Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 11/15/2017. The last waste pickup for all waste streams was in August 2015. The Used oil tank is 240 gallons and is approximately 2/3 full at this time. There is a 30 gallon drum for waste antifreeze that is almost full, and a drum for used oil filters. Have a waste picked up or take waste to the County Hazardous waste disposal facility as a VSQG within 30 days and provide documentation

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-21-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: EPA ID number CAL000356667 Active. No manifests on Hazardous Waste tracking system. Facility is a very small quantity generator of used oil, antifreeze, and oil filters. Recommend getting rid of used oil tank since facility generates so little oil. Regardless of how full the tank is, hazardous waste must be disposed of every 180 days or within 90 days of reaching 27 gallons total. There have been no pickups since August 2015, and tank is not full. Facility can utilize the County's Very Small Quantity Generator (VSQG) Program for disposal of waste. Brochure left on site during 2015 and explained again during today's inspection.

CERS ID: 10067317
CERS Description: Chemical Storage Facilities

Violations:

Site ID: 88930
Site Name: A+ JAPANESE AUTO REPAIR INC
Violation Date: 03-29-2016
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173

Violation Description: Failure to properly close hazardous waste containers when not in active use.

Violation Notes: Returned to compliance on 03/29/2016. Two 5-gallon buckets used for draining containers completely open during work day but will be drained at the end of the day. Waste antifreeze drum open but closed during inspection.

Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 88930
Site Name: A+ JAPANESE AUTO REPAIR INC
Violation Date: 04-24-2018
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple

Violation Description: Hazardous Waste Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 07/20/2018. As a non-RCRA large quantity generator, the aboveground tank used for waste oil storage must receive a tank system integrity assessment once every five years. Complete this assessment within 60 days and keep a copy on site for review during a subsequent inspection.

Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 88930
Site Name: A+ JAPANESE AUTO REPAIR INC
Violation Date: 04-04-2014
Citation: 40 CFR 1 265.32 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.32

Violation Description: Failure of the facility to maintain the following emergency equipment or equivalents: 1) An internal communications or alarm system capable of providing immediate emergency instruction (voice or signal) to facility personnel; 2) A device, such as a telephone (immediately available at the scene of Operations/ Maintenance) or a hand-held two-way radio, capable of summoning emergency assistance from local police departments, fire departments, or State or local emergency response teams; 3) Portable fire extinguishers, fire control equipment (including special extinguishing equipment, such as that using foam, inert gas, or dry chemicals), spill control equipment, and decontamination equipment; and 4) Water at adequate volume and pressure to supply water hose streams, or foam producing equipment, or automatic sprinklers, or water spray systems.

Violation Notes: Returned to compliance on 04/15/2014. Eyewash station is not inspected. (Facility recharges car batteries)

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 03/29/2016. Two 5-gallon plastic buckets used for draining containers completely were not labeled. Roll away oil carts labeled but accumulation start date missing. Antifreeze drum labeled but illegible except for the accumulation start date. All containers labeled or relabeled during inspection as needed.

S103171891

Violation Notes: Returned to compliance on 04/15/2014. Portable used oil containers (empty daily) didn't have Hazardous Waste labels. Incomplete labels on used oil and used antifreeze.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 88930
Site Name: A+ JAPANESE AUTO REPAIR INC
Violation Date: 03-28-2016
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a site map with all required content.

Violation Notes: Returned to compliance on 08/26/2016. Site map needs to be revised to show current hazmat storage locations and storm drain locations.
Violation Division: San Mateo County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 88930
Site Name: A+ JAPANESE AUTO REPAIR INC
Violation Date: 04-24-2018
Citation: 40 CFR 1 265.201(c)(3) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.201(c)(3)
Violation Description: Failure to inspect hazardous waste tanks at least once each operating day for the following, when present: (1) Discharge control equipment (e.g., waste feed cutoff systems, by-pass systems, and drainage systems) to ensure that it is in good working order; (2) Data gathered from monitoring equipment (e.g., pressure and temperature gauges) to ensure that the tank is being operated according to its design; (3) The level of waste in the tank.

Violation Notes: Returned to compliance on 07/20/2018. Based on Safety-Kleen waste oil disposal records, business is consistently generating and disposing of 270 gallons or more of used motor oil per month and as a result, business is considered a non-RCRA large quantity generator. Maintain a record of waste oil tank daily inspections. CUPA will email an inspection form that can be used for this requirement.

Waste Description:	METHYL ETHYL KETONE

Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code:	F005
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF

Name: KELLY MOORE PAINT COMPANY 1114
Address: 1075 COMMERCIAL ST
City,State,Zip: SAN CARLOS, CA 94070
Site ID: 127493
CERS ID: 10068346
CERS Description: Chemical Storage Facilities

Violations:

Site ID: 127493
Site Name: KELLY MOORE PAINT COMPANY 1114
Violation Date: 06-13-2016
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.
Violation Notes: Returned to compliance on 07/07/2016. Use CERS Consolidated Emergency Response/Contingency Plan template form available on the CERS website which contains an Earthquake Vulnerability Subsection that can be completed. Provide a current phone number for the Local Hazardous Materials Program (same as the CUPA phone number) in the emergency contact agency section.
Violation Division: San Mateo County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 127493
Site Name: KELLY MOORE PAINT COMPANY 1114
Violation Date: 06-13-2016
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 07/07/2016. Update hazardous materials inventory as needed. Delete consumer products due to reporting exemption. Hazardous materials inventory should include hazardous waste, Kelly Moore "recyclable" paint materials (not PaintCare paint), and tint colorants stored at or above the established reporting thresholds.

Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On-site with Andrew Reynolds for CUPA closure inspection. Walked through facility and verified removal of materials, hazardous waste, etc, and located some tints on a wheel for paint mixing, these will be disposed of tomorrow by ingenium at which point the permit will be closed out. Also noted on-site still was an air compressor, a few fluorescent tubes, and some other small electronic universal waste items. These items have been confirmed that the construction compny demolishing teh building will dispose during decomissioning. The final manifests are on file including the paint waste from Ingenium on 4/12/21. manifest # 000379501 No further actions required aside from emailing final manifest from Ingenium after pickup on 4/16. Facility permits will be closed out for the CUPA based on this inspection.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History:

Extracted from ERAS's June 17, 2009 Work Plan for Environmental Investigation, San Mateo County does not take responsibility for the accuracy of the statements made or any professional interpretations made in the referenced report. The Lighthouse is located at 734 El Camino Real in San Carlos, California in a commercial district between El Camino Real and a City of San Carlos alleyway. The site is improved with a one-story building with a partial second story, which occupies the entire lot. The Lighthouse is a retail lamp and lighting fixture outlet that has occupied the building since 1959. A 300-gallon gasoline underground storage tank (UST) was located near the southwest property line adjacent to the alleyway. The former dispenser was located above the tank, and a remote fill was located outside the building about 4 feet away. The area of the former UST pit is now inside an addition to the back of the building. This portion of the building is used for inventory storage and delivery. Retail sales, service businesses and restaurants surround the subject site. A former gasoline station is located approximately 150 feet to the north of the subject site. The opposite (northeast) side of El Camino is occupied by Cal Train railroad tracks. The adjacent property to the southeast of the subject site, 740 to 744 El Camino Real (The Chang property), is occupied by businesses along El Camino Real and a parking lot along the back alley. The adjacent site to the northwest, 718 El Camino Real, is occupied by San Carlos Pet Hospital and parking lot. 20 December 1993: A 300-gallon gasoline underground storage tank (UST) was removed from inside the rear of the building by SEMCO at which time one soil sample was collected directly below the former UST. The sample was analyzed for total petroleum hydrocarbons as gasoline (TPH-G), benzene, toluene, ethylbenzene, and total xylenes (BTEX), and lead (Pb). These analytes were detected at 1,100 milligrams per kilogram (mg/Kg), 3.8mg/Kg, 39mg/Kg, 16mg/Kg, 99mg/Kg, and 75mg/Kg, respectively. August 1994: Environmental Restoration Services (EnRest) advanced one boring to groundwater in the center of the former tank pit. At that time, EnRest reported a strong hydrocarbon odor in the soil and noted an oily sheen on the saturated soil. 14 September 1994: EnRest advanced borings SB-1 through SB-6 and collected groundwater grab-samples. Concentrations of TPH-G and BTEX were detected in the groundwater. No soil samples were analyzed. November 1994: EnRest advanced borings C-1 through C-4

