

# Public Works Committee

Meeting Minutes  
Friday, November 17, 2017

---

Attendance: Mr. Ruse, Ms. Zuchowski-Eckel, Mr. Oberdorf, Mr. Scott, Mr. Kolb, Mr. Williams, Mr. Langenderfer

The committee decided that the projects that are currently under design be completed and plans become off the shelf ready when funding is available.

Bob Williams of MSG and the design engineer from MSG came and presented the drawings for the Colony, Colony Road and Eagle Point Road. The committee members will review the drawings and get back to them with any comments.

Mr. Ruse asked for numbers on the projects as well as full depth reclamation costs vs. a complete rebuild.

The committee also asked that they combine the road and the storm water projects for the colony into one project. The costs still show them as two stand alone projects.

Andy Langenderfer of Tetra Tech gave a report and updated schedule of the River Road/Colony/Dixie Highway Roundabout. Tetra Tech is currently waiting for comments back from ODOT.

Mr. Kolb asked that the committee approve the remaining equipment to the cab and chassie that will be completed this December.
