Grundy County Health Department Confirms Transition Plan for Behavioral Health Services

Morris, IL — The Grundy County Health Department is sharing a final update regarding the Behavioral Health Division, which will officially close on June 13, 2025. This decision follows a period of thoughtful review and planning to ensure continued access to quality mental health care for Grundy County residents.

In preparation for this transition, the department has worked in close collaboration with the Grundy County Board, the Board of Health, local behavioral health providers, and members of the Behavioral Health Alliance. The shared goal throughout has been to maintain service continuity and connect residents to appropriate support.

To assist community members, the department has updated its website to include a verified list of:

- Community mental health agencies, and
- Nonprofit organizations that prioritize Medicaid-eligible clients
- Private behavioral health firms

Residents may also call the health department to request a copy of this resource list. Staff are available to help guide individuals and families toward the services that best meet their needs.

We are sincerely grateful to the professionals, partners, and organizations that have supported the Behavioral Health Division and the individuals it has served. While this chapter is concluding, access to mental health services remains available through a strong network of providers committed to the wellbeing of our community.
