State law requires cities and schools to hold joint elections. The school district is not having an election, however, due to COVID-19 the City election was moved to November, and we will hold a joint election with the County, State and Federal government. The Grimes County Elections Administrator prepared a contract for joint election.

15. Workshop on proposed budget for fiscal year 2020-2021.

Staff will present a balanced budget. There are a couple of items that were not in the proposed budget presented during the last meeting.

Item 1 – There are some major repairs that are urgent at the Wastewater Treatment Plant. Engineers estimate to replace the drum screen, and replacement of the rotors in two ditches will be \$515,000. The proposed budget included \$200,000, and staff proposes to utilize \$315,000 from the sewer reserve fund to complete the needed repairs. The reserve fund balance is currently \$372,072. If council agrees to the use of these funds the reserve balance will be \$57,072.

Item 2- The proposed budget did not include any pay increases for staff. The budget as is the case every year is tight; however, we held a contingency account in the budget of \$138,000. Staff proposes to utilize some of that money to provide one time pay increases to staff. An attachment with options is attached.

Information regarding Specific Use Permits:

Specific uses are not generally compatible with those uses permitted by right in the zoning district, but by the unusual circumstances (existing uses and historic uses) in the area, consideration of the use is advisable. Such uses are granted to the owner of the property and are not transferable with the sale of the property.

Following the issuance of a Use Permit, the Building Official shall ensure that, if the development is undertaken, it is completed in compliance with said permit. However, if a Use Permit has not been used within six (6) months after the date granted, the permit is automatically cancelled.

The Planning and Zoning Commission and/or the City Council may impose additional reasonable restrictions or conditions to carry out the spirit of intent of this Ordinance and to mitigate adverse effects of the proposed use. These requirements may include, but are not limited to, increased open space, loading and parking requirements, suitable landscaping, and additional improvements such as curbing and sidewalks.

City of Navasota City Council & Planning and Zoning Commission Staff Report

Date: August 4, 2020

Agenda Item: Amending Development Standards for Single Dwelling Unit Development in B-1, R-2 and

R-3 Zoning Districts.

REQUEST:

Conduct a public hearing to receive public comment and testimony regarding amending Chapter 14 zoning, Exhibit A Zoning Ordinance, Article IX R-3: High Density, Multi-Dwelling, Residential District, 9.3 Development Standards, B. Building setbacks, (3) side Setback, and Article VIII R-2: Medium Density, Multi-Dwelling Unit, Residential District, 8.3 Development Standards, B. Building Setbacks, (3) Side Setback, for the purpose of reducing side setback requirements for single dwelling unit development. Amending Chapter 14 zoning, Exhibit A Zoning Ordinance, Article XI B-1: General Business District, 11.4 Development and Design Standards, B. Setbacks, (5), for the purpose of clarifying setback requirements for residential development within a General Business District.

SUMMARY:

After inquires related to single dwelling unit development within B-1: General Business District City staff found the development standards relating to setbacks are not very clear. Under 11.4 Development and Design Standards for Article XI B-1: General Business District the following requirement is outlined for residential lots:

(5) A residential lot in a general business district must conform to the setback requirements as required in the appropriate residential zone.

The language "appropriate residential zone" is not very clear as to what type of residential setbacks apply. Since most B-1 zoning corridors abut residential zoning districts staff is recommending the following changes that will ensure compatibility with the nearest or abutting residential zoning district:

During the City Council public hearing on **June 8, 2020** City Council determined the proposed amendments needed further consideration and clarification. City Council directed staff to instead draft uniform setback requirements for single and 2 dwelling unit development in B-1: General Business District. Below is the proposed language:

(5) A lot or parcel used for a single or two dwelling unit residential development in a general business district must conform to the following setback requirements: Front setback: 25', Rear setback: 20', Side setback: 7' or 10% of the lot width whichever is greater, Street side setback: 20'.

