Note: This map is based on Geographic Information Systems (GIS) obtained in 2006 and does not have county approval as a source for official zoning information. The official zoning map can be obtained from the Piatt County Zoning Administrator.

Map 9-11:

Low Density Residential Suitability

Assets are weighted based on their estimated worth towards development. Extents of road assets are based on average daily traffic volume. Constraints are considered unsuitable.

Assets

- Within Municipal Limits (100%)
- Access to public sewer (100%)
- Access to public water (100%)
- Access to major roadways (25%)
- Non-Prime soils (25%)
- Access to Sand/Gravel Aquifer (15%)
- Septic Suitability (10%)
- Existing Residential (25%)

Constraints

- Existing Parks and Natural Areas
- Wetlands
- Floodplain
- Soils subject to flooding

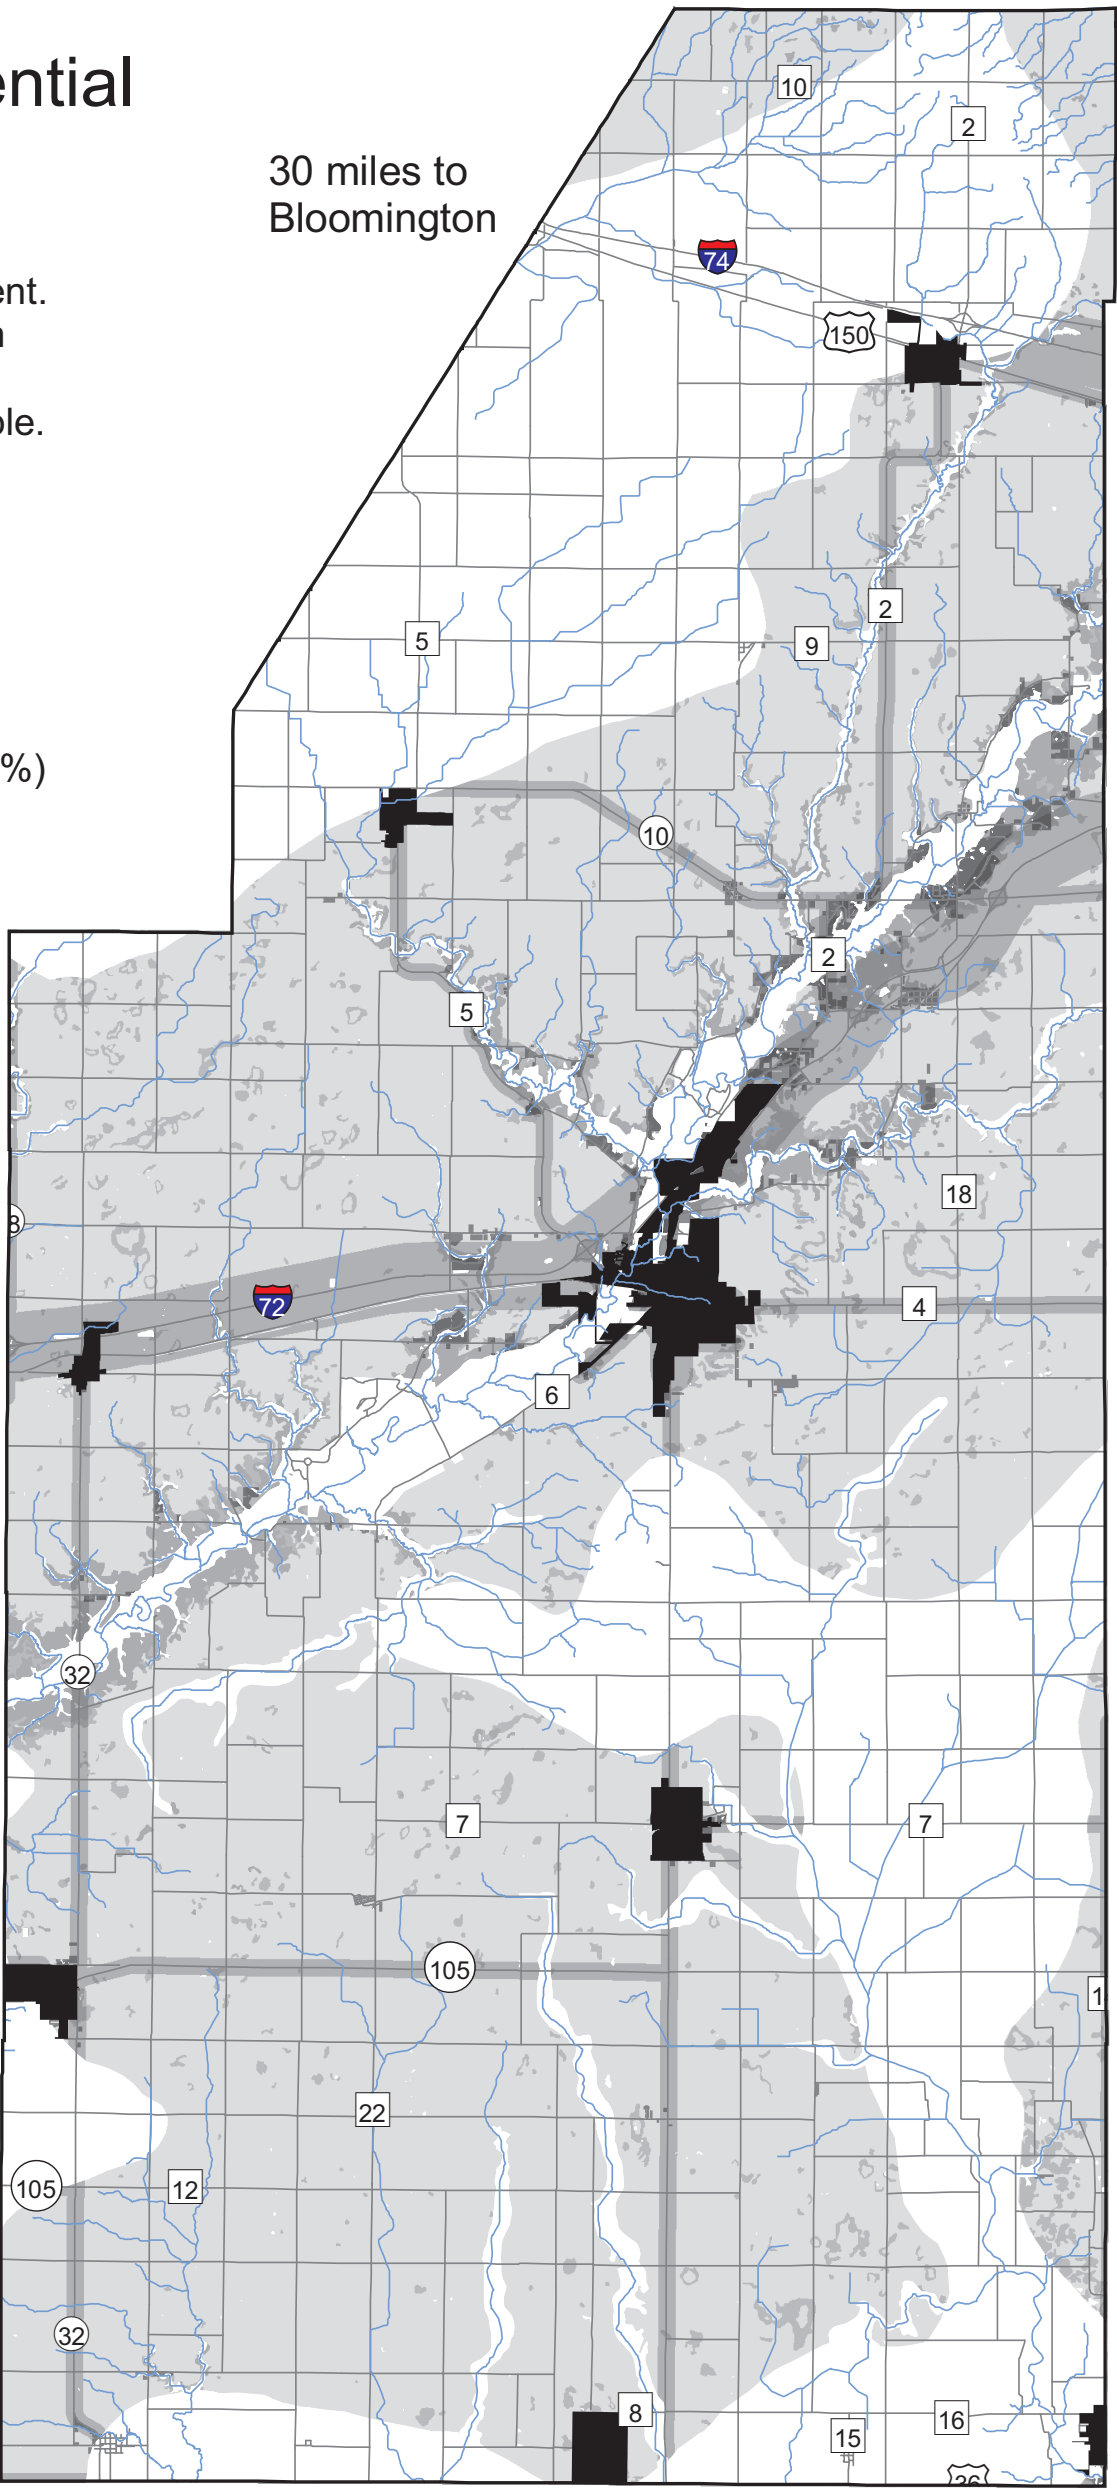

- Streams
- Municipality
- County Hwy
- State Hwy
- U.S. Hwy
- Interstate

- Suitable
- Unsuitable

Map 9-12:

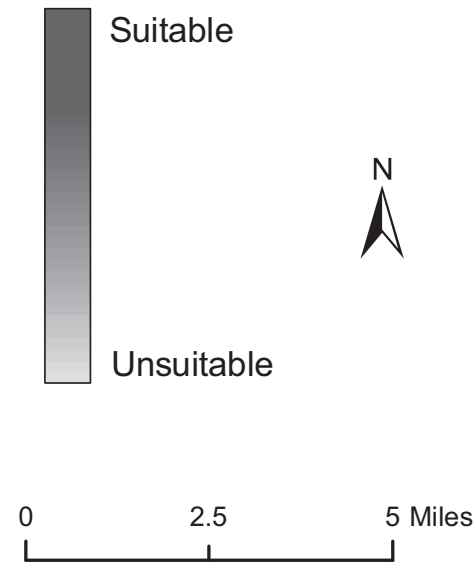

Commercial/Industrial Suitability

Assets are weighted based on their estimated worth towards development. Extents of road assets are based on average daily traffic volumes. Constraints are classified as unsuitable.

