**FINAL
PUBLIC WATERFRONT ACCESS STUDY
TOWN OF HASTINGS, NY
APRIL 2012**

EXECUTIVE SUMMARY

Oswego County, on behalf of the Town of Hastings (Project Sponsor), has commissioned this Public Waterfront Access Study to develop an inventory and evaluation of public waterfront access sites within portions of Oswego County. The Town of Hastings project encompasses the waterfront sites situated on Oneida Lake, sites along the Oneida River, and sites along the Oswego River from Three Rivers to the southern boundary of the Town of Minetto on the west side of the Oswego River and the northern boundary of the Town of Volney on the east side of the river. The results of this study will serve as a guide for Oswego County and the municipalities included in the study area for future consideration of expanding public access to the waterfront, and to provide valuable data for future funding applications.

This study involved the inventory and analysis of 55 publicly owned waterfront parcels, within the Towns of Constantia, Granby, Hastings, Schroepfel, Volney, West Monroe, the Village of Cleveland, and the City of Fulton. Data was collected for each parcel, which summarizes the existing attributes of the property. Each site was then considered in regards to the adequacy of existing public access, conditions that restrict access, and general opportunities for improving public access. This information is summarized in the Inventory & Analysis section of this report.

Public outreach was included in the development of the study, consisting of two Public Information Meetings (PIM's). The first PIM was held subsequent to the completion of the Inventory and Analysis task, on December 6, 2011, where the results of that task were presented to the public. Information and comments resulting from PIM is included in the Public Outreach section of this report. The second Public Information Meeting to discuss the report was held after submittal and review of the Draft Study to and by Oswego County and the NYS Department of Coastal Resources, on February 9, 2012 at the Hastings Town Hall.

INTRODUCTION

This Public Waterfront Access Study was prepared for the Oswego County Department of Community Development, Tourism & Planning, the Town of Hastings (as project sponsor) and the NYS Department of State, Division of Coastal Resources (DCR) to provide an inventory and analysis of public access to the waterfront areas within Oswego County. Information in this study may be used by the included municipalities in support of fund raising / grant applications for improvements to public waterfront access.

The geographic limits of this study include the waterfront sites within Oswego County along the shore of Oneida Lake, the Oneida River, and sites along the Oswego River as defined in the Executive Summary and in Exhibit 1 – Location Map in Appendix A. As the inventory proceeded it became apparent that some property owners allowed public access to their property, a second group of parcels that are privately held yet have public access was added to the parcel database for this study, however they were not included in the inventory. This study involved the inventory of 55 waterfront parcels, situated within the following municipalities:

Table 1 – Summary of Parcel Locations

<u>Municipality</u>	<u>No. of Publicly Owned Parcels</u>	<u>No. of Parcels Privately Owned with Access</u>
City of Fulton	12	0
Town of Constantia	6	0
Town of Granby	3	2
Town of Hastings	3	0
Town of Schroepel	21	0
Town of Volney	3	0
Town of West Monroe	5	0
Village of Cleveland	<u>2</u>	<u>0</u>
Total Parcels studied:	55	2

A map showing the location of the parcels included in this study is included in Appendix A.

This study is part of a two-study initiative by the Oswego County Department of Community Development, Tourism & Planning to characterize existing public access to the described waterfront areas. A companion study, sponsored by the Town of Scriba, completes the inventory along the shore of Lake Ontario, and sites within one mile of the lake along Lake Ontario's primary tributaries (Salmon River, Little Salmon River) and along a portion of the Oswego River from the lake to the south end of the Town of Minetto, within the County of Oswego. The project is funded through the NYS Department of State, Division of Coastal Resources, using a grant from the Environmental Protection Fund.

DATA COLLECTION

Data was collected for the involved waterfront parcels from available GIS based sources including the Oswego County Planning office, the County Real Property office (tax ID numbers, size, ownership, use), the NYS GIS Clearinghouse (ortho-photography, wetlands, flood zones), and by site observation at each property. Oswego County also solicited input from the affected municipalities to provide locations/descriptions of additional parcels of waterfront land that have potential to come under public ownership (see Correspondence, Appendix D). Response for this study was received from the Town of Volney. The GIS based information was particularly useful, allowing a list of publicly owned waterfront properties to be generated for initial screening. The GIS based list, along with the additional municipal parcels were then reviewed with the County, with some deletions, due to existing uses as canal operations (locks, etc.), municipal works (water, sewer facilities) where public access should not be encouraged.

