcement			
Description: Pedestrian and Bicycle Safety Program (PBS) is designed to aid public agencies in funding cost-effective projects that improve pedestrian and bicycle safety through education and enforcement. The primary focus of this program will be on areas experiencing disproportionately high pedestrian and bicycle crashes and surrounding facilities such as schools, parks, and senior centers.						
Website: http://www.trafficsafetygrantsillinois.org						

1	2 3	4 5	6 7	8 9	IMPLEMENTATION
---	-----	-----	-----	-----	----------------

Maximum Amount: \$200,000 for	
Department: IDOT Deadline: Set by IDOT Infrastructure Applications, \$30,000 for Non-Infrastructure Applications Categories: Engineering Encouragement, Enforcement, Enforc	

Description: The Illinois Safe Routes to School Program (SRTS) is a federally funded program administered by the Illinois Department of Transportation. The Illinois SRTS Program supports projects and programs that enable and encourage walking and bicycling to and from school. The program applies to schools serving grades Kindergarten through 8th grade. Project sponsors may receive up to 80 percent reimbursement for project costs. The remaining 20 percent is the responsibility of the project sponsor.
