How to WEAR A MASK

With recent recommendations for people to wear masks, we felt it important to go over some mask-wearing best practices!

- Ensure a **TIGHT SEAL** on your face. The mask should not be loose.
- The mask should **COVER YOUR NOSE AND MOUTH**.
- **FACIAL HAIR** can prevent a tight seal.
- Once on, **DON'T TOUCH YOUR MASK**.
- For masks that are able to be washed, **WASH THEM IMMEDIATELY AFTER EACH USE**.
- **WASH YOUR HANDS** thoroughly after each use and before you touch your face or anything else.