As a result of this effort, a final list was generated to serve as a guide for the site visit task. The site visit effort included recording the existing site characteristics (slope, vegetation, shore conditions, utilities, existing access, and existing amenities), using a Tablet style PC with an access database containing pre-populated information including town, ownership, and parcel ID number. Digital photographs of each site were also obtained and linked within the GIS database. Where needed, voice recordings were made to capture initial thoughts on potential for improving public access, to be used during the analysis portion of the study.

Upon completion of the inventory data collection, an initial analysis of each parcel was completed to review the data, and to brainstorm opportunities for improved public access. These observations were then entered into the data set to complete the parcel reviews. All of the data compiled for each site was captured in formats that are easily integrated into the County's GIS system. A summary matrix of this information is included in Appendix B.

INVENTORY

Inventory of the waterfront parcels involved a two step process – first, a desktop GIS investigation to identify publicly owned waterfront parcels within the study area, and to obtain existing parcel data, such as:

Tax ID Number
Address/Location
Acreage
Ownership
Usage/ Land Code

The second step involved a site visit to each parcel, where remaining existing attributes of the property were obtained. Attributes included:

- Land Access (Type of Street)
- Water Access (Body of Water)
- Vegetative Cover Type and Percent of each
- Percent Improved
- Existing Use
- Bank Condition (top of bank to water elevation)
- Bank Slope
- Site Amenities: Parking, boat launch, trail system, picnic/benches, play equipment, camping, bathroom, buildings, landscaping, beach, access control, dock tie-up, pier, fishing access, and historic feature
- Utilities

ANALYSIS

The analysis of the parcels, to determine 1) the existing level of access and 2) the potential for improvements to public access, started during the site visits. Observations on existing access at each parcel, which included factors such as connection to the adjacent highway system, parking areas, and clear access to the shoreline were recorded during the site visits. As anticipated, the level of existing highway, parking and access to the waterfront was varied. Some parcels exhibited a level of improved access, while others remain in an undeveloped state. Potential for improved means of access, such as parking, boat launching, fishing access, clearing of shoreline, etc. were recorded during the site visits at each parcel for further consideration. Some parcels

exhibited a high potential for improvement to provide better public access, while others exhibited medium or low potential for improvement. The key to understanding the intent behind the high, medium and low ranking assessments is that these evaluations are meant to rate the parcels **potential** for future improvements.

Table 3
Summary of Parcels Potential for Improved Access

Municipality	High	Medium	Low
City of Fulton	4	5	3
Town of Constantia	3	2	1
Town of Granby	2	2	1
Town of Hastings	3		
Town of Schroepfel	3	9	9
Town of Volney	3		
Town of West Monroe	1	4	
Village of Cleveland	<u>1</u>	<u>1</u>	
TOTAL:	19	24	14

Note: A full list of parcels in this study and breakdown by municipality is included in Appendix B

PUBLIC OUTREACH

A Public Information Meeting (PIM #1) was held on December 6, 2011, at the Town of Hastings Town Hall. This meeting was publicly advertised via press releases in the Syracuse Post-Standard, other local daily and weekly media outlets and posted online at www.syracuse.com and on the County's website in advance of the meeting. This initial PIM was held subsequent to the Inventory & Analysis Task, to familiarize interested citizens and groups with the study, and to obtain initial public input on the parcels studies, and to start discussion on the potential local recommendations for improved public access.

Approximately 20 people attended this PIM, where Oswego County Department of Community Development, Tourism & Planning, and the Consultant representatives reviewed the extent of the study, the existing conditions of the parcels involved, and initial thoughts on potential for improved public access. Comments voiced at the

meeting regarding specific parcels were noted, and the public was also given the option to submit written comments / input to the County for consideration, for a period of approximately two weeks after the PIM.

At the request of the public, the data sheets and map of the study area were posted on the County's website, where interested individuals could examine the information at their convenience.

A second Public Information Meeting (PIM #2) was held on February 9, 2012, at the Hastings Town Hall. This meeting was publicly advertised via press releases in the Syracuse Post-Standard, other local daily and weekly media outlets and posted online at www.syracuse.com and on the County's website in advance of the meeting. The second PIM was held subsequent to the publishing of the draft report in order to obtain public input.

Approximately 20 people also attended this PIM, where Oswego County Department of Community Development, Tourism & Planning, and the Consultant representatives reviewed the extent of the study, and progress to date. Comments voiced at the meeting regarding specific parcels and the report itself were noted, and the public was also given the option to submit written comments / input to the County for consideration, for a period of approximately two weeks after the PIM.

