Re: Award Recommendation for (4) Gas Detectors

Specifications and an RFP were developed for gas detectors to be used in confined space entry in Wastewater operations. The RFP was properly advertised and notice to prospective bidders was provided. The bids were opened on February 7, 2023 at 2:00 pm and read aloud. We received bids from four companies. Some of the bidders chose to give multiple options for different manufacturers. The accompanying bid tab was prepared.

I recommend that we award the bid to All Safe Industries, Inc. in the amount of \$14,318.13. All Safe Industries, Inc. was the low bid and the equipment offered meets the bid specifications. The specifications did not have a hand held probe specifically stated. All Safe did not include one, but some of the other bidders did. We requested the probe be added and the recommended award reflects a \$160.50 addition for the probe.

2023 Gas Detector Bid Tab

| Company | Brand of Equipment | Bid Amount |
|---------------------------|-----------------------------|-------------|
| Airgas USA, LLC | BW Technologies | \$16,660.12 |
| | MSA Altair | \$28,632.76 |
| | Industrial Scientific iBrid | \$19,187.67 |
| | | |
| All Safe Industries, Inc. | MultiRAE Lite | \$14,318.13 |
| | | |
| B2B Solutions, LLC | RKI Instruments | \$15,910.95 |
| | Industrial Scientific iBrid | \$19,903.08 |
| | MultiRAE Lite | \$20,576.08 |
| | | |
| Curtis Tools for Heros | MSA Altair | \$17,044.30 |
