May 15, 2014

The Honorable City Council
City Planning Commission
City of Stockton, California

FIVE-YEAR CAPITAL IMPROVEMENT PROGRAM—CITY MANAGER'S MESSAGE

The five-year Capital Improvement Program (CIP) cost projections for fiscal years 2014-19 total \$738 million of which \$81.5 million is proposed in the FY 2014-15 Annual Budget. Included in the five year plan are projects totaling \$347 million which have identified funding sources and \$391 million unidentified funding sources. The five-year CIP is a planning document that does not appropriate funds for projects. The first year of the CIP will be incorporated into the City of Stockton adopted annual budget for fiscal year 2014-15. The CIP proposed budget amount for the fiscal year 2014-15 totals \$81.5 million. The CIP budget for next year is almost entirely made of transportation and utility improvements. These categories count for the majority of the five year CIP project list as well. This is reflective of the poor condition of the General fund and the lack of new development mitigation fees.

In the FY 2014-19 CIP, 97% of the funding designated for capital projects comes from restricted, or non-discretionary, funding sources. Non-discretionary funding can only be spent on specific projects or specific types of projects. For example, Measure K funds can only be spent on transportation projects.

City staff is responsible for projecting revenue and developing project requests that will assist in the preparation of the CIP. A capital improvement program is the community's plan for short and long-term facilities and infrastructure repair and development. This document is the link between comprehensive fiscal plans and the physical development of capital projects. The CIP provides the mechanism for estimating capital requirements, and for planning, scheduling, and implementing projects during a five-year period; develops revenue policy for proposed improvements; estimates the budget for capital projects; and informs the public of proposed capital improvements.

The proposed CIP projects for FY 2014-15 are fully funded. However, the project costs identified in years 2 through 5 of the program are primarily unfunded and presented to illustrate priorities and the magnitude of funding needed. In addition to the project summaries provided in this document, several critical programs do not have developed budgets but instead are listed in the highlights section. These are projects, such as urban forest, roadway pavement and parks that are important to the ongoing City operations and illustrate the vast unmet improvement needs.

FIVE-YEAR CAPITAL IMPROVEMENT PROGRAM—CITY MANAGER'S MESSAGE

Consistent with the mission statement for the City of Stockton, this Capital Improvement Program is designed to improve public safety, stimulate and support economic development, and enhance the quality of life for the citizens of Stockton through improvement of the community's buildings, streets, parks, water, and sewer facilities. The Capital Improvement Program provides an infrastructure development policy that is consistent with the adopted General Plan for the City of Stockton.

Respectfully Submitted,

KURT WILSON
CITY MANAGER

LM:vb

CAPITAL IMPROVEMENT PROGRAM HIGHLIGHTS

The Capital Improvement Program (CIP) is a five-year plan of the public projects necessary to maintain and improve the public works of the City and implement the Stockton General Plan. The public works include buildings, parks, golf courses, utilities, and the transportation system. The projects listed in the CIP have an estimated cost over \$50,000 and provide long-term assets to the community. Budgeted costs are broken into the following categories: design, construction, equipment and land purchases, and project administration. The costs identified in the first year of the program are appropriated as a part of the annual operating and capital budget process. A summary of revenues, expenditures and fund balances for the various City funds that contain the individual capital projects included in the proposed FY 2014-15 Capital Budget (first year of the CIP) is provided in this document. The projects and costs identified in years 2 through 5 of the program are intended to illustrate priorities and the magnitude of funding needed. For these outer year projects to be constructed, funding sources will have to be identified.

Each year, the five-year program is reviewed in view of the City's needs, priorities, and available funds, and revised as necessary. A long-term Capital Improvement Program provides a number of benefits:

- It focuses attention on community goals, needs and capabilities for the best use of public expenditures, and establishes a long-term plan for future needs.
- It prioritizes needs and establishes an orderly basis for sound budget decisions.
- It improves the City's chances of obtaining State and Federal financing assistance.
- It encourages coordination of projects among city staff and other public agencies to avoid scheduling conflicts. In addition, it permits private enterprise to relate their projects to the City's program.

Capital Improvement Program Process

To identify capital program needs, Public Works staff works with other city departments and external agencies (such as the Council of Governments and the Regional Transit District) and members of the community to identify potential projects. Based on this input, Public Works staff, with assistance from the Department of Municipal Utilities, develops a list of proposed projects, along with cost estimates and priorities. In addition, Public Works staff works with Administrative Services staff to identify revenue projections for funding capital projects in the first year of the program. These funding sources include the General Fund, Public Facilities Fees, Measure K, Utility Fees, Enterprise Funds, and various State and Federal grants.

The City Manager's Office reviews the proposed projects in terms of Council and City priorities, and available funding in the first year. The recommended Capital Improvement Program is submitted to the City Planning Commission to review for conformance with the General Plan, and to the City Council for review and possible adoption. The City Council reviews the capital projects, makes revisions if applicable, and adopts a resolution appropriating the first year funding of the approved five-year plan.

FY 2014-15 through FY 2018-19 Capital Improvement Program Highlights

The FY 2014-15 through FY 2018-19 CIP proposes a list of projects with a total value of \$738 million. However, of this amount only \$2.775 million or 0.4% is funded from the General Fund. Included in the five year plan are projects totaling \$347 million which have identified funding sources and \$391 million with unidentified funding sources. This later amount represents improvements that are needed but cannot be funded at this time.

Of the five years in the CIP, the only financially constrained year is the first year, FY 2014-15, which means that there is funding available for the \$81.5 million in proposed improvements. However, \$78.7 million or 97% of the funding available is from restricted sources dedicated to transportation, utilities, boat launching, and library. For the final four years of the CIP, FY 2015-16 through FY 2018-19, the total project value is \$656 million. The majority of these projects are unfunded. They constitute a list of high priority improvements that are planned but cannot be constructed until funding source(s) have been identified.

The proposed CIP projects are grouped into three categories: General Government, Transportation, and Utilities. The following provides highlights of the proposed projects in each of these categories. In addition, this program includes a list of unfunded projects. This information is being provided to more fully detail the improvements that are needed but cannot be funded because of ongoing financial constraints. The list of unfunded projects is not comprehensive and does not capture the extent of all of the deferred maintenance for City facilities and infrastructure. While not a complete list of additional deferred maintenance projects, the following list is provided to put this significant issue into context and illustrate the magnitude of the cost.

- Urban Forest: an initial \$4.8M is needed to bring the forest up to an acceptable standard. An additional \$2.3M is needed annually to provide proper maintenance, including regular trimming and a removal/replacement program. The proposed program allocates no funding for this area.
- Roadway pavement: more than \$10M per year is needed to resurface pavement to keep the pavement network in its current condition. This cost would significantly increase if streets that warrant reconstruction due to severe distress, high roadway center, or extensive curb damage are included. The

proposed program allocates only \$2.1M in FY 2014-15.

- Parks: \$12M is needed for improvements and repairs of play areas, park furnishings, irrigation systems, buildings, courts, ball fields, and flatwork. The proposed program allocates only \$450,000 for repairing playgrounds, shade structures, Pixie Woods attractions, and drinking fountains in FY 2014-15.
- Facilities: more than \$10M is needed to catch up on maintenance and replace roofs at City facilities (not including City Hall); however, FY 2014-15 proposed CIP budget includes only a minor amount of funding to be allocated for minor/emergency repairs and upkeep of SMG managed facilities.

General Government

This category includes improvements associated with Police, Fire, Parks, Golf Courses, Libraries, and City buildings. Improvements are funded through the General Fund as well as dedicated funding sources such as Public Facility Fees.

The proposed General Fund allocation for capital projects in FY 2014-15 is \$2.775 million. Funding is allocated to miscellaneous emergency maintenance including General emergency maintenance city-wide, replacement of the civic auditorium stage controls/rigging, specific roof maintenance and leak repairs, HVAC upgrades/replacements due to failure of existing equipment, hazardous material abatement, Fire Station repairs (driveways/pavement at Stations 2 and 10, engine bay and kitchen repairs at Stations 2 and 4), Pixie Woods repairs (train ride and lagoon), playground fall attenuation material replacement at Parks, restroom renovation at the Cesar Chavez Library, removal and remediation of leaking underground fuel tanks, City wide arterial roadway LED street lights conversion, and improvements to comply with Americans with Disability Act (ADA) requirements. Due to funding constraints, this level of funding is again very low compared to the immediate needs. To give an idea of needed funding, for the projects listed in FY 2015-16 through FY 2018-19 as unfunded (which are not comprehensive), the average annual expenditure for those projects that would typically be funded from the General Fund is over \$12 million.

Transportation

Improvements to the transportation system are funded from non-General Fund sources that are dedicated to transportation projects. These sources include State and Federal grants, Public Facilities Fees, and Measure K tax proceeds.

The transportation projects included in the CIP represent a continuing effort to improve traffic flow, safety, and personal mobility, reduce air pollution, accommodate growth, foster economic development, promote use of alternate transportation modes, and preserve the transportation infrastructure. Projects are drawn from many sources, including the Stockton Street Improvement Plan, the Circulation Element of the General Plan, and various planning documents of the San Joaquin Council of Governments. The transportation portion of the program has been able to consistently generate significant amounts of grant funds. Public Works is currently actively managing projects with a

combined value of over \$141 million, of which over \$79 million is from competitive grant sources. This total does not include transportation projects that have been planned, sponsored or designed by the City but are being managed by other agencies, primarily Caltrans. Including these projects expands the total project value to over \$900 million. Based on this past and current success, the proposed five-year program includes an aggressive list of transportation projects that either have grant funding, or for which grant funds will be sought, to facilitate design and construction of the needed improvements.

In general, the transportation projects proposed for funding in FY 2014-15 of the CIP include modifications and installation of traffic signals, expansion of Bus Rapid Transit onto Martin Luther King Jr. Boulevard, maintenance of bridges and pavement throughout the city, widening projects on Thornton Road, Hammer Lane and Lower Sacramento Road, sidewalk improvements on West Lane, a roundabout at Montauban Avenue and Swain Road, traffic calming measures in 16 neighborhoods, construction of ADA accessibility improvements, and installation of adaptive traffic control systems on March Lane and on Pershing Avenue.

Utilities

Capital improvements to the City's Water, Wastewater and Stormwater utility systems are funded from non-General Fund sources that are dedicated to utility operations, maintenance and improvements. These sources include utility user fees, connection fees and Public Facilities Fees.

The Department of Municipal Utilities is continuing to budget new project funds in the Water Enterprise for the north system chloramine conversion project; improvements to facilities at the Water Field Office; and water well rehabilitations and abandonments.

The Capital Improvement and Energy Management Plan, 2011 (CIEMP) outlined a multi-year \$130 million project to repair, replace and upgrade the treatment process units at the Regional Wastewater Control Facility. A large part of the infrastructure is over 60 years old and past their effective operating life. The Wastewater Enterprise is currently in the design stage of improvements to two critical treatment process facilities - Headworks and Tertiary Plant. For FY 2014-15, the CIEMP requests are predominately for engineering studies and design. In addition, the Wastewater Enterprise is proposing to fund the rehabilitation and replacements of large diameter pipelines due to corrosion and deterioration.

