YCUA Conducting Cross Connection Residential Surveys This Summer

In accordance with the requirements set forth by the Michigan Department of Environment, Great Lakes, and Energy (EGLE), the Ypsilanti Community Utilities Authority (YCUA) water department has implemented the State of Michigan Cross Connection control rules to protect the YCUA water system from cross connections.

“Cross Connection” is defined as a connection or arrangement of piping or appurtenances through which a backflow could occur. “Backflow” means water of questionable quality, waste, or other contaminants entering a public water supply system due to a reversal of flow.

YCUA will be conducting exterior surveys in the listed residential areas to protect the water supply for all citizens. For more information, go to www.ycua.org or call 734-484-4600 ext. 311.