THE LIGHTHOUSE (Continued)

S102444547

and collected groundwater grab samples. Concentrations of TPH-G and BTEX were detected in two of the four groundwater samples analyzed. June 1996: EnRest installed two off-site monitoring wells (MW-1 and MW-2), and one onsite monitoring well (MW-3) inside the building. Soil samples and groundwater samples collected from the wells were analyzed for TPH-G, BTEX and methyl-tert-butyl ether (MTBE). These constituents were not detected above laboratory reporting limits in any of the samples. EnRest concluded that hydrocarbon impact was confined within the triangular area defined by the monitoring wells. 28 August 1996: EnRest collected soil samples in and around the former tank pit area to evaluate the extent of soil impact. Petroleum hydrocarbons were detected in the soils up to 2,300mg/Kg TPH-G, 19mg/Kg benzene and 34mg/Kg MTBE. As a result, the former tank pit was over-excavated in January of 1997. EnRest reported that 18 yards of impacted soils were excavated, treated, and properly disposed. Following over-excavation four sidewall samples (S-SW, W-SW, N-SW and E-SW) were collected from a depth of 7 feet below ground surface (bgs). Benzene concentrations in soil ranged up to 62mg/Kg. MTBE was not detected above 0.05mg/Kg. February 1997: The former UST pit was back-filled with pea gravel. Prior to filling the tank pit the groundwater was inoculated with Solmar L-104 hydrocarbon consuming microbes. EnRest installed monitoring well MW-4 within 10 feet of the former tank location in the down-gradient position. Two soil samples were collected from the boring for MW-4 at 10 and 15 feet bgs, and one groundwater sample was collected from well MW4. Concentrations of TPH-G and BTEX were detected in the groundwater sample and the soil sample from 10 feet bgs. 20 May through 11 October 1998: EnRest conducted a bio-venting pilot study at the site. Four induction points were installed within 15 feet of MW-4 in both the cross-gradient and down-gradient directions of the well. The well points were driven to 12 feet bgs. This pilot study measured the effectiveness of the introduction of low flows of air into the aquifer to facilitate aerobic biodegradation of the contaminant plume. The four induction points were plumbed to a one horsepower, low-pressure blower to inject ambient air into the aquifer. EnRest concluded that the low-pressure air induction system was not able to push the 4-foot column of water within the well point down to the aquifer where oxygen could then be released to the targeted gravelly unit at 10 feet bgs. EnRest recommended that a second bio-venting study be conducted using a high-pressure air flow system. 17 February 2000: Piers Environmental Services, Inc. (PIERS) began a high-pressure bio-vent pilot test. February 2000: PIERS prepared a Feasibility Study Work Plan. In their evaluation PIERS stated that the water-bearing zone is confined, and that groundwater in well MW-4 may come into contact with the potentially contaminated overlying clay yielding analytical results not representative of actual groundwater conditions. San Mateo County GPP required the reinstallation of well MW-4 with the top of screen below 10 feet bgs. March 2000: PIERS sampled groundwater from well MW-4. The groundwater was found to contain 3,700" g/L TPH-G and 3.2" g/L benzene, a significant reduction in hydrocarbon concentrations over previous groundwater samples from that well. Bio-venting continued during overnight hours with vapor venting from the uncapped MW-4. May 2000: ERAS was contracted to fulfill the recommendation of GPP to install a replacement well for MW-4 and continue groundwater monitoring. ERAS sampled groundwater from well MW-4. Fuel hydrocarbon compounds were found in significantly higher concentrations than those reported for

THE LIGHTHOUSE (Continued)

S102444547

the groundwater sample collected in March 2000. In July 2000, ERAS installed 0.75-inch diameter well MW-5 within 5 feet of MW-4. The 5-foot screened interval was placed at 11.3 to 16.3 feet bgs. No soil samples were collected. A groundwater sample was collected. July 2000 to the present: ERAS resumed quarterly groundwater monitoring of wells MW-1 through MW-5. October 2000: It was noticed that a well-point of the soil-venting system was leaking. The system was shut-down for a week and repaired on October 11, 2000. Bio-venting was resumed during the nighttime only, venting from well MW-4. December 2000: Soil-venting was discontinued due to concern over the possibility of benzene vapor accumulating in the building. Resumption of the bio-venting system is not planned until the potential effectiveness of soil-venting is reassessed and the system is retro-fitted with a vapor extraction and treatment system. June 2001: ERAS prepared a Site Conceptual Model (SCM). As part of the SCM ERAS analyzed the attenuation of dissolved benzene, toluene and total xylene isomers (BTX) to discern if the injection of air to the subsurface during a pilot test conducted by EnRest resulted in the enhancement of aerobic degradation as was hoped. Lipson and Siegel (2000, Using Ternary Diagram to Characterize Transport and Attenuation of BTX, Groundwater, vol., no. 1, p. 106-113) discussed the analysis of the relative proportions of BTX to characterize the mechanisms controlling the fate and transport of aromatic hydrocarbons at a site. When BTX concentrations are plotted as proportions on a ternary diagram the data points a trajectory with a trend that is a function of the major attenuation or transport mechanism. Both biodegradation and sorption tend to produce BTX trajectories toward the benzene apex over both distance and time due to the more efficient removal of toluene and xylenes by these mechanisms. Volatilization produces a trajectory toward the xylenes apex as benzene and toluene more readily volatilized out of the dissolved phase. Dispersion produces no clear trajectory as none of the aromatic hydrocarbons are selectively removed from the dissolved phase. ERAS prepared a ternary diagram for BTX from wells MW-4 and MW-5 with respect to time. The changes in the data trajectory were analyzed starting February 1997 through May 2001 and included the periods during the bio-venting pilot tests conducted by EnRest from May 1998 to October 1998, and from February 2000 to December 2000 when the bio-vent system, A detailed description of the analysis is included in the SCM (ERAS 29 June 2001). In summary, the reduction in dissolved fuel hydrocarbon concentrations detected in groundwater samples collected from wells MW-4 and MW-5 during the periods of the bio-vent pilot tests appears to be due primarily to volatilization caused by the bio-vent system. No clear evidence of aerobic biodegradation was found. January and February 2002: ERAS conducted a soil and grab-groundwater investigation that included collection of eight soil samples and three grab groundwater samples from 5 locations, GS-1 through GS-5. The boring locations were placed as close as possible to the groundwater grab-sample locations of 1994, SB-1 through SB-6, to compare the analytical results with data from the previous investigation. The data from this investigation indicated that the area of contaminated soil acting as a potential source of contamination to the groundwater is wider than previously estimated. May 21 through 23, 2003: ERAS installed wells MW-6 and MW-7, and collected soil and groundwater grab samples from boring GS-6. Soil-gas samples were collected adjacent to well MW-6 and a temporary sub-slab port near the center of the building. BTEX