The Stormwater Enterprise fee has been unchanged since 1992, and the utility is insufficiently funded for permit compliance activities and needed capital improvements. Therefore, over the years, a large number of capital improvement projects have been moved to later years because of lack of funding. For FY 2014-15, \$1.0 million is available for deferred capital improvements which have accumulated over the past six years to address a small fraction of pipeline and pump station deficiencies. Without an approved increase to the Stormwater fee, capital improvements, necessary to minimize

the amount of localized flooding and maintain pace with the regulatory environment, will not be possible.

Basis of Capital Revenue Projections

To determine the funds available for Capital Projects in the FY 2014-15 Capital Budget, the City considers the following:

- Analysis of all funds and adjustment for historical and year-to-date trends.
- Calculation of the interest on project and account balances where appropriate.
- Projection of user fee revenues in the Wastewater, Water, and Stormwater funds based on current approved user rates.
- Projection of Public Facilities Fees revenues based on current fees and development projections.

Capital Improvement Program Funding Sources

City Funds

Capital Improvement Fund: The Capital Improvement Fund is unrestricted and can be used for any project designated by the City Council. The resources in this fund come from transfers from the City's General Fund, reimbursements for specific projects, and interest earnings.

Federal/State Funds

Federal/State Grants: These funds are made available through an extensive application process that is usually initiated by City staff. Most grants require some kind of fund match from the City. Grant funds are appropriated when grant agreements are executed.

Transportation Development Act (TDA): These funds are derived from the statewide sales tax and are returned to each County for public transit and bicycle/pedestrian purposes. TDA funds may also be used for roads and streets. However, Stockton's allocation is currently limited to transit operations and pedestrian/bike path projects included in the Sidewalk and Wheelchair Ramp Repair project.

Sales Tax Measure K

Measure K: In 2006, voters approved a 30 year extension of the ½ cent transportation sales tax. These funds are earmarked for: Local Street Repairs and Roadway Safety (35%), Congestion Relief projects (32.5%), Railroad Crossing Safety projects (2.5%), and Passenger Rail, Bus and Bicycles (30%) which include dedicated funding for bus

rapid transit and safe routes to schools.

City Enterprise Funds

Wastewater Revenue: These funds are generated from user fees and connection fees for sewer service provided by the Municipal Utilities Department.

Water Revenue: These funds are generated from user fees and connection fees for water services provided by the Municipal Utilities Department.

Stormwater Revenue: These funds are generated from user fees for storm water services provided by the Municipal Utilities Department.

Golf Fund: These funds are generated from user fees for the Swenson Park Golf Course and the Van Buskirk Golf Course.

Public Facility Fees

Public Facilities Fees: These fees are collected through the building permit process from new development projects. This provides funds for new or expanded facilities necessary as a result of growth and development. Public Facility Fees include street improvements, community recreation centers, city office space, fire stations, libraries, police stations, traffic signals, park site, street tree, air quality, water connection, and wastewater connection.

Other Revenue

Library: The Library Fund receives transfers in from the General Fund and other sources for use in Library improvements.

Boat Launching Facilities: These funds are generated from user fees for parking and boat launching at the Buckley Cove boat launch facility.

Project Summary

Acct. Ref. #	0000
Title	Miracle Mile Parking Lot Resurfacing
Department	Central Parking

Project Description				Justification					
Resurfacing and striping of City-owned parking lots located along the Miracle Mile. This may include improvements to driveways, irrigation, and signage. Lots in need of improvements are as follows: A, C, G, H, I, J, and K.				These lots are provided to support commercial businesses along the Miracle Mile, a majority of which do not have their own on-site parking. All of the lots (with the exception of four lots recently improved) are deteriorating and contain potholes. Existing planter boxes have been damaged by cars.

 Title Parking Garage Lighting Retrofit
 Department Central Parking

Project Description This project includes retrofitting the SEB Garage and Channel Street Garage with energy-efficient lighting.				Justification The current lighting system at each garage is inefficient, requiring high energy costs and multiple bulb replacements to maintain sufficient lighting. The replacement of fixtures will save energy cost and maintenance cost.

Project Summary

Acct. Ref. #	PW7022
Title	ADA Compliance Program
Department	City-Wide

Project Description				Justification					
This project provides for annual implementation of minor accessibility upgrades to City facilities as identified In the City's adopted ADA Transition Plan. This project will provide for the replacement of restroom fixtures, signage, door handles, lifts, and access modifications.				In 1990, the American with Disabilities Act (ADA) was passed to provide guidelines for accessibility in the work place. In 2004, the City completed a Self-Evaluation and Transition Plan. Ongoing accessibility improvements are required to be in compliance with the Transition Plan and to reduce the City's exposure to accessibility claims. ADA lifts at swimming pools, and parking lot access will require immediate implementation.

Title	Bob Hope Theater Electrical Service Separation
Department	City-Wide

<div>Project Description</div> <div>This project will separate the single electrical service at the Bob Hope Theatre, serving 6 businesses (5 on Market street), into 6 total service points each with a separate meter.</div>				<div>Justification</div> <div>Bob Hope Theatre is maintained by SMG. Project improvements have been identified by SMG as a high priority. The existing single electrical service is not consistent with electrical code requirements. In addition, having one electrical meter serving 6 businesses does not provide an accurate account of electricity usage for each business making billing difficult.</div>

Project Summary

Acct. Ref. #	0000
Title	Corp Yard Storage Building Installation
Department	City-Wide

Project Description				Justification							
This project will construct a new storage facility at the City's Corporation Yard. The building will be an open-walled canopy style structure; measuring approximately 243' x 30'.				A storage facility is needed to store and stockpile road construction materials. These materials include: sand, gravel, aggregate base, blacktop, and hazardous materials. For storage of materials, proper segregation is needed to prevent cross-contamination. Additionally, this facility will ensure that the run-off of liquids does not infiltrate the stormwater collections system.

Title	Electronic Payment Station for City Services
Department	City-Wide

Project Description				Justification						
This project will provide funding to provide an additional payment option for City customers - a user friendly electronic payment station kiosk that will be located in the Adminstrative Services Department.				The electronic payment station kiosk will provide an important customer service function for utility services. Accepting payments by traditional walk-in cashiering methods is time consuming and takes away from other revenue generating and customer service activities. Customers can pay their bills using the self-service kiosk method and lessen the workload for cashiering staff.

Acct. Ref. #	0000
Title	Event Center Security & Safety Improvements
Department	City-Wide

Project Description		Justification							
This project will install security improvements at the Stockton Ballpark. Improvements include installation of the following: increasing entrance gate heights; repairing existing cameras, and adding additional cameras. This project will also install a fall protection system for the Stockton Arena. Fall protection is a safety system attached to the upper rigging grid at facilities. It's purpose is to allow workers to work safely with rigging facility equipment such as scoreboards, lighting, catwalks, and special effects.		Event Center facilities are maintained by SMG. Project improvements have been identified by SMG as a high priority. The Ballpark does not have a comprehensive security system. Recent break-ins have shown SMG staff where weaknesses exist in the current security system. Security must be upgraded to prevent continued property damage, theft, and vandalism. At the Stockton Arena, there is no fall protection. Without a fall protection system, workers are at risk, and shows may not book the venue because sufficient fall arrest systems are not in place.

Title	Event Venues Equipment Replacement
Department	City-Wide

Project Description				Justification					
This project will replace broken and outdated equipment at the following locations: Stockton Arena, Bob Hope Theatre, and Ballpark. The project includes replacing a pair of genie man lifts at the Theatre, a bunker raker machine at the Ballpark, two stolen golf carts and two way radios at the Arena. The project will also purchase lighting equipment, microphones and sound equipment for the Theatre as they are currently being rented, and an aerator for the Ballpark.				Event Center facilities are maintained by SMG. Project improvements have been identified by SMG as a high priority. All four facilities have equipment that are past their service life. These items are either unusable or must be constantly repaired. Replacement of broken and outdated equipment including purchasing items that are constantly rented will save money.

Title	Facilities Assessment Plan
Department	City-Wide

Project Description				Justification					
Funding for a Facilities Assessment Plan will provide an assessment of all city buildings and will include a condition analysis, and recommendation for improvements with a prioritization and costs.				A Facilities Assessment Plan is necessary to layout the current condition of facilities that have had deferred maintenance in past years due to budgetary constraints. The Assessment Plan is critical in providing a systematic approach to long term maintenance of city buildings.

Title	General Emergency Maintenance (Citywide)
Department	City-Wide

Project Description				Justification					
This project provides funding for general emergency repairs of various City buildings to avoid work shutdowns and liabilities. Emergencies include replacement or resolution of vandalized facilities (windows, doors, locks, graffiti, etc.); replacement or repair of damaged entry/exit systems (burglar and fire alarms); and repair of plumbing and electrical system malfunctions.				This project is necessary for repairs of unavoidable or unpredicted emergency breaks or failures. Many of the facilities are located in areas that are subject to extensive vandalism - vandalism may take the form of graffiti or property damage, and theft. Before the facility can be utilized, the facility must be restored to an operational level at minimum.

Project Summary

Acct. Ref. #	PW7002
Title	Hazardous Materials Abatement and Monitoring
Department	City-Wide

Project Description				Justification						
This project will provide for the abatement of hazardous materials encountered during maintenance and construction in City facilities throughout the year. This project also includes visual monitoring for abatement surveys as required to identify source locations. Based on existing surveys, hazardous materials abatement is anticipated for flooring repairs at the following facilities due to asbestos: Senior Center; Cesar Chavez Library restrooms; and PD Main lockers/restrooms.				Abatement of hazardous materials such as asbestos, lead paint, and mold is a mandatory step during construction and often during routine maintenance activities such as repainting. Due to the age of many City facilities, there exists the potential for encountering hazardous materials during both maintenance and project work.

Project Summary

Acct. Ref. #	0000
Title	Human Resources Interior Improvements
Department	City-Wide

Project Description				Justification							
This funding for this project will replace carpet and paint all interior walls throughout Human Resources' section of the first floor of the Stewart-Eberhardt Building, and install a roll-up type security window with panic button in the lobby. Locations of carpet replacement and paint include the main office area, hallways, common areas, offices, file rooms, storage rooms and conference rooms. Coordination will take place with IT for computers and phone disconnect and reconnect. The security window will be secured from the inside and act as a physical barrier from the public.				Human Resources Department is the first point of contact for all new employees in addition to serving existing employees. This department holds negotiation meetings, training classes, recruitment testing, interviews, and hosts consultants. Existing walls have blemishes and minor corner damage, scratched door casings and color inconsistency. Due to high foot traffic the carpets are worn and do not respond to cleanings. Existing patched areas are unraveling. The existing lobby desk does not have adequate safety features to aid staff in the event of an emergency. Staff at the front desk are the first people that visitors (both hostile and not) come into contact with and they're in the best position to act in the event of an emergency.