- Assets
- Interstate Access (highlighted)
 - Railroads (40%)
 - Access to major roadways (40%)
 - Facility Planning Area (10%)
 - Access to Groundwater (10%)

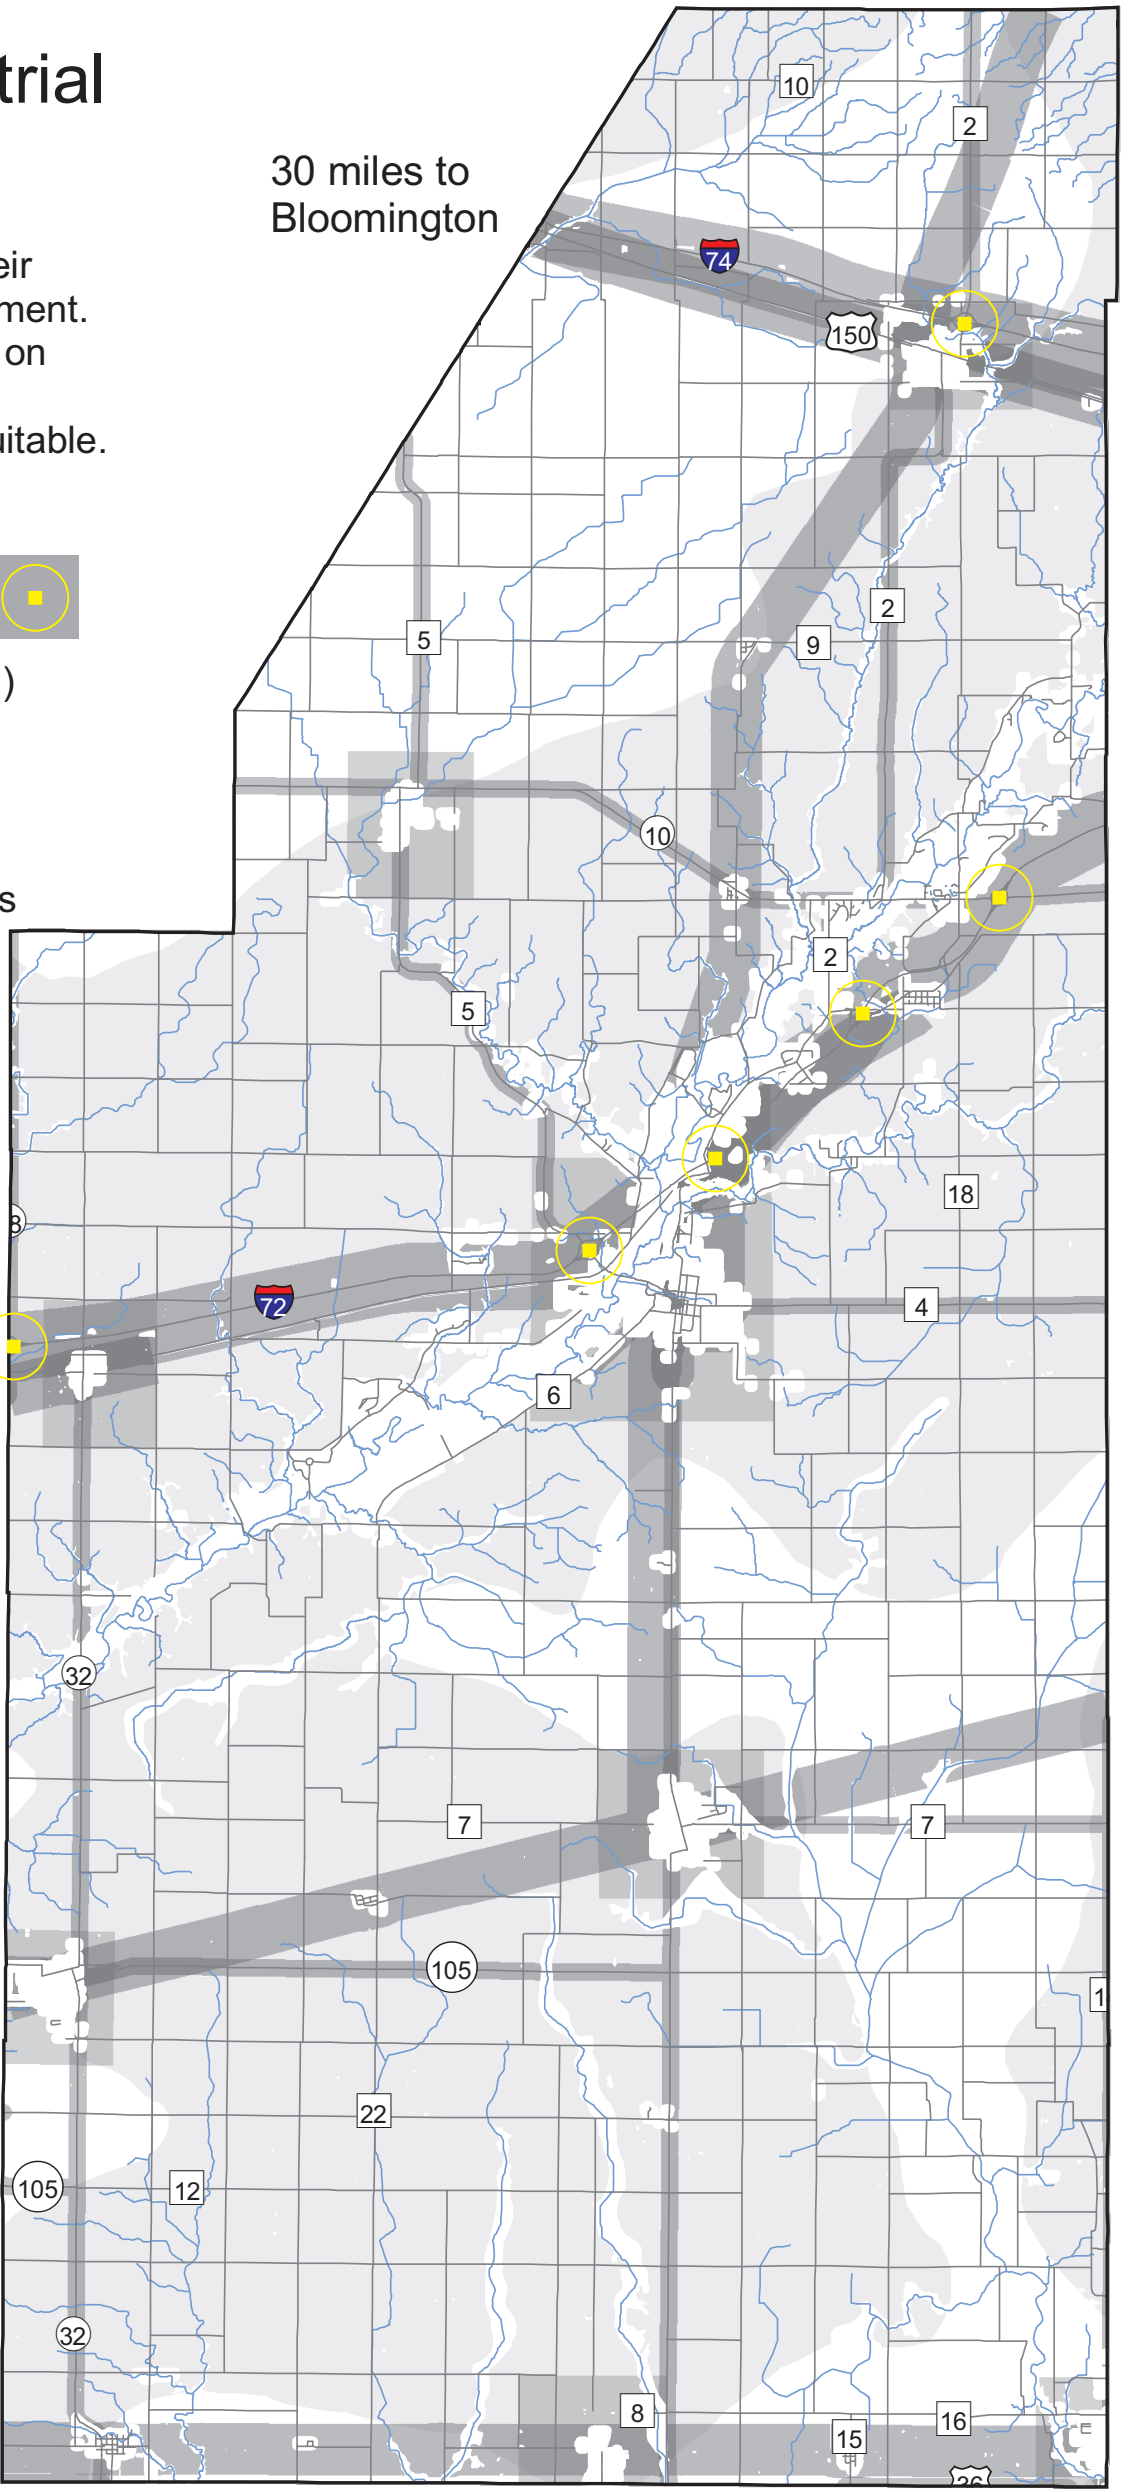

- Constraints
- Existing Parks and Natural Areas
 - Wetlands
 - Floodplain
 - Existing Residential

- Streams
- 10 County Hwy
- 48 State Hwy
- 150 U.S. Hwy
- 74 Interstate

Map 9-13:

Extent of Infrastructure

- Municipal Boundary
- Electric Transmission Line
- Gas Transmission Pipeline
- Railroad
- Interstate
- State Highway
- Residential Clusters
- Score of 60% or greater

Mapping Components (weighted):