concentrations in the vapor sample collected from the boring for MW-6 were either below the laboratory reporting limit or below the ESLs for the protection of residential indoor air. The sub-slab sample was found to contain elevated contaminant concentrations. December 2003: ERAS conducted a conduit and well survey. March 21, 2005: ERAS conducted a grab-groundwater investigation. Boring GS-7 located adjacent to well MW-3 was advanced to confirm that the shallow groundwater above 15 feet bgs does not contain detectable hydrocarbon compounds, which was found to be the case. Boring GS-8 was advanced behind the adjacent building at 718 El Camino Real to confirm that hydrocarbon contamination had not impacted soil or groundwater in that area, which was found to be the case. April 15 to 19, 2005: Toxichem Management Systems (Toxichem) conducted a soil-gas investigation and preliminary risk assessment for indoor air at the Property. The risks associated with migration of carcinogenic vapor phase contaminants into residential and commercial structures were estimated to be unacceptable. Non-carcinogenic hazards were estimated as acceptable for a commercial setting. Groundwater grab-samples were also collected from 6 to 8 feet bgs. August 23 through September 28, 2006: ERAS conducted a subsurface investigation and well installation, including installation of onsite well MW-8, and offsite wells MW-10 and MW-11. Borings for the collection of soil and groundwater samples were advanced on the adjacent property at the Chang Property (GS-9 and GS-10) and along El Camino Real (GS-10 and GS-11). Additionally, the former air injection points and soil-gas sample ports SV-1 through SV-3, and SV-5 through SV-11 were abandoned. Soil-gas sample port SV-4 was completed with swagelock valves and covered by a traffic-rated well vault. Quarter 3, 2006 Monitoring Event: ERAS additionally analyzed selected groundwater samples for methane and dissolved iron among other bioremediation byproducts. ERAS plotted the concentrations of benzene, methane and dissolved iron in groundwater versus distance roughly along the plume axis from well MW-6, MW-4, MW-8, and MW-7 to boring GS-11 indicated elevated methane around MW-4 and MW-8, depleted dissolved iron in the sample from MW-8, and increase dissolved iron and less methane in sample from MW-7. The presence of methane and dissolved iron can be indicators of anaerobic bioremediation activity. In oxygen depleted environments, microbes will use iron as an electron acceptor for the metabolism of hydrocarbons. When other electron acceptors are depleted, microbes will metabolize hydrocarbons by a process of methanogenesis. It appears that some level of anaerobic biodegradation is operating at the site. Anaerobic degradation proceeds much more slowly than aerobic biodegradation in oxygenated environments. August 2006: Toxichem conducted an onsite indoor air sample and risk assessment for the Property. The indoor air samples were found to exceed the Tier I ESLs for benzene and other compounds. The risk assessment found the indoor air quality in the Lighthouse building to be unacceptable with respect to human health for commercial land use. August and December 2006: Toxichem conducted a multi-level soil gas sample investigation at the Lighthouse and the adjacent property, the Chang Property, to delineate the extent of soil-gas contamination. The investigation included sub-slab vapor samples beneath the building foundation slab at the 740 El Camino Real. These sub-slab samples were not found to contain contaminants above the Tier I ESLs for residential land use. March 2008: ERAS submitted a Corrective Action Plan (CAP). In the 9 April 2009 letter, GPP responded to issues in the CAP, including a request for a pilot

Groundwater Monitoring Report - First Half 2010, San Mateo County does not take responsibility for the accuracy of the statements made or any professional interpretations made in the referenced report. In 1946, three (3) 4,000 gallon underground storage tanks (USTs) were installed in the eastern corner of the subject property. The USTs were used for storage of leaded and unleaded gasoline. The tanks were decommissioned in circa 1983 when the tanks and all associated piping were removed. The tanks were replaced with three (3) 10,000 gallon fiberglass USTs installed near the northern corner of the subject property that store gasoline and diesel fuel. No environmental sampling was reportedly conducted during the circa 1983 tank and piping removal activities and no closure report was required at that time. A 550-gallon waste oil UST was removed from the central portion of the subject property in 1994. When the tank was removed, approximately 15 to 20 gallons of oil reportedly leaked from holes in the tank into the excavation. Oil was pumped from the excavation and approximately one (1) foot of soil was removed from the bottom of the excavation. After removal of the soil, a soil sample was collected from the base of the excavation, approximately seven (7) feet below ground surface (bgs). The soil sample contained concentrations of oil and grease, total petroleum hydrocarbons as diesel (TPHd), total petroleum hydrocarbons as gasoline (TPHg), benzene (B), toluene (T), ethylbenzene (E), and xylenes (X), halogenated volatile organic compounds (HVOCs), and heavy metals (chromium, nickel, lead and zinc). The report on the waste oil UST removal and sampling was presented in a technical report by Weiss Associates, Inc. (Weiss Associates) dated February 25, 1998. Groundworks Environmental, Inc. conducted a preliminary site assessment (PSA) of the waste oil UST area in September 1996. The PSA consisted of the collection and analyses of soil and groundwater grab samples from the waste oil UST area and installation of three (3) temporary piezometers to determine groundwater gradient. Soil and groundwater samples were analyzed for total recoverable petroleum hydrocarbons (TRPH), TPHg, BTEX, methyl tert butyl ether (MTBE), and HVOCs. The groundwater flow direction was determined to be to the northeast with a gradient of approximately 0.12 vertical feet/ horizontal feet (ft/ft). In January 1998, Weiss Associates conducted a soil and groundwater investigation that involved drilling thirteen (13) soil borings designated BWO, and B-9 through B-20, respectively. The investigation showed petroleum contamination in groundwater extending east and northeast of the subject property. Another result of the investigation was to gain closure of the former waste oil UST without further over excavation. In August 1998, Weiss Associates prepared a feasibility study report that addressed the onsite contamination. In September 2001, Environmental Restoration Services (ERS) conducted remedial activities involving the excavation of between 1,120 and 1,200 tons of contaminated soil around the former gasoline UST area in the eastern corner of the subject property, and pumping of up to 18,500 gallons of contaminated water from the excavation. In August 2002, three (3) groundwater monitoring wells (MW-1, MW-2 and MW-3) were installed on the subject property by Atlas Engineering Services, Inc (Atlas). A fourth well, MW-4, was installed off-site in August 2003. Quarterly monitoring was conducted by Atlas until June 2004. The monitoring data indicated groundwater flow direction was towards the east /northeast. In June 2004, Atlas proposed installing three (3) additional off-site wells (designated MW-5, MW-6 and MW-7) and three (3) additional offsite borings (designated B-21, B-22 and B-23). By

letter dated November 5, 2004, SMCoGPP reduced the scope of work to only installing two (2) of the proposed three (3) wells (MW-6 and MW-7), and eliminating the need for the proposed borings. In March and April 2007, GEI installed Wells MW-6 and MW-7 off-site on the east side of El Camino Real. The two (2) newly installed wells were first sampled on August 9, 2007. Modest levels of fuel hydrocarbons (TPHg, BTEX, and MTBE) were detected in the initial groundwater sample from Well MW-6, and only TPHg and MTBE were detected in the initial groundwater sample from Well MW-7.

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Date: 11-28-2018
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16

Violation Description: Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Violation Notes: Returned to compliance on 02/25/2019. Hazardous waste training was last documented in August 2017. Hazardous waste training must be completed annually and documented according to regulation. The documentation must include job descriptions that relate to hazardous waste. Provide documentation of Hazardous waste training with the appropriate hazardous waste job duties within 30 days.

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to prepare a Spill Prevention, Control, and Countermeasures (SPCC) Plan.
Violation Notes: Returned to compliance on 02/21/2019. Prepare an SPCC and provide documentation to SMCUPA within 30 days.

