Agricultural	14	14	100.0%	881,500	881,500	100.0%	50	50	100.0%
Religious/Non-Profit	8	8	100.0%	4,599,200	4,599,200	100.0%	16	16	100.0%
Government	2	2	100.0%	878,700	878,700	100.0%	20	20	100.0%
Education	11	11	100.0%	400,000,000	400,000,000	100.0%	4000	4000	100.0%
Utilities	10	10	100.0%	15,710,750	15,710,750	100.0%	10	10	100.0%
Total	1699	1699	100.0%	589,701,775	589,701,775	100.0%	8756	8756	100.0%

Task B. Determine whether (and where) you want to collect additional inventory data.

Questions	Y	N
1. Do you know where your greatest damages may occur in your hazard areas?		
2. Do you know whether your critical facilities will be operational after a hazard event?		
3. Is there enough data to determine which assets are subject to the greatest potential damages?		
4. Is there enough data to determine whether significant elements of the community are vulnerable to potential hazards?		
5. Is there enough data to determine whether certain areas of historic, environmental, political, or cultural significance are vulnerable to potential hazards?		
6. Is there concern about a particular hazard because of its severity, repetitiveness, or likelihood of occurrence?		
7. Is additional data needed to justify the expenditure of community or state funds for mitigation initiatives?		

Date: August 10, 2009   What will be affected by the hazard event?   To

Task B. Determine whether (and where) you want to collect additional inventory data.

Questions	
1. Do you know where your greatest damages may occur in your hazard areas?	
2. Do you know whether your critical facilities will be operational after a hazard event?	
3. Is there enough data to determine which assets are subject to the greatest potential damages?	
4. Is there enough data to determine whether significant elements of the community are vulnerable to potential hazards?	
5. Is there enough data to determine whether certain areas of historic, environmental, political, or cultural significance are vulnerable to potential hazards?	
6. Is there concern about a particular hazard because of its severity, repetitiveness, or likelihood of occurrence?	
7. Is additional data needed to justify the expenditure of community or state funds for mitigation initiatives?

Town of Parish
Village of Parish

Date: What will be affected by the hazard event?

Task A. Determine the proportion of buildings, the value of buildings, and the population in your community or state that are located in hazard areas.

Type of Structure (Occupancy Class)	Number of Structures			Value of Structures			Number of People		
	# in Community	# in Hazard Area	% in Hazard Area	$ in Community	$ in Hazard Area	% in Hazard Area	# in Community	# in Hazard Area	% in Hazard Area
Residential	944	944	100.0%	57,113,689	57,113,689	100.0%	2700	2700	100.0%
Commercial	38	38	100.0%	5,360,500	5,360,500	100.0%			
Industrial	0	0		0	0				
Agricultural	8	8	100.0%	334,300	334,300	100.0%			
Religious/Non-Profit	6	6	100.0%	865,000	865,000	100.0%			
Government	6	6	100.0%	1,738,800	1,738,800	100.0%			
Education	4	4	100.0%	11,514,433	11,514,433	100.0%			
Utilities	8	8	100.0%	1,818,101	1,818,101	100.0%			
Total	1014	1014	100.0%	78,744,823	78,744,823	100.0%	2700	2700	100.0%

Task B. Determine whether (and where) you want to collect additional inventory data.

Questions	Y	N
1. Do you know where your greatest damages may occur in your hazard areas?	x	
2. Do you know whether your critical facilities will be operational after a hazard event?	x	
3. Is there enough data to determine which assets are subject to the greatest potential damages?	x	
4. Is there enough data to determine whether significant elements of the community are vulnerable to potential hazards?	x	
5. Is there enough data to determine whether certain areas of historic, environmental, political, or cultural significance are vulnerable to potential hazards?	x	
6. Is there concern about a particular hazard because of its severity, repetitiveness, or likelihood of occurrence?	x	
7. Is additional data needed to justify the expenditure of community or state funds for mitigation initiatives?		x

Utilities	1	0		300	0				
Total		616	547	88.8%	30,020,641	27,078,439	90.2%	667	600	90.0%

Task B. Determine whether (and where) you want to collect additional inventory data.