RECOMMENDATIONS

As part of the parcel analysis, initial recommendations were developed for improvements to public access. The access improvement considered included the following list and is not exclusive to water activities:

Possible Improvements:

Formalized Parking
Trail system
Picnic area / benches
Play equipment
Formal or informal camping
Bathrooms
Changing facilities
Formal beach
Formal fishing access
Way finding signage
Kiosk including interpretive information
Lighting
Active recreation fields
Pavilion
Gazebo
Boardwalk
Bird watching facilities

Boating Improvements:

Boat launch - ramp
Boat launch - car top
Handicap boat launch
Dock tie-up
Pump out station
Boat utility hookup
Boater bathroom facilities
Formal harbor master
Pier
Waterway improvements
Dredging required

Further, the two Public Information Meetings for this study gathered the input from local residents and municipal representatives on what improvements they believe would be valuable to their community and or appropriate, at some of the parcels within the study. This additional information was added into the database for the various parcels.

It is recommended that waterfront access is provided for emergency responders' at points along the rivers between each lock. Because the areas between the locks can be viewed as separate bodies of water there needs to be designated emergency access points along the rivers.

When planning for future projects and maintaining current access points we need to be aware that the International Joint Commission is developing a potential new approach for managing Lake Ontario water levels.

OTHER PUBLIC ACCESS

This study provides a summary of waterfront parcels that are owned by local, County, State or Federal entities. During the course of the entire study (including the Scriba portion), 22 parcels owned by not-for-profit agencies or similar were also identified and entered into the study database. While under control of the not-for-profit organization, these parcels provide another level of public access to the waterfront, and are worth mentioning in this study. Municipalities may offer to team with the not-for-profit organization to improve access at these locations. The study area map within Appendix A highlights these parcels as a separate color, so they can be distinguished from the publicly owned parcels.

USE OF THIS STUDY

As noted in the Introduction, the municipalities included in the study area may find the inventory, analysis, and recommendations contained herein to be a valuable resource for:

- 1) Supporting information for funding applications on future public waterfront access improvement projects:
 - By using the Study Area Map in Appendix A – each parcel can be located and keyed to its Parcel ID number and or Tax Map Number. The Site Reports in Appendix B are arranged in order of sequential Parcel ID Number, so are relatively easy to find.
 - With the Site Report retrieved, a municipality can use the information contained within to help describe the existing conditions and site attributes, as well as initial recommendations made by either the study consultant or obtained through public outreach. With coordination through the County Department of Community Development, Tourism & Planning, site mapping (GIS based), and digital photographs can be obtained for additional support of local efforts to obtain funding.
 - The Municipalities would then be prepared to initiate work on planning, estimating and applying for funding of access improvements.

2) Prioritization of projects within a community:

- For communities with multiple sites having waterfront access, this study can be used to help to set priorities for which sites have better potential for improvement

3) Starting point for self-help improvements

- For proactive communities, the data herein could be used as the spark for discussions about what improvements could be made by self-help – either by municipal forces, or organized community forces.

4) Documentation of Public Outreach

- The results of the public meetings held for this study, which provided significant public input, can be used by municipalities in support of funding applications.

CORRESPONDENCE

From: Turner, David [<mailto:dturner@oswegocounty.com>]

Sent: Friday, July 15, 2011 3:54 PM

To: John Donohue; hastings.supervisor@hotmail.com; supervisor@scribany.org; Ivan, Valeria (DOS); Michael Cortese; Scott Prindle; Weiss, Marty

Subject: waterfront access study project

After several years of gathering data and amending, extending and finalizing contracts, we are prepared to begin two study projects that will help us to inventory and analyze all of the public access sites and facilities (or lack thereof) along the Lake Ontario shoreline within Oswego County, the Oneida Lake shoreline with the county and the shorelines of the two rivers that connect the lakes.

You are invited to join us on a conference call for a second scoping meeting with representatives from Barton & Loguidice, the consultant that has been selected for the project(s).

The call is scheduled for 10:00 AM on Friday 07/22/11. To join the call dial 877-810-8595. If you happen to be the first caller, the phone will continue to ring until the second caller dials in.

Thank you for your consideration!

Dave

Subject: Public waterfront access study project

You are receiving this notice because I do not have an email contact for your respective Supervisor or Mayor (Chief Elected Official - CEO). I would greatly appreciate your cooperation in passing this on to your CEO for me. Thank you!

A few years ago, we were successful in securing some funding to conduct an "inventory and analysis" project that is intended to examine all of the existing publicly accessible waterfront sites along the shorelines of Lake Ontario and Oneida Lake as well as the Oswego and Oneida rivers. The intent is to prepare a document, with public input, that details what we have now and its condition, with recommendations for improvements where appropriate. We would also like to identify any possible sites that could be added if there were funding available for the acquisition and development of those sites. To that end, if there are sites in your community that could be acquired and developed for public use, we are requesting your assistance in identifying them. We will then have project staff visit those sites and gather the data necessary for our section on possible future sites. Once completed, the report can be used by all of you to support grant applications should you desire to improve existing sites or develop new ones.

