

# Dighton Community Electricity Aggregation Program

Dighton Community Electricity Aggregation is an electricity supply program offered by the Town of Dighton to provide residents and businesses with new, Town-vetted options for electricity supply. National Grid continues to deliver your electricity, repair power outages, and maintain the electricity grid; they also send you one bill for the electricity you used.

On the Dighton Community Electricity Aggregation website ([MassCEA.com/Dighton](http://MassCEA.com/Dighton)), residents, business owners, and other electricity customers can

- Learn how the program works;
- See different electricity products;
- Easily enroll in any of the program options or leave (opt-out) the program;
- Read the aggregation plan;
- See the benefits of supporting renewable energy generation.

Notices about the program:

Please keep in mind that future savings cannot be guaranteed because National Grid Basic Service rates change every six months for residential and commercial customers and every three months for industrial customers.

Newly eligible customers will receive a Customer Notification Letter detailing the program and ways to leave the program (opt out); those who choose not to opt out will be automatically enrolled.

Customers who have chosen a third-party supplier will not receive an opt-out package and will not be automatically enrolled. They can voluntarily join the program, but they may be subject to penalties or early termination fees from the third-party supplier if they switch to the electricity program during the term of their contract with their chosen supplier.