Project Summary

Acct. Ref. #	PW7036
Title	HVAC Upgrades and Replacements
Department	City-Wide

Project Description				Justification					
This project will provide for the replacement of malfunctioning HVAC equipment. HVAC equipment includes: chillers, water towers, package units, wall mount units, split systems, fans (exhaust and restrooms), heaters, control systems, and associated piping/ducts.				Many of the City's heating and cooling systems are antiquated and replacement parts are no longer available. Some units are over 30 years old and maintenance costs are high. Replacing units with energy efficient equipment will provide better heating/cooling and reduce energy costs.

Title	Lighting Improvement @ SMG Managed Facilities
Department	City-Wide

Project Description				Justification					
This lighting improvement at SMG managed venues includes re-lamping the facility with energy efficient bulbs and adding protective screens.				Project improvements have been identified by SMG as a high priority. The existing rink lighting is exposed and unprotected over the ice surface. Some fixtures are not working from damage by pucks or age. The system must be re-lamped with energy efficient bulbs and protective screens. Additionally, the Energy Independence Act is a federal program that phased out the production or ability to import a variety of non-energy efficient materials and equipment. The lighting above the ice at Oak Park Ice Arena was phased out as of July 2012.

Title	Roof Maintenance and Leak Management Program
Department	City-Wide

Project Description				Justification							
This project will provide management of the over 800,000 square feet of roof systems throughout the City. Management of the roof systems includes periodic cleaning (twice a year), preventative maintenance, minor repairs, condition analysis and recommendations for types of repairs.				Annual maintenance and repairs are necessary for the 800,000 square feet of roof systems covering City Buildings. Preventative maintenance includes roof and gutter cleaning, and minor maintenance and repair. Condition analysis is necessary to determine future strategies and establish cost predictions for oncoming years.

Title	Roof Replacement and Construction Program
Department	City-Wide

Project Description				Justification					
This project will replace the roof of the Stores/Light Fleet Building located at the City's Corp Yard in FY 2016. Subsequent unfunded years provide for roof replacements at priority locations including the Police Department Main, Municipal Service Center and Fire Stations (10 locations).				The City has approximately 800,000 square feet of combined roof area on City buildings. Some of the roofs require structural reinforcement due to dry rot in the roof support structure. Many buildings have exceeded their useful life and must have roof replacement in effort to avoid extensive building damage. The Stores/Light Fleet Building's roof is approximately 30 years old and is beyond leak repair.

Title	Stockton Arena Chiller Rebuild
Department	City-Wide

Project Description				Justification					
This project will rebuild one of the two chillers in the Arena. The chiller will be disassembled, inspected and worn parts rebuilt or replaced to prevent shutdown.				Stockton Arena is maintained by SMG. Project improvements have been identified by SMG as a high priority. The Arena has two chillers in the mechanical room which are part of the air conditioning (HVAC) system. This project will rebuild one of the two chillers as the system must have preventative maintenance rebuilds to prevent shutdown. Currently the system is three years overdue for maintenance. Failure to rebuild one of the chillers could cause unforeseeable extensive damage that has potential to disable the ability to maintain the ice sheet for hockey.

Title	Stockton Arena Energy Management System
Department	City-Wide

Project Description				Justification					
This project will replace the Energy Management System Controls for the HVAC System at the Stockton Arena.				Stockton Arena is maintained by SMG. Project improvements have been identified by SMG as a high priority. The current Energy Management Controls for the HVAC system is failing. The controls are incomplete, outdated, and no longer supported. The system is in need of replacement and upgrade. Without proper controls, some systems cannot run, while others must run manually which causes energy inefficiency and unneeded extra wear and tear to the chillers and HVAC units. Proper building conditions cannot be maintained with the current system.

Project Summary

Acct. Ref. #	PW1408
Title	Library - Chavez - Restroom Renovations & ADA
Department	Library

Project Description				Justification						
The funding for this project will completely renovate the four public restrooms at the Chavez Library to meet ADA requirements.				All six public restrooms at the Chavez Library were constructed in 1964 and do not meet ADA requirements. The restrooms serve approximately 300,000 visitors annually to this facility. The 50-year old facilities and fixtures are difficult to maintain and keep clean. Renovated facilities would meet the current ADA requirements and allow for lower on-going maintenance costs.

Title	Library Book Collection Augmentation
Department	Library

Project Description				Justification						
This project will provide funding for purchasing library books to meet the demands of new development.				Public Facility Fees were established to purchase materials to help meet the need for additional book collections and new technology created by new development. As the community grows demand for new materials increases.

Title	Northwest Branch Library on Thornton Road
Department	Library

Project Description				Justification					
The funding for this project provides for design and construction of a new library, including final furnishings and materials necessary to operate such a facility. The location is in north Stockton at 9602 Thornton Road, on existing acquired property. Facility size will be approximately 14,000 SF.				Growth in north Stockton has created a need for an additional facility. Fees have been collected for this purpose.

Title	Buckley Cove Parking Lot Pavement Resurfacing
Department	Parks and Trees

Project Description				Justification						
The improvements at the existing 214,000 square foot Buckley Cove Marina parking lot consists of base failure repair, and crack sealing in FY 2015; slurry resurfacing and re-striping in FY 2017.				Regular pavement maintenance has not been performed at this secured facility for ten years. To preserve the integrity of the asphalt and reduce long term pavement failure, it needs to be patched and sealed.

Title	Drinking Water Fountain Repairs & Replacements
Department	Parks and Trees

<div>Project Description</div> <p>This is the second part of a two phase project to repair and/or replace all broken drinking fountains throughout all General Fund maintained park sites. Some work will be performed by Facilities Maintenance crews, some will be performed by private contract. Locations of the parks are citywide; approximately 35 sites.</p>				<div>Justification</div> <p>Most of the drinking fountains at General Fund maintained park sites have been vandalized and are inoperable. In some cases fountains have been removed. Drinking fountains provide a much needed and appreciated service, especially in the vicinity of playgrounds and fields.</p>

Acct. Ref. # 0000
Title EBMUD Bike Path Reconstruction
Department Parks and Trees

Project Description		Justification							
This project will repair the EBMUD Bike Path, a Class I bicycle facility, from Feather River Drive to Pacific Avenue, including upgrading wheelchair ramps at intersections and repairing connections to pedestrian paths and sidewalks.		The EBMUD Bike Path and Greenscape is a unique public resource, but its usefulness as a commute connection and source of recreation is being eroded by the increasing deterioration of the asphalt trail. Bringing this facility back up to its original usefulness will improve the usability of the City's Bikeway Network, increase the safety of those using the path, and potentially decrease vehicular traffic, which will support the City's Climate Action Plan, reduce fuel consumption, and increase air quality.

Project Summary

Acct. Ref. # 0000
Title Game Court Rehabilitation
Department Parks and Trees

Project Description				Justification							
The project will resurface game courts in 34 City Parks (6 parks per year). In FY 2015 courts at Baxter, Gibbons, Weston, Swenson, and Louis Parks will be repaired. Parks repaired in subsequent years will include: Atherton, Stribley, Valverde, American Legion, Brooking, Shropshire, Faklis, and Equinoa Parks (FY 2016); Grupe, Holmes, Liberty Square, Van Buskirk, Victory, Weberstown East, and Dentoni Parks (FY 2017); Laughlin, Peterson, Williams Brotherhood, and Sandman Parks (FY 2018); Panella, Parma Sister City, Cruz, Holiday, Loch Lomond, Harrell, McKinley, and Sousa Parks (FY 2019); and Sherwood and Anderson Parks (FY 2020).				An attractive, well-used park is a neighborhood asset, while a run-down park is a blight. This project will restore deteriorating game court surfaces, keeping them playable, and will correct any trip hazards. Parks were evaluated on two criteria: frequency of use and degree of game court damage. A Game Court Maintenance Schedule was created, with the most highly used and most deteriorated facilities being given priority.

Project Summary

Acct. Ref. # 0000
 Title Irrigation Controller Upgrades
 Department Parks and Trees

Project Description				Justification					
The project includes purchase and installation of Calsense brand controllers for up to 40 General Fund park sites and a communication conversion for Gleason's existing controller, completing the City's conversion to SMART irrigation controller technology. Installation includes new controllers, master valves, flow sensors and 5-years of initial cellular communication service for each site. The first five park sites to be upgraded include: Weber Point Events Center, McLeod Lake, American Legion, Morelli, and Gleason.				New controllers and appurtenances are necessary to comply with the State Model Water Efficient Landscape Ordinance regulations and to improve irrigation efficiency and to reduce water and electricity bills (up to 30%). The controllers gather weather data on a daily basis and adjust irrigation valve run times based on actual water evaporated in the field and moisture in the atmosphere. The controllers allow for remote adjustment from the office affording greater efficiency in troubleshooting and maintenance. Most of the park sites are irrigated with drinking water making water conservation even more critical.

Project Summary

Acct. Ref. #	PW1323
Title	Louis Park Softball Complex Parking Lot & Walk
Department	Parks and Trees

Project Description				Justification					
The funding for this project will reconstruct two existing parking lots, repair existing pavement base failures, overlay with hot mix asphalt, install new striping and replace existing pedestrian walkways to comply with latest Americans with Disabilities Act (ADA) Standards.				This project is the second phase of the parking lot and pedestrian walkway improvements. The existing parking lot is deteriorated with pavement base failures, alligator cracking and in need of ADA compliant upgrades. Deferring the much needed improvements will further deteriorate existing conditions and increase maintenance costs.

Title	Oakmore Montego Neighborhood Park - 6 Acres
Department	Parks and Trees

Project Description				Justification					
This 6 acre site is located on the south east corner of Shady Forest Way and El Pinal Drive. The project provides for acquisition of 5 acres and associated street frontage as well as construction of the 6 acre neighborhood park.				The park is consistent with the City's General Plan. Timing for construction will be coordinated with neighborhood build-out of approximately 75%, and sufficient maintenance assessment district revenue. The City owns one acre of this 6 acre site.

Project Summary

Acct. Ref. #	PW1414
Title	Park Shade Structure Replacement Citywide
Department	Parks and Trees

Project Description				Justification						
Repair or replace 22 wooden shade structures at 13 City Parks (General Fund Parks). 16 structures need repairs, and 6 need total replacement. First year's funding request is to repair/replace the 6 most deteriorated.				Existing structures have been in service for over 25 years and are in various states of disrepair. 6 are in need of complete replacement. The 16 structures that are in need of repairs are missing wood slats and some have dry rot on the supporting structure. Refurbishment, replacement, and/or demolition is warranted to preserve these capital assets and all 22 should be painted for safety, functionality, longevity and aesthetics.