Violation Division: San Mateo County Environmental Health
Violation Program: APSA
Violation Source: CERS

Site ID: 442874
Site Name: Primo Honda
Violation Date: 11-28-2018
Citation: 22 CCR 15 66265.192(a) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(a)
Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer prior to placing the tank system in service. The written assessment shall state that, the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed to meet the regulation.
Violation Notes: Returned to compliance on 06/03/2019. All tanks are new, however, there is no hazardous waste tank assessment on file. Provide a hazardous waste tank assessment for the waste oil and coolant tanks within 30 days.

Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 442874
Site Name: Primo Honda
Violation Date: 12-05-2019
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 12/13/2019. Open, unlabeled bucket of used antifreeze was found in the service area. Transfer contents of the bucket into the waste antifreeze storage container, or label the container 'used antifreeze, empty daily' and ensure it is closed when not actively adding waste. Few inches of used oil in the secondary container under oil filter crusher. Pump out used oil from the

Eval Type: Routine done by local agency
Eval Notes: Not reported
Eval Division: San Mateo County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-28-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Initial inspection at new facility. Facility has been open since June 2018 and no HMBP has been submitted at this time. Facility is out of compliance and HMBP must be submitted within 30 days. Hazmat storage includes 1000 gallon waste oil tank, 2, 500 gallon new oil tanks, 240 gallon ATF tank, 250-300 gallon waste antifreeze tank, and drums of car wash soap, drying agent, brake clean, waste brake clean, waste oil filters, and waste oily solids. Ensure all chemicals stored at greater than threshold amounts are included in the HMBP

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	03-26-2021
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	Facility SPCC is up to date. the plan is stamped by professional engineer and not currently due for any 5 year re-certification. Facility can complete a self-certified HMBP via the Tier I/II federal template available online. Please contact dan for additional questions on completing this plan. Plan is accurate and up to date and meets APSA requirements. Inspections in tank room conducted frequently and documented on clipboard. All tanks are double wall UL listed tanks and the waste tanks have received hazardous waste tank assessment by a PE.

Violation Notes: hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Returned to compliance on 05/28/2019. Business has over one 55 gallon drum of waste coolant and last waste coolant pick up was in August 2017. It appears that the waste coolant accumulation period exceeded 180 days after 100 kg. or 27 gallons. Dispose of waste coolant within 30 days and submit a copy of the disposal record to the CUPA to correct the minor violation.

EDR Link ID: SAN CARLOS, CA

CPS-SLIC:
Name: PRAXAIR DISTRIBUTION
Address: 767 INDUSTRIAL
City,State,Zip: SAN CARLOS, CA 94070
Region: STATE
Facility Status: **Open - Long Term Management**
Status Date: 08/12/2021
Global Id: T0608146836
Lead Agency: SAN MATEO COUNTY LOP
Lead Agency Case Number: 779075
Latitude: 37.5089726466896
Longitude: -122.252106964588
Case Type: Cleanup Program Site
Case Worker: BG
Local Agency: SAN MATEO COUNTY LOP
RB Case Number: 41-0844
File Location: Local Agency
Potential Media Affected: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Trichloroethylene (TCE)
Site History: Can be extracted from most recent report in Geotracker or at San Mateo County offices if submitted prior to 2005, San Mateo County does not take responsibility for the accuracy of the statements made

Site Name: SAN CARLOS TRANSMISSION
Violation Date: 11-21-2019
Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description: Failure to meet the following conditions of satellite accumulation regulations: G Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. G Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. G The generator complies with section 66265.171, 66265.172, and 66265.173(a). G The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words G Hazardous WasteG including specified information G Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a G 90 dayG accumulation area G 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated
Violation Notes: Returned to compliance on 01/14/2020. Used paper filters and used metal filters were last disposed of December 2017. Dispose of both metal and paper oil filters and submit documentation to the inspector within the comply by date,

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Description: Failure to post the following information next to the telephone: (A) The name and telephone number of the emergency coordinator; (B) Location of fire extinguishers and spill control material, and, if present, fire alarm; and (C) The telephone number of the fire department, unless the facility has a direct alarm.

Violation Notes: Returned to compliance on 02/12/2020. During the inspection I did not observe an emergency procedures form posted in a visible location. Complete the emergency procedures form provided by the CUPA (or similar) and post it on site in a visible location. Provide proof of corrective action to the CUPA within 30 days.

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: Returned to compliance on 01/16/2016. Report new thinner and recycled thinner drums separate from waste thinner drum.

Violation Division: San Mateo County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 158287
Site Name: SUPERIOR BODY SHOP
Violation Date: 12-19-2017
Citation: 22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7

Violation Description: Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2) By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or re manufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or re-manufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.

Violation Notes: Returned to compliance on 12/19/2017. Four containers observed in garbage can that were not considered empty containers pursuant to state regulation. Each container was removed from garbage can and drained until no free product drained from container opening. CUPA will email a state fact sheet that can be reviewed with key personnel and used for training purposes.

Site ID: 158287
Site Name: SUPERIOR BODY SHOP
Violation Date: 01-13-2020
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: Returned to compliance on 02/18/2020. The hazardous materials inventory should not include the 55 gallon drum of recycled wash thinner. Revise the chemical location description for new paint products in the Paint Room to correspond to a similar room description on the Site Map. Chemical locations for new thinner and waste thinner changed and the chemical location description for these items must be revised. Revise the Chemical Description Section based on the above comments and submit a revised HMBP within 30 days.

Violation Division: San Mateo County Environmental Health

Violation Notes: Waste, and starting accumulation date. Returned to compliance on 02/04/2014. 1 5 gallon of waste from gun cleaner and 1 55 gallon drum of waste thinner had label on wall. Label must be placed on accumulation container and must have a date. HW labels used to label used thinner that is not yet waste. Advised to remove waste labels from these containers and relabel as "used thinner."

Violation Date: 12-19-2017

Citation: 22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7

Violation Description: Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or re manufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or re-manufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.

Violation Notes: Returned to compliance on 12/19/2017. Four containers observed in garbage can that were not considered empty containers pursuant to state regulation. Each container was removed from garbage can and drained until no free product drained from container opening. CUPA will email a state fact sheet that can be reviewed with key personnel and used for training purposes.

Violation Date: 01-13-2020
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)

Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

Violation Notes: Returned to compliance on 02/18/2020. Provide hazardous materials safety and emergency procedures training to all employees during new employee orientation and annually thereafter. Submit a copy of the training record to the CUPA within 30 days for all employees that work on site.

Violation Division: San Mateo County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 158287
Site Name: SUPERIOR BODY SHOP
Violation Date: 12-18-2013
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 02/04/2014. 1 5 gallon of waste from gun cleaner and 1 55 gallon drum of waste thinner had label on wall. Label must be placed on accumulation container and must have a date. HW labels used to label used thinner that is not yet waste. Advised to remove waste labels from these containers and relabel as "used thinner."

Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 158287
Site Name: SUPERIOR BODY SHOP
Violation Date: 12-19-2017
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical

Click Here:

Environmental Interest/Information System:

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Case Worker: UUU
Local Agency: SAN MATEO COUNTY LOP
RB Case Number: 41S0017
Loc Case Number: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Contaminants of Concern: * Solvents
Potential Media Affected: Under Investigation
Site History: Harris Microwave Semiconductor , Inc. operated at the site until May 1984. Sump removal (neutralization tank) from the facility in 1986; TCE was detected in soil samples up to 6mg/kg, pH 9.6. Additional site investigation conducted by Emcon in 1987 to determine the GW quality downgradient of the facility. Emcon concluded that the Appert facility is not the source of the VOCs detected in the offsite well E-2 (TCE up to 2.2 mg/l, PCE 0.092 mg/L).