Questions	Y	N
1. Do you know where your greatest damages may occur in your hazard areas?	x	
2. Do you know whether your critical facilities will be operational after a hazard event?	x	
3. Is there enough data to determine which assets are subject to the greatest potential damages?	x	
4. Is there enough data to determine whether significant elements of the community are vulnerable to potential hazards?	x	
5. Is there enough data to determine whether certain areas of historic, environmental, political, or cultural significance are vulnerable to potential hazards?	x	
6. Is there concern about a particular hazard because of its severity, repetitiveness, or likelihood of occurrence?		x
7. Is additional data needed to justify the expenditure of community or state funds for mitigation initiatives?		x

6. Is there concern about a particular hazard because of its severity, repetitiveness, or likelihood of occurrence?	x
7. Is additional data needed to justify the expenditure of community or state funds for mitigation initiatives?	x

Date: **What will be affected by the hazard event?**

Task A. Determine the proportion of buildings, the value of buildings, and the population in your community or state that are located in hazard areas.

Type of Structure (Occupancy Class)	Number of Structures			Value of Structures			Num	
	# in Community	# in Hazard Area	% in Hazard Area	$ in Community	$ in Hazard Area	% in Hazard Area	# in Community	#
Residential	1483	1335	90.0%	121,953,800	109,758,420	90.0%	5661	
Commercial	70	63	90.0%	10,337,600	9,303,840	90.0%		
Industrial	7	6	85.7%	7,643,700	6,879,330	90.0%		
Agricultural	56	50	89.3%	4,776,700	4,299,030	90.0%		
Religious/Non-Profit	8	7	87.5%	2,254,300	2,028,870	90.0%		
Government	0	0		0				
Education	1	1	100.0%	3,675,000	3,675,000	100.0%		
Utilities	16	14	87.5%	4,451,200	4,006,080	90.0%		
Total	1641	1476	89.9%	155,092,300	139,950,570	90.2%	5661	

Task B. Determine whether (and where) you want to collect additional inventory data.

Questions	
1. Do you know where your greatest damages may occur in your hazard areas?	x
2. Do you know whether your critical facilities will be operational after a hazard event?	x
3. Is there enough data to determine which assets are subject to the greatest potential damages?	
4. Is there enough data to determine whether significant elements of the community are vulnerable to potential hazards?	x
5. Is there enough data to determine whether certain areas of historic, environmental, political, or cultural significance are vulnerable to potential hazards?	x
6. Is there concern about a particular hazard because of its severity, repetitiveness, or likelihood of occurrence?	x
7. Is additional data needed to justify the expenditure of community or state funds for mitigation initiatives?	x

Task B. Determine whether (and where) you want to collect additional inventory data.

Questions	Y	N
1. Do you know where your greatest damages may occur in your hazard areas?	x	
2. Do you know whether your critical facilities will be operational after a hazard event?	x	
3. Is there enough data to determine which assets are subject to the greatest potential damages?		x
4. Is there enough data to determine whether significant elements of the community are vulnerable to potential hazards?	x	
5. Is there enough data to determine whether certain areas of historic, environmental, political, or cultural significance are vulnerable to potential hazards?	x	
6. Is there concern about a particular hazard because of its severity, repetitiveness, or likelihood of occurrence?	x	
7. Is additional data needed to justify the expenditure of community or state funds for mitigation initiatives?	x

Task B. Determine whether (and where) you want to collect additional inventory data.

	Y	N
1. Do you know where your greatest damages may occur in your hazard areas?		✓
2. Do you know whether your critical facilities will be operational after a hazard event?	✓	
3. Is there enough data to determine which assets are subject to the greatest potential damages?	✓	
4. Is there enough data to determine whether significant elements of the community are vulnerable to potential hazards?	✓	
5. Is there enough data to determine whether certain areas of historic, environmental, political, or cultural significance are vulnerable to potential hazards?	✓	
6. Is there concern about a particular hazard because of its severity, repetitiveness, or likelihood of occurrence?	✓	
7. Is additional data needed to justify the expenditure of community or state funds for mitigation initiatives?	✓	

Date: *What will be affected by the hazard event?*

Task A. Determine the proportion of buildings, the value of buildings, and the population in your community or state that are located in hazard areas.

Task B. Determine whether (and where) you want to collect additional inventory data.

                      Y   N

1. Do you know where your greatest damages may occur in your hazard areas?   ___   ✓

2. Do you know whether your critical facilities will be operational after a hazard event?   ✓   ___

3. Is there enough data to determine which assets are subject to the greatest potential damages?   ✓   ___

4. Is there enough data to determine whether significant elements of the community are vulnerable to potential hazards?   ✓   ___

5. Is there enough data to determine whether certain areas of historic, environmental, political, or cultural significance are vulnerable to potential hazards?   ✓   ___

6. Is there concern about a particular hazard because of its severity, repetitiveness, or likelihood of occurrence?   ✓   ___

7. Is additional data needed to justify the expenditure of community or state funds for mitigation initiatives?   ✓   ___

Date:

What will be affected by the hazard event?

