

Illinois Public Transit Systems

Public Transit System Definitions

Transit systems below generally receive Federal Transit Administration's (FTA) grants to operate a public transit system. Additionally, there are Illinois state grants that fund public transportation.

Large Urbanized Fixed-Route Bus System is public transportation serving one or more large cities with a 200,000+ population. These systems can be comprised of large fixed routes, bus stops, and a call-ahead complimentary ADA Paratransit service; as well as light/commuter rail service.

Small Urbanized Fixed-Route Bus System is public transportation serving one or more cities of a 50,000+ population. These systems can be comprised large fixed routes and bus stops; as well as a call-ahead complimentary ADA Paratransit service for certified eligible persons with disabilities that will travel at least ¾ mile in any direction around a fixed route.

Rural Municipal Bus System is public transportation with medium sized buses serving a village or city of less than a 50,000 population. Routes and stops vary per system, but could be comprised of fixed routes; deviated-fixed routes; and/or demand response transportation.

Rural Countywide Bus System is public transportation with smaller buses and mini-vans serving one or more rural county areas of less than a 50,000 population. These systems often request call-ahead requests with scheduled pick-ups and drop-offs, known as demand response transit. Sometimes these systems also provide other flexible routes connecting to specific areas. Call-ahead reservations are normally required 24-48 hours in advance; however, same-day call-in(s) are allowed when the transit system's schedule can accommodate the trip request.