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

KELLY MOORE PAINT COMPANY INC (Continued)

S125952651

File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil, Soil Vapor, Under Investigation
Potential Contaminants of Concern: * Solvents, Tetrachloroethylene (PCE), Trichloroethylene (TCE), Benzene, Ethylbenzene, Stoddard solvent / Mineral Sprits / Distillates, Toluene, Total Petroleum Hydrocarbons (TPH), Xylene
Site History: Site operations ceased in March 2018. Phase II Environmental site Assessment reported VOCs and TPHs impacting soil and groundwater. PCE in northwest corner of the site appears to be associated with upgradient/offsite dry cleaner. Work plan was developed and approved to investigate impacts to groundwater and soil vapor at Kelly Moore Paint Site. Investigations include evaluation of preferential contaminant migration pathways along utility corridors, additional soil, groundwater and soil vapor sampling. The need for indoor air sampling will be evaluated based on results of soil vapor sampling. Investigations are ongoing; results are to be reported by 8/31/2019.

Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description: Failure to meet the following conditions of satellite accumulation regulations: G Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. G Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. G The generator complies with section 66265.171, 66265.172, and 66265.173(a). G The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words G Hazardous WasteG including specified information G Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a G 90 dayG accumulation area G 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated
Violation Notes: Returned to compliance on 06/11/2018. Waste oil filters (oily debris), waste brake clean, and waste antifreeze can be managed using the satellite accumulation rules and must be picked up at least annually. The last time brake clean was disposed of was June 2016 and the accumulation start date on the antifreeze was from 2015. Have both of these waste streams properly disposed of and provide documentation to SMCUPA within 30 days.

CERS HAZ WASTE:

Name: APPLAUD MEDICAL
Address: 733 INDUSTRIAL RD
City,State,Zip: SAN CARLOS, CA 94070
Site ID: 564955
CERS ID: 10839736
CERS Description: Hazardous Waste Generator

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-24-2020
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Initial Hazardous Waste Generator Program inspection conducted during the COVID-19 pandemic. I conducted the inspection with the assistance of Alice Luong of Applaud medical Inc. using FaceTime. Applaud Medical currently generates very small amounts of hazardous waste including ethanol contaminated wipes. The work area is a separate room located at 737 Industrial Rd. San Carlos and the frequency of waste generation is periodic approximately once or twice per year. Applaud has posted the completed emergency procedures form on-site and has a labeled 5-gallon plastic bucket for use when hazardous waste is generated. The hazardous waste label is compliant and will be completed with the remaining required information once hazardous waste is placed in the container.

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Initial hazardous waste generator inspection conducted during the COVID-19 pandemic. Inspection conducted remotely with the assistance of Benjamin Yellen of Celldom Inc. using FaceTime. Celldom is generating small quantities of a flammable liquid waste. Hazardous waste is stored in a labeled 5-gallon carboy container located in a plastic tray beneath the lab workbench. I discussed basic hazardous waste management requirements with Mr. Yellen during the inspection.

Eval Type: Routine done by local agency
Eval Notes: I conducted the inspection remotely during the COVID-19 pandemic with the assistance of A.J. Hallock using FaceTime. GALT, Inc. has not generated any hazardous waste at 733 Industrial Rd. to date, but this could change in the future so they will keep the permit active for the hazardous waste program at this time. I discussed basic hazardous waste management procedures with Mr. Hallock and he is familiar with the requirements and will work with Ingenium to profile and dispose of any hazardous waste generated in the future. Employee training records submitted by email.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-08-2020
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Inspection conducted during COVID-19 pandemic. I conducted the initial HMBP Program inspection remotely with the assistance of Riya Thakkar using FaceTime. I observed all compressed gas storage locations for January Inc. inside the 737 Industrial Road building and in the outdoor storage enclosure, and all cylinders are properly secured.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-08-2020
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Inspection conducted during the COVID-19 pandemic. I conducted the routine Hazardous Waste Generator Program inspection remotely with the assistance of Riya Thakkar using FaceTime. January Inc. is an SQG that generates a small amount of waste corrosive acid liquids. I observed the hazardous waste storage area and two 5-gal plastic containers of hazardous waste were closed and properly labeled. One hazardous waste pick up in December 2019 and hazardous waste manifest records are complete. Emergency procedures were completed with current information and posted in two work areas.

Site ID: 438161
CERS ID: 10763245
CERS Description: Hazardous Waste Generator

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-10-2020
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: I conducted a remote inspection with John Randolph and observed the work area and hazardous waste generation activities and storage locations. I reviewed hazardous waste disposal and employee training records during the inspection. Elegen is a small quantity generator and currently disposes of waste solvents at the County VSQG Program.

File Location: Local Agency
Potential Media Affected: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Tetrachloroethylene (PCE), Trichloroethylene (TCE), Vinyl chloride, Stoddard solvent / Mineral Sprits / Distillates

Site History: Extracted from Streamborn's December 31, 2009 Workplan to Install Soilgas Sampling Points and Conduct Soilgas Sampling, San Mateo County does not take responsibility for the accuracy of the statements made or any professional interpretations made in the referenced report. The subject property is located between Laurel Street and Cowgill Alley in San Carlos CA. El Camino Real, a major northwest/southeast traffic artery, is located one block northeast of Cowgill Alley. The overall area has mixed uses, including residential, commercial, and light industrial. From 1927 to the early 1980s, the subject property was operated as a commercial laundry and dry cleaning facility. Carlos Cleaners was the most recent laundry/cleaner business to occupy the subject property. Carlos Cleaners moved to 1000 Laurel Street in the early 1980s. Buildings that formerly housed the laundry/cleaners were demolished in 1985 in preparation for redevelopment of the property. In 1986, underground storage tanks related to the former laundry/cleaners were removed. At

the time of tank removal, contaminated soil was encountered and overexcavated to depths up to approximately eight feet. The tanks and excavated soil were disposed of offsite. The excavation was backfilled with sand and gravel. The subject property was redeveloped in 1986 and included construction of a two-story mixed residential, office/commercial, and parking structure. Current use includes office/commercial space on the ground floor, located on the southwestern side of the building, adjacent to Laurel Street. A garage, accessed from Cowgill Alley, is located on the northeastern side of the building, on the ground floor. The garage, facing Cowgill Alley, is partially enclosed, with significant natural ventilation. Sixteen residential units occupy the second floor, above the garage and office/commercial space. The former underground tanks - the source of the contamination - were located beneath the eastern portion of the garage. Several soil and groundwater investigations were performed between 1986 and 2006. In total, seven monitoring wells were installed, twenty-seven borings were drilled, and nine membrane interface soundings were performed. Soil and groundwater samples were collected and analyzed for TPH-Stoddard Solvent, TPH-Diesel, TPH-Jet A, TPH-Motor Oil, TPH-Gasoline, BTEX, MtBE, and volatile organic compounds. During these investigations, free phase product was commonly observed in wells MW-2 and MW-3. In 2004 and 2005, Erler and Kalinowski prepared a corrective action plan and revised corrective action plan that evaluated alternative remedial measures to remove the free phase product. The revised plan identified the preferred remedial action: groundwater extraction to create a cone(s) of water table depression and collection and removal of free phase product that collected within the depressed cone(s). In 2007 and 2008, Streamborn constructed the remedial system. The system included three recovery wells (RW-1, RW-2, and RW-3), installed to a depth of approximately 11 feet in Cowgill Alley, located approximately 20-30 feet downgradient of the former underground tanks. The system included an infiltration gallery, constructed within the area of the former underground tanks. Various treatment system components were installed, including a vacuum blower to control vapors, vapor-phase carbon sorbers to abate the extracted vapors, and aboveground tanks to temporarily store the extracted groundwater, prior to re-injection into the infiltration gallery. Since 3 September 2008, Streamborn has operated the remedial system. System operation has typically included the following: Groundwater has been continuously extracted from well RW-3, causing a continuous cone of depression to a depth of approximately 10 feet. On a weekly basis, free phase product that collected in well RW-3 has been manually evacuated (along with manual evacuation of free phase product in any other wells with detectable free phase product, an infrequent occurrence). Groundwater has been continuously extracted from well RW-2, to augment the volume of groundwater extracted from well RW-3 and provide approximately 2,000 gallons per week of extracted groundwater. Temporary storage of the extracted groundwater in aboveground tanks. Amendment of the extracted groundwater with dilute hydrogen peroxide, macronutrients, and sodium bicarbonate (pH adjustment). The concentrations of the amendments were designed to enhance bioremediation, as opposed to chemically oxidize the contaminants. Gravity re-injection of the amended groundwater. The amended groundwater was re-injected into the infiltration gallery, causing a subsurface recirculation loop of biostimulants (infiltration gallery - recovery wells). Operation of the remedial

system was planned for a complete hydrologic cycle (one year, rise and fall of seasonal groundwater elevations). However, after one year of operation, free phase product continues to be collected in well RW-3.