If there are sites that you want considered for this project we are requesting the following; municipality where property exists, current owners name, phone number and address, real property tax parcel number, street address of site or description of site location, contact information for the person in your municipal office if there are other questions regarding proposed or existing sites. We are respectfully requesting that you submit to our office any sites that you would like considered and your local contact information by no later than August 22, 2011.

The firm of Barton & Loguidice (B&L) has been selected to assist in this project and we would also request that you provide them with any professional courtesies necessary to complete this work.

Thank you for your interest and anticipated cooperation!

Sincerely,
David Turner, Director

Re: Town of Volney waterfront property

Dear Mr. Turner:

I would like to thank you for your interest and involvement in the public waterfront access study you are conducting.

The Town of Volney owns one parcel which consists of waterfront. The property identified as tax map # 288.00-01-03 consists of a total of 109.55 acres. The back of the property which borders the Oswego River consists of approximately 2,535 feet of waterfront area. Currently there is access to the waterfront area going in from the Great Bear Road.

Enclosed you will find a map generated from the Oswego County GIS Parcel Viewer. In addition, I've enclosed a copy of the RPS Database GIS Map Viewer and a copy of the property information sheet.

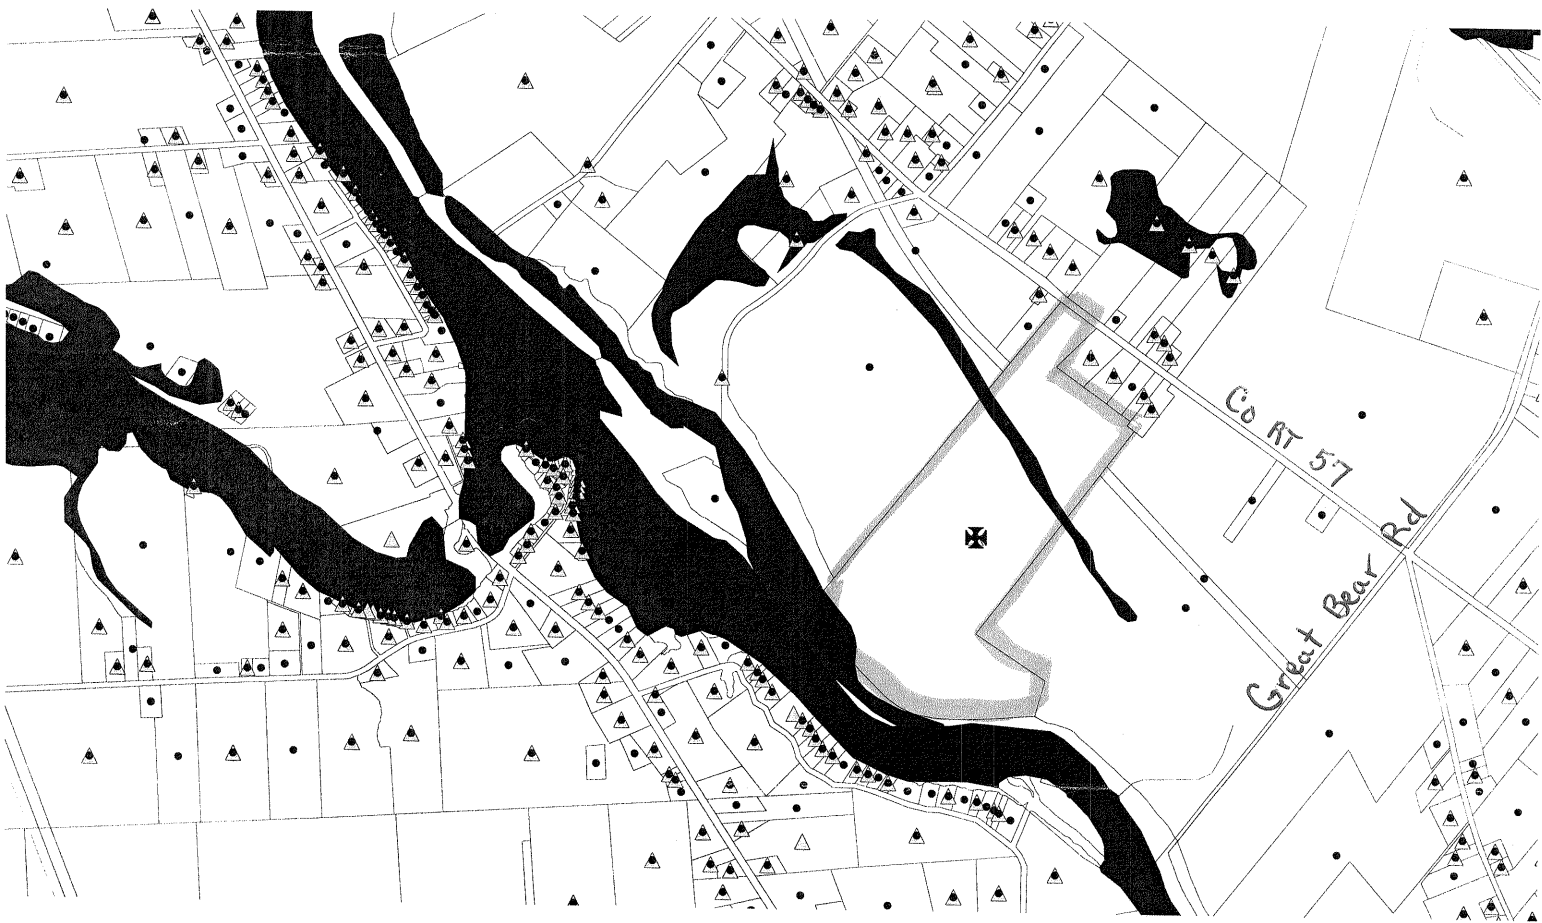

I am looking forward to working with you in the future regarding this project. If you have any additional questions in regards to this project please do not hesitate to contact me.

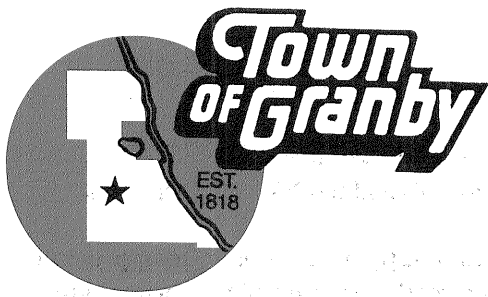

Sincerely,

Dennis Lockwood, Supervisor
Town of Volney

Re: Public waterfront access study.

Dear David

The attached pictures show an area on Pendergast Road just off County Route 46 by the Himminville Bridge that could possibly be used for access to the Oswego River. There is property on the north side of County Route 46 that could also be used. The following covers the owners of each parcel.

1. Michael Kenyon 337 Pendergast Road on the south side of County Route 46.
2. Shane Blackwell at 355 Pendergast owns river property on the north side of County Route 46.

The County might approach each of these owners as to sale of such property. There are no buildings on either parcel.