Regarding the R-3 zoning district. City Staff continues to see variance requests for single dwelling unit construction to vary from the fifteen-foot (15') side setback requirements outlined under Article IX R-3: High density, multi-dwelling unit, residential district, 9.3 Development Standards, (B). Building setbacks, (3) side setback:

(3) Side Setback. There shall be side setbacks, on each side, having a width of not less than fifteen (15) feet or ten percent (10%) of the lot width, whichever is greater. When abutting a street, the minimum side setback shall be at least twenty (20) feet (Street Side Setback).

The R-3 and R-2 zoning district are primarily in areas where the average lot size is 50′ X 100′. After the required side setbacks are applied it only leaves a 20′ wide buildable area for single dwelling units and 15′ wide single dwelling units on corner lots. The proposed amendment would increase this buildable area and encourage infill residential development for the neighborhoods in R-3 and R-2 zoning districts that have vacant lots:

During the City Council public hearing on **June 8, 2020** City Council determined the proposed amendments needed further consideration and clarification. A point was made as to what happens if a lot is under 50-foot-wide with R-1A or R-1B zoning. The proposed amendments to side setback requirements would allow for 28' to 36' foot wide single or two dwelling units to be constructed anywhere where a lot is 50-foot-wide or less lot exists. This would include R-1A, R-1B, R-2 and R-3 zones.

G. All lots that average (50) feet wide or less between the front and rear building lines the following setback requirements apply: Front setback: 25', Rear setback: 20', Side setback: 7', Street side setback: 15'.

Staff recommends adding the proposed language to all residential zoning districts for increased uniformity across the board.

To: Navasota City Council Members

Christian Community Services is asking for continued help with the City Water bill.

We have gotten the grden put back in and enjoyed many fresh vegtables for our food clients.

Since the Civid -19 crisis we have seen a drop and a resurgence of food clients. Lots of "new" families/individuals due to job loss. Also we are having to purchase more food from the local grocery (Arlens) as Brazos Valley Food Bank is having a time receiving foods and getting volunteers to work the food. All Food Banks are facing shortages of food that is donated and purchased. We serve / have signed up 350 families/individuals from Navasota alone. With approximatley 100 families/individuals from outside of Navasota signed as food clients.

During the months from March 31st through July 2020 we have signed up about 60 more families. The Clothes closet was closed from the end of March to July 1st. But voucher for those who qualify for it was was \$350.00. This is from September 2019 to august 2020.

Since Covid-19 and purchasing food from a local store our spending has increased as CCS tries to make sure our food clients are receiving an adequte amount of food each month.

CCS Spending for the time of June 2019 to June 2020 was \$ 13,000.00 (if purchased at normal pricing would be: \$ 149,587.00)

We Thank the City of Navasota for partnering with Christian Community Services by helping with the water bill!

Sincerely, Patricia Gaston Latricia Gas

GENERAL INFORMATION: Tax Code Section 26.04(c) requires an officer or employee designated by the governing body to calculate the no-new-revenue (NNR) tax rate and voter-approval tax rate for the taxing unit. These tax rates are expressed in dollars per \$100 of taxable value calculated. The calculation process starts after the chief appraiser delivers to the taxing unit the certified appraisal roll and the estimated values of properties under protest. The designated officer or employee shall certify that the officer or employee has accurately calculated the tax rates and used values shown for the certified appraisal roll or certified estimate. The officer or employee submits the rates to the governing body by Aug. 7 or as soon thereafter as practicable.

School districts do not use this form, but instead use Comptroller For 50-859 Tax Rate Calculation Worksheet, School District without Chapter 313 Agreements or Comptroller Form 50-884 Tax Rate Calculation Worksheet, School District with Chapter 313 Agreements.

Water districts as defined under Water Code Section 49.001(1) do use this form but instead use Comptroller Form 50-858 Water District Voter-Approval Tax Rate Worksheet for Low Tax Rate and Developing Districts or Comptroller Form 50-860 Developed water District Voter-Approval Tax Rate Worksheet.