Violation Notes: Facility HMBP has been overdue since 2019 February. It is now more than two years overdue. Please submit updated HMBP within 30 days.

Violation Division: San Mateo County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 359614
Site Name: PATXI'S PIZZA
Violation Date: 07-03-2019
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: Review the Chemical Description Section and determine if Patxi's is storing liquid nitrogen above 1,000 cubic feet, the reporting threshold for nitrogen stored as a gas or liquid. With regard to the nitrogen storage tank located next to the liquid carbon dioxide tank, my understanding is that this tank contains nitrogen gas below the 1,000 cubic foot threshold. It's o.k. to report a below threshold amount of nitrogen but if it's included in the chemical inventory, it must be reported using the correct physical state (i.e., gas or liquid) and corresponding unit of measure.

Potential Media Affected: Indoor Air, Other Groundwater (uses other than drinking water), Soil, Soil Vapor, Surface water
Potential Contaminants of Concern: Other Chlorinated Hydrocarbons, Trichloroethylene (TCE), Vinyl chloride
Site History: Site Location and Description The subject Site is an approximately 12-acre property located at 960 Industrial Road in San Carlos, San Mateo County, California. The Site is bounded by Industrial Road to the northeast, Commercial Street to the northwest, and property occupied by Kelly-Moore to the southwest. Brittan Avenue forms part of the Site's southeastern boundary. Pulgas Creek, a tidally influenced drainage channel, bounds the remainder of the Site's southeastern boundary. The Site is approximately 5 to 10 feet above mean sea level (msl). Located in an area developed primarily for industrial and commercial use, the Site was developed in the 1950s by Litton Electron Devices (Litton). Historical Site operations consist of the design, manufacture, and distribution of microwave components for use in weather radar equipment, medical devices, and communication equipment for military aircraft and ships. Litton operated the Site from 1956 to 2001, when the Site and its operations were purchased by Northrop Grumman. Northrop Grumman sold the facility in 2002 to L3 Communications, which currently operates the Site as L3 Electron Devices. Northrop Grumman has retained the status of 'responsible party' for purposes of environmental monitoring and remediation. No significant changes in Site operations have reportedly occurred during the property transactions. The main building at the Site is a horseshoe-shaped, one- and two-story structure totaling approximately 200,000 square feet. The main building is roughly divided into five sections referred to as Buildings 3A, 3B, 5A, 5B, and 7. The construction of the main building consists of tilt-up concrete walls, concrete floor slabs, and a built-up roofing system. Two smaller structures, a 3,600-square foot chemical storage building and a liquid hydrogen tank pad are located on the northwestern portion of the Site. These structures were constructed in 1983. A small fenced area with a metal roof and concrete slab floor used to store empty drums is located in the southwestern portion of the Site. The remainder of the Site consists of asphalt-paved parking lots with small landscaped areas and vegetation along the banks of Pulgas Creek. In 2016 L3 Electron Devices moved operations to southern California per Wikipedia. In 2018, the Site was sold to Alexandria Real Estate. The Site is currently vacant and the property owner may redevelop into commercial use.

Latitude: 37.5046533237154
Longitude: -122.250655889511
Case Type: Cleanup Program Site
Case Worker: Not reported
Local Agency: Not reported
RB Case Number: Not reported
File Location: Local Agency
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Cyanide
Site History: Extracted from Bureau Veritas' April 22, 2009 Phase II Environmental Site Assessment Report, San Mateo County does not take responsibility for the accuracy of the statements made or any professional interpretations made in the referenced report. Aqua Science Engineers, Inc. (ASE) conducted investigations following recent closure activities at the Site. In September 2008, ASE advanced nine (9) soil borings in Building 5B by hand auger to depths between 2.0 and 4.5 feet bgs for the collection of soil samples; five (5) of the borings were advanced at the former plating room, and four (4) of the borings were advanced at the former cleaning room. ASE also concrete-cored the bottom of the ENU vault for the collection of one water sample. Soil samples from the former plating room were analyzed for CAM 17 metals and pH, and one sample (from Boring P-4 at the 3.5-foot depth) was also analyzed for cyanide. Soil samples from the cleaning room were analyzed for volatile organic compounds (VOCs) and pH. The water sample was analyzed for pH. No VOCs were detected at concentrations above California Regional Water Quality Control Board (RWQCB) Environmental Screening Levels (ESL) for shallow soil in an industrial/commercial land use setting. Readings for pH were not indicative of hazardous conditions. Soil from the former plating room showed arsenic at concentrations reflective of natural background concentrations. Cyanide was detected at the 3.5-foot depth at a concentration of 10 milligrams per kilogram (mg/kg), which exceeded its RWQCB ESL. In November 2008, upon the request of SMCEH, ASE conducted additional sampling activities around the vicinity of Boring P-4 to determine the extent of cyanide in soil within the former plating room. Four (4) soil borings (P-6 through P-9) were advanced during the investigation. Three (3) of the borings were advanced to the 2.0-foot depth at locations approximately 3 feet away from Boring P-4, and one (1) boring was advanced to the 4.5-foot depth immediately adjacent to Boring P-4. Analytical results showed cyanide in soil at concentrations up to 0.36 mg/kg, with the highest concentration detected at the 4.5-foot depth. Detected concentrations of cyanide were above its RWQCB ESL. Reportedly, it was ASE's opinion that the cyanide was limited in vertical and lateral extent, and that the concentrations were related to naturally-occurring background conditions. On December 3, 2008, ASE submitted a letter to the SMCEH presenting their rationale for the occurrence of cyanide at background concentrations at the Site. ASE concluded that the cyanide concentrations detected in soil were within the range of naturally-occurring background concentrations for cyanide in both San

Mateo and Santa Clara counties. In their e-mail correspondence dated December 12, 2008, SMCEH did not concur with ASEs assertion due to the lack of site-specific data to support their understanding of background conditions. SMCEH requested that additional investigation be performed to delineate the extent of cyanide in soil, investigate the potential for cyanide to be present in groundwater, and establish site specific background concentrations for cyanide. On January 23, 2009, L-3 voluntarily entered into a Remedial Action Agreement with SMCEH. The Agreement required that further characterization and potential remedial action, if necessary, be conducted at the Site.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RB Case Number: 41-0543
Local Agency: Not reported
File Location: Local Agency
Local Case Number: 770023
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: Can be extracted from most recent report in Geotracker or at San Mateo County offices if submitted prior to 2005, San Mateo County does not take responsibility for the accuracy of the statements made or any professional interpretations made in the referenced report.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Environmental Interest/Information System:

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

HAZARDOUS AIR POLLUTANT MAJOR

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

Waste Code:	P106
Waste Description:	SODIUM CYANIDE (OR) SODIUM CYANIDE NA(CN)
Waste Code:	U112
Waste Description:	ACETIC ACID, ETHYL ESTER (I) (OR) ETHYL ACETATE (I)
Waste Code:	U161
Waste Description:	4-METHYL-2-PENTANONE (I) (OR) METHYL ISOBUTYL KETONE (I) (OR) PENTANOL, 4-METHYL-
Waste Code:	U220
Waste Description:	BENZENE, METHYL- (OR) TOLUENE

Waste Description:	METHYL ETHYL KETONE
Waste Code:	F001
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F002
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F005
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code:	F006
Waste Description:	WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.
Waste Code:	F008
Waste Description:	PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.
Waste Code:	F009
Waste Description:	SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.
Waste Code:	P030
Waste Description:	CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED
Waste Code:	P098
Waste Description:	POTASSIUM CYANIDE (OR) POTASSIUM CYANIDE K(CN)
Waste Code:	P106
Waste Description:	SODIUM CYANIDE (OR) SODIUM CYANIDE NA(CN)
Waste Code:	U112
Waste Description:	ACETIC ACID, ETHYL ESTER (I) (OR) ETHYL ACETATE (I)
Waste Code:	U161
Waste Description:	4-METHYL-2-PENTANONE (I) (OR) METHYL ISOBUTYL KETONE (I) (OR) PENTANOL, 4-METHYL-
Waste Code:	U220
Waste Description:	BENZENE, METHYL- (OR) TOLUENE

Violations:

Site ID: 6162
Site Name: APEX DIE
Violation Date: 11-06-2019
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173

Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 02/21/2020. Six 55 gallon drums of hazardous waste were not properly closed. One drum of used oil with a funnel was closed during the inspection. Close all hazardous waste drums and provide proof of corrective action to the CUPA within 30 days. Ensure that each drum is closed when not in use during waste transfers.

Violation Division: San Mateo County Environmental Health

Violation Date: 10-21-2015
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173

Violation Description: Failure to properly close hazardous waste containers when not in active use.

Violation Notes: Returned to compliance on 10/21/2015. Three open drums observed in haz waste storage area and one 5-gallon bucket of glue waste in other area. All containers closed during inspection.

Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 6162
Site Name: APEX DIE
Violation Date: 11-06-2019
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 02/21/2020. Two 55 gallon drums of UV sheen/water mixture, one drum of adhesive/water mixture, one drum of oily debris, and two drums of used oil have been accumulating since 2017 and are over the allowable accumulation period of 180 days from the date that 100 kg (i.e., 27 gal, 220 lbs) was generated. Dispose of all hazardous waste currently on site and submit a record of the disposal activities to the CUPA within 30 days. Ensure that hazardous waste is disposed of within 180 days of generating 27 gallons for future haz waste generation activities.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation: HSC 6.95 25505.1 - California Health and Safety Code, Chapter 6.95, Section(s) 25505.1
Violation Description: Failure to notify property owner in writing that the business is subject to the business plan program and has complied with its provisions.
Violation Notes: Returned to compliance on 12/09/2019. Complete an HMBP Property Owner Notification Letter and provide to the property owner or their agent within 30 days. The CUPA will provide a template form that can be completed and used for this requirement. Once the property owner is notified, provide a copy of the notification letter to the CUPA to demonstrate that this item was corrected.
Violation Division: San Mateo County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 560386
Site Name: Joby Aviation San Carlos
Violation Date: 12-05-2019
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 12/16/2019. Two red step cans located in the Battery Assembly And Test Area and one red step can in the Machine Shop that are used for accumulating hazardous waste solids were not labeled with a hazardous waste label. In addition, one 55-gallon drum of hazardous waste solids and one drum of hazardous waste liquid located in the outdoor Waste Accumulation Shed had incomplete labels, respectively. Ensure that all containers used for hazardous waste storage are labeled with a completed hazardous waste label once waste accumulation begins. Provide documentation to the CUPA that the label violations referenced above have been corrected within 30 days.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Latitude: 37.50092
Longitude: -122.254901
Case Type: Cleanup Program Site
Case Worker: BG
Local Agency: SAN MATEO COUNTY LOP
RB Case Number: Not reported
File Location: Local Agency
Potential Media Affected: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Tetrachloroethylene (PCE)
Site History: Extracted from AllWest's April 9, 2004 2003-2004 Groundwater Sampling and Site Conditions Summary Report, San Mateo County does not take responsibility for the accuracy of the statements made or any professional interpretations made in the referenced report. The subject Property is a rectangular shaped parcel located on the southern corner of the intersection of Laurel Street and Morse Boulevard, in San Carlos, San Mateo County California. The building was reportedly built in 1945. The building is constructed on a concrete slab with no basement and was utilized as a marker until 1976. From 1976 till September 2001 the northern portion of the building was occupied by Carlos' Dry Cleaners. Dry cleaning equipment that utilized PCE was used onsite. Since that time the building has been extensively remodeled. Currently a chiropractic office and an allergy clinic occupy the southern portion of the building (lease spaces 1 and 2). A drop off location for Carlos Dry Cleaners occupies the northern portion of the building (lease space 4). No active dry cleaning activities occur at this location. Lease space 3, the area where former dry cleaning operations occurred, is currently occupied by an urologist office. The subject property is at approximately 25 feet above mean sea level on a gently sloping plain that dips eastward to San Francisco Bay. The United States Geologic Survey (USGS) has mapped the area as Quaternary alluvial deposits that have been eroded off the Santa Cruz Mountains that rise to the west. Based on previous investigations. subsurface site soil consists of gravel till immediately underneath the concrete slab to an approximate depth of 8 inches. Below the gravel fill, a grayish brown. silty clay was encountered to an approximate depth of 8 to 10 feet. Based on visual observation it is anticipated that this material will exhibit low permeability and will yield water at a slow. rate. Below the clay, silty sand, sand and gravel sediments were encountered. These coarse grained units were saturated and rapidly yielded water. Static groundwater was encountered at a depth of approximately 4 feet. The shallow clay yielded water slowly. The lower coarse grained sediments readily yielded water. which rises rapidly indicating confined conditions. Regional groundwater flow is to the northeast, concurrent with the trend of the regional topography. PIERS completed a Phase I Environmental Site Assessment (ESA) for the subject property in March 2002. PIERS concluded that with the exception of the use of the dry cleaning equipment and PCE there are no other environmental concerns regarding the Property. Because of this concern PIERS conducted a Phase II investigation in March 2002 that consisted of shallow soil sampling in and around the dry cleaning machines as well as a drain outside the building (maximum depth explored 2.5 feet). Seven soil samples were collected and five samples analyzed for PCE and other