Project Summary

Acct. Ref. #	PW1415
Title	Pixie Woods Lagoon & Train Ride Improvements
Department	Parks and Trees

Project Description				Justification					
This project to improve the Pixie Woods Park will provide the following: 1.) Install a water quality aeration system for the Pixie Woods Lagoon, 2.) Reconstruct the train trestle, and 3.) Reconstruct the train depot roof.				Lagoon Aeration - The Pixie Woods lagoon has approximately four feet of sedimentation/organic build-up; the lagoon is only six feet deep. Providing proper water circulation and associated aeration will reduce the need for chemical control of the algae and duck weed as well as prevent sedimentation build-up. In addition to reducing chemical costs, improving the water quality will make the facility safer for the general public and increase the life of the boat amusement ride. Train Trestle and Depot Roof Reconstruction - The existing train trestle and depot roof have dry rot. There is a possibility of structural weakness, and the roof continues to encounter leaks; reconstruction is needed before additional damage occurs. The train ride is a major attraction for the park.

Title Pixie Woods Walkway Resurfacing
Department Parks and Trees

Project Description				Justification					
The funding for this project will provide maintenance work on the pedestrian walkway at Pixie Woods Park. The pedestrian walkway will be resurfaced with sand slurry seal, existing cracks and displacements will be sealed or ground down to minimize trip hazards.				Pixie Woods Park is open approximately 100 days per year (May to September) and receives about 14,000 visitors per season. The pedestrian walkway throughout the park is deteriorated with cracks and displacements that have become potential trip hazards. Improving the existing walkway will extend it's service life and improve overall safety.

Title	Playground Wood Fiber Fall Surfacing Conversion
Department	Parks and Trees

Project Description				Justification					
This project funds removing existing sand fall surfacing and replacing it with engineered wood fiber fall surfacing at 13 park play ground sites (Anderson, Atherton, Brooking, Dentoni, Holiday, Holmes, Liberty, Oak park west, Pixie Woods, Sandman, Swenson, Union and Weber Square).				Sand fall surfacing in playgrounds does not meet State and Federal standards for wheelchair accessibility. Sand does not provide suitable fall attenuation.

Title	Weber Point Shade Structure Fabric Replacement
Department	Parks and Trees

Project Description This project will provide funding to replace the fabric on the Weber Point Event Center shade structure.				Justification The Weber Point Event Center shade structure was built in 1999. The life expectancy for the fabric is approximately 15-years. A number of pockets on the fabric that hold the support cables are starting to unravel, which indicates that the remaining useful life of the fabric is limited.

Project Summary

Acct. Ref. #	PW1410
Title	Fire Station No. 2 Engine Bay Improvements
Department	Public Safety - Fire

Project Description				Justification						
This project will repaint the Engine Bay of Fire Station No. 2. The project will paint the interior ceiling sheathing, joist and framing of the fire truck and engine bays. Hazardous materials abatement is included for the lead content in the existing paint.				Over 50% of existing paint of Engine Bay for Company 2 is peeling and could possibly contain lead. The Engine Bay has not been painted for several years. If existing conditions are not improved the paint will continue to chip causing safety issues, and the condition will further deteriorate.

Title	Fire Station No. 4 Kitchen Improvements
Department	Public Safety - Fire

Project Description				Justification					
This project will replace the existing kitchen counter and cabinets at Station 4 with stainless steel cabinets. Existing cabinets will be removed and new wall cabinets, cabinets with pass thru, cutting board and sink with faucet will be installed.				Existing cabinets and counter are over 50 years old and deteriorated. Cabinet door and drawers are loose and or broken. Laminate counter top is unglued to it's original surface and is coming apart. Existing kitchen storage is insufficient as pots and pans are placed on top of the cabinets causing a safety hazard in the event of an earthquake.

Project Summary

Acct. Ref. #	PW1412
Title	Fire Station Nos. 2 & 10 Driveway & Parking Lot
Department	Public Safety - Fire

Project Description				Justification					
The project improvements include: 1.) reconstructing existing catchbasin collars at Station No. 2; and 2.) reconstructing the driveway located at the northeast entrance of Station No. 10 and reconstructing portions of the parking lot. At Station No. 2 the existing asphalt catchbasin collars will be removed and replaced with concrete. At Station No. 10, the existing driveway will be removed and replaced with a concrete structural section to better accommodate the apparatus loads. Improvements in the parking lot include base failure repair, resurfacing and re-stripping.				At Station No. 2 existing catchbasin collars and adjacent asphalt is cracked due to heavy fire truck traffic. Continued asphalt degradation around the catch basins allow for water intrusion and further damage around existing drain inlets. Concrete needs to replace the asphalt collars to better accommodate the loading of apparatus to prevent further degradation. At Station No. 10 the water table is naturally high due to its geographical location. The asphalt drive and parking lot has failed. Concrete replacement of the driveway and base failure repair is needed to mitigate further degradation.

Project Summary

Acct. Ref. #	0000
Title	Police Department Additional Office Space
Department	Public Safety - Police

Project Description				Justification					
This project will provide approximately 10,000 SF of additional workspace over a two year period. The 10,000 SF of office space identified will be located in the currently vacant area of the 4th floor in the Stewart-Eberhardt Building (SEB). The construction of additional workspace will include, but is not limited to report writing stations, office space for administration staff, file room, and break room. Because Police Department staffing is projected to increase over the next three years, an additional 5,000 SF of office space will be needed beyond build-out of the 4th floor of SEB; this space has not yet been identified.				With the passage of Measures A and B, the Police Department (PD) anticipates hiring 150 additional staff positions over the next three years, which the department's current office configuration cannot accommodate. The majority of these positions are field staff of which will be on shift assignments, which reduces the amount of additional office space required. In an effort to maintain optimal deployment efficiency and keep operational functions housed together, it is recommended that additional space in the Essential Services facility be built out and/or renovated over the next three years to accommodate the additional office space needs. The eastern portion of the fourth floor (approximately 10,000 SF) is still a shell and will require significant tenant improvements to convert it into an operational office space, however, plans have already been drawn and could be adapted for the Police Department's use.

Title	Police Department Under Freeway Parking Lot
Department	Public Safety - Police

Project Description				Justification					
This project will replace fencing around an existing parking lot under the Crosstown Freeway (State Route 4) used by the Police Department. The fencing will be increased to 8-feet in height with exclusion wire along the top. A interior fence will be constructed to separate the lot between Police Department assets and other parking lot customers. Included with the improvements is the installation of two automated vehicle gates and two automated pedestrian gates.				The City plans to add 120 Police Officers over the next three years. Additional parking space is needed to accommodate patrol vehicles, vehicle staging, and employee parking. By upgrading security at this lot, the City can better utilize the existing space and accommodate additional patrol cars without the purchase and upgrade of additional land.

Title Police Main Facility Improvements
Department Public Safety - Police

Project Description				Justification					
This project will remodel the basement of the Police Main Facility to accommodate Roll Call. Work includes renovating the locker rooms and bathrooms/showers.				The existing Roll Call room is overcrowded, and the locker room and bathroom facilities are in disrepair. The rooms are in need of renovation to enable efficient sanitization of the facilities and to be able to serve the needs of officers.

Title	Civic Auditorium Stage Controls/Rigging
Department	Recreation

Project Description				Justification					
This project will provide for the replacement of the Civic Auditorium stage controls/rigging, and the stage curtains.				The current curtain and stage controls/rigging system are out dated and do not meet current codes. The system is difficult to operate and potentially unsafe as it does not meet current functional needs or standards. A total replacement is necessary.

 Title Civic Auditorium Various Repairs
 Department Recreation

Project Description				Justification					
The funding for this project will repair various elements of the Civic Auditorium building as follows: 1) Repair/replace exterior awnings of the building; 2) Refinish the floor surfaces in all halls; 3) Paint the interior and exterior of the building; 4) Replace all window and hallway curtains; 5) Add backstage safety lighting system to the Main and North Hall stages; 6) Replace entire PA and Sound System; and 7) Renovate concession areas up to code for food service uses.				Years of deferred maintenance have affected the overall aesthetics and use of the building. These repairs would make the building appealing for private and City events that need a full functioning auditorium. Delay in the much needed repairs will increase auditorium deterioration increasing maintenance costs and energy inefficiency.

Title	McNair Soccer Complex - Fencing, Gate & Turf
Department	Recreation

Project Description				Justification					
This project will improve security and aesthetics at the McNair Soccer Complex by installing approximately 600 linear feet of fencing on the north side of the soccer field, adding an entrance gate to the west side of the facility, and overseeding the existing grass to improve existing spotty growth patterns.				McNair Soccer Complex is unsecure and open on the north end of the complex. Unauthorized users enter the soccer field from the unsecure opened area during non-operating hours. The existing west gate allows for vehicles to access the field area where parking is not permitted. The locks on the gate are continuously being cut off. Installing an entrance gate for pedestrians will improve security by preventing unauthorized users from entering. McNair's soccer field grass is unappealing with spotty growth patterns. Overseeding, fertilization and sodding some areas will improve the turf.

Title	Stockton Soccer Complex Improvements
Department	Recreation

Project Description				Justification					
This project will provide various improvements at the Stockton Soccer Complex to include the following: Adding a new blend of grass to the fields; lighting repairs on all nine fields; installing parking lot bollards and fencing gates around the parking lots; expanding the existing parking lot to the undeveloped areas on the south and west sides of the complex; and installing two additional restroom buildings on the north and south ends of the facility.				During league play, tournaments, and special events, the Stockton Soccer Complex accommodates over 5,000 people. The facility is severely inadequate to serve its users. The grass needs restoration, and the parking lots and restrooms need to be expanded.

Title Stribley and Van Buskirk Community Center
Department Recreation

Project Description		Justification							
At Stribley Community Center, the project includes installing manually operated thermostat controls. At Van Buskirk Community Center, the project includes replacing carpet in Ross Hall with linoleum or vinyl product; and installing a security dividing door to separate the gymnasium area and fitness room from the remainder of the building use areas.		At Stribley Community Center, thermostat settings cannot be manually adjusted in the activity rooms, resulting in uncomfortable conditions for some activities. At Van Buskirk, existing carpet flooring cannot be kept clean; and a security door is needed to separate rooms to allow for crowd control during events.

Title	Regional Wastewater Control Facilities
Department	Sanitation

Project Description				Justification					
This project provides funds to repair, modify and/or replace facilities at the Regional Wastewater Control Facility. Projects planned for Fiscal Year 2015-2016 include the replacement of the Headworks Facility and Laboratory.				These projects are necessary to maintain the proper operation of facilities at the Regional Wasterwater Control Facility and to insure continued compliance with the State of California's regulatory and water quality requirements.

Title	Sanitary Pump Station Rehabilitation/Modifications -
Department	Sanitation

Project Description				Justification					
This project provides for the modification to existing sanitary pump stations to correct capacity and/or deficiencies. For Fiscal Year 2014-2015, projects include electrical and mechanical repairs to the pump stations at Thornton and Davis Roads, and Don Avenue and Santiago Way. In addition, the Smith Canal East Forcemain will be televised and evaluated for structural deficiencies.				This project ensures that sanitary pump station capacities are adequate and reliable for system demands.

