

PERMIT PROVISIONS

PART X - MONITORING REQUIREMENTS

- B.** The User shall satisfy the Total Toxic Organics (TTO) requirement in accordance with the following:

2. Toxic Organic Management Plan

- a. In lieu of monitoring for TTO and upon written request, the District may allow the IU to satisfy the TTO requirement by submitting a toxic organic management plan (TOMP) for approval by the District or by submitting a Certification that TTO are not used in the facility. The sample of TTO Certification and requirement on TOMP are specified in Part XX-Special Conditions of this Permit.

PART XX - SPECIAL CONDITIONS

A. ADDITIONAL/SPECIAL MONITORING REQUIREMENTS

1. Total Toxic Organics

- a. The following certification statement will be included in the Semi-Annual Monitoring Reports.

"Based on my inquiry of the person or persons directly responsible for managing compliance with the permit limitation (or pretreatment standard) for total toxic organics (TTO), I certify that, to the best of my knowledge and belief, no dumping of concentrate toxic organics into the wastewaters has occurred since filing of the last discharge monitoring report. I further certify that this facility is implementing the toxic organic management plan submitted to the permitting (or control) authority."

- b. The User shall submit a revised Toxic Organic Management Plan which specifies the toxic organic compounds used, the method of disposal used instead of dumping, and procedures for ensuring that toxic organics do not spill or leak into the wastewater.

Note: The TTO definition for the specific regulated category shall be included in the permit as the following attachment.
