

# **Public Notice**

---

December 9, 2022

As noted last week, Duke's Root Control, Inc. (Duke's), a contractor for the Ypsilanti Community Utilities Authority (YCUA) is working several neighborhoods performing maintenance on the sanitary sewer system. The work involves applying herbicide to the sanitary sewers to minimize the intrusion of tree roots into the pipes at the locations where building sewers from each residence connect to the main line. Work was originally planned to start December 5, 2022, and be completed by December 10, 2022. However, due to illnesses affecting Duke's personnel, the project started late and has not progressed as quickly as anticipated. Work is now expected to be complete by December 13, 2022.

We apologize for any inconvenience caused by the delay and thank you for your patience. If you have any questions regarding this project please call YCUA at (734) 484-4600 and ask for Scott Westover, Engineering Manager at extension 220 or via electronic mail at [swestover@ycua.org](mailto:swestover@ycua.org).