Title	Sanitary System Deficiency Improvements -437
Department	Sanitation

Project Description				Justification					
These projects will address capacity deficiencies and corrosion problems. For Fiscal Year 2014-2015, Projects include sewer repairs or replacements at Alexandria Place, Ralph Avenue, Black Oak Drive, Highway 99 Sewer Crossing, and Navy Drive.				These projects eliminate restrictions and pipeline collapses in the City's sanitary sewer collection systems, and allows for continuous sewer service within the service area.

Project Summary

Acct. Ref. #	7702
Title	Sanitary System Repair - 437
Department	Sanitation

Project Description				Justification					
This project provides for major repairs or replacements of the City's existing sanitary system. For Fiscal Year 2014-2015, the design, repair and replacement of sewer mains are at the following locations: California Street, Wilson Way, Kentfield Road, Channel Street, Rose Street, Acacia street, Fremont Street, El Dorado Street, Commerce Street, Walnut Street, Esperanza Way, Porterfield Court, Third Avenue, Glendora Avenue, and Pacific Avenue. In addition, for Fiscal Year 2014-2015, deteriorated sewer maintenance holes and the sewer crossing at the Calaveras River along the alignment of Crown Avenue will be repaired or replaced.				As the existing sanitary sewer system ages, it is necessary to continually repair, rehabilitate or replace deteriorated infrastructure in order to insure the system continues to operate in an acceptable manner without service interruption to customers.

Title	Storm Drain Alleviation - Modification/Additions -
Department	Stormwater (Drainage)

Project Description				Justification						
This project improves and repairs the storm drain infrastructure to eliminate flooding and reduce overflows of stormwater into the sanitary system. Improvements include Charter Way and Tillie Lewis Flood Relief, Stanislaus Street Stormline Replacement, East Park Street Storm Drainage Upgrade, El Dorado Street, Mission Street Storm Drainage Installation, Exit Street Storm Drainage, and infiltration assessments for various drainage systems in Fiscal Years 2015-2016 through 2018-2019.				This project addresses deficiencies in the storm drain system throughout the City. By reducing stormwater flooding, overflows into the sanitary collection system and wastewater treatment costs are both reduced.

Project Summary

Acct. Ref. # 7790
Title Storm Drain Detention Basins - 447
Department Stormwater (Drainage)

Project Description Project provides for the funding of improvements to regional storm drainage basins, located throughout the City. Improvements to basins include repairs to access roads, fencing, eroded basin slopes, and concrete channels.				Justification The basins are necessary to detain stormwater; thereby, reducing the risk of street flooding and impacts to local waterways. This project addresses deficiencies and disrepair conditions of existing storm drainage basins.

Title	Alpine Avenue Grade Separation
Department	Streets

Project Description				Justification					
This project will construct an underpass structure on Alpine Avenue at the Union Pacific Railroad intersection; located between West Lane and Montego Avenue.				The existing railroad crossing provides for a skewed intersection, at-grade with train traffic. This proposed underpass will eliminate the at-grade intersection, improving safety by eliminating blocking delays occurring on Alpine Avenue when trains cross. This project will also reduce train horn use.

Title	Arch Road Widening - Austin Rd to Performance Dr
Department	Streets

Project Description				Justification					
Project includes widening Arch Road between Austin Road and Performance Drive to a 4-lane roadway. Improvements include installation of concrete curb, gutter, sidewalks and driveways on both sides, widening narrow sections to a 4-lane roadway with a middle turn pocket lane, installing ADA wheel chair ramps, new street lights, new storm drain facilities, striping and signing and traffic signal modifications.				The newly constructed Sperry Road Extension project from French Camp Road to Performance Drive is 4-lane roadway. Several sections of Arch Road between Performance Drive and Austin Road (BNSF Intermodal Facility) are only 2 lanes. This project will include right of way acquisition and will provide a consistent width expressway east and west of State Route 99, enhancing commercial development along this corridor.

Title	Arch-Airport Road and B Street Signalization
Department	Streets

Project Description				Justification					
The project will signalize the intersection of Arch-Airport Road and B Street. While the foundation for the signal cabinet is in place, the project will install signal mast arms, detection, pedestrian countdown and audible signals, ADA compliant wheelchair ramps, CCTV camera, and crosswalks according to current City standards.				Based on data collected in 2013, the intersection satisfies traffic signal warrants presented in the California Manual of Uniform Traffic Control Devices 2012 Edition. 90% of the project cost is funded through the Highway Safety Improvement Program (HSIP) Cycle 6. The 10% local match will be completely funded by Proportionate Share Development Fees.

Title	Bicycle Facilities Master Plan Update
Department	Streets

Project Description		Justification							
This project will update the City's Bicycle Facilities Master Plan to include a comprehensive plan for the City's bicycle network and to identify key opportunities to integrate "Complete Streets" policies and improvements. Grants will be sought to assist in funding this project.		The last update to the City's Bicycle Facilities Master Plan was completed in 2007. An updated Master Plan is needed to assist in providing a safe, comfortable and convenient bicycling environment, and to increase bicycling commuters in the City's geographical core. The Bicycle Facilities Master Plan update is needed to align with the City's General Plan, the California Streets and Highways Code, and "Complete Streets" policy into an implementable plan.

Title	Bus Rapid Transit, Phase IV (MLK Jr. Blvd and
Department	Streets

Project Description			Justification						
This project is included in the City of Stockton Bus Rapid Transit Master Plan. The City is teaming with San Joaquin Regional Transit District to deliver this project. The City will install bus detection devices at 15 traffic signals along Dr. Martin Luther King Jr. Blvd and at the intersection of Farmington Road and Mariposa Road. Funding expenses and revenues identified are for the project's construction phase; design and environmental are currently underway.			Over \$1.7 million in Federal CMAQ funding, and \$226,418 of Air District Funds have been secured for the entire project. The Dr. Martin Luther King Jr. Blvd project will be patterned after the successful Metro Express bus services that are currently operating on Pacific Avenue between Hammer Lane and the Downtown Transit Center; Airport Way between the Downtown Transit Center and Stockton Metropolitan Airport; and on Hammer Lane between Mariners Drive and State Route 99.

Title	California Street Gap Closure Improvements,
Department	Streets

Project Description				Justification						
The project consists of sidewalk gap improvements along California Street between Hampton Street and Monterey Avenue. The project includes installing new curb, gutter, sidewalk, driveways, repairing existing curb, gutter, and sidewalk, storm drain upgrades including installation of maintenance holes, catch basins, and storm drain pipes.				California Street is a four-lane arterial that runs north-south through the center of Stockton. Within the limits of the proposed project there are residential areas, stores, businesses, and medical facilities; however California Street does not have continuous sidewalks.

Title	Center St / El Dorado St Overpass Rehabilitation
Department	Streets

Project Description				Justification					
Project includes rehabilitation of the existing Center Street and El Dorado Street overpasses located between Church Street and Worth Street. Funding for design and construction of this project was appropriated in the CIP Budget for FY 2013/14. The design of this project is underway. This appropriation is for additional funds for environmental mitigation measures placed on the project, and for biological monitoring services during construction.				As part of the project's design, the state placed environmental mitigation measures on the project which must be addressed to move forward with the project. Bat exclusion with installation and maintenance of bridge netting is required. Major funding is from the federal Highway Bridge Program.

Title	City Bridges Rehabilitation Project
Department	Streets

Project Description				Justification					
This project will rehabilitate the following City Bridges to address deficiencies indicated in the Bridge Inspection Reports. This project includes the following Bridges: - West Lane / Calaveras River - Pershing Avenue / Calaveras River - Diamond Street / Mormon Slough - Santa Paula Way / Mosher Slough - Aurora Street / Mormon Slough Repairs will address erosion, asphalt approaches, deck sealing, and barrier replacement.				Bridge repairs are necessary to address structural deterioration issues. These repairs will maximize lifespan of the bridges.

Title	Davis Road Widening (Bear Creek to Waterford)
Department	Streets

Project Description				Justification					
This project widens Davis Road between Bear Creek and Waterford Drive. Improvements include widening a two lane roadway to a four lane roadway to match existing widened segments; installation of concrete curb, gutters, sidewalks and driveways; installation of drainage facilities; landscaping; and striping and signage.				The existing roadway is narrow, two lanes, and needs to be widened to four lanes matching the existing Davis Road Bridge over Bear Creek and Davis Road Bridge over Pixley slough. Roadway widening will improve safety to vehicular traffic and pedestrians.

Project Summary

Acct. Ref. #	0000
Title	Downtown Crosswalk Upgrades
Department	Streets

Project Description				Justification							
This project will install Rectangular Rapid Flashing Beacons on mast arms, upgrade existing crosswalk signs/crosswalks and frontage improvements at five uncontrolled crossings in downtown to increase pedestrian and bicycle safety. Three of the crossings are located on El Dorado Street (Main Street Promenade, Channel Street, and Lindsay Street), and two are located on Center Street (Channel Street and north of Parkers Alley). Both of these streets are major one-way arterials, with at least three travel lanes.				All five of the crossings have pedestrian activated in-pavement warning and illuminated signs. These in-pavement systems have proven to be difficult to maintain. In addition, replacement parts for these devices are being phased out and therefore more difficult to purchase. Studies have shown that Rectangular Rapid Flashing Beacons (RRFB) on mast arms are much more visible than in-pavement lights, and thus have a much higher compliance rate. The purpose of this Project is to replace the in-pavement lights with pedestrian warning devices that have enhanced visibility and will further improve safety for pedestrians crossing El Dorado and Center Streets at these 5 locations.

Project Summary

Acct. Ref. #	PW1425
Title	Downtown Fuel Tank Removal, Leak Assessment,
Department	Streets

Project Description				Justification					
This program will complete the soil and vapor testing required to close the case for a leaking fuel tank discovered under the sidewalk at 601 E. Main Street (City Project No. 08-17). This project will also provide for the removal of the newly discovered abandoned oil tank under the sidewalk at 800 E. Main Street (City Project No. 13-33). As part of the removal, soil samples will be collected and tested, contaminated soil will be disposed, and an Initial Assessment Report will be filed with the San Joaquin County Environmental Health Department (EHD). Additional soil removal, remediation, or monitoring may be required if EHD determines that it is necessary.				The City owns the property beneath the sidewalks located Downtown. Historically, owners of Downtown buildings would install fuel oil tanks under the sidewalk; this was during an era before fuel tanks were regulated. As no City permits were issued there are no historic records of locations of these installs. Since 2008, whenever these tanks are discovered, the City is responsible for their removal and for any associated testing and cleanup. The case for 800 E. Main Street is under the supervision of the Central Valley Regional Water Quality Control Board, which can levy fines if removal, assessment, and cleanup are not completed in a timely manner.