I hope this information will assist you.

Very Truly Yours

Edward Williamson
Supervisor

APPENDIX D

PUBLIC COMMENT

A person is silhouetted against a bright sunset over a body of water. The person is standing on a pier or dock, holding a fishing rod that extends across the water. The sun is low on the horizon, creating a strong reflection on the water's surface. In the background, a line of trees and some buildings are visible along the shore.

Public Meeting Notice Regarding Public Access Waterfront Sites in Oswego County

MEETING 1

This meeting will focus on the Oneida Lake shoreline within Oswego County, the Oneida River and the Oswego River south of the Minetto Bridge.

Tuesday, December 6 at 7 p.m.

Hastings Town Hall, 1134 US Route 11, Central Square

MEETING 2

The focus of this meeting will be those waterfront sites on Lake Ontario within Oswego County and any on the Oswego River north of the Minetto Bridge.

Wednesday, December 7 at 7 p.m.

Scriba Municipal Building, 42 Creamery Rd., Scriba

For more information, please call the Oswego County
Department of Community Development, Tourism and Planning
at 315/349-8292.

FOR IMMEDIATE RELEASE

Nov. 18, 2011

Public Invited to Offer Comment on Public Access Sites

OSWEGO COUNTY – Oswego County, working in cooperation with the towns of Hastings and Scriba, received a grant to conduct an inventory and analysis of public access sites along the Oswego and Oneida River corridors. The project will also include an examination of sites along the shorelines of Lake Ontario and Oneida Lake within Oswego County.

“The final report of this inventory survey process will serve as a valuable tool for communities within the study areas,” said David Turner, director of the Oswego County Office of Community Development, Tourism and Planning. “They can use it in their efforts to seek funding assistance for the completion of a variety of projects that will be identified in the report.”

Oswego County is working with the staff of Barton & Loguidice, P.C. to complete the first stages of this project.

The public is invited to participate in a discussion of these studies and offer comments about these or other public access sites in the referenced waterfront areas.

The first public comment session will be Tuesday, Dec. 6 at 7 p.m. in the Hastings Town Hall, 1134 US Route 11, Central Square. This meeting will focus on the Oneida Lake shoreline within Oswego County, the Oneida River, and the Oswego River south of the Minetto Bridge.

