

Your safety and well-being is our top priority.

Grady Healthcare has helped your Fire/EMS department identify a new mechanism to help you when a “red lights and siren” ambulance response or a trip to the ER isn’t necessary.

Introducing... **RIGHT SITE**

RightSite means the right care, right now.

If EMS crews suggest you don't need a trip to the ER, they will offer RightSite and you can be connected to an ER doctor and a RightSite navigator alongside your EMS crew right then.

RightSite will get you to the care you need.

Working with the recommendation of the ER doctor, your Navigator will help get you appropriate care — whether it's an urgent care visit, a clinic appointment, a prescription refill, or even a telehealth visit on the spot to resolve your need. We can even assist with roundtrip transportation to your appointment if you need it.

RightSite will provide follow-up support.

Navigators will check in with you the next day to make sure that you are satisfied with your care and have everything you need to recover. RightSite Navigators can also provide referrals to services, including prescription assistance or transportation to doctor's visits.

“RightSite creates a huge advantage for everyone—it will give you good options with the confidence your own Fire/EMS professionals will be there for you, too, no matter the level of emergency or time of day/night.”