Task A. Determine the proportion of buildings, the value of buildings, and the population in your community or state that are located in hazard areas.

Task B. Determine whether (and where) you want to collect additional inventory data.

Questions
1. Do you know where your greatest damages may occur in your hazard areas?
2. Do you know whether your critical facilities will be operational after a hazard event?
3. Is there enough data to determine which assets are subject to the greatest potential damages?
4. Is there enough data to determine whether significant elements of the community are vulnerable to potential hazards?
5. Is there enough data to determine whether certain areas of historic, environmental, political, or cultural significance are vulnerable to potential hazards?
6. Is there concern about a particular hazard because of its severity, repetitiveness, or likelihood of occurrence?
7. Is additional data needed to justify the expenditure of community or state funds for mitigation initiatives?

Task B. Determine whether (and where) you want to collect additional inventory data.

Questions	
1. Do you know where your greatest damages may occur in your hazard areas?	x
2. Do you know whether your critical facilities will be operational after a hazard event?	x
3. Is there enough data to determine which assets are subject to the greatest potential damages?	x
4. Is there enough data to determine whether significant elements of the community are vulnerable to potential hazards?	x
5. Is there enough data to determine whether certain areas of historic, environmental, political, or cultural significance are vulnerable to potential hazards?	x
6. Is there concern about a particular hazard because of its severity, repetitiveness, or likelihood of occurrence?	
7. Is additional data needed to justify the expenditure of community or state funds for mitigation initiatives?	

Town of Volney Hazard: ice storm, winter storm severe
Inventory Assets

Date: **What will be affected by the hazard event?**

Task A. Determine the proportion of buildings, the value of buildings, and the population in your community or state that are located in hazard areas.

Task B. Determine whether (and where) you want to collect additional inventory data.

Questions	
1. Do you know where your greatest damages may occur in your hazard areas?	
2. Do you know whether your critical facilities will be operational after a hazard event?	
3. Is there enough data to determine which assets are subject to the greatest potential damages?	
4. Is there enough data to determine whether significant elements of the community are vulnerable to potential hazards?	
5. Is there enough data to determine whether certain areas of historic, environmental, political, or cultural significance are vulnerable to potential hazards?	
6. Is there concern about a particular hazard because of its severity, repetitiveness, or likelihood of occurrence?	
7. Is additional data needed to justify the expenditure of community or state funds for mitigation initiatives?

Task B. Determine whether (and where) you want to collect additional inventory data.

Questions	
1. Do you know where your greatest damages may occur in your hazard areas?	
2. Do you know whether your critical facilities will be operational after a hazard event?	
3. Is there enough data to determine which assets are subject to the greatest potential damages?	
4. Is there enough data to determine whether significant elements of the community are vulnerable to potential hazards?	
5. Is there enough data to determine whether certain areas of historic, environmental, political, or cultural significance are vulnerable to potential hazards?	
6. Is there concern about a particular hazard because of its severity, repetitiveness, or likelihood of occurrence?	
7. Is additional data needed to justify the expenditure of community or state funds for mitigation initiatives?	

Hazard: Epidemic
Inventory Assets

Date: August 10, 2009

What will be affected by the hazard event?

To

Task A. Determine the proportion of buildings, the value of buildings, and the population in your community or state that are located in hazard areas.

Type of Structure (Occupancy Class)	Number of Structures			Value of Structures			Num	
	# in Community	# in Hazard Area	% in Hazard Area	$ in Community	$ in Hazard Area	% in Hazard Area	# in Community	#

Task B. Determine whether (and where) you want to collect additional inventory data.

Questions	
1. Do you know where your greatest damages may occur in your hazard areas?	
2. Do you know whether your critical facilities will be operational after a hazard event?	
3. Is there enough data to determine which assets are subject to the greatest potential damages?	
4. Is there enough data to determine whether significant elements of the community are vulnerable to potential hazards?	
5. Is there enough data to determine whether certain areas of historic, environmental, political, or cultural significance are vulnerable to potential hazards?	
6. Is there concern about a particular hazard because of its severity, repetitiveness, or likelihood of occurrence?	
7. Is additional data needed to justify the expenditure of community or state funds for mitigation initiatives?

Task B. Determine whether (and where) you want to collect additional inventory data.