Project Summary

Acct. Ref. #	0000
Title	EBMUD - March Lane Greenscape, Phase 2
Department	Streets

Project Description				Justification						
This project will create a shaded greenscape along the East Bay Municipal Utilities District (EBMUD) Corridor, an underutilized public space adjacent to March Lane. The project site covers a 4-acre parcel between El Dorado Street and Hillsboro Avenue. Improvements include: landscaping with trees, shrubs, lawn, and decorative grasses; irrigation; and pedestrian amenities along the existing Class I bicycle path.				The project site is blighted and highly visible from March Lane, a highly used road. Upgrading this underutilized public resource will decrease blight and increase neighborhood engagement an economically disadvantaged area. The improvements will increase the safety of those using the existing bike path and improve the usability of the City's Bikeway Network. Increasing use of the facility will decrease motorized traffic on a major arterial street, supporting the City's Climate Action Plan, reducing fuel consumption, and increasing air quality. Design for the project is 90% complete.

Title	Eight Mile Road/I-5 Interchange Reconstruction
Department	Streets

Project Description				Justification									
The project will reconstruct the Eight Mile Road/I-5 Interchange by widening Eight Mile Road to provide an additional westbound lane; widening the southbound on-ramp from 3 to 4 lanes; widening the southbound off-ramp from 2 to 3 lanes, and constructing a new northbound loop off-ramp in the northeast quadrant of the interchange. This project budget includes only design and right of way costs. The full cost of the project including construction totals approximately \$72.7 million.				This project is associated with the I-5 Widening project and is needed to accommodate the growth in traffic due to the build-out of northwest Stockton per the City's General Plan.

Title	Eight Mile Road/SR 99 Interchange Reconstruction
Department	Streets

Project Description				Justification					
This project will reconstruct the Eight Mile Road/SR99 Interchange, the ramps will be reconfigured to provide a tight diamond ramp configuration for the SR99 northbound ramps and a partial cloverleaf or spread diamond configuration for the SR99 southbound ramps. A park and ride facility will be constructed in the northeast quadrant of the Interchange. Preliminary engineering and environmental are currently being completed. This project budget includes cost for only the next phase: final design, and right of way acquisition. The full cost of the project including construction totals approximately \$89 million.				This project is needed to address the congestion and related degradation of the Level of Service that is projected by the year 2035 at the Eight Mile Road/SR99 Interchange and adjacent roadways within the study area as a result of planned development in accordance with the City of Stockton's 2035 General Plan.

Title	Filbert Street/Miner Avenue Traffic Signal
Department	Streets

Project Description				Justification					
The project includes installing a new traffic signal at the Filbert Street and Miner Avenue intersection, fiber optic cable, and intersection round corners will be upgraded to current ADA standards. Intersection round corner radii will also be improved to accommodate STAA trucks. This project is currently in design; expenses and revenues shown for funding in FY 2014/15 are for construction and right-of-way acquisition.				This intersection has been selected from the 2008 Citywide Traffic Signal Priority List. The intersection meets State and Federal warrants for signalization. This signal will support pedestrian activity in the area and eliminate an all-way stop.

Project Summary

Acct. Ref. # PW1427
Title Hammer Lane Widening, Phase 3B
Department Streets

<div>Project Description</div> <p>This project will widen Hammer Lane from four to six lanes between Alexandria Place and Thornton Road. The work includes: southside road widening, overlay of pavement, replace curb gutter, sidewalk, driveways, wheelchair ramps, relocation of street lighting, raised median, landscaping, irrigation, striping, signs, pavement markings.</p>				<div>Justification</div> <p>This is the last segment of Hammer Lane to be widened as part of the Stockton Street Improvement Project dated from 1994, which included a study of nine major street corridors, including Hammer Lane.</p>

Project Summary

Acct. Ref. #	0000
Title	Hammer Lane/I-5 Interchange Reconstruction
Department	Streets

Project Description				Justification					
The project will widen the following: Hammer Lane from 4 to 6 lanes under I-5; the northbound off-ramp from 3 to 5 lanes, the northbound on-ramp from 2 to 3 lanes, the southbound off-ramp from 2 to 3 lanes and Hammer Lane by an additional lane in each direction between Kelly Drive and Mariners Drive.				This project is associated with the I-5 Widening project. This project will accommodate the planned growth in traffic due to the build-out of the Stockton General Plan in the Hammer Lane and I-5 corridors.

Project Summary

Acct. Ref. #	PW1312
Title	March Lane Adaptive Traffic Control System
Department	Streets

Project Description				Justification					
This project will deploy an adaptive traffic control system that includes upgrading traffic signal controllers and traffic signal cabinets, installing an Emergency Vehicle Pre-emption(EVP) system, and establishing system communication with our central computer at 19 signalized intersections on the corridor between Feather River Drive and Montauban Avenue.				This is an inter-jurisdictional project with Caltrans District 10 to deploy an adaptive traffic control system along a 3.75 mile segment of March Lane to improve traffic operations, safety, and the effective capacity of the corridor. March Lane is a congested facility with above 35,000 vehicles per day on most segments and reaches 63,400 vehicles per day near the I-5 area. This facility is also a major truck route between I-5 and Pacific Avenue. It has three congested peak hours; AM, Mid-day, and PM. The free flow speed is below the posted speed limit when congested. Major funding is from the federal Congestion Mitigation Air Quality Program.

Project Summary

Acct. Ref. #	PW6722
Title	McKinley Avenue/French Camp Slough Bridge
Department	Streets

Project Description				Justification						
The project scope includes, but is not limited to the construction of rock slope protection, spalled concrete repairs, bridge deck repairs, and the installation of a polyester concrete overlay to the deck. The project is currently funded with \$199,120 in existing design and environmental funds.				A 2001 Caltrans Bridge Inspection Report stated the McKinley Avenue Bridge was "scour critical". The Report stated that an abutment footing was exposed and slightly undermined, and that any further erosion of the alluvial channel bed may compromise the stability of the structure. A 2007 Caltrans Bridge inspection report noted exposure of an abutment footing, settlement of the roadway at the abutments, soffit cracks along the construction joint where the bridge was widened, and vertical cracks in the abutment diaphragms and in both sides of each pier wall. This project is entirely funded from the federal Highway Bridge Program.

Project Summary

Acct. Ref. # 0000
 Title Micro-Surfacing of Local Roads
 Department Streets

<div>Project Description</div>				<div>Justification</div>					
<div>The project provides for an ongoing preventive maintenance program on various local City streets using micro-surfacing treatment. The existing condition of the selected streets register in the pavement condition index (PCI) range of 50 to 70 (PCI 0 is failed and PCI 100 is brand new street). Included with the micro-surfacing treatment is minimal base failure repairs and restriping.</div>				<div>Micro-surfacing is an economical method of extending the useful life of pavement roads. Streets are selected using a computerized pavement management program. Deferring the preventive maintenance treatment will lead to accelerated deterioration of the pavement condition, resulting in higher repair costs in the future. Micro-surfacing is projected to be undertaken in a 5-year cycle.</div>					
<div>Project Forecast</div>				<div>Project Detailed 2015</div>

Project Summary

Acct. Ref. #	0000
Title	Miner Avenue Streetscape, Phase 1
Department	Streets

Project Description				Justification					
Rehabilitate Miner Avenue from California Street to Aurora Avenue which includes: narrowing the roadway from 4 lanes to 2 lanes, addition of medians, replacement of sidewalk, curb & gutter, signal modification at California and Stanislaus intersections, landscape and hardscape features, and public art. This is the first phase of implementation of the Miner Avenue Streetscape Plan. Project also includes preparation and approval of a Precise Roadway Plan and Environmental Study for the entire Miner Avenue Streetscape project, from Center Street to the UPRR.				On March 13, 2012, Council approved a Master Plan for the Miner Avenue Streetscape Improvements from Center Street to the UPRR. The Master Plan proposed a set of improvements that could intensify the Corridor's linkages to the downtown and serve as a catalyst for private investment in the Corridor. It also could provide the Corridor with a greater sense of place and enhance its vitality by creating a safer and more pedestrian friendly environment.

Project Summary

Acct. Ref. #	0000
Title	Miracle Mile Street Lighting Replacement
Department	Streets

Project Description				Justification					
The funding for this project includes demolition of 37 existing specialty street lights along the Miracle Mile segment of Pacific Avenue, and installation of a lesser number of street lights in accordance with current City standards. New installation includes a new wiring system, controls, foundations, poles and fixtures.				Existing pole foundations are failing, bolts are corroded, and conduit has deteriorated or is completely gone. System was constructed over 50 years ago. Some street light poles have fallen down in wind events. The wiring is difficult to maintain because there is no protection from corrosive elements of the soil.

Project Summary

Acct. Ref. #	PW1315
Title	Montauban Avenue and Swain Road Roundabout
Department	Streets

Project Description				Justification					
The project converts a 4-way stop control intersection to a roundabout at Swain Road and Montauban Avenue. The project includes installing fiber optic cabling for a pan-tilt-zoom (PTZ) Camera, upgrading corner improvements to bring the intersection up to Americans with Disabilities Act (ADA) standards for wheelchair accessibility, installing signs and striping. The PTZ camera at the roundabout will be interconnected to the nearby intersection to bring the images to the City's Traffic Management Center (TMC). The project will also install new street lighting and upgrading existing amenities.				The intersection meets the warrants for signalization and is on the City's signal priority list. The location is better suited for a roundabout than a signal. A roundabout would improve the Level of Service at the intersection, improve safety, and will provide traffic calming at the intersection. This project is funded entirely from the federal Congestion Mitigation Air Quality Program.

Project Summary

Acct. Ref. #	PW9720
Title	Morada Lane/SR 99 Interchange Reconstruction
Department	Streets

Project Description				Justification					
This project will reconstruct the Morada Lane/SR99 Interchange. The ramps will be reconfigured to provide a tight diamond ramp configuration for the southbound diagonal on and off ramps and reconstruct the northbound ramps with larger radii "hook" ramp that intersect with the East Frontage Road. This project budget includes only design and right of way acquisition costs. The full cost of the project including construction, totals approximately \$132.6 million.				This project is needed to address the congestion and related degradation of the Level of Service that is projected by the year 2035 at the Morada Lane/SR99 Interchange and adjacent roadways within the study area as a result of planned development, and in accordance with the City of Stockton's 2035 General Plan.

Project Summary

Acct. Ref. #	PW6653
Title	Neighborhood Traffic Calming Program (16
Department	Streets

Project Description				Justification					
The Neighborhood Traffic Management Program (NTMP) allows participating neighborhoods to address local traffic related issues such as speeding and cut-through traffic through installation of traffic calming measures. These measures include items such as speed humps, speed cushions, traffic circles, etc. Staff currently works with 16 neighborhoods per year to develop and construct traffic calming plans that offer viable solutions to each neighborhood's specific traffic concerns. Costs for this annual program includes a cost spike for FY 2015 due to traffic circles that have been approved for construction.				Through the implementation of the community-based traffic calming program, the City of Stockton is able to improve neighborhood safety and livability by providing residents the resources they need to reduce speeding, traffic volumes, and address other traffic related issues.

