Subject: Resignation

Hi Mark,

I am sorry to send this but my family and I decided to move out of Connecticut and relocate to Florida.

I enjoyed my time on the board but I have an offer that I cannot refuse.

Thank you for your help and I wish you the best on the project. I hope one day they put a restaurant in the marina.

All the best

Rob

Who You Have	

Spoken To	
Explanation of Interest and Contribution	I have a very long interest in conservation policy. I support it for both sustainability and economic reasons. I believe strongly that effective conservation yields economic benefits to towns and homeowners.
Resume or Bio	Downie vita - 08.09.22.doc
Additional Comments	I should be considered a political independent. I register for a particular party only because doing so is required to vote in particular primaries. In the past have been registered as both an independent and democrat. I am now registered as a Republican so I can vote in that primary

Fairfield WPCF Digester Cleaning – Project Cost \$625,000

1. **Background** – The Primary digester at the WPCF has been part of the sludge treatment process since the plant’s inception in the 1950’s. The sludge waste streams are fed to the digester for solids destruction and methane gas production used for mixing and heating. On April 24, 2022 the fixed metal roof of the tank was lifted from its mounting brackets due to a suspected clogged outlet pipe which caused an overfill condition. The pressure exerted on the cover caused it to break ten of the twelve mounting brackets.
2. **Purpose and Justification** – The purpose of the request is to complete the removal of the material inside the tank and have it disposed of at an authorized disposal facility. Which will then allow the WPCF to determine the needed repairs.
3. **Detailed Description of Proposal** – The bid was generated per the specifications given by an Engineering firm familiar with this kind of work.
4. **Reliability of Cost Estimate** – Based on a scale of 0 to 10, this is a 10. The project has a firm price obtained through the bid process.
5. **Increased Efficiency or Productivity** – Efficiency and productivity will improve, as inorganic material that is estimated at 10 feet will be removed. This will allow the tank to hold more process generated solids, increase time in the tank for more digestion of material.
6. **Additional Long Range Costs** – None, other than cleaning every ten years.
7. **Additional Use or Demand on Existing Facilities** – None.
8. **Alternatives to this Request** – None. Specialized contractors needed for this work.
9. **Safety and Loss Control** –None for Town.
10. **Environmental Considerations** –None- All work to be completed will be in the confines of the plant and process drainage.
11. **Insurance** – The selected contractor will be required to carry the necessary insurance prescribed by the Purchasing Department.
12. **Financing** – Funded through the WPCA fund balance.
13. **Other Considerations**: None.