Questions	
1. Do you know where your greatest damages may occur in your hazard areas?	
2. Do you know whether your critical facilities will be operational after a hazard event?	x
3. Is there enough data to determine which assets are subject to the greatest potential damages?	x
4. Is there enough data to determine whether significant elements of the community are vulnerable to potential hazards?	x
5. Is there enough data to determine whether certain areas of historic, environmental, political, or cultural significance are vulnerable to potential hazards?	x
6. Is there concern about a particular hazard because of its severity, repetitiveness, or likelihood of occurrence?	x
7. Is additional data needed to justify the expenditure of community or state funds for mitigation initiatives?

Task A. Determine the proportion of buildings, the value of buildings, and the population in your community or state that are located in hazard areas.

Type of Structure (Occupancy Class)	Number of Structures			Value of Structures			Num	
	# in Community	# in Hazard Area	% in Hazard Area	$ in Community	$ in Hazard Area	% in Hazard Area	# in Community	#
Residential	589	30	5.1%	27,771,841	1,388,592	5.0%	667	
Commercial	18	1	5.6%	2,138,300	115,915	5.4%		
Industrial	3	0		62,100	0			
Agricultural	0	0		0	0			
Religious/Non-Profit	2	0		2,300	0			
Government	3	1	33.3%	45,800	15,114	33.0%		
Education	0	0		0	0			
Utilities	1	0		300	0			
Total	616	32	5.2%	30,020,641	1,519,621	5.1%	667	

Task B. Determine whether (and where) you want to collect additional inventory data.

Questions	
1. Do you know where your greatest damages may occur in your hazard areas?	x
2. Do you know whether your critical facilities will be operational after a hazard event?	x
3. Is there enough data to determine which assets are subject to the greatest potential damages?	x
4. Is there enough data to determine whether significant elements of the community are vulnerable to potential hazards?	x
5. Is there enough data to determine whether certain areas of historic, environmental, political, or cultural significance are vulnerable to potential hazards?	x
6. Is there concern about a particular hazard because of its severity, repetitiveness, or likelihood of occurrence?	
7. Is additional data needed to justify the expenditure of community or state funds for mitigation initiatives?

Task B. Determine whether (and where) you want to collect additional inventory data.

Questions	
1. Do you know where your greatest damages may occur in your hazard areas?	Y
2. Do you know whether your critical facilities will be operational after a hazard event?	Y
3. Is there enough data to determine which assets are subject to the greatest potential damages?	
4. Is there enough data to determine whether significant elements of the community are vulnerable to potential hazards?	Y
5. Is there enough data to determine whether certain areas of historic, environmental, political, or cultural significance are vulnerable to potential hazards?	Y
6. Is there concern about a particular hazard because of its severity, repetitiveness, or likelihood of occurrence?	Y
7. Is additional data needed to justify the expenditure of community or state funds for mitigation initiatives?	Y

Worksheet # 3a

Hazard:

Inventory Assets

6/26/2009

What will be affected by the hazard event?

TOWN OF RICHLAND
ICE,SEVERE,THUNDER,
WINTER STORM

Task A. Determine the proportion of buildings, the value of buildings, and the population in your community or state that are located in hazard areas.

Type of Structure (Occupancy Class)	Number of Structures			Value of Structures			N
	# in Community	# in Hazard Area	% in Hazard Area	$ in Community	$ in Hazard Area	% in Hazard Area	# in Community
Residential	5	5	100.0%				
Commercial	3	3	100.0%	839,000			
Industrial	0	0	0.0%				
Agricultural	0	0	0.0%				
Religious/Non-Profit	1	1	100.0%	331,000			
Government	10	10	100.0%	5,147,300			
Education	1	1	100.0%	3,675,000			
Utilities	3	3	100.0%				
Total	23	23	100.0%	9,992,300	0		5673

Task B. Determine whether (and where) you want to collect additional inventory data.

Questions
1. Do you know where your greatest damages may occur in your hazard areas?
2. Do you know whether your critical facilities will be operational after a hazard event?
3. Is there enough data to determine which assets are subject to the greatest potential damages?
4. Is there enough data to determine whether significant elements of the community are vulnerable to potential hazards?
5. Is there enough data to determine whether certain areas of historic, environmental, political, or cultural significance are vulnerable to potential hazards?
6. Is there concern about a particular hazard because of its severity, repetitiveness, or likelihood of occurrence?
7. Is additional data needed to justify the expenditure of community or state funds for mitigation initiatives?

Task B. Determine whether (and where) you want to collect additional inventory data.