Project Summary

Acct. Ref. #	0000
Title	North Stockton Grade Separations
Department	Streets

Project Description		Justification							
Project construction was completed in 2013. The project included construction of three separate roadway grade separations: two overpasses on Eight Mile Road over the Union Pacific Railroad, and one underpass on Lower Sacramento Road beneath the Union Pacific Railroad. Eight Mile Road overpass facility provides for the ultimate eight-lane roadway configuration; Lower Sacramento underpass provides for the ultimate six-lane roadway configuration. Future appropriations include an annual loan payback to the San Joaquin Council of Governments commencing in Fiscal Year 2015/16 and continuing through Fiscal Year 2019/20 in the approximate amount of \$55K per year.		This project provided elimination of vehicle-train intersection conflict. The project was largely funded with state Proposition 1B Bond funds. The Cooperative Agreement executed between the City of Stockton and the San Joaquin Council of Governments for this project provided for the advance of construction funds with the understanding that interest would be paid back upon project completion. The project is now complete and the payback must be appropriated in future budgets.

Project Summary

Acct. Ref. # PW9726
 Title Otto Drive/I-5 Interchange
 Department Streets

Project Description				Justification						
This project will construct a new interchange on Interstate 5 at Otto Drive. The project will also construct northbound and southbound auxiliary lanes from Otto Drive to Hammer Lane. Funds have been advanced for preliminary design of this future interchange. Full design and right of way acquisition is anticipated to cost \$16.1M; construction period is beyond the 5-year CIP window and is anticipated to cost \$85.7M.				This project is associated with the I-5 Widening project and is needed to accommodate the growth in traffic due to the build-out of northwest Stockton per the General Plan. This project will also provide traffic relief at the existing Hammer Lane/I-5 Interchange by directing traffic to this new interchange.

Title	Pavement Management System (PMS) Survey
Department	Streets

Project Description				Justification					
The Pavement Management System (PMS) survey consists of field pavement inspection and updating of database records and decision queries. This survey is scheduled and budgeted to take place over a five-year span. Unfunded FY 2016 is budgeted to provide roadway survey for approximately 400 miles, with following years each budgeted for approximately 200 miles.				The Pavement Management System (PMS) survey database is used to evaluate the pavement condition of the City's street network. It is also used to prioritize the maintenance strategies to extend the service life of the streets. Regular re-evaluation of street conditions for the entire network ensures accuracy of the data. An updated PMS is required for City to be eligible to receive federal-aid funding for street resurfacing projects.

Project Summary

Acct. Ref. #	PW1316
Title	Pedestrian Bridge over Calaveras River
Department	Streets

Project Description				Justification					
This project will provide funding to rehabilitate the pedestrian bridge over the Calaveras River east of West Lane. The project includes reinforcing the bridge abutments and rehabilitating the hand rails. Design of this project is currently underway.				Bridge inspections have determined that the north concrete abutment and hand rails are exhibiting distress. Girder connections need reinforcing and concrete is spalling at the abutment. Hand rail painting is deteriorated and hand rail connections need reinforcing. Further deterioration will eventually require closure of the bridge.

Project Summary

Acct. Ref. #	PW1311
Title	Pershing Avenue Corridor Adaptive Traffic Control
Department	Streets

Project Description				Justification					
This inter-jurisdictional project with the County will deploy an adaptive traffic control system along a 4.9 mile segment of Pershing Avenue to improve traffic operations, safety, and the effective capacity of the corridor. The project includes upgrading controllers and traffic signal cabinets, installing a Emergency Vehicle Preemption (EVP) system, and establishing system communication with the central computer via Ethernet-over-fiber at 16 signalized intersections along the corridor between Fremont Street and Hammer Lane. Design of this project is currently underway.				Pershing Avenue is a congested facility with 30,600 vehicles per day. This facility is also a major truck route between Fremont Street and Harding Way. It has three congested peak hours; AM, Mid-day, and PM. The free flow speed is below the posted speed limit when congested. The project is funded completely by Congestion Mitigation and Air Quality (CMAQ) Grants and the San Joaquin Valley Air Pollution Control District (SJVAPCD) Public Benefit Grant.

Project Summary

Acct. Ref. #	0000
Title	Pershing Avenue Roadway Crown Reduction
Department	Streets

Project Description				Justification					
Project reduces the existing crowning at intersections along southbound Pershing Avenue between Princeton Avenue and Elmwood Avenue. Included with the crown reduction is base repair where needed, pavement grinding and paving, and installation of ADA compliant ramps and sidewalks.				Pershing Avenue is one of the major north-south arterials in the City of Stockton. High roadway crowns due to multiple pavement overlays have created humps, "crowning", at all side street intersections between Princeton Ave and Elmwood Ave in the southbound right lane. This existing crowning causes vehicles to bottom out and scrape the pavement.

Project Summary

Acct. Ref. #	PW1420
Title	Rectangular Rapid Flashing Beacons HSIP Cycle 6
Department	Streets

Project Description				Justification					
This project will install Rectangular Rapid Flashing Beacons, upgrade existing crosswalk signs/crosswalks and frontage improvements at uncontrolled locations on various local, collector and arterial roadways to increase pedestrian and bicyclist safety. The safety improvement locations are AG Spanos Blvd @ Banyon Dr (Julia Morgan Elem), Center St @ First St (Edison HS), Eighth St @ Phelps St, Estate Dr (Creekside Elem), Flora St @ Watts Av (Fremont Elem), Harding Wy @ Commerce St, Lever Blvd @ Kansas St (Marshall Taylor Elem), Lincoln St @ Rose St (Annunciation), Mendocino Av @ Manchester Av (UOP), Pacific Av @ Monterey Av, Pacific Av @ Regents Ct, Tenth St @ Tiffany St (Van Buren Elem), Thornton Rd @ Waudman Av and Weber Av @ Commerce St.				Safety improvements have been identified at 15 existing uncontrolled crosswalks to reduce pedestrian and bicyclist collisions. There were a total of 27 pedestrian and bicyclist collisions at these intersections within a 5 year period which included 2 fatalities. 90% of the project cost is funded by the Highway Safety Improvement Program.

Title	Residential Development Street Trees & Signs
Department	Streets

Project Description				Justification					
This project includes installation of street trees and intersection street name signs within new residential developments.				Public Facility Fees are collected specifically for residential street trees and street name signs when properties are developed into residential subdivisions. These fees are collected so that the City may furnish and install the trees and signage concurrently with the construction of the residential development.

Project Summary

Acct. Ref. #	PW1421
Title	Responsive Traffic Signal Control on El Dorado
Department	Streets

Project Description				Justification					
This project will deploy a traffic responsive control system at 8 intersections along El Dorado Street (at Duncan, Swain, Robinhood, Yokuts, March, Churchill, Fulton and Alpine). Improvements include signal coordination, upgrade signal heads for visibility, installing additional detections for the system and to convert semi-actuated traffic signals to fully-actuated signals at Duncan and Churchill.				Staff identified intersections with the highest collision rate (over a recent 3-year period) and two of the intersections on the El Dorado Street corridor ranked in the top 30. The proposed project is a 2.5-mile-segment of El Dorado Street with 4 travel lanes. The most recent 5-year period (6/1/08-5/31/13) indicates that there have been a total of 227 collisions along this segment of El Dorado. Improving traffic signal coordination and upgrading signal hardware are cost effective ways to improve traffic safety on El Dorado Street. 90% of the project cost is funded from the Highway Safety Improvement Program.

Title	Robinhood Drive & Claremont Avenue Bike Lane
Department	Streets

Project Description				Justification					
This project includes installing bike lanes on Claremont Avenue and Robinhood Drive. On Claremont Avenue, bike lanes will be installed between Bianchi Road and Robinhood Drive; on Robinhood Drive bike lanes will be installed between El Dorado Street and Pershing Avenue. This project also includes converting Robinhood Drive from a four-lane undivided roadway to a two-lane road with center left-turn lane; on street parking would not be affected. A component of this project is the installation of bike detection at the following intersections: Pacific Avenue, Pershing Avenue, March Lane, and Yokuts Avenue.				This project is to better serve all modes of transportation, including bicycles. This project will provide desired improvement in traffic flow, reduced vehicle speeds and collisions. This project will provide safer connectivity to nearby San Joaquin Delta College.

Project Summary

Acct. Ref. #	0000
Title	Roundabouts at Various Locations
Department	Streets

Project Description				Justification					
The project converts 4-way stop controlled intersections to roundabouts at the four following locations: Swain Road/Morgan Place; Hammertown Drive/Montauban Avenue; Lincoln Street/Eighth Street; and Davis Road/Chaparral Way. The project includes installing pan-tilt-zoom (PTZ) cameras and corresponding fiber optic cabling; reconstructing street corners to comply with latest Americans with Disabilities Act (ADA) Standards; striping; signage; and upgraded streetlighting.				The four intersections noted meet the warrants for signalization and are on the City's signal priority list. The locations are better suited for a roundabout than traffic signal. Installation of the roundabout will improve the Level of Service at these intersections and will provide traffic calming helping to lower motorist speeds. Roundabouts are less expensive to install than traffic signals, and do not require electrical maintenance, which will provide long term savings.

Project Summary

Acct. Ref. # 0000
 Title Rule 20A Streetlighting
 Department Streets

Project Description				Justification					
The project will install street lighting along streets when PG&E undergrounds their overhead utilities as part of the Rule 20A Program for the following street segments: Miner Avenue - Segment 1 (California Street to Aurora Street and Union Street to Wilson Way); Wilson Way - Segment 1 (Charter Way to Hazelton Avenue); Wilson Way - Segment 2 (Hazelton Avenue to Harding Way); and Miner Avenue - Segment 2 (Wilson Way to Eastern City Limits).				PG&E has funding through the Rule 20A program to underground overhead utilities. Once utilities are placed underground, PG&E removes their wood poles. In many cases, the City uses these wood poles for street lighting. Project funding is to replace/upgrade the street lighting to current City standards following removal of the wood poles.

Title	San Joaquin Trail Improvements
Department	Streets

Project Description				Justification					
This project will install a new pedestrian walkway, pedestrian amenities, bicycle racks, benches, par course exercise equipment, irrigation landscaping, including trees, shrubs, groundcover, and irrigation system along the existing public greenbelt in Weston Ranch.				This project will encourage the use of the existing public greenbelt. The proposed improvements will increase safety, neighborhood livability, and the usefulness of an underutilized pedestrian and bicycle trail that connects residential areas with commercial, health and retail businesses and provides a safe route to four schools.