The second meeting will be held Wednesday, Dec. 7 at 7 p.m. in the Scriba Municipal Building, 42 Creamery Road. The focus of this meeting will be waterfront

sites on Lake Ontario within Oswego County and any on the Oswego River north of the Minetto Bridge.

For more information, please call the Oswego County Department of Community Development, Tourism and Planning at 315/349-8292.

DATE: 12/7/11

Public Meeting – Public Access Waterfront Sites in Oswego County

December 6, 2011 at 7:00 p.m. (Hastings Town Hall)

Dave Turner of Oswego County Dept. of Community Development, Tourism & Planning provided an overview of the project and introductions to the consultant team.

Barton & Loguidice, PC provided an overview of the progress made to date, including the number of parcels examined, the data collected, the analysis of the data, and some initial recommendations.

Additional recommendations & comments from the public:

- Repairs and enhancements to pier in Brewerton on Oneida River
- Any improvements to Lock Island would be great
- Continue improvements to Lighthouse Park – Hastings
 - Make it multi-use
- Secluded trails can be problematic at night
- Town park in Constantia – Car top boat launch
- Library site in Constantia – fishing pier
- Three Mile Bay – Towns of Constantia and West Monroe
 - Should be open to the public
- Shaw Road – West Monroe – East end of Big Bay
 - Car top boat launch, picnic area, fishing access
 - Floral and fauna signage
 - Historic Interpretive signage (old canal)
- City of Oswego – Westside of river, south of high dam – car top site
- Minetto – Gazebo at waterfront park
- Battle Island – Old Guard Lock – Chalone Drive (Eastside)
 - Boat Launch – next to golf course
- Stop 28 – Riverview Business Park – needs improvements
- Great Bear – trails on tow path, old section of canal
 - Old locks, signage, parking lot
- Village of Cleveland – Village Park – Parking lot
 - State dock needs to be rebuilt
- Big Bay Creek – canoes and kayaking, fishing
 - Bird watching
- River/Canal Areas – Amenities, businesses

- Waste receptacles – available and monitored, bathrooms and pump-outs
- Caughdenoy by dam – parking – access to water, picnic, roof top
- Design areas so that you minimize conflicts between user groups
- Handicapped boat launch apparatus?

Public Meeting – Public Access Waterfront Sites in Oswego County

December 7, 2011 at 7:00 p.m. (Town of Scriba Justice Center)

Dave Turner of Oswego County Dept. of Community Development, Tourism & Planning provided an overview of the project and introductions to the consultant team.

Barton & Loguidice, PC provided an overview of the progress made to date, including the number of parcels examined, the data collected, the analysis of the data, and some initial recommendations.

Additional recommendations & comments from the public:

- Was the breakwater / light house at Oswego Harbor included in this study – no, it was not per Dave Turner, due to federal involvement. City of Oswego has acquired the Lighthouse, and is in the process of defining a project to repair it. They may have to lobby USACE to make the breakwater pedestrian friendly.
- Town of Richland, next to the restaurant that was the Irish Wigwam, there is a boat launch owned in deed by the Town of Richland. Users of the boat launch use the restaurant parking lot. This is related to the funding for dredging in Sandy Pond – the town needed a boat launch site with parking.
- As an overall comment, the study should look at the river segments between locks as a lake, and determine what public access is available. There are stretches of river / canal that need public access in order to be safe.
- There is a possibility of a partnering between Sea Grant and County for signage
- There should be more “carry in , carry out” signs
- Can anything be done with the channel markers, navigation aids, etc? County is working with a coalition to make this better.
- There is a 2000 NYSDOS report on dredging the E. Shore of Ontario, which was updated in 2005 and is again being updated.
- The Sandy Pond Channel, and dredging for it, is a big issue for the County
- Harbor Trail in Oswego should be extended to Sheldon Beach park. There is need for formalization and upgrading of the park too. Is it possible to get a cartop launch site here?
- Sandy Pond channel is a BIG issue
- Views of the Lake and River / Canal system are also important
- It was noted that there are several non-municipal entities that own land that provide or could provide public access. Examples are owned by Audubon Society and the CNY Land Trust. These parcels will be included in the study.
- Scriba – at the Sithe Energy parcels, there are no public beaches – the study should consider if this could be fit here.
- On Joseph Fultz Blvd. – is it possible to create a kayak launch, fishing access, sunbathing area, or a pebble beach area?