	Y	N
1. Do you know where your greatest damages may occur in your hazard areas?		✓
2. Do you know whether your critical facilities will be operational after a hazard event?	✓	
3. Is there enough data to determine which assets are subject to the greatest potential damages?	✓	
4. Is there enough data to determine whether significant elements of the community are vulnerable to potential hazards?	✓	
5. Is there enough data to determine whether certain areas of historic, environmental, political, or cultural significance are vulnerable to potential hazards?	✓	
6. Is there concern about a particular hazard because of its severity, repetitiveness, or likelihood of occurrence?	✓	
7. Is additional data needed to justify the expenditure of community or state funds for mitigation initiatives?	✓	

Date:

What will be affected by the hazard event?

Task A. Determine the proportion of buildings, the value of buildings, and the population in your community or state that are located in hazard areas.

Task B. Determine whether (and where) you want to collect additional inventory data.

Questions
1. Do you know where your greatest damages may occur in your hazard areas?
2. Do you know whether your critical facilities will be operational after a hazard event?
3. Is there enough data to determine which assets are subject to the greatest potential damages?
4. Is there enough data to determine whether significant elements of the community are vulnerable to potential hazards?
5. Is there enough data to determine whether certain areas of historic, environmental, political, or cultural significance are vulnerable to potential hazards?
6. Is there concern about a particular hazard because of its severity, repetitiveness, or likelihood of occurrence?
7. Is additional data needed to justify the expenditure of community or state funds for mitigation initiatives?

Town of Volney

Date: **What will be affected by the hazard event?**

Task A. Determine the proportion of buildings, the value of buildings, and the population in your community or state that are located in hazard areas.

Type of Structure (Occupancy Class)	Number of Structures			Value of Structures			Number of People		
	# in Community	# in Hazard Area	% in Hazard Area	$ in Community	$ in Hazard Area	% in Hazard Area	# in Community	# in Hazard Area	% in Hazard Area
Residential	2333	933	40.0%	195,972,000	78,388,800	40.0%	6038	2415	40.0%
Commercial	67	26	38.8%	25,994,755	10,137,954	39.0%			
Industrial	20	7	35.0%	25,829,500	9,040,325	35.0%			
Agricultural	43	16	37.2%	2,796,300	1,034,631	37.0%			
Religious/Non-Profit/health	8	3	37.5%	20,825,800	7,913,804	38.0%			
Government	3	1	33.3%	933,000	307,890	33.0%			
Education	2	1	50.0%	1,590,909	795,454	50.0%			
Utilities	39	15	38.5%	24,247,623	9,214,096	38.0%			
Total	2515	1002	39.8%	298,189,887	116,832,954	39.2%	6038	2415	40.0%

Task B. Determine whether (and where) you want to collect additional inventory data.

Questions	Y	N
1. Do you know where your greatest damages may occur in your hazard areas?	x	
2. Do you know whether your critical facilities will be operational after a hazard event?	x	
3. Is there enough data to determine which assets are subject to the greatest potential damages?	x	
4. Is there enough data to determine whether significant elements of the community are vulnerable to potential hazards?	x	
5. Is there enough data to determine whether certain areas of historic, environmental, political, or cultural significance are vulnerable to potential hazards?	x	
6. Is there concern about a particular hazard because of its severity, repetitiveness, or likelihood of occurrence?		x
7. Is additional data needed to justify the expenditure of community or state funds for mitigation initiatives?		x

Task B. Determine whether (and where) you want to collect additional inventory data.

Questions	
1. Do you know where your greatest damages may occur in your hazard areas?	
2. Do you know whether your critical facilities will be operational after a hazard event?	
3. Is there enough data to determine which assets are subject to the greatest potential damages?	
4. Is there enough data to determine whether significant elements of the community are vulnerable to potential hazards?	
5. Is there enough data to determine whether certain areas of historic, environmental, political, or cultural significance are vulnerable to potential hazards?	
6. Is there concern about a particular hazard because of its severity, repetitiveness, or likelihood of occurrence?	
7. Is additional data needed to justify the expenditure of community or state funds for mitigation initiatives?	

Date: **What will be affected by the hazard event?**

Task A. Determine the proportion of buildings, the value of buildings, and the population in your community or state that are located in hazard areas.

Type of Structure (Occupancy Class)	Number of Structures			Value of Structures			Numl	
	# in Community	# in Hazard Area	% in Hazard Area	$ in Community	$ in Hazard Area	% in Hazard Area	# in Community	# i