volatile organic compounds (VOCs) by EPA Method 8010. PCE was detected in the four soil samples collected from the interior of the building. No other chemicals were detected. In May 2002, AllWest performed a subsurface investigation that consisted of advancing four geoprobe borings (B1 through 84). Eight soil samples and three groundwater samples were analyzed for VOCs and naphtha. PCE was detected in shallow soil samples with concentrations decreasing with depth. PCE along with two of its breakdown products were detected in the groundwater samples. Naphtha was not detected in any of the samples collected. Based on the results of the investigation, AllWest concluded that historic operations in the vicinity of the dry cleaner had resulted in the release of PCE and recommended that further characterization of the lateral extent be performed. In June 2002 EnviroVision, Inc. advanced 13 soil borings (SB- 1 through SB- 13) both inside and outside of the building and collected soil and groundwater samples for VOC analysis. Results of the investigation documented that concentrations of PCE in soil decreased with depth. PCE was detected in all groundwater samples submitted for analysis. Various PCE breakdown products were also detected in some of the water samples. EnviroVision recommended additional site characterization to further define the extent of PCE in soil and groundwater. In addition, they also proposed an interim remedial action. Consisting of excavating soil containing elevated levels of PCE from the interior of the building. In September 2002 EnviroVision oversaw the excavation of approximately >6 cubic yards of soil from the interior of the building near the location of the former dry cleaning operation. Soil was excavated to a depth of approximately 5.5 feet where groundwater was encountered. 13 confirmation soil samples were collected from the sidewalls and bottom of the excavation. Approximately 150 gallons of water were removed from the excavation. A "grab" groundwater sample was collected from the excavation after recharge. Soil and groundwater samples were analyzed by an on-site laboratory. PCE was detected in all soil and groundwater samples collected from the excavation. After sampling approximately 60 pounds of a hydrogen release compound (HRC) was poured into the excavation. HRC was added to the subsurface to stimulate anaerobic microbial growth which in turn enhances the rate of biodegradation of chlorinated solvents. The excavation was then backfilled with a 3/8 inch gravel from the bottom of the excavation to an approximate depth of 2 feet. Graded sub-base was placed over the gravel and the cement floor was replaced. EnviroVision concluded that PCE concentrations detected in the confirmation sample were below risk based screening level (RBSL) for commercial use. Additional groundwater characterization was recommended. In December 2002, SOMA Corporation prepared a human health risk assessment for the facility. The purpose of the assessment was to "evaluate the appropriateness of future tenant occupancy" and provide supporting documentation for site closure. Based on maximum concentrations of PCE in soil a site specific evaluation of the risk for the indoor air inhalation pathway was performed. The result of the assessment indicate that the cancer risk did not exceed a one in a million and the "PCE in soil does not appear to propose a risk of adverse public health effects for tenant occupancy by a urologist using the premise for his practice." The SMCHSA, in a February 2003 letter, approved occupancy of the lease space by the urologist.

Completed Info:

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 06/30/1993
Comments: Approved RA for hot spot lead removal. 63 tons of contaminated soil were excavated to 250 ppm and disposed at an off-site disposal facility. No further action was required.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment Report
Completed Date: 03/31/1991
Comments: Completed PEA. In May 1990, approximately 1500 cubic yards of soil with lead concentrations of 500 ppm were excavated and removed. Subsequent investigations revealed "hot spots" with lead concentrations above 500 ppm.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 01/16/1990
Comments: Completed Site Screening. Site characterization conducted in 1989 indicated that onsite soils were contaminated with lead at levels greater than 500 mg/kg. A total of 250 individual and composite samples indicated lead concentrations exceeding the STLC & TTLC. Contamination occupies approximately 6 acres.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Lead Agency Case Number: 779088
Latitude: 37.5059784036797
Longitude: -122.261697202921
Case Type: Cleanup Program Site
Case Worker: BG
Local Agency: SAN MATEO COUNTY LOP
RB Case Number: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Indoor Air, Soil, Soil Vapor
Potential Contaminants of Concern: Tetrachloroethylene (PCE), Trichloroethylene (TCE), Vinyl chloride
Site History: Extracted from Green Environment's July 1, 2011 Site Investigation. San Mateo County does not take responsibility for the accuracy of the statements made or any professional interpretations made in the referenced report. The subject property is located in a mixed residential and commercial area in San Carlos, California on San Carlos Avenue. A site location map is provided in Figure 1. The subject property has historically been used for on-site dry cleaning for over 45 years. According to the operators of Vogue Cleaners, dry cleaning equipment designed for the use of PCE was removed from the facility approximately five years ago, replaced with non-PCE dry cleaning equipment. In September 1996, four (4) soil borings were advanced by Environmental Geoscience Services (EGS) in the area of the dry-cleaning equipment present at that time, to a total depth of six (6) feet below top surface (bts). Two (2) soil samples were collected from each of these borings (B-1 through B-4) at three (3) and six (6) feet bts. PCE was detected at low concentrations in all eight (8) soil samples ranging from 0.47 to 5.86 micrograms per kilogram (!g/kg). Low concentrations of chloroform and 1,1-dichloroethene were also detected in all eight (8) soil samples at maximum concentrations of 0.77 !g/kg and 1.16 !g/kg, respectively. Historic soil sampling locations are depicted in Figure 2 and associated soil analytical data is presented in Table 1 and Figure 3. In January 2011, GEI installed and sampled three (3) sub-slab soil vapor probes SV-1, SV-2 and SV-3 at the subject property as depicted in Figure 2. At SV-1, located near the rear of the subject property, PCE was detected in soil vapor at a concentration of 6,200 micrograms per cubic meter (!g/m3), chloroform was detected at 44 !g/m3, and 1,1,1-trichloroethane (1,1,1-TCA) was detected at 44 !g/m3. At SV-2, located immediately north of the former PCE dry cleaning machine, PCE was detected in soil vapor at a concentration of 22,000 !g/m3, and 1,1,1-TCA was detected at 160 !g/m3. At SV-3, located near the sewer lateral near the center of the south wall, PCE was detected in soil

vapor at a concentration of 1,200 !g/m3, acetone at 28 !g/m3, 2-butanone (MEK) 3.4 !g/m3 and 1,1,1-TCA was detected at 7.5 !g/m3. PCE was the only chemical constituent that exceeds the residential ESL (410 !g/m3) in all three (3) sub-slab soil vapor samples collected during the January 2011 investigation. Additionally, at 6,200 !g/m3 and 22,000 !g/m3 PCE in SV-1 and SV-2, respectively, the commercial ESL (1,400 !g/m3) was exceeded. Soil vapor analytical data is presented in Table 2 and Figure 4. Upon completion of the soil vapor sampling activities, at each sub-slab soil vapor sampling location, GEI completed a hand augered soil boring with soil samples collected at 1.0- and 4.5-feet bts utilizing a hand slide hammer. PCE was the only Halogenated Volatile Organic Compound (HVOC) detected in the soil samples and was present in seven (7) of the eight (8) soil samples analyzed. The two highest concentrations of PCE detected during the soil investigation were as follows: 64 !g/kg PCE was detected in Boring SV-1 at 1.0 feet bts at the rear of the subject property; and 67!g/kg PCE was detected in Boring SV-2 at 1.0 feet bts immediately north of the former PCE dry cleaning machine. The deeper samples collected at 4.5 feet bts in each of the borings reported PCE concentrations significantly lower than these elevated 1-foot samples. No other HVOCs were detected in any of the borings at the 1.0- and 4.5-foot sampling depths.

HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Facility Status: Inactive, non-billable
Program Category: HAZARDOUS WASTE PROGRAM

Name: VOGUE CLEANERS
Address: 1249 SAN CARLOS
City,State,Zip: SAN CARLOS, CA 94070
Region: SAN MATEO
Facility ID: FA0018099
Prog Element Code: STORES HAZ MAT <219GAL,1,999LB, 879FT3
Record Id: PR0004836
Description: STORES HAZ MAT <219GAL,1,999LB, 879CF
Facility Status: Inactive, non-billable
Program Category: BUSINESS PLAN PROGRAM

Name: VOGUE CLEANERS
Address: 1249 SAN CARLOS
City,State,Zip: SAN CARLOS, CA 94070
Region: SAN MATEO
Facility ID: FA0018099
Prog Element Code: STORMWATER ANNUAL INSPECTION FEE
Record Id: PR0041230
Description: STORMWATER ANNUAL FEE - INSP FREQ EVERY 2 YRS
Facility Status: Inactive, non-billable
Program Category: STORMWATER

DRYCLEANERS:

Name: VOGUE CLEANERS
Address: 1249 SAN CARLOS AVE
City,State,Zip: SAN CARLOS, CA 940700000
EPA Id: CAD981977598
NAICS Code: 81232
NAICS Description: Drycleaning and Laundry Services (except Coin-Operated)
SIC Code: 7211
SIC Description: Power Laundries, Family and Commercial
Create Date: 07/03/1987