- It was noted that there are a lot of water quality regulations regarding a “water park” or “spray park”
- Has the study considered the effect of the proposed lake levels (+1 ft. or better) due to the Great Lakes joint commission discussions.
- At end of Rikers Beach Rd. there is a good area for parking, access.;
- Mexico Point Park – need improvement to aesthetics, erosion is an issue, need interpretation for Native Americans. This access point get tremendous use.
- Potential for improvement of the NYS 3 public access. Although out of the study area, there is a great access point off of Rikers Beach Rd.....the sign needs to be more forgiving.
- Study should look at connecting Sandy Island Beach to the Boater’s Beach.
- There is another great, fairly unknown access off of the road leading to Rainbow Shores – there is a hard to read sign saying “no trespass”, but in fine prints says 12AM to 5AM....so anyone can use it during day....there is a 30 car parking lot. Perhaps putting signage out on Route 3 would help direct more people to this.
- At Minetto, a parking and boat launch site to the west of the high dam would be a good improvement to consider.
- Leto Island – at present, not public, but should be.
- Consideration of “Carry in, Carry out” vs. providing trash receptacles is important – who would be responsible for picking up & disposal of trash?
- Suggestion that SUNY Oswego be added to the data set.

Public Meeting 2 – Public Access Waterfront Sites in Oswego County

February 2, 2012 at 7:00 p.m. (Town of Scriba Justice Center)

Dave Turner of Oswego County Dept. of Community Development, Tourism & Planning provided an overview of the project and introductions to the consultant team.

Barton & Loguidice, PC provided an overview of the progress made to date, explained the high medium low ranking for opportunities for possible improvements. Study meant to be a tool for municipalities moving forward to seek out potential projects and possible funding sources, with the inclusion of public information meetings involved in the process.

Additional recommendations & comments from the public:

- Recommendation that information concerning the International Joint Commission and the possible change in lake levels be included in the report, especially if we plan to make improvements to parcels that may change due to the level of the lake changing.
- Where the Black Creek flows into the Oswego River there is a possibility to improve access by providing a better boat launch facility.

Public Meeting 2 – Public Access Waterfront Sites in Oswego County

February 9, 2012 at 7:00 p.m. (Town of Hastings Town Hall)

Dave Turner of Oswego County Dept. of Community Development, Tourism & Planning provided an overview of the project and introductions to the consultant team.

Barton & Loguidice, PC provided an overview of the progress made to date, explained the high medium low ranking for opportunities for possible improvements. Study meant to be a tool for municipalities moving forward to seek out potential projects and possible funding sources, with the inclusion of public information meetings involved in the process.

Additional recommendations & comments from the public:

- Change parcel #43 in the study from medium to high for opportunities for possible improvements. Need to improve drainage to stop the beach from getting eroded into the lake.
- Parcel #41 DEC owned parcel, would be difficult to get some of the potential possible improvements implemented due to lack of funds to construct, maintain, and provide security/police the possible activities.

Subject: Special Needs launch ramp

To: "Dave Turner (dturner@oswegocounty.com)" <dturner@oswegocounty.com>

Hi Dave,

A good meeting tuesday evening. Some positive suggestions.

A paddling friend went to the Wed. meeting and wrote that there were very good positive suggestions made at that meeting.

This is the web link I was sent, regarding the special needs launch ramp.

With the tremendous paddling activity Minetto gets, it would be an ideal location for one of these units.

Regards,

Dick

New handy cap loading ramp - Dexter (on rollers)

Dear Editor,

Let's encourage our next mayor to "think outside the box" while promoting an improved quality of life.

The city's greatest resource is Lake Ontario, but the city incurs enormous costs pumping lake water to its citizens and businesses. Coincidentally there is a vacant turbine bay in the high dam hydro station and another in the low dam station (leased by Brookfield). Let's commission an engineering study to assess the feasibility of two new city installed hydro turbines dedicated to pumping city water. Yes, changes would need to be negotiated with Brookfield's lease, both to use the space, and for possible loss of generating capacity. And yes the city's high dam output might at times be diminished, but let's look at it.

Let's install more docking on the north side of Breitbeck Park. Availability of dock space will be considerable attraction for buyers in the new condo projects.

Let's acquire or lease access to a snow-boarding slope in the city to compliment the wonderful sledding offered by the kind folks at the Country Club. I think the slope under the power lines just south of the Pontiac Nursing Home could be magnificent. A cooperative arrangement with Fallbrook could be another site.

The city should expand the small boat, canoe, kayak rentals at the Wrights Landing.

The city should lead discussions with the college and school district regarding siting and building of several windmills in the city (including city waters) to power public buildings and machines.

The city (together with the college) should lead aggressive efforts to obtain funding for underwater "in current" hydro generation in the Oswego River (a large demo project is being done in New York City under NYPA).

The city (together with the college) should also lead aggressive efforts to obtain funding for demonstration wave generation facilities.

