

My name is Mason Updike and I would like to serve a term on the planning and zoning commission. I was born in Craig in 1994 and have lived in Craig for the entirety of my life. I am rooted in Craig and plan to live here the rest of my life. For the past 4 years I have worked in a managerial role at Masterworks Mechanical where I have learned leadership and how to deal with adversity. I want the opportunity to contribute to the future vision of Craig and I feel I have the skills to be a contributing member to the commission. One of the skills I have that I feel is necessary for this role is being prepared. I am willing to study to become more knowledgeable in any specific areas of need. Another skill I feel I can contribute is I can be a critical thinker. I believe I have the ability to analyze and comprehend competing interests. I am excited to learn the things I do not know and am willing to work to become more of a leader in the community. Thank you for your consideration.
