

Public Notice

July 17, 2023

As part of the ongoing dedication to provide top quality, cost effective, and environmentally safe water and wastewater services to our customers, YCUA's improvements to both existing water and wastewater utilities within the M-17 and US-12 corridors in the City of Ypsilanti is now substantially complete. With the underground construction essentially done, replacement of the curbs and pavement surfaces disturbed during the pipe work is underway. Michigan Avenue and those portions of the connecting side streets will be restored first and, weather permitting, should be completed within the next several weeks. Areas disturbed by the pipe work in the alleyways and parking lots north and south of Michigan Avenue will then be restored with that work anticipated to be complete by Labor Day.

Similar to the earlier phases of the project, the Michigan Department of Transportation (MDOT) will follow YCUA's construction into the Michigan Avenue corridor.

Every effort was made to minimize disruptions caused by the water and wastewater system improvements, all construction work invariably results in some inconveniences. Although there were a couple unplanned, emergency service disruptions and related adverse effects, there were much less of these types of events than expected. YCUA recognizes the stress the project put on the businesses and residents in the vicinity and sincerely thanks everyone for their patience and understanding as these important improvements were successfully completed.

The improvements were constructed for YCUA by DiPonio Contracting, Inc. (DiPonio), of Shelby Township, Michigan. OHM Advisors, Inc., of Livonia, Michigan administered the construction contract and provided full-time, on-site observation of the work by DiPonio on behalf of YCUA. If you have any questions regarding this project please call YCUA at (734) 484-4600 and ask for Scott Westover, Engineering Manager, at extension 220 or via electronic mail at swestover@ycua.org.