The city should establish two adjacent leash-free Dog parks, one for small dogs, one for large dogs, at Fort Ontario or Breitbeck Park.

The City should lead Oswego County, the City of Fulton, and the villages of Baldwinsville, Phoenix, and islands in the Oswego River. This would provide citizens with opportunities for kayaking or canoeing on daily and weekend excursions.

The City should encourage (or collaborate with) Harbor Festivals, Inc. and the CNY Kayak and Canoe Club to organize and host competitive races on the Oswego River. I envision a race menu that would allow single and double participants to enter any of the small races between successive locks on the canal, or in the big race the entire length of the Oswego River.

The City should renovate the old bathhouse at Flat Rock (Sheldon Beach) and assign lifeguards, allowing bathing at that site. Rubber water shoes are readily available, so the bathing, wading area need not necessarily be sand.

The City should collaborate with the Port Authority to establish a children's wading pad (like the one at Kingsford Park), together with an ample adult seating/picnic area at the Fitzgibbons Boiler site. This would go a long way to substituting for a beach, yet providing citizens with a lakeside venue.

The City should encourage Oswego County tourism to actively promote the Oswego Middle School "Kingsford Woods" environmental trail as a premiere Cross in country Skiing and/or Snowshoeing experience. This promotion would best be accomplished in association with the appropriate CNY interest groups, and could include regional competitions. The OMS trail or the Oswego Speedway could be a terrific dog-sledding competition venue.

The City should encourage (or collaborate with) Harbor Festivals, Inc. and appropriate CNY clubs to organize and host exhibits and competitions of Kite Boarding and Wind Surfing in Oswego Harbor.

One of the most important activities of the Mayor's office should be to vigorously pursue inclusion of pedestrian friendly access in the US Army Corp of Engineers evaluation of repairs necessary for the Breakwall.

Mike Goldych

Subject: Public waterfront access study project]

To: Mayor <mayorbateman@gmail.com>, Dave Turner <DTURNER@oswegocounty.com>

Cc: Ron Kaplewicz <aldermankaplewicz@gmail.com>, Susan Deary <sdeary@oswegony.org>,
Fred Crisafulli <fcrisafu@oswegony.org>, Mercedes Niess

<mercedes@hleewhitemarinemuseum.com>, Karen Noyes <KNOYES@oswegocounty.com>

Dave and Mayor Bateman,

Sorry for the delayed reply to this request soliciting Public Waterfront Access. I just ran across it today.

I want to add these potential sites in the City of Oswego for a Public Waterfront Access Study Project:

1. Sheldon Beach
2. Extension of the Oswego Harbor Trail through the NRG north side to Sheldon Beach and into SUNY campus
3. Eastern extension of the bicycle/hiking trail from Fort Ontario into the County wetlands at Teal Marsh-- that would allow the Great Lakes Seaway Trail to extend into the city (this was included by the County in the Harbor Rail Trail proposal in the 1990s).
4. (safe) access to Big Rock at the foot of Fort Ontario.
5. Access to the Breakwater and eventually to the Oswego Lighthouse
6. Access for kayaks and canoes at the Oswego River to access downtown venues (discussion about a floating dock behind the Captains Quarters Hotel)
7. Leto Island--especially now that the bridge is closed (DEC was interested in acquiring this)
8. Kayak/ canoe launch to be made official --north of the Oswego High Dam
9. Explore possible Kayak/white water canoe tract at the north side of Varick Hydro facility
10. Dry dock facility
11. Boat rental facilities--row boats, sailfish, windsurfers, motor boats.
12. Scuba Diving shops --especially if Underwater Blueway Trail is developed --see website for New York State Underwater Blueway trail <http://underwaterbluewaytrail.org/Bluewaytrail/Welcome.html>
13. Safety infrastructure ---life rings especially near the port docks to throw to people who fall into the river-- alarms or emergency contact boxes-- emergency high water rising light signals at Varick hydro.
14. Fishing access along the north eastern harbor area. Port does not allow fishing on its lands near Patz Restaurant.
15. Boat clean out stations--and more fuel stations for boaters. (competition can be good).
16. Erie Canal Heritage Corridor Bike and hiking trails to connect from the Oswego Riverwalks down to the Erie Canal along the entire Oswego Canal on both sides of the river.

I think that sums up the possibilities.

dave

would it be possible to include in the planning document for the taft bay park in the town of constantia, handicapped access to the pavillions,

a barrier (concrete wall) to prevent beach erosion from the north, and a boat launch for small boats and kayaks we would also like to include the site

at the end of county route 23 a floating dock and a fishing type pier and reconstruction of the break wall located at the site

if you need anymore info please contact me at anytime

thank you

chuck