The Comptroller's office provides this worksheet to assist taxing units in determining tax rates. The information provided in this worksheet is offered as technical assistance and not legal advice. Taxing units should consult legal counsel for interpretations of law regarding tax rate preparation and adoption.

STEP 1: No-New-Revenue Tax Rate

The NNR tax rate enables the public to evaluate the relationship between taxes for the prior year and for the current year based on a tax rate that would produce the same amount of taxes (no new taxes) if applied to the same properties that are taxed in both years. When appraisal values increase, the NNR tax rate should decrease.

The NNR tax rate for a county is the sum of the NNR tax rates calculated for each type of tax the county levies.

While uncommon, it is possible for a taxing unit to provide an exemption for only maintenance and operations taxes. In this case, the taxing unit will need to calculate the NNR tax rate separately for the maintenance and operations tax and the debt tax, then add the two components together.

Line	No-New-Revenue Rate Activity		Amount/Rate
1.	2019 total taxable value. Enter the amount of 2019 taxable value on the 2019 tax roll today. Include any adjustments since last year's certification; exclude Tax Code Section 25.25(d) one-fourth and one-third over-appraisal corrections from these adjustments. Exclude any property value subject to an appeal under Chapter 42 as of July 25 (will add undisputed value in Line 6). STEP 2: Voter-Approval Tax Rate

The voter-approval tax rate is the highest tax rate that a taxing unit may adopt without holding an election to seek voter approval of the rate. The voter-approval tax rate is split into two separate rates:

- 1. **Maintenance and Operations (M&O) Tax Rate:** The M&O portion is the tax rate that is needed to raise the same amount of taxes that the taxing unit levied in the prior year plus the applicable percentage allowed by law. This rate accounts for such things as salaries, utilities and day-to-day operations.
- 2. **Debt Rate:** The debt rate includes the debt service necessary to pay the taxing unit's debt payments in the coming year. This rate accounts for principal and interest on bonds and other debt secured by property tax revenue.

The voter-approval tax rate for a county is the sum of the voter-approval tax rates calculated for each type of tax the county levies. In most cases the voter-approval tax rate exceeds the no-new-revenue tax rate, but occasionally decreases in a taxing unit's debt service will cause the NNR tax rate to be higher than the voter-approval tax rate.

STEP 4: Additional Rollback Protection for Pollution Control

A taxing unit may raise its rate for M&O funds used to pay for a facility, device or method for the control of air, water or land pollution. This includes any land, structure, building, installation, excavation, machinery, equipment or device that is used, constructed, acquired or installed wholly or partly to meet or exceed pollution control requirements. The taxing unit's expenses are those necessary to meet the requirements of a permit issued by the Texas Commission on Environmental Quality (TCEQ). The taxing unit must provide the tax assessor with a copy of the TCEQ letter of determination that states the portion of the cost of the installation for pollution control.

This section should only be completed by a taxing unit that uses M&O Funds to pay for a facility, device or method for the control of air, water or land pollution.

STEP 5: Voter-Approval Tax Rate Adjustment for Unused Increment Rate

The unused increment rate is the rate equal to the difference between the adopted tax rate and voter-approval tax rate before the unused increment rate for the prior three years [39]. In a year where a special taxing unit adopts a rate above the voter-approval tax rate by applying any portion of the unused increment rate, the unused increment rate for that year would be zero.

For each tax year before 2020, the difference between the adopted tax rate and voter-approval rate is considered zero, therefore the unused increment rate for 2020 is zero.[40]

This section should only be completed by a taxing unit that is a municipality of less than 30,000 or a taxing unit that does not meet the definition of a special taxing unit. [41]

STEP 6: De Minimis Rate

The de minimis rate is the rate equal to the sum of the no-new-revenue maintenance and operations rate, the rate that will raise \$500,000, and the current debt rate for a taxing unit.[42]

This section should only be completed by a taxing unit that is a municipality of less than 30,000 or a taxing unit that does not meet the definition of a special taxing unit. [43]