Project Summary

Acct. Ref. #	PW9969
Title	Sidewalks, Curbs, Gutters Repair Program
Department	Streets

Project Description				Justification					
This project includes installation of curb ramps on street corners, and repair of curb, gutter and sidewalk damaged by City tree roots throughout various locations citywide. FY 2014/15 funding allows for installation of approximately 30 wheelchair ramps and 3,000 SF of curb, gutter and sidewalk repairs. Future unfunded years represent an identified backlog of 170 curb ramp installations and 260,000 SF of curb, gutter and sidewalk repairs.				The City receives requests from citizens to install curb ramps to allow or improve access between sidewalks and streets in accordance with ADA requirements. Additionally, the City receives requests for curb, gutter and sidewalk repairs at locations damaged by City owned tree roots. Per SMC 12.04.040, the City assumes responsibility of these types of repair.

Title Sperry Road Extension
Department Streets

Project Description			Justification		
Project construction was completed in 2013. The project included construction of 5,300 lineal feet of a four-lane elevated roadway, including five bridge structures. The roadway extends from Performance Drive to French Camp Road, just east of Interstate 5.			This appropriation is for a loan payback to the San Joaquin Council of Governments due in Fiscal Year 2014/15, pursuant to a cooperative agreement for the project. Funds were advanced to supplement the project's construction funding.

Project Summary

Acct. Ref. #	PW1429
Title	Street Resurfacing on Federal-Aid Streets FY
Department	Streets

Project Description				Justification						
Annual resurfacing of various Federal-Aid Urban (FAU) streets using either thin asphalt concrete overlay, Cape-seal, micro-surfacing or slurry-sealing. Project includes; base failure repairs, 2" to 3" of pavement grinding, pavement re-striping, raising of existing utilities to final pavement elevation; installation of traffic loops and detector handholes; installation and reconstruction of curb, gutter, sidewalk and ADA curb-ramps. For FY 2014-15, the project streets include: El Dorado Street (March Lane to Robinhood Drive); Hammer Lane (West Lane to 400 feet east of Loraine Avenue); and West Lane (Swain Road to Fulton Avenue).				Resurfacing of existing street pavement is necessary for the safety of motorists and to prolong the service life of the City's roadways. As per Americans with Disabilities Act, all pedestrian facilities on resurfaced streets must be made accessible to accommodate all users, requiring new curb-ramps to be installed where none exist. The federal funding for this project requires the use of local funds, matching no less than 11.47% of the eligible project cost.

Project Summary

Acct. Ref. # PW1428
Title Thornton Road Widening
Department Streets

Project Description				Justification					
This project will widen Thornton Road between Bear Creek and Pershing Avenue to six lanes, providing a center turn lane. Improvements will consist of pavement widening, construction of storm drainage facilities, construction of curb, gutter and sidewalk, installation of streetlights, modification of traffic signals, modification of existing utilities, and installation of traffic signing and striping.				The majority of Thornton Road between Bear Creek and Pershing Avenue is 2 lanes wide. The capacity is insufficient resulting in significant congestion. This project will make the necessary street improvements as defined by Stockton Street Improvement Plans (SSIP) which were approved by Council in 1994.					
Project Forecast				Project Detailed 2015					
Year	Total Expense	Total Revenue	Difference						
2015	15,841,000	15,841,000	0						
	15,841,000	15,841,000	0						

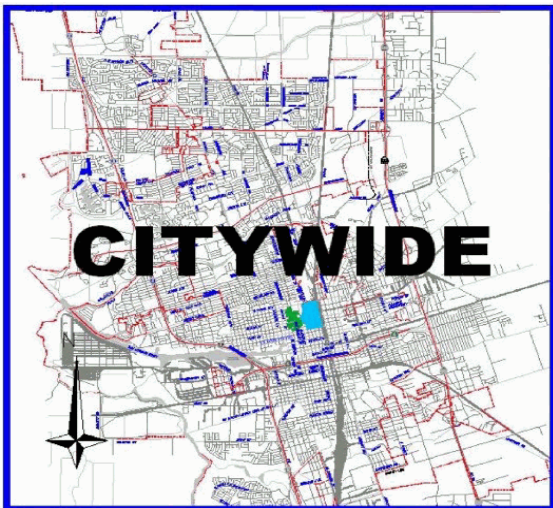

Project Summary

Acct. Ref. #	PW9906
Title	Traffic Signal Control System
Department	Streets

Project Description				Justification					
This project for FY 2014/15 will expand the fiber optic network to three traffic signals along Holman Road: Delfina Way, Gary Galli Drive, and Hendrix Drive. This project will also upgrade the video monitoring wall in the Traffic Management Center (TMC). Project in the future years will further expand the network.				A fiber optic trunk cable has been installed along the median on Holman Road. Connections from this trunk cable to nearby signal cabinets at Delfina Way, Gary Galli Drive and Hendrix Drive are necessary to allow for remote traffic monitoring and control. The City has an extensive fiber optic network which provides communication to traffic signals, CCTV cameras, and between City facilities (i.e., Corp Yard, MUD, fire stations, TMC). The network allows staff to view up to 16 locations at a time from the TMC; however the video wall in the TMC was built with year 2005 technology and replacement parts are no longer available.					
Project Forecast				Project Detailed 2015

	2,434,000	2,434,000	0						

Project Summary

Acct. Ref. #	PW1422
Title	Traffic Signal Head Retrofit
Department	Streets

Project Description				Justification					
This project includes retrofitting existing traffic signal heads with 8-inch diameter lenses, with larger 12-inch diameter lenses at 29 various intersections citywide.				Staff evaluated over 170 signalized intersections throughout the City, and selected 29 locations which had the highest number of injury collisions. The 29 intersections had a total of 10 severe-injury, 58 injury-other visible, 163 injury-complaint-of-pain, and 217 property-damage-only (PDO) collisions during the most recent 5-year period (6/1/08 to 5/31/13). This project will improve the visibility of the signal indications, and help reduce the amount of red light violations and collisions. 90% of the project cost is funded through the Highway Safety Improvement Program (HSIP); accompanied by the required 10% local fund match.

Project Summary

Acct. Ref. #	PW1423
Title	Traffic Signal Mast Arm Retrofit and Installation
Department	Streets

Project Description				Justification							
This project is both a retrofit of existing mast arms and installation of new mast arms. The retrofit will replace existing mast arms at signalized intersections with mast arms with longer spans. The four locations identified for retrofit are as follows: Kelley Drive (Southbound) at Hammer Lane; and Martin Luther King Jr. Boulevard (Westbound and Eastbound) at both San Joaquin Street and California Street. New mast arms will be installed at the following three locations: San Joaquin Street (Northbound and Southbound); Grant Street (Southbound); and California Street (Northbound and Southbound). This project also includes upgrading traffic signal equipment and curb ramps to current standards at the intersections.				Staff identified intersections with the highest collision rate and these intersections ranked in the top 18. Signal head visibility will be substantially improved with the installation of the mast arm poles and pole mounted 12" heads. 90% of the project cost are funded through the Highway Safety Improvement Program (HSIP); the remaining project cost will be provided by the required 10% local match.

Project Summary

Acct. Ref. #	PW9934
Title	Traffic Signal Modifications
Department	Streets

Project Description				Justification					
This is a multi-year project to modify signals. Project includes installing larger signal heads, new mast arms, audible signals, countdown pedestrian heads, signal and service cabinets, wheelchair ramps, new sidewalk, and median reconstruction. Improvements include the intersection of Pacific Avenue/Douglas Road in FY2015; four intersections in FY2016; two intersections in FY2017; and two intersections in FY2018. Other locations will be identified and prioritized in future CIP projects as there is backlog of intersections that need to be improved to meet current standards.				This project addresses traffic safety needs that are identified by analysis of motor vehicle accident records, and review of traffic signal conditions. This project will reduce collision rates.

Project Summary

Acct. Ref. #	PW9933
Title	Traffic Signal New Installations
Department	Streets

Project Description				Justification					
The Citywide Traffic Signal Priority Study in 2008 identified the following intersections as a high priority for installation of traffic signals based on state and federal standards: Alpine Avenue/Alvarado Street, and Hazelton Avenue/Stanslaus Street. The project will install signals at these intersections.				Traffic Signals are needed at these intersections to enhance vehicle and pedestrian safety and improve traffic flow throughout the City based on the 2008 Citywide Traffic Signal priority Study. The identified intersections meet established warrants to justify installing traffic signals.

 Title Water Field Office Remodel - 427
 Department Water

Project Description				Justification					
This project provides for the remodel of the Water Field Office, located in north Stockton. Programmed funding includes upgrades to restroom facilities, locker rooms, construction of shop facilities, and material storage bins.				The current facility is over 40-years old and is undersized for current staffing levels. Additional shop and material storage areas are needed to support current maintenance activities of the water supply and distribution system.

Title Water Supply - New Wells 424
Department Water

Project Description <p>This ongoing project provides for the drilling and equipping of new wells. For Fiscal Year 2018-2019, Well No. 33 (south of Bear Creek and east of Homan Road) will be equipped and placed into production.</p>				Justification <p>This project is required to provide for the water needs of new customers being added to the City's water systems, and increase the reliability and sustainability of the water supply to existing customers. This project is consistent with the Water Master Plan that advocates the construction of additional wells to permit the conjunctive use of groundwater and treated surface water.</p>

 Department Water

Project Description		Justification							
This project designs and constructs water tanks to provide for adequate system pressures, fire flows and emergency water storage. For Fiscal Year 2017-2018, improvements include the design and construction of the Northeast Reservoir No. 1 and Pump Station.		This project is needed to improve water system reliability, capacity, working pressures, fire flow, emergency storage, and water quality.

Project Summary

Acct. Ref. # 7601
 Title Water System Expansion -427
 Department Water

Project Description				Justification					
This project installs water mains and upgrades to the existing system to improve water system delivery and to complete water loops to add reliability. Fiscal Year 2014-2015 includes the construction of the Feather River Drive at Fourteen Mile Slough Water Main Crossing.				These projects are needed to improve system reliability, capacity, working pressure, fire flows, and water quality.

Title	Well/Reservoir/Detention Basin Site Improvements
Department	Water

Project Description				Justification					
This ongoing project provides for improvements to existing wells and reservoirs to meet risk management objectives as prescribed by the State Office of Emergency Services. This project includes perimeter fencing at a reservoir site in Fiscal Year 2015-2016 and demolition of an elevated water storage tank at Walnut Plant in Fiscal Year 2014-2015.				State requires risk reduction plans to improve security of the facilities and maintain facilities in operating conditions.

Title	Citywide Arterial Roadway - LED Street Lights
Department	City-Wide

Project Description				Justification						
This project includes converting existing arterial roadway street light luminaires from 200-watt high pressure sodium (HPS) to light-emitting diode (LED).				The existing arterial roadway street light inventory will be converted to LED luminaires to provide long term enery cost savings and reduce maintenance. This project will also help meet intended Green House Gas and sustainable communities strategy goals as outlined in AB 32 and SB 375 legislations.
