Shadford Tower Project

As part of the ongoing dedication to provide top quality, cost effective, and environmentally safe water and wastewater services to our customers, YCUA continues to make improvements to both existing water and wastewater utilities within the City of Ypsilanti and the Township of Ypsilanti.

After a temporary pause, construction activities at YCUA's Shadford Tower, which started in fall of 2023, including the surface sandblast and painting of the tower, are set to recommence on April 1st. This project will enhance the structural integrity and visual appeal of Shadford Tower. Local residents can anticipate swift progress to this essential infrastructure, further solidifying our community's access to safe and reliable drinking water.

If you have any questions regarding this project please contact:

Sean Knapp, Director of Service Operations
