

# Arterial Streets Resurfacing 2023

## Proposed Project Schedule:

06/07/23 - 10/13/23

## Project Description:

This project consists of resurfacing the following street segments on College Hill:

- Merman Drive from Terre View Drive to Westwood Drive.
- Westwood Drive from Merman Drive to Northwood Drive.

Miscellaneous other work will occur throughout the project and within the designated work areas (e.g., bus pull out construction, utility cover adjustments, concrete sidewalk/curb and gutter construction, roadway striping and sign installation, and minor utility repairs). The City of Pullman has contracted with Motley-Motley, Inc. to complete this project.

## Travel Impacts:

- Project streets will be closed to thru traffic in two phases during construction. Phase 1 closes Merman Drive. In Phase 2, work will shift to Westwood Drive.
- Local residents will be allowed access to the closed work areas, but should drive slowly and cautiously and expect delays during active construction.

## Project Funding:

Federal Funds/Arterial Streets: ~ \$1.6 Million