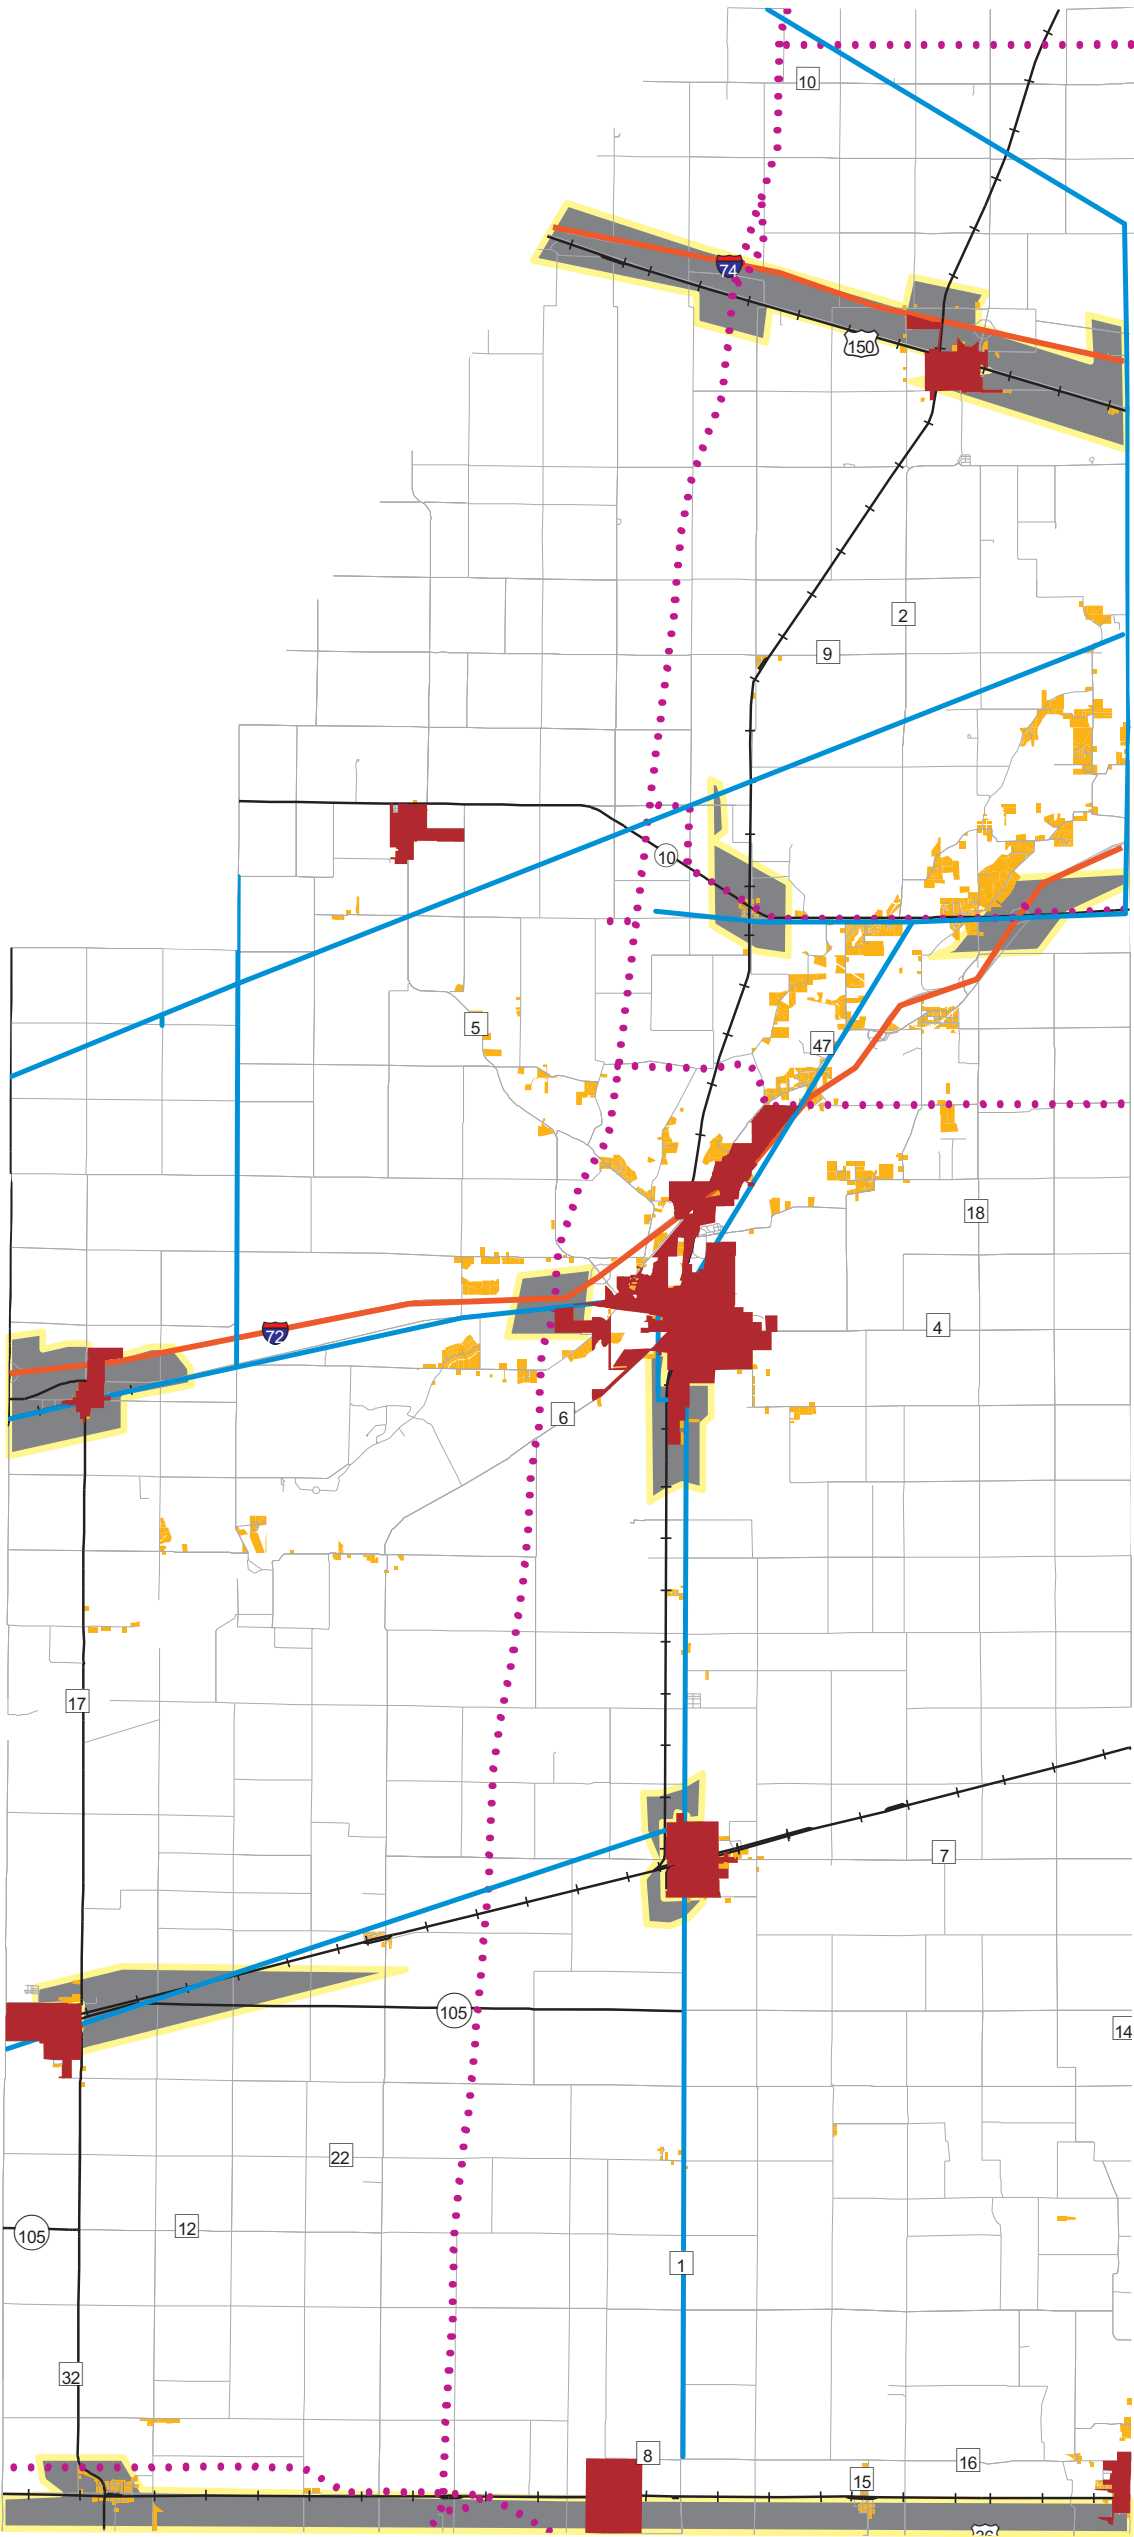

- 1. Rail (30%)
- 2. Interstate (30%)
- 3. State Hwy (20%)
- 4. Natural Gas Pipeline (10%)
- 5. Electric Transmission Line (10%)
- 6. Groundwater Availability (10%)

Total weighting does not equal 100 % because not all of the infrastructure components occur within 1/2 mile.

Preparation Date:
July 2009

This map is intended only for study purposes and does not reflect the recommendations of the Champaign County Regional Planning Commission.

Map 9-14:

Agricultural Suitability

Assets are weighted based on their estimated worth towards agricultural land use.
Extents of road assets are based on average daily traffic volumes.
Constraints are classified as unsuitable.

- Assets
- Prime Farmland (100%)
- Constraints
- Existing Parks and Natural Areas
 - Wetlands
 - Lakes
 - Existing Residential Areas

Map 9-15:

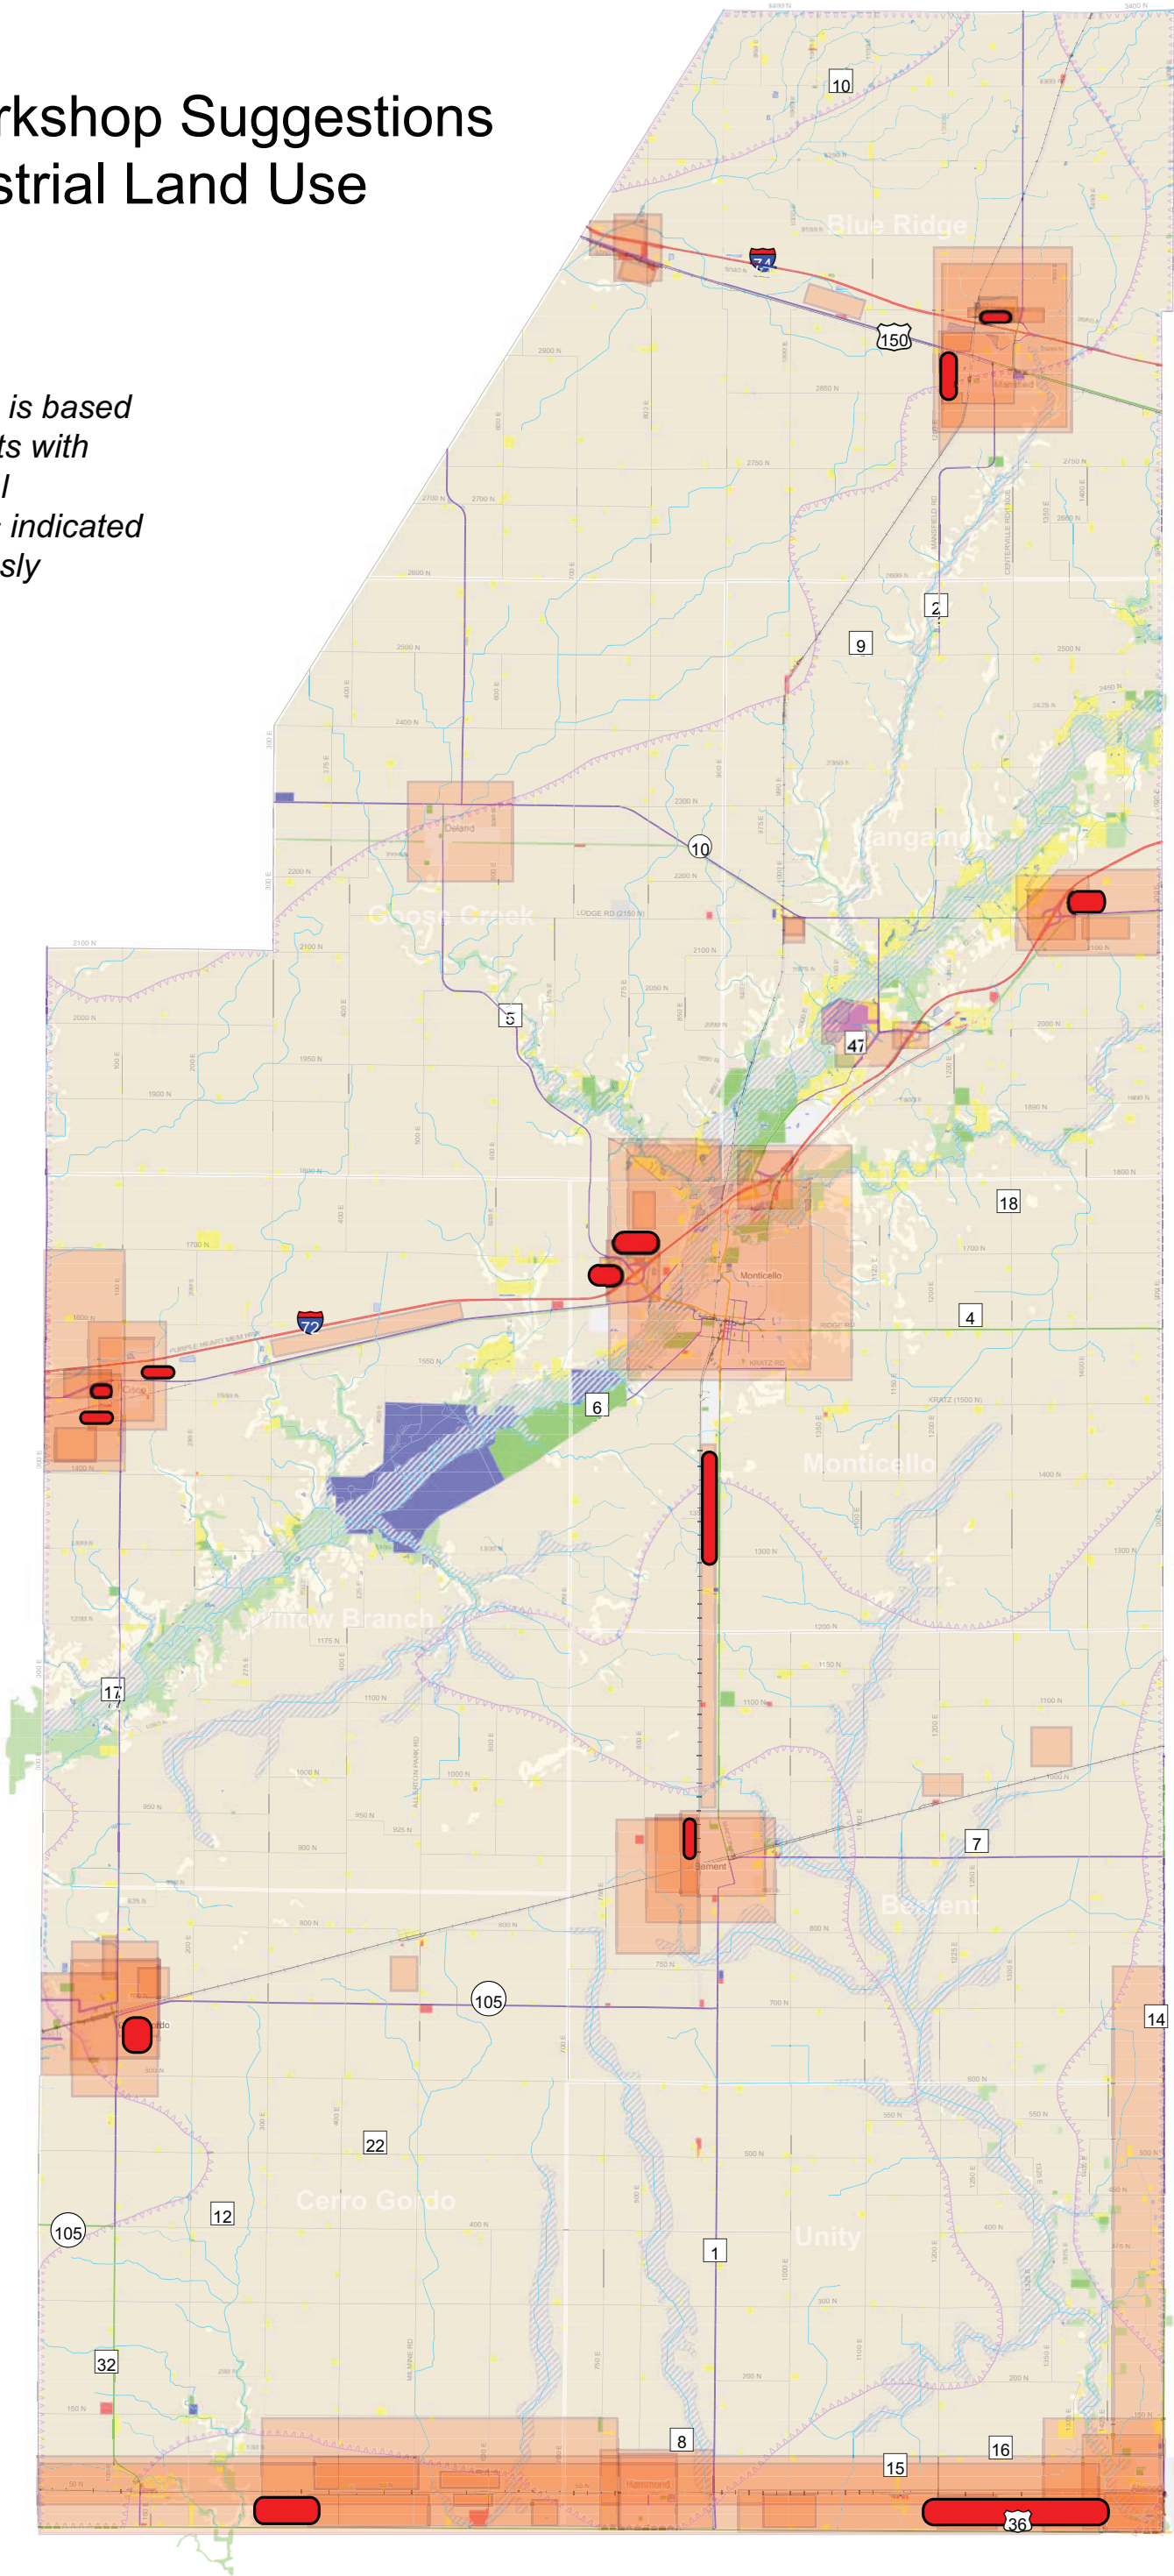

Refined Public Workshop Suggestions Commercial / Industrial Land Use

Piatt County, Illinois

Refinement of public suggestion is based on the desire to reducing conflicts with existing land use, and residential transportation routes. Locations indicated here do not overlap with previously developed land uses.

 Future Land Use
Commercial / Industrial

- Legend
- Average Daily Traffic
- 0 - 600
 - 601 - 1,800
 - 1,801 - 4,500
 - 4,501 - 10,000
 - 10,001 - 19,400

-  Open Space
-  Woodland
-  Prime Farmland (LESA)

Map 9-16:

Piatt County Comprehensive Plan Future Land Use Map

Future Land Uses and Development

- Agricultural
- Low Density Residential
- Conservation Residential
- Commercial / Industrial
- Commercial
- Trails
- Proposed Mobility Hub (Park and Ride)

Low Density residential provides for rural development, but minimizes physical and visual impacts on a case by case basis.

Conservation residential provides for rural development, but emphasizes mitigation of environmental impacts, shared cost for sewer, water and transportation, and maintains farming as the primary rural land use

Existing Land Uses

- Interstate
- Highway
- Road
- Railroad
- Environmentally Sensitive Area
- Existing Park or Natural Area
- Stream or Major Drainage
- Lake
- Municipal Boundary
- Unincorporated Settlement
- Sewer Facility Planning Area
- Extraterritorial Jurisdiction

Environmentally Sensitive Areas include flood plains, wetlands, soils subject to flooding, and state designated environmental areas.

Production Date:
September, 2009
